Amateur Radio Newsline(tm) Report 1690 - January 1, 2010

Amateur Radio Newsline report number 1690 with a release date of
Friday, January 1, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. A congressman wants every hertz of spectrum
cataloged for possible transfer to wireless broadband, the mayor of San
Francisco wants warning labels on cellphones, MARS gets a new mission
and the story on the record. Find out what we mean when we say on the
record on Amateur Radio Newsline(tm) report number 1690 coming your way
right now.

RESTRUCTURING: WIRELESS BROADBAND WANTS MORE SPEXCTRUM FTOM ANYONE

As we enter the second decade of the 21st century, wireless devices are
transforming the way the world access the internet and even how people
interact with one another in every day life. But these devices also
chew up a lot of radio spectrum. Now wireless providers fear they are
in danger of running out of bandspace to expand current services and
introduce new ones. They want more frequencies and this could put
every radio service in a firefight to save their allocations and this
could include ham radio. We have more in this report from Norm Seeley,
KI7UP:

--

It's a well known fact that as mobile and hand-held wireless devices
become
more sophisticated, they transmit and receive more data over the
airwaves. But the radio spectrum is finite and cellphones, texting devices
and the like are only allotted a specific number of megahertz in which to
operate.

Now, with demand for broadband wireless growing at a rapid pace, the giant
telecommunications corporations say they need a lot more bandspace. At
least 800 Megahertz more of dedicated spectrum to start and the government
from the White House on down seems to agree that this is a need that must
be quickly met.

And where will this spectrum come from? That's exactly what one elected
official says that Congress needs to determine and do so right
now. Democratic Representative Rick Boucher of Virginia is sponsoring a

bill that would mandate a government inventory of all of the airwaves. This to identify unused or underused bands that could be quickly reallocated for wireless services.

Boucher who is the chairman of the House Commerce Subcommittee on Communications, Technology and the Internet says that it is not a question of whether we can find more spectrum. Rather he says that we have to find more spectrum.

Because of this need, wireless companies are eyeing some frequencies used by TV broadcasters, satellite telephone communications companies and even federal agencies including the Pentagon. But several key wireless experts note, any reallocation of spectrum from current users to wireless broadband won't happen without a fight.

Broadcasters in particular have become very vocal of late in telling government regulators that any attempt to usurp spectrum used by that industry will be met with resistance. You can read that as likely a long and drawn court battle that could drag on for years.

Other potential sources of frequencies are federal agencies that handle everything from emergency communications to surveillance operations. But agencies such as the Defense Department say that it needs spectrum for such mission critical equipment as precision-guided weapons, advanced Radar systems and drone aircraft. And while the government has vacated some frequencies and is committed to finding compromises that work for the government and commercial sector, it can only do this if it does not jeopardize military capabilities or national security.

So why should all this concern ham radio? If you confine your operations to the High Frequency bands or even 6 or 2 meters its not likely that any proposed reallocation of spectrum would affect you. None of these bands are very appealing to wireless service providers.

Its when you get to 200 MHz and above that the hunt will likely be focused and right there lies the relatively silent 222 to 225 MHz allocation. Above that is the 70 centimeter ham radio allocation which is secondary to the Federal Government. If the government were to decide to move completely out of 70 centimeters it could put a lot of weak signal operators and repeaters in a fight to keep the spectrum on which they now reside.

But likely the real losses would be up in the microwave range where hams hold a lot of spectrum that to date is used mainly by experimenters. And a lot of it sits adjacent to bands used by other services that might eventually be pushed by government decree into moving elsewhere or simply told to disband to make way for more wireless broadband services.

For amateur radio as an FCC licensed communications service this means being vigilant about attempts at reallocations that might include any bands that we use. It also means making certain that our ham radio political leaders are aware that every hertz from DC to light will be under scrutiny by both the wireless broadband industry and the government in the coming

months and years.

As Karl Nebbia, who is the head of the National Telecommunications and Information Agency's Office of Spectrum Management points out: "For now, one thing everyone agrees is that there are no easy pickings in the airwaves."

And for the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, reporting from Scottsdale, Arizona.

--

In reality, the real worry to amateur radio spectrum below 70 centimeters is not from direct reallocation of ham bands to wireless broadband. If spectrum is lost between 6 meters and 70 centimeters its will more likely be because those services now using 1.2 GHz and above will need to find new homes. Where will that spectrum come from? Likely from the lowest priority users the FCC can find. Namely hams at 222 Mhz or even as low as 144 MHz and above. (Amateur Radio Newsline(tm) and VHF Reflector from various published reports.)

**

RADIO POLITICS VS. TECHNOLOGY: SAN FRANCISCO MAYOR WANTS RADIATION WARNING NOTICES ON CELLPHONES

Meantime, the debate on whether cell phones should come with warning labels saying they may cause brain cancer is heating up in ultra-liberal San Francisco, California. That's where Mayor Gavin Newsom has made it known that he wants such labels even though it will likely put that city at odds with the Federal Communications Commission and the politically powerful cellular telephone phone industry.

The San Francisco mayor is calling for cell phone boxes to carry warning labels mush like cigarette packs. These would contain with what's called the radiation absorption rate on humans for each model telephone being merchandised in that city. This is the amount of energy that a person might be exposed to by using a cellphone or similar device.

According to news reports, cellular telephone radiation is a growing concern among politicians from coast-to-coast. A Maine state legislator named Andrea Boland is sponsoring similar legislation that would be state wide.

But the FCC says all cell phones sold in the United States are safe. And even the prestigious American Cancer Society is on record as saying cell phones are unlikely to cause cancer.

Cellular telephones only came into widespread use in the mid to late 1990's. Many researchers say it could be years if not decades before the long term studies on these devices and any relation to them being a cause of any form of cancer is complete. (SF OnLine)

**

PROPAGATION: ASTRONOMERS SAY 2009 WAS A BETTER YEAR FOR SUNSPOTS THAN 2008

According to several scientific journals, 2009 will fall short of 2008 's record of days with no sunspots or other solar activity. Astronomers note that the solar surface continues see occasional sunspots as we conclude a very active December 2009. This they say insures that 2009 will fall several days short of the 266 blank days of 2008 which was the year with the greatest count of sunspot free days since 1913.

The astronomical community says that the overall solar flux continues to gradually trend upward and there's every reason to believe the year 2010 will not dip below the low sunspot counts of the past three years. This they say is based on the actual trends since September and not only forecast data. They say that sunspot groups over the past three months have emitted more flares of greater intensity than at any other time in solar cycle 24. They believe that this is further evidence that the solar disc is awakening from its extended sunspot sleep. What the researchers cannot or won't promise is better High Frequency DX conditions which usually accompanies increased solar activity. (Science OnLine)

WITH NEWSLINE: ARNEWSLINE BOD MEETING JANUARY 10

Amateur Radio Newsline will be holding its annual Board of Directors Meeting by teleconference on Sunday, January 10th and we are looking for listener and reader input on how we can improve the weekly newscast and the Newsline sponsored Young Ham of the Year Award. If you have suggestions please e-mail them to us at Newsline at ARNewsline dot org before January 3rd. This will give us time to look your ideas over for possible discussion in the meeting agenda. Again the meeting is Sunday, January 10th and we sincerely welcome your ideas. (ARNewsline(tm))

**

RESCUE RADIO: MARS GETS A NEW MISSION

The former Military Affiliate Radio System has been re-christened as the Military Auxiliary Radio System and has been charged with a new mission in the area of Homeland Security. Bruce Tennant, K6PZW, has the details:

--

Yes, MARS does have a new mission. On Wednesday, December 23, the Department of Defense issued an official instruction concerning MARS that is effective immediately. This Instruction gives the three MARS services

-- Army, Air Force and Navy/Marine Corps a new focus and their first major revision since January 26, 1988.

In the past, MARS had focused primarily on emergency communications and health and welfare support. The DoD's Instruction now directs the three MARS services to provide contingency radio communications to support US government operations, Department of Defense components and civil authorities at all levels. This in providing for national security and emergency preparedness events.

MARS units will still continue to provide health and welfare communications support to military members, civilian employees and other designated groups when in remote or isolated areas, in contingencies or whenever appropriate. However, MARS must also be capable of operation in radio only modes without telephone service or access to the Interne. Also, it must be sustainable on emergency power when public utility power has failed. Also, some MARS stations must be transportable for timely deployment. Unfortunately, the Instruction does not mention or direct which of the three MARS services will take the lead when responding to events.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The Department of Defense defines a "military auxiliary" as "an organized body of volunteers prepared to supplement the uniformed services or any designated civilian authorities by provision of specialized autonomous services when called upon or when situations warrant. It gives the Civil Air Patrol and Coast Guard Auxiliary as examples of auxiliaries. A more in depth article on this changes to MARS is at the ARRL's website at www.arrl.org. (KA5S, ARRL, others)

**

HAM RADIO IN SPACE: KIDS DAY ON THE GROUND AND ON AO-51

The first of two 2010 Kids Day operating events takes place on Sunday, January the 3rd and this year it will be in space as well as on the ground. This is because AMSAT North America and the AMSAT Oscar 51 Operations Group will be making that ham-sat available for this twice year fun operation.

The terrestrial version of Kids Day takes place from 1800 to 2400 UTC. The ARRL suggests using the following frequencies for Kids Day QSO's: 28.350 to 28.400 MHz, 24.960 to 24.980 MHz, 21.360 to 21.400 MHz, 18.140 to 18.145 MHz, 14.270 to 14.300 MHz, 7.270 to 7.290 MHz, 3.740 to 3.940 MHz, as well as your favorite 2-meter repeater with permission of the repeater's sponsor. In space, AMSAT has announced that its AO-51 satellite will be configured with its uplink at 145.880 MHz FM voice and the Downlink at 435.300 MHz, also FM voice. In either case, please be sure to observe third-party restrictions when making DX QSO's.

The Kids Day operating event is not a contest. It's a way to tell children
worldwide about the magic and mystery of two way hobby radio communications. To do this, Amateur radio stations are being asked to devote this short time window to promote the terrestrial hobby and ham radio satellite operations to youngsters This, by providing a place to make contacts with other Kids Day stations around the world.

More information is on-line at www.arrl.org. To find it just use the search feature with the words Kids Day. (AMSAT NA, ARRL, others)

OPERATING AWARDS: THE NORTH SCOTLAND YAESU HERITAHE AWARD

2010 has been named Yaesu Heritage Year by the North Scotland Contest Group as they take to the air with the special event callsign GS2MP. Operators GM3WOJ and GM0NAI will be using their vintage Yaesu transmitters, receivers and transceivers during the whole year and sporting a different Yaesu built radio each.

Operation will mostly be on 40 and 20 meters, SSB and CW, using classic radios like the FT-dx-100 , FT-200 and FT-dx-401 to name only a few. Yaesu UK Ltd. is sponsoring the event and supplying special QSL cards, small trophies and a special prize to the overall winner. Hams worldwide are invited to work GS2MP and earn points towards the Yaesu Heritage Year Award.

For more details, please visit www.gm7v.com/yaesu2010.htmb on the World Wide Web. (Southgate)

**

RADIO EDUCATION: RADIO SOCIETY IN WALES RECEIVES TRAINING GRANT

The Welsh Aberdare and District Amateur Radio Society has been presented a ï¿½5,000 (pound) grant from the Awards for All Wales fund. The cash will be used by the group to provide training facilities, materials, equipment and projects for students wishing to undertake a course leading to a Radio Communications Foundation, Intermediate or Advanced accredited examination.

The society was formed in March 2009 and has around 20 members. It has already helped five people whose ages ranged from 14 to 65 through the Foundation License and there are currently two more students preparing for their examinations. The group has also obtained two recognized tutors for all levels of the amateur radio license preparation and has been designated as an official examination center. A spokesman says that some money will be spent on equipment to upgrade the existing station to add new or
190-wales
additional modes. (WalesOnline)

HAM RADIO SCOUTING: A SUMMER QRP SCOUTING TREK DOWN UNDER

And while it may be cold and wintry in the Northern Hemisphere, down under its summertime and some Scouts in Australia have decided to take a hike and bring ham radio with them. Not only that, these scouts want to make contact with you. Jim Linton, VK3PC, of the WIA News has the rest of the story:

--

Four members of the Scout Australia, Victorian Branch Scout Radio and Electronics Service Unit will be hiking the French Island National Park southeast of Melbourne and operate the scout callsign VK3SAT for the Keith Roget Memorial National Parks Award.

Peter Fraser VK3ZPF, Hayden McManus VK3FRST, Marcus Berglund VK3TST and Adam Scammell VK3YDF will be on air 0400 UTC on 9 January until 0100 UTC 10 January.

The bands proposed are 80m, 40m, and 20m using wire antennas strung in the low trees on the island. As the team has to carry everything in backpacks to the camping ground the transceivers are to operate a maximum of 15w PEP will be powered from small sealed lead acid batteries.

VK3SAT hopes to make many contacts and will be QRV as long as the battery power lasts. Details of the Keith Roget Memorial National Parks Award can be found on the Amateur Radio Victoria website in cyberspace at www.amateurradio.com.au

I'm Jim Linton VK3PC and you're listening to the Amateur Radio Newsline.

--

15 watts from backpack radios into makeshift antennas in the Australian wilderness is going to make this one a hard contact to snare no matter where in the world you may live. (WIA News)

**

HAM RADIO ON THE WEB: HAMTUBE.COM WEBSITE FOR SALE

The popular hamradiotube.com website is up for sale. According to an announcement on the website by its owner Donald Dubuque, W4DJD, operating costs coupled with a lack of donations from the viewing public have lead him to make the decision to divest himself of the site.

To quote Dubuque's website posting: "These types of sites don't run cheap. It takes money to keep the bandwidth and storage that videos require."

Hamradiotube.com is an amateur radio only version of the YouTube.com web operation. W4DJD says that he enjoys running the site and that he is sad to let it go. If you have the financial means to take it over, please contact W4DJD at his callbook address. (Southgate, HamradioTube)

**

NAMES IN THE NEWS: WHITE HOUSE NAMES W7HAS AS NEW CYBERSECURITY COORDINATOR

Some names in the news. The White House has named Professor Howard A. Schmidt, W7HAS, of Issaquah, Washington as its new Cybersecurity Coordinator.

A long time public servant, Schmidt became interested in computer forensics as a police officer. He started working with the Air Force in the early 1990's when he was called upon to assist the Office of Special Investigations to assist in countering hackers trying to penetrate Department of Defense systems.

In addition to his work with the Air Force, W7HAS served as an information security advisor to the government for more than 30 years working for the FBI and the Bush administration after the September 11, 2001 terror attacks on U-S soil. He left the public sector in 2003 to join eBay. Schmidt was also the first chief security officer at Microsoft and a co-founder of the company's Trustworthy Computing initiative.

Howard Schmidt holds a bachelor's degree in business administration and a master's degree in organizational management from the University of Phoenix. He also holds an Honorary Doctorate degree in Humane Letters. In addition to amateur radio, he is an avid Harley Davidson rider, private pilot, fisherman and outdoorsman.

In his new position he will have regular access to the President and serve as a key member of his National Security Staff. He will also work closely with the President's economic team to ensure that cybersecurity efforts keep the United States both secure and prosperous. (Published news reports)

**

NAMES IN THE NEWS: CANADIAN ARTIST WANTS TO PAINT COMMUNICATIONS IN SOUND

A Canadian artist who works primarily with sound and vision is inviting radio amateurs with good HF capabilities to take part in an audio art project on 20 meters. Kapwani Kiwanga, will transmit a message on 20 meters from Eindhoven, the Netherlands, to territories that have a historic link with Holland. These include such places as Surinam, Indonesia, and South Africa.

Participants in these countries will be asked to re-transmit the received message back to her in Eindhoven. Kiwanga will transmit it back to and so on and so on. This ping-pong effect will increasingly distort the message finally resulting in an abstract artistic sound recording.

Kiwanga says that she would like to get started on this project as soon as possible. If you would like to take part in it, please e-mail her to kiwangakap (at) hotmail (dot) com or call her on 0031 617 638 920. Also, please copy the South African Radio Leage News at armi@sarl.org.za which is following this rather interesting ham radio art creation come to be. (SARL)

THE CHANGING OF THE GUARD: EXPLORER KNUT HAUGLAND LA3KY - SK

The changing of the guard in Amateur Radio continues. This, with the sad news that Knut M. Haugland, LA3KY, the last surviving member of the crew that crossed the Pacific Ocean in 1947 on board the balsa wood raft the Kon Tiki has died at age 92.

Knut Haugland was a former Norwegian resistance fighter and explorer who was honored with Norway's Norways's highest decoration for military gallantry, the War Cross with sword, for helping prevent the German nuclear program from acquiring heavy water to make weapons during World War 2. Similar honors were also bestowed upon him by Great Britain and France.

After the war ended he joined the Kon Tiki ocean going raft expedition of Norwegian anthropologist Thor Heyerdahl, as one of its radio operators. The Kon-Tiki eventually sailed 4,900 miles from Peru to Polynesia in 101 days to prove Heyerdahl's theory that ancient mariners may
have migrated across ocean stretches.

According to Wikipedia, during the Kon Tiki Pacific crossing Haugland and fellow crew member Torstein Raaby were in frequent radio contact with American amateur operators. Much of the communications consisted of sending meteorological and hydrographic data to be passed on to the Meteorological Institute in Washington, DC.. Despite the tiny radio which had an output of only 6 watts they managed to contact radio operators in Norway, even sending a telegram to congratulate King Haakon VII on his 75th birthday. Haugland also played himself in the 1950 documentary film about the Kon-Tiki voyage.

The passing of LA3KY was announced by the director of the Kon-Tiki Museum who said that Haughland died in an Oslo hospital on Friday, December 25th. (KC5FM, N6BQD)

**

WITH NEWSLINE: ANDY JAREMA, N6TCQ MEMORIAL ON JANUARY 23rd

A memorial celebrating the life of former Amateur Radio Newsline treasurer Andy Jarema, N6TCQ, is slated for Saturday, January 23rd in Glendale, California. As regular listeners know, Andy passed away from multiple organ failure just before noon on Tuesday, November 24th. In keeping with Andy's wishes this memorial to be co-hosted by his sister Ann and his life companion Judy Hurst will be upbeat and a reflection of the way Andy lived his life. (ARNewsline(tm))

**

EMERGING TECHNOLOGY: NANOCOMPUTING

The new year brings with it some new advances in nano technology as we hear from Jim Davis, W2JKD:

--

EMERGING TECHNOLOGY: BIOELECTRIC ADVANCES TO INORIVE COMMUNICATIONS AND COMPUTING

Combining nanoelectric transistors with bioelectric machinery could soon lead to improved electronic, computing and communications products. So say researchers at the Lawrence Livermore National Laboratory where they have devised what they term as a versatile hybrid platform that uses lipid coated nanowires to build prototype bionanoelectronic apparatus.

While modern communication and data processing devices rely on electric fields and currents to carry the flow of information, biological systems are much more complex. They use an arsenal of membrane receptors, channels and pumps to control signal transduction. This the scientists claim is a system of internal signal flow unmatched by even the most powerful computers.

Human is cited as a primary example. The researchers note that conversion of sound waves into nerve impulses is a very complicated process, yet the human ear has no trouble performing it.

They add that the mingling biological components in electronic circuits could enhance biosensing and diagnostic tools, advance neural prosthetics such as cochlear implants, and could even increase the efficiency of future computers.

The research appeared in the online version of the Proceedings of the National Academy of Sciences and more recently in Science Daily. You can read it at http://www.sciencedaily.com/releases/2009/08/090811091834.htm

--

Truly a case where the smaller is the better for all of mankind. (Science Daily)

**
THE SOCIAL SCENE: 7th ANNUAL STRANGE DX CONVENTION APRIL 17

Only two items on the ham radio social calendar this week. The 7th International DX Convention organized by the Strange Radio Team will be held April 17th and 18th in Italy. The venue is Paestum near Salerno which is billed as a fantastic archeological area and tourist site. Access by air is through the Napoli Capodichino Airport. More information will soon be on-line at strangeradioteam.com/idxc (Strange Radio Team)

**

THE SOCIAL SCENE: EMCOMMWEST SEEKS SPEAKERS

The 2010 EMCOMMWEST ham radio convention to be held April 30th to May 2nd at the Grand Sierra Resort in Reno, Nevada, is looking for speakers.

EMCOMMWEST is an annual forum for radio amateurs to discuss the latest emergency communication techniques, learn what served agencies need and requirements are as well as learning about both the successes and failures from those directly involved in emergency communications work.

Because of this presentations should be in some way emergency communications related. If you would like to speak at this event, please send an e-mail to speakers@emcommwest.org. In return you will be sent a speakers application that allows potential speakers a place for a short description of your proposed talk as well as an opportunity for you to categorize it.

And less we forget. EMCOMMWEST is recognized by the ARRL as an Operating Specialty Convention. The event's website is www.emcommwest.org (KQ6FM)

**

HAM RADIO IN SPACE: ARIS MEETS TO DISCUSS HAM RADIO IN SPACE ISSUES

Tuesday, December 15th saw a meeting of the Amateur Radio on the International Space Station working group. Agenda items addressed included the VHF Automatic Identification System and the new ARISS antennas which were recently installed on the Columbus module. Also discussed at this gathering was the status of ARISSat-1 whose deployment has been delayed until later in 2010. This comes after , NASA informs AMSAT that the schedule of work for space walks or EVA's at the International Space Station is being revised. (ANS)

**

HAM RADIO IN SPACE: NEW CANADIAN ARISS WEB PAGE

And a new Canadian Web page has been developed to promote the Amateur Radio on the International Space Station or ARISS program. The page is sponsored by the Ottawa Valley Mobile Radio Club and is located in cyberspace www.ovmrc.on.ca. Just select "ARISS" at the bottom of the left hand side menu. (Press Release)

**

DX

In DX, word that DC0KK, is active until January 7th as from Sri Lanka as 4S7KKG. Operations are on all HF bands using CW, SSB, RTTY, PSK and WSJT. QSL via DC0KK, direct or by the Bureau.

W2APF will be traveling on board the ship 'National Geographic Explorer' heading to the Antarctica region between February 8th to March 5th. He is expected to be operating as W2APF/C6A/MM while on board the ship. In the Antarctic territories he will be signing W2APF/KC4 and VP8DML while in the territory of the Falkland Islands. QSL all of this activity via W2APF.

N6QEK will be active portable VY1 from Whitehorse, Yukon Territory through January 4th. Listen out for him on all bands between 80 through 10 meters using RTTY, PSK31 and SSB. His main goal is to activate the Yukon Territory for the ARRL RTTY Roundup Contest on January 2nd and 3rd. QSL direct to his home call or via Global QSL.

Lastly, looking ahead to next spring, the Midwest 6 Meter DX Group will operate stroke J 8 on 6 meters from Bequia Island between June 28th and July 5th. QSL via KB3RHR.

(Above from various DX news sources)

**

THAT FINAL ITEM: HOW RECORDS WERE MADE

And finally this week, have you ever wonder how records were made. We are talking records as in phonograph not computer files. Amateur Radio Newsline Bill Pasternak, WA6ITF, knows because he has seen the movie:

--

Running almost 24 minutes, the movie is called "The Sound and the Story." And it is the story of the record industry as told back in 1956 by RCA when it was one of the worlds biggest producers of phonograph records, record players and associated products.

"The Sound and the Story" follows the process of making a 33-1/3 RPM "Long Play" or "LP" record, from original recording to first its play on a consumer record player. The movie begins with a lesson in early recording technology including the mastering on an early Ampex tape machine that's fed by a crude by today's standards recording console used back then. It in turn is fed by a number of RCA ribbon microphones of the type we have all seen at radio museums or for sale on-line on eBay. The show also touches on practices such as multiple takes and terms such as dynamic range, though with little explanation of what any of this means.

The exacting and surprisingly complex methods used in crafting the record "master" and the process of stamping the platters are illustrated in great detailed. Additionally there is an explanation of the distribution system that was used at RCA's Indianapolis plant, which also supplied the roots of the RCA Music Service and other similar operations. These operations -- as we all know -- are now just memories of an era gone by.

"The Sound and the Story" clearly was aimed at the general audience with viewers of the film will also learning that RCA really took its end to end record quality control very seriously. However, those with experience in the record industry or the technically curious will have much to entertain them for the 20 some odd minutes that this show plays.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the studio in the City of Angels.

--

"The Sound and the Story" would make an excellent program for radio club viewing if a tape, DVD or even a projectable 16 millimeter film print were to be made available. Meantime you can enjoy this piece of electronic nostalgia on-line at www.archive.org/details/SoundAndTheS to enjoy. (RCA)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73, Happy New Year and we thank you for listening.

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

3. SARL NEWS - SUNDAY 3 JANUARY 2010

Newsgroup: rec.radio.amateur.misc
Date: 2010-01-02 20:00:10 UTC
From: website@sarl.org.za
Message-ID: <20100102200005.96EE433CA5@panix2.panix.com>
Source record: 6123

SARL NEWS - SUNDAY 3 JANUARY 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web-stream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325; 14,235; 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750; 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit.)

In the news today:

SARL NEWS NEEDS EDITORS

SUMBANDILASAT SO67 POWER REDUCED

BACAR TO LAUNCH IN THE WESTERN CAPE

MOTIONS FOR THE ANNUAL GENERAL MEETING

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

SARL NEWS NEEDS EDITORS

SARL News is compiled weekly by a very small team of editors working in pairs. The news editor compiles the SARL News in English and Afrikaans from news items received from clubs and individual radio amateurs as well as other news sources. The language editor then checks the consistency, grammar and style of both versions. Both language versions are then sent to George Honiball, ZS6NE, who casts a final eye and arranges the distribution and posting on the SARL web.

Editors are needed in all departments to ensure that the SARL News continues to run efficiently. With more editors the work load can be shared. Editing comprises about three hours weekly every third or fourth month.

To volunteer, please e-mail George to gth@absamail.co.za or call him on 012 664 4155.

SUMBANDILASAT SO67 POWER REDUCED

In order to conserve power for other operations on SumbandilaSat, the ground control team have reduced the power of the transponder carrying amateur radio to 2,5 W. First reports from stations in Australia indicate that the reduction is hardly noticeable and that the signals remain stronger than most other amateur radio satellites.

Availability of the ZS0SUM payload will be during daylight hours when the satellite is in full sunlight. The actual schedule is published on www.amsatsa.org.za.

MOTIONS FOR THE ANNUAL GENERAL MEETING

Motions for submission and consideration at the AGM of the SARL on 24 April 2010 are invited from members.

Each motion must contain the following:

1. A concise description of the motion; and 2. A motivation in support of the motion.

A proposer and seconder must sign each motion.

Motions must reach the Secretary by no later than Sunday 31 January 2010. Motions must be addressed to The Secretary, SARL and mailed to PO Box 1721, Strubensvallei, 1735, or faxed to 011 675 2393.

DECEMBER A RECORD SUNSPOT MONTH

2009 ended with a flurry of sunspots. The month of December has had more "spotted days" than any previous month of the year by a significant margin, and all of the month's sunspot groups were part of the new Solar Cycle 24. Could this herald an end to the deepest solar minimum in nearly a century? Keep up to date by visiting spaceweather.com. Have you worked any good DX lately? Drop us a line with your DX log at armi@sarl.org.za.

FIRST CALL FOR PAPERS FOR THE SA AMSAT SPACE SYMPOSIUM

This is the first call for papers for the 2010 SA AMSAT Space Symposium to be held at the University of KwaZulu-Natal on 27 March 2010. Visit www.amasatsa.org for more detail.

HOME CONSTRUCTION COURSE

Book now for the Durban and Port Elizabeth events. There is only one space left for the Cape Town event on 23 January 2010. There are still spaces available in Durban and Port Elizabeth. Book now to avoid disappointment. Full details and a booking form can be found on www.sarl.org.za; select 'Activities' and then 'RTA' and navigate from there. If you have booked for the Cape Town course, your name will appear on the RTA pages. Please check and if your name is not there, send an e-mail to rta@sarl.org.za.

BACAR TO LAUNCH IN THE WESTERN CAPE

The first flight of BACAR 2010 is planned for Sunday 24 January. The payload will be multifunctional and include a 20- and 40 m SSB transceiver, a 2 m parrot repeater, a 2 m Doppler beacon, equipped with a GPS, as well as a camera. SARL News and www.amsatsa.org.za will carry regular updates.

ZS10WCS JANUARY IS FREE STATE MONTH

During January 2010, the Vrystaat Amateur Radio Club will host the ZS10WCS call sign. If you have not worked the special event station, here is another opportunity.

CLUBS INVITED TO SUBMIT NOMINATIONS FOR SARL AWARDS

Radio clubs and individual radio amateurs are invited to submit nominations for the various SARL awards recognising radio amateurs for excellence in various aspects of the hobby. Clubs will receive a SARL letter in their mailboxes with details. The SARL letter can also be downloaded from www.sarl.org.za, click on 'News' and select 'Clubtalk'.

THREE GOOD REASONS TO JOIN THE SARL

There are many good reasons why a radio amateur should join the SARL. You can join now at R200 for the next six months and receive Radio ZS and all the other benefits, such as reduced rates for attending the various courses presented by the SARL. Coming up this year are, for example, the PIC and the Home Construction courses in PE and Durban. Look at www.amateurradio.org.za/threereasons.jpg to see why you cannot afford to stay outside the SARL! To join, find details at www.sarl.org.za and click on 'Membership'.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. 2009 ended with a decent amount of sunspot activity. December accumulated a total of 22 'spotted' days. Current predictions are that sunspots will become a non-stop daily occurrence up to February 2010. The effective sunspot number is expected to be between 10 and 15 for the coming week. Overall conditions are on the rise.

15 and 20 m will provide the best opportunities for DX. Conditions to India will be good from the afternoon onwards. During the late afternoon and early evenings, it will be moderate towards Europe. In the afternoon there is a good possibility of contacts with the USA on 15 m. Contacts with New Zealand will be possible for a short while on 15 and 20 m during the mornings. Contacts with Australia will be probable on 20 m for a short while during the mornings and the afternoons. During the afternoons and evenings 15 and 20 m contacts may also be possible with Brazil.

Local conditions will be good on 40 m during the day time. 80 m may also perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the middle of the day. With summer here, 20 m is also once again

very useful for contacts over the longer distances, especially during the mornings. 80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

15 to 17 January 2010 - PEARS VHF/UHF Contest; 23 January - Home Construction course in Cape Town; 24 January - BACAR launch in the Western Cape; 31 January - President's net at 19:30; 31 January - Closing date for AGM motions; 28 February - New closing date for the SumbandilaSat essay competition; 28 February - Final date for entries in the ARRISS-SAT project to be submitted to youth@sarl.org.za; 27 March - 2010 SA AMSAT Space Symposium.

To end SARL News today, the first of 2010, we would like to extend our best wishes for the year ahead. The SARL President, Rassie Erasmus, ZS1YT, and the Councillors of the SARL join the SARL News team in wishing you a prosperous and joyful new year.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz.

Sentech sponsors the ARMI transmissions on the non-amateur frequencies. You have listened to a bulletin of the South African Radio League compiled by Dennis, ZS4BS/6, and edited by Jannie, ZR6PHD.

Thank you for listening, 73.
/EX

4. IRTS Radio News Bulletin, Sunday 3rd January 2010

Radio News Bulletin
Sunday 3rd January 2010

Free IRTS Membership!

A reminder to IRTS members that all members who pay their annual membership subscription by direct debit will be entered in a draw at the 2010 Annual General Meeting, with five prizes of free membership for a year.

Full details are in the December issue of Echo Ireland. A direct debit mandate was included with the latest Echo Ireland or can be downloaded from the Downloads
page of the IRTS web site.

IMRA AGM.

On Saturday January the 30th. AREN will have a stand at the Irish Mountain Rescue AGM being held in Tramore, County Waterford. Simultaneously members will be assisting at a walk in the Galtee Mountains. _____

AREN AGM.

On Saturday February 6th all AREN members are requested to attend a meeting being held in the Park Hotel,
Clonmel County Tipperary.

Contact John Ronan, EI7IG for further information. Finally, AREN wishes all listeners a Happy New Year.

2008 issues of Scatterpoint now online

The UK Microwave Group (UKuG) has now placed all of the 2008 issues of their newsletter Scatterpoint in the
public domain.

They can be downloaded along with issues from previous years by anyone (UKuG member or not) from
http://www.scatterpoint.org/

UKuG's policy is to reserve the current year's issues
for members only.

It is hoped that this archive will be a source of useful amateur
microwave information for all and that many of you who are not yet
members of the Group will consider joining via the UKuG website.

UK Microwave Group (UKuG) http://www.microwavers.org/

Great Circle Maps

The Great Circle Map software GcmWin has been recently updated to
support VOACAP and now produces colorful propagation maps as well as
telling you which way to
point your HF beam.

GcmWin Download page
http://www.qsl.net/sm3gsj/download.htm

Essex packet network closes

It is with great reluctance, and due to health problems, that G1NNB has
had to close down his packet station/network, which included the
International BBSs
GB7ESX & GB7NNA.

Both have given continuous service to mid Essex and beyond for over 25
years and were probably the longest
running stations in the UK.

GB7ESX & GB7NNA were the first AX 25 BBSs in the world to have
compressed mail forwarding. Latterly by popular request George
installed GB7DXE, Essexs first and only packet DX cluster, which is
still running on
the Internet.

MARS gets new name, more responsibilities

The ARRL reports that, effective 23 December, the Military Auxiliary
Radio System replaces the Military
Affiliate Radio System.

A Department of Defense Instruction details changes and requirements of
the new organization. _____

Antarctic operation

Alex, UA1PAW now operating as R1ANR from Novo Runway in Antarctica, is
expected to be there until the end of
February 2010.

While 10/15/20/30m are closed, he is QRV at about 20.00Z on 40m He is
running a Stepp-IR all band vertical antenna using a Yaesu MARK V RTX

and PA
ACOM 2000A.

QSL Manager is ZS1ANF

Wicklow Town Club first meeting

The first meeting is scheduled for January 13th at 19.30pm 2010 in The Glebe National School in
Wicklow town.

Directions if coming into Wicklow from the North ie Rathnew. After Lidl and Heatons take your first turn left then immediately right and go up the hill. At the crest of the hill the school is on the right hand side opposite the Church of Ireland.

Iians mobile is 086 8057242 if you need to call. All
are welcome to attend

Dates for your Diary

We would like to bring to your attention some Dates for both International and National Amateur Radio Events

IRTS 78th AGM April 24-25

Dundalk Amateur Radio Society shall be hosting the 78th Irish Radio Transmitters Society A.G.M over the weekend of Saturday 24th and Sunday 25th April 2010.

The venue for the event is the Fairways Hotel, Dundalk Co.Louth, a number of rooms have been reserved for anyone staying overnight, however it is advisable to book a room early. More info www.ei7dar.com

Dayton Hamvention

Dayton Ohio US May 14-16 more info www.hamvention.org

Friedrichshafen

Hamtronic Friedrichshafen Germany June 25-27 more info
www.hamradio-friedrichshafen.de

Rallies

Phoenix A.R.C Rally 14th February

The Rally will be held as usual at Coolmine Community School near Blanchardstown on Sunday 14th February 2010.Doors open from 9am to 2.30pm. Usual traders will be present and to encourage a real Amateur Radio orientated Rally bring and buy tables
will be free of charge.

For tables contact Tony at 087-2349997 or Tom at 01-8211043 This is the first rally of the New Year and usually a very enjoyable occasion. Refreshments and plenty of car parking are available.

Dundalk Rally 25th April

The Rally will commence at 11.00am, followed by the
IRTS AGM at 2.00pm.

Further details for booking, traders tables or any other info please e-mail the following, Thos EI2JD chairman /at/ ei7dar.com or Peter EI4HX secretary /at/ ei7dar.com

For more information on Rallies please check the
IRTS Website.

This week in History

1901 Commonwealth of Australia is proclaimed.

1902 N.Stubblefield, USA, demonstrates his wireless
telephone.

1952 First transistor hearing aid marketed in the USA.

Happy New Year

IRTS News Team would like to wish all our friends in Radio a happy and Peaceful New Year for 2010.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to charlie dot carolan at gmail dot com Or by phone to 087-6265418 News can also be submitted via e-mail to newsteam at irts dot ie for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following
Sundays bulletin.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, N1DG, NJ1Q, K2PF, NG3K & ADXO, N4AA & QRZ DX, KH6BZF, W6DPD, K7VL, K8CX, K8YSE, AT International, DL2GAC, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5CWU, HA5BWW, I1JQJ/IK1ADH & 425 DX News, I2YSB, OZ6OM & 50 MHz DX News, PA0MIR, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VE9NC, VHF-DX-Portal (MMMonVHF) and ZL2AL for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 27th-December, through Sunday, 3rd-January there were 216 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V7, V8, VE, VK, VK9N, VK9W, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2009 DX SOUND BITES! Tom, K8CX, has done it again. He has provided DXers with 146 memorable DX sound clips from 2009. Visit Tom's famous "HAM GALLERY" Web at: http://hamgallery.com/dx2009
While there also check out some of his other features on his Web page, such as: 12 years of "Rare DX Sound Clips" of the past, QSL Card Museum,

Dayton Photo Galleries and Tribute to Silent Key Ham Operators.

2010 CDXC CHALLENGE. The aim of the "2010 Clipperton DX Club Challenge" is to contact as many DXCC entities as possible on the different bands and on the different modes over the duration of the challenge. The challenge is opened to all radio amateurs, member of the CDXC or not. The challenge started on January 1st, 2010, at 0000z, and will last until Sunday, August 29th, at 2359z. Three categories are available:
Bands HF : - Mixed Mode All HF bands (CW, SSB, Digi)
Band 6m : - Mixed 6m (CW, SSB, Digi)
Band 2m : - Mixed 2m 2m (CW, SSB, Digi)
Complete details are available on the CDXC Web page at: http://www.cdxc.org

2010 CQ DX MARATHON. Now that the 2009 CQ DX Marathon has ended, the 2010 CQ DX Marathon has begun as of 0000z, on January 1st, and will run through/until 2359z, December 31st, 2010. The goal is to work as many countries and CQ zones as possible at least once during the 2010 calendar year. Complete details, rules and score sheets are available at: http://www.dxmarathon.com

2010 OLYMPIC WINTER GAMES (Special Canadian Prefixes). The following prefixes will be available for use in Canada from February 1st to March 31st, to commemorate the 2010 Olympic Winter Games in British Columbia. Canadian stations with a VA prefix can use VG, VY can use XK, VO can use XJ, and VE can use VX. Known announced activities are:
VX9NC - VE9NC will operate during that time using primarily digital modes on all HF bands. QSL via his home callsign.
VG7G - VE7XS will be operating during this time. (No other details known.)
VG7W - VE7OM will be operating as VG7W between now and January 31st. (No other details known.)

6W, SENEGAL. Operators Ron/PA3EWP and Tom/GM4FDM will team up again, but this time from the Le Calao rental shack in the region of Somone about 70km south of Dakar in Senegal for 2 weeks between January 26th and February 9th. Both operators have their license and will sign 6W/homecall. Activity will be on 160-10 meters, but operations will be concentrated on CW on the lower bands. Antennas are a Titanex vertical for 160/80m, 4 square for 40m, verticals for 30/17m and monobanders are available for 20/15/10m. They "may" also be active on 6 meters using a K3 radio and a 5 element yagi. Also, some RTTY operations are expected from Tom. The operators will attempt to be on the air during the sunrise/sunset for USA and Japan and hope that the path to Europe will not prove too troublesome. Tom will attempt to upload ONLY his logs to LoTW if the InterNet is available, if not, they will be submitted immediately upon his return home. QSL 6W/PA3EWP via PA7FM. QSL 6W/GM4FDM via GM4FDM, direct or by the Bureau and LoTW.

8Q, MALDIVES. Cezar, YO8TLC, will be active as 8Q7CE from Addu Atoll, Feydhoo Island (AS-013), between January 8-25th. Activity will be holiday style with operations on 40/30/20 meters using mainly CW and some SSB. He will use a FT-857 w/100 watts into an ATU MFJ971 and vertical multi-

band antenna. QSL via YO8TLC, by the Bureau or direct.

A6, UNITED ARAB EMIRATES (Update). Gerry, VE6LB, will be active as A6/VE6LB from Dubai between January 9th and February 7th. Activity will be limited (holiday style) using 100 watts into a G5RV antenna and mainly on CW. QSL direct via his home callsign (QRZ.com address) or LoTW. Bureau QSLs can be requested via E-mail at: ve6lb@telus.net
Visit his Web page at: http://www.telusplanet.net/public/telwest/ve6lb.htm
He hopes to have an on-line log at:
http://logsearch.de/index.php/online-logsearch

CE0, EASTER ISLAND (SA-001). Roberto, YV5IAL, will be active as CE0/YV5IAL from Isla de Pascua (IOTA SA-001, DICE ICE-001, WLOTA L-0319) between January 8-11th. This will be a QRP, portable, holiday style operation. Activity will be on PSK31 digital mode on 14070.15 kHz from 2200-0100z, and occasionally on 40/30/15 meters. QSL via his home callsign.

FM, MARTINIQUE. Nicolas, F5TGR, will be active as FM/F5TGR between April 25th and May 6th. Activity will be limited to his spare time (holiday style) on 40-10 meters using CW and SSB. QSL via his home callsign, direct or by the Bureau.

H40 & H44, TEMOTU PROVINCE AND SOLOMON ISLANDS (Update). Bernhard, DL2GAC, informs OPDX that he will once again be on a DX vacation in the Solomon Islands. He is expected to arrive on January 21st and will (expected) depart on April 20th. Bernhard will be active as H44MS, usually on SSB only but will focus on the 80 and 40 meter bands. Between February 6-19th, operators Siegfried/DK9FN and Hans-Peter/DG1FK, will join Bernhard/DL2GAC and the team will be active as H40FN (CW), H40FK (Digi-mode) and H40MS (SSB), respectively, from Ngarando/Reef Islands (OC-065). Activity will be focused on 160/80m (using their famous LOBSTER 2-element multi-band vertical), but they will operate on 160-6 meters depending on the band conditions. QSL H40FN via HA8FW, H40MS via DL2GAC and H40FK via DG1FK. QSL cards will be sent out automatically via the Bureau. However, for those who want to receive their QSL cards directly, a minimum of 2 USDs for postage is requested. Donations are most welcome. For more details, updates and pictures/details of Siegfried's last visit to Temotu, please visit the following Web page at:
http://hari-ham.com/seiten/h40fn_expedition/index.php
Bernhard states there is NO InterNet connection from either locations.

IOTA NEWS..... (None to report this week!)

J2, DJIBOUTI. Darko, E70A, who has been operating as J28OO since November of 2007, has apparently changed his callsign. He is now signing J28AA. He has operated CW, SSB and RTTY on 80-10 meters. However, his activity lately has been mainly CW on 80/40/20 meters. QSL via his QSL Manager K2PF, direct or LoTW.

NEW CLUB (New Club for Morse Code Enthusiasts). "A new club has been formed among Amateur Radio operators who are Morse Code (CW) enthusiasts. It is called The CW Operators' Club (CWops). CWops encourages the use of CW in Amateur communications, and it promotes goodwill among Amateurs around the world by planned CW activities. CWops is international in scope, membership and management. Its focus is the use of CW, whether for contesting, DXing or ragchewing. Moreover, it promotes every form of sending -- if it's CW, CWops supports it! For further information, go to www.cwops.org. There you will find everything that you might want to know about CWops, including our bylaws and articles of incorporation, our planned activities, an explanation of how to become a member, and a list of current members....." Jim Talens, N3JT, Secretary, CWops

NEW OFFICERS FOR 2010. Members of the Central California DX Club, Inc., elected the following officers for 2010. They are:
President - Mike Bavoso, W6YDE
First Vice President - Fred Stenger, N6AWD
Second Vice President - Jim Clymer, WS6X
Secretary/Treasurer - Charles McConnell, W6DPD
Director - Bob Hervatine, N2NS

PC600, THE NETHERLANDS (Special Event). The City of Purmerend in the Netherlands will be celebrating its 600th anniversary of city rights. The local amateurs are participating in this celebration and will be active using the special callsign PC600P during 3 periods throughout the year. Look for special event station PC600P to be on the air between January 1-27th, May 1-28th and September 1-28th. After the completion of the event in September, a QSL for this station will be sent via the Bureau to all stations who made a contact. During the same periods, other PA stations from Purmerend will also be active using special callsigns (e.g. PA600MIR, PA601FR, PA602SWL, PA603HGP, PD602YL, PE603HG a.s.o.). Details of a short-time operational award is available via the local VERON chapter Web site at: http://hamradio.nikhef.nl/afdeling/waterland

QSL INFO AND NEWS.....
9G5TT & 9G5XX QSL STATUS. Silvano, I2YSB, reports that all of the QSLs

received for 9G5TT and 9G5XX have been sent/answered as of January 2nd. You can check the status of your QSL or to see if you are in the log at: http://www.i2ysb.com/index.php?option=com_wrapper&Itemid=43 For any inquires, you can send E-mail to: i2ysb@i2ysb.com

QSLS VIA LoTW: 4L4WW, 4L8A, 4O3A, 8P5A, AH2Y, BA4RF, BU2AI, CN3A, CT3KN, CX7TT, DS1REE, FO8RZ, FY8PO, GM0F, HC8A, IR4M, J39BS, JT1CO, KG6DX, NP3CW, OH0X, OK1DO, P40W, P49Y, PJ2T, PS2T, RA0FU, S51ZZ, SM5IMO, SU1KM, TR8CA, UA0FAI, UW2AM, V26K, V47NT, YO9HP and ZP4FX.

QSLS RECEIVED VIA MAIL: 3DA0VB, 3D2KJ, 4W6AL, 7Q7VB, 8R1PY, 9U0VB, 9X0VB, 9Z4FZ, A61AB, CT8/DL7JAN, CU3EQ, D20VB, EA9IE, FM5AA, FT5GA, KL7RRC/p, P29NI, PJ2/K8ND, SV2ASP/A, T30GM, TO5RZ, TX5SPA, TX5SPM, VP2VI, VP8YLG, UA2FFW, VU2MTT, XV2RZ and YJ0PX.

QSLS RECEIVED VIA THE BUREAU: 5W0SS, 6Y2Z, C21DL, CU2A, CX1AA, DK1MAX, FO/DL3GA, FP/VE7SV, GJ2A, HH6/DL7CM, HI3/SP9XCN, HK0GU, HQ9H, HP3TA, J38AA, J3/SP9PT, 8N5S, 8J3YAGI, JW1CCA, K5D, KG4MO, KH8/DF2SS, WP3R, LW2DX, LX/DF3VM, LY7Z, OA4/DJ3KR, OH3YI, OH0R, PA1CC, PJ7/ND5S, RW2F, S59AA, S9SS, T32RD, T32WW, T33C, T96Q, TA3DD, UA4HBW, UE80MC, V25A, V73MJ, VE3EXY/2, VE2XAA, VI5BR, VP2MLA, VP2MWP, VP9/WA1S, VR2BG, XE1KK, ZD8A, ZF2AH, ZK3MW, ZL2IFB and ZL3C.

SILENT KEY. OPDX was informed that Jozsef "JOCI" Skultety, HA7PB, (HSC, FOC) became a Silent Key on December 31st, 2009. OPDX and its readers would like to send out our deepest sympathy to the family and friends.

T7, SAN MARINO. Operators Tony/T77C, Victor/RV2FW, Dmitri/UA2FB, Vladimir/ UA2FF and Igor/UA2FZ will activate the Amateurs Radio Republic of San Marino (A.R.R.S.M.) club station T70A during the CQ 160-Meter CW Contest (January 29-31st) as a Multi-Op entry. QSL via T70A.

TX4, FRENCH POLYNESIA (Update). Operators Jacques/F6BEE, Phil/FO8RZ, Nigel/G3TXF and Gilles/VE2TZT will be active using the special callsign TX4T from Tahiti between February 9-24th. Activity will be active on 160-10 meters with a strong effort on the lower bands (160/80m). They also plan to be entries in the CQ WPX RTTY (February 13-14th) and ARRL DX CW (February 20-21st) Contests. QSL via G3TXF. Visit their Web page at: http://www.fo2010.org

VK9N, NORFOLK ISLAND. By the time you read this, operators Alan/VK3XPD, Kevin/VK4UH and Mike/VK3KH will be active as VK9NA until January 14th. However, this is a VHF, UHF and Microwave DXpedition. For complete details, visit their Web page at: http://www.vk9na.com/index.html

ZL NEWS (New Zealand DX Hall of Fame Members for 2010). The New Zealand DX Hall of Fame was set up a few years ago to honor those outstanding ZL DXers who have excelled in our radio sport hobby over many years. The current panel of judges includes Ken McCormack/ZL1AIH, Duncan McMahon/ZL3JT and Bill Carney/ZL3NB. The judges were unanimous in their selection for 2010. Their individual citations are below:

Dave A. Johnston, ZL1AMN - The election of Dave Johnston as the 4th inductee to the NZ DX Hall of Fame recognizes Dave's extraordinary and unselfish contribution to the sport of Amateur Radio DXing in New Zealand. His DXpedition exploits around the Pacific over many decades as ZL1AA/K, ZK2DJ, A35DJ, 5W1CA are legendary, and he has enabled a generation of amateur radio operators worldwide to obtain that elusive new country. His personal achievement in the ARRL DXCC program with Honour Roll on Phone with 350 entities is outstanding. Dave's contribution to DXing internationally has been immense by way of the ANZA Net anchor man for many years. Dave is the NZ co-coordinator for ITHE, the International Tour Host Exchange organization which assists amateurs with accommodation when traveling around the World.

Aola B. Johnston, ZL1ALE - The election of Aola Johnson, ZL1ALE, as the 5th inductee to the NZ DX Hall of Fame recognizes Aola's extraordinary and unselfish contribution to the sport of Amateur Radio DXing in New Zealand. Aola's DXpedition exploits around the Pacific with her husband Dave over many decades has enabled a generation of amateur radio operators worldwide to obtain that elusive new country with a YL operator. Aola has operated as A35YL, ZK2YL, 5W1BY and others. Her personal achievement in the ARRL DXCC program is outstanding with 349 entities credited. She is the only lady in New Zealand on the ARRL DXCC Honor Roll. She is a member of WARO, CLARA, YLRL, ALARA, BYLARA, and YLISB.

Dave Brown, ZL1HY (SK) - The posthumous election of Dave Brown, ZL1HY, as the 6th inductee to the NZ DX Hall of Fame recognizes Dave's amazing DXing achievements over many decades. His help and inspiration that he gave to other DXers has been immeasurable. His personal achievement in the ARRL DXCC program is legendary with DXCC No. 59 in September 1947. ZL1HY was the first Oceania station to achieve the TOP position in world DXing with 375 confirmed on phone in 1992. It was the first time this honor ever left America. His last QSO was in April 1992 He was an outstanding ZL radio amateur for decades. This award honors Dave Brown's wonderful DXing skills and will show how accomplished this great New Zealand DXer was.

> Would someone PLEASE host or figure out how to set up a newsgroup for
> Mark?

That has already been done for Mark by some philanthropic benefactor who prefers to remain anonymous. There are two new newsgroups in the alt hierarchy:

* alt.cocksucker.mark.morgan
* alt.morgan.homo

They are carried by a handful of servers at the moment (all European), probably vindicating Mark's comment that "I do write in ore european mode" -- message <7mmj03l5jsfu5oflm1b78fvv5gh00s53d8@4ax.com>.

My sources tell me that there will be some additional "cmsg newgroup" control messages posted to control.newgroup and alt.config in order to encourage propagation to places like Google Groups. After all, if Google Groups carries alt.cocksucker.roger-wiseman, why not be fair about things and carry alt.cocksucker.mark.morgan too? Anything else is discriminatory, possibly homophobic, and may even violate certain U.S. anti-discrimination laws.

The Fundamental Transformation of America
When Obama wrote a book and said he was
mentored as a youth by Frank,
(Frank Marshall Davis) an avowed Communist,
people said it didn't matter.

When it was discovered that his grandparents,
were strong socialist,
sent Obama's mother to a socialist school,
introduced Frank Marshall Davis to young Obama,
People said it didn't matter.

When people found out that he was
enrolled as a Muslim child in school and his
father and step father were both Muslims,
people said it didn't matter.

When he wrote in another book he
authored "I will stand with them (Muslims)
should the political winds shift
in an ugly direction."
people said it didn't matter.

When he admittedly, in his book,
said he chose Marxist friends
and professors in college,
people said it didn't matter.

When he traveled to Pakistan ,
after college on an unknown
national passport,
people said it didn't matter.

When he sought the endorsement of the
Marxist party in 1996 as he ran
for the Illinois Senate,
people said it doesn't matter.

When he sat in a Chicago Church
for twenty years and listened to a preacher
spew hatred for America and
preach black liberation theology,
people said it didn't matter.

When an independent Washington organization,
that tracks senate voting records, gave him
the distinctive title as the "most liberal senator",

people said it didn't matter.

When the Palestinians in Gaza ,
set up a fund raising telethon
to raise money for his election campaign,
people said it didn't matter.

When his voting record
supported gun control,
people said it didn't matter.

When he refused to disclose who
donated money to his election campaign,
as other candidates had done,
people said it didn't matter.

When he received endorsements from
people like Louis Farrakhan and
Mummar Kadaffi and Hugo Chavez,
people said it didn't matter.

When it was pointed out that he was
a total, newcomer and had absolutely
no experience at anything except
community organizing,
people said it didn't matter.

When he chose friends and acquaintances
such as Bill Ayers and Bernadine Dohrn
who were revolutionary radicals,
people said it didn't matter.

When his voting record in the Illinois
senate and in the U.S. Senate
came into question,
people said it didn't matter.

When he refused to wear a flag,
lapel pin and did so only
after a public outcry,
people said it didn't matter.

When people started treating him as
a Messiah and children in schools
were taught to sing his praises,
people said it didn't matter.

When he stood with his hands over
his groin area for the playing of the
National Anthem and Pledge of Allegiance,
people said it didn't matter.

When he surrounded himself in the White house
with advisors who were pro gun control, pro

abortion, pro homosexual marriage and wanting to
curtail freedom of speech to silence the opposition
people said it didn't matter.

When he aired his views on abortion,
homosexuality and a
host of other issues,
people said it didn't matter.

When he said he favors
sex education in Kindergarten,
including homosexual indoctrination,
people said it didn't matter.

When his background was either
scrubbed or hidden and nothing
could be found about him,
people said it didn't matter.

When the place of his birth
was called into question,
and he refused to produce a birth certificate,
people said it didn't matter.

When he had an association in Chicago
with Tony Rezco, a man of questionable character,
who is now in prison and had helped Obama
to a sweet deal on the purchase of his home,
people said it didn't matter.

When it became known that George Soros,
a multi-billionaire Marxist,
spent a ton of money to get him elected,
people said it didn't matter.

When he started appointing czars
that were radicals, revolutionaries,
and even avowed Marxist/Communist,
people said it didn't matter.

When he stood before the nation
and told us that his intentions were to
"fundamentally transform this nation"
into something else,
people said it didn't matter.

When it became known that he had
trained ACORN workers in Chicago
and served as an attorney for ACORN,
people said it didn't matter.

When he appointed a cabinet members
and several advisors who were

tax cheats and socialist,
people said it didn't matter.

When he appointed a science czar, John Holdren,
who believes in forced abortions, mass
sterilizations and seizing babies from teen mothers,
people said it didn't matter.

When he appointed Cass Sunstein as regulatory
czar and he believes in "Explicit Consent",
harvesting human organs with out family consent,
and to allow animals to be represented in court,
while banning all hunting,
people said it didn't matter.

When he appointed Kevin Jennings, a homosexual,
and organizer of a group called gay, lesbian,
straight,
Education network, as safe school czar and it became
known
that he had a history of bad advice to teenagers,
people said it didn't matter.

When he appointed Mark Lloyd as diversity czar
and he believed in curtailing free speech,
taking from one and giving to another to spread
the wealth and admires Hugo Chavez,
people said it didn't matter.

When Valerie Jarrett was selected as Obama's
senior White House advisor and she is an
avowed Socialist,
people said it didn't matter.

When Anita Dunn, White House Communications director
said Mao Tse Tung was her favorite philosopher
and the person she turned to most for inspiration,
people said it didn't matter.

When he appointed Carol Browner as global warming
czar, and she is a well known socialist working
on Cap and trade as the nations largest tax,
people said it doesn't matter.

When he appointed Van Jones, an ex-con and
avowed Communist as green energy czar,
who since had to resign when this was made known,
people said it didn't matter.

When Tom Daschle, Obama's pick for health
and human services secretary could not be
confirmed, because he was a tax cheat,
people said it didn't matter.

When as president of the United States ,
he bowed to the King of Saudi Arabia ,
people said it didn't matter.

When he traveled around the world
criticizing America and never once
talking of her greatness,
people said it didn't matter.

When his actions concerning the middle-east
seemed to support the Palestinians
over Israel , our long time friend,
People said it doesn't matter.

When he took American tax dollars to
resettle thousands of Palestinians
from Gaza to the United States ,
people said it doesn't matter.

When he upset the Europeans by
removing plans for a missile defense system
against the Russians,
People said it doesn't matter.

When he played politics in Afghanistan by
not sending troops the Field Commanders
said we had to have to win,
people said it didn't matter.

When he started spending us into a debt
that was so big
we could not pay it off,
people said it didn't matter.

When he took a huge spending bill
under the guise of stimulus
and used it to pay off organizations,
unions and individuals
that got him elected,
people said it didn't matter.

When he took over insurance companies,
car companies, banks, etc.
people said it didn't matter.

When he took away student loans
from the banks and put it
through the government,
people said it didn't matter.

When he designed plans to take over
the health care system
and put it under government control,
people said it didn't matter.

When he set into motion a plan
to take over the control of all
energy in the United States
through Cap and Trade,
people said it didn't matter.

When he finally completed his
transformation of America
into a Socialist State ,
people finally woke up........
but it was too late.

--
Repubs don't have enough mental capacity
to realize that there are opinions other than
theirs.

SB QNEWS @ WW $QNEWS100110
QNEWS - Jan 10 - VK4 ON AIR

DID YOU TELL ANYONE ABOUT AMATEUR RADIO THIS WEEK?

Welcome to QNEWS from VK4WIA. I'm Geoff Emery, VK4ZPP and here's a thought for the New Year.

When you ride your bicycle on the road, do you automatically make way for a person on a motor scooter? Should motor cycle riders give way to ute's and sedans? Sounds crazy doesn't it? As a public resource, the road is used by all kinds of vehicles with all sorts of cargoes and many passengers. The reason that the roads are not chaotic is that every user is obliged to adhere to common road rules. Breaking those rules may result in injury and death.

To join the users of the radio spectrum we can use a mobile/cell phone,

a LIPD or CB and so on. If we get smitten with the bug known as Amateur

Radio and wish to transmit, we all have to pass a licence which ensures

basic compliance with common rules. Breaking these rules may result in annoyance to others and even injury and death.

The aether, as it was known, the radio frequency spectrum is shared and

used in a common way around the world of amateur radio. Titles and honorifics, status and position matter not to the radio amateur. The callsign is special in that it applies to the person and not the equipment or craft that carries it.

There was a time in Australia that we only had what is now the Advanced

licence. For the "dummies" that couldn't or didn't want to learn Morse Code, the Limited licence was introduced at the same technical level but minus the CW. Now we have other grades of licence and they all permit the holder to enjoy use of the same radio spectrum.

In our coming centenary year, can we ensure the the traditions of the hobby don't die out. When we key the transmitter, we are communicating with another amateur with a callsign and a name. There is no superiority in the ranks of the hobby except in the individual's own mind.

For QNews, I'm Geoff, VK4ZPP that is what I think.

BUNYA MOUNTAINS AND DISTRICT AMCOM

Hi again to all, I'm Neil VK4NF from Bunya Mts & District Amcom Inc.

Just a reminder that the Ham & Wine fest at Maclagan is coming up fast,

Remember the date, Saturday 30th January, The deadline for table bookings is Friday the 15th January, so be quick, bookings are rolling in.
If you wish to stay the weekend, Accommodation and or camping & caravan sites are available at Rangemore estate and Winery near Maclagan, for more info contact Ricky VK4NRL at ricklammas@optusnet.com.au

Hope to see you at the fest.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray VK4CF back with news from the Redcliffe AR Club".

Planning for John Moyle has already started and as next Monday night is the club's meeting night this will be the main area of discussion. With the majority of the club's executive away, the second eleven will be in charge of the organization of event.

The new shelters will be available for the event and again the club will be located at Murrumbong Scout camp about 15 minutes drive from Petrie. Again CW will play a big part of the field day activities and there is a general invitation to all amateurs and interested others to make a visit to the scout camp to meet and greet members of the Redcliffe Club.

For the information of all intending visitors to the club here are a run down of club Monday Night General Activities for 2010. The location of the club House is at MacFarlane Park Klingner Rd Kippa Ring (UBD Map 91 Ref G 1) , and meeting time is from 7.30 - 10 pm-ish with the club usually open by about 7 pm.

Program includes:
discussion social and technical, first Monday of the month.
Business meeting second Monday of month.
A number of special demonstrations, technical talks take place on the year on third Monday of the month.
On the 4th Monday of every month is a fox hunt starting at 7.30pm everyone is welcome.
The club has also 2 unique awards for all amateurs. The Redcliffe City Award, that requires at least 5 contacts with Redcliffe club members.
The second is the TOBAR Award. This award is a tour around Australia by Amateur Radio and requires contacts starting and finishing in Redcliffe, and contacting other amateurs in the major cities and towns around this fine land.

For details of these awards please contact our secretary Peter, VK4TAA or James, VK4TJF, the club's QSL manager via the club web site or read for yourself at http://www.redclifferadioclub.org.au/

So until next week, for Redcliffe club I'm Ray VK4CF 4QNEWS from VK4WIA.

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING JAN 10 2010

WIA CENTENARY

WIA Supported Centenary Activities

The Wireless Institute of Australia has urged its affiliated clubs to
develop and implement activities to promote amateur radio in their
community, either in association with their rostered use of the VK100WIA
callsign, or activities not involving the commemorative callsign.

There are, of course, a whole range of other activities that may be
undertaken that may promote amateur radio to particular groups, or simply
amount to an activity that enhances amateur radio for radio amateurs.

The WIA welcomes the association of such activities with the Centenary year
program. This gives those running such activities the ability to use the
WIA Centenary Logo in publicity material.

The WIA will support appropriate activities on the basis that it occurs
between 1 January and 31 December this year, is one that in the view of the

Centenary Committee either promotes amateur radio, is of general interest to radio amateurs or is otherwise worthy of support.

Full details of this arrangement can be found in the WIA Centenary section of the WIA website.

Two events already have been approved so far to be WIA Supported Centenary Activities, they are:

The VK9NA VK Microwave Group VHF/UHF/Microwave DXpedition to Norfolk Island 3rd to the 14th January

And, the Centre Victoria RadioFest at Kyneton on the 14th of February

Any club, group or individual seeking the WIA's support for an activity to be associated with the Centenary Celebrations should contact the Centenary Committee Chairman, David Wardlaw VK3ADW.

Either by email to centenary@wia.org.au or if you want to discuss a proposal on the phone at 03 9857 8346.

Bay radio club ready to ham it up!

That was the headline written by Jennifer Chapman in Monday 4th January's Fraser Coast Chronicle.

Sue Stephenson, a long-time member of the Hervey Bay Radio Club who's photo "at the mic." in the Chronicle said she enjoys the company of her fellow "hams".

The Hervey Bay Amateur Radio Club has been given the chance to have a special call-sign for the celebration of the Wireless Institute of Australia's 100th anniversary.

Three days have been allocated to select radio clubs across the country during a three to four-month period starting in March.

Because the call-sign, VK100WIA, marks a special occasion it means more radio enthusiasts from around the world will be tuning in to Australia.

Hervey Bay Amateur Radio Club publicity officer Reg Wheller said the anniversary provides a great opportunity to promote the Fraser Coast to a larger-than-usual overseas audience.

In an attempt to attract more people and to celebrate the worlds oldest ham radio society, the society that keeps the ham wheels turning, the Bay Radio Club will hold a sausage sizzle at its Pialba headquarters in January or February.

All members, ex-members and anybody else interested in amateur radio will be welcome and can call 4124 6253.

VK100WIA It's a special call-sign; there will never be another one," Mr Wheller said.

Special callsign roster nearly full

To date 45 clubs throughout Australia have accepted the WIA's invitation to take up a three-day roster slot of the commemorative callsign VK100WIA.

The callsign will be on air from May through to October. Currently only six time-slots for the use of VK100WIA remain vacant.

There are two in August and one each in July and September. Clubs who are not yet on the roster and want to be, are encouraged to register online via the WIA website. The rostering must be completed by March.

DIGITAL DIVIDEND GREEN PAPER

The Rudd Government has released a Government green paper seeking public comment on the benefits and costs of maximising Australia's digital dividend.

The 'digital dividend' is the term used to describe the radio-frequency spectrum made available up as a result of the switchover to digital-only television. The transition to digital-only television will free up spectrum that is currently used to deliver analogue television services.

The Government is committed to achieving a maximised digital dividend while maintaining Australians' existing access to free-to-air digital television services.

WIA

Emergency Communications Training

Last year the WIA Board considered training of amateurs for activities associated with emergency communications preparedness. In the July and September 2009n issues of Amateur Radio magazine, the WIA Comment focused on issues surrounding amateur operator emergency communications, training and general preparedness. From the feedback received, the Board considered that a national accredited training system was an essential element in the broad range of issues associated with emergency communications provided by amateur operators. In association with the WIA' s Recognised Training Organisation (RTO), TrainSafe, a nationally recognised training package has now been developed. The WIA Board has prepared a statement on "where it is at" in the development of the training package and a summary of feedback and issues. The statement and attachments can be found on the WIA website.

Just thirty days or so from the announcement of the WIA's Emergency Communications Training package over 100 people have registered their interest by completing the online application form. The WIA, in association with its Recognised Training Organisation (RTO), TrainSafe Australia, announced on the 2nd of December 2009 that a nationally recognised training package had been developed. The announcement with details of the training program may be read on wia.org.au the WIA website

If you are interested in registering for the WIA's Emergency Communications Operator Training, further information and the online registration form can be found on the WIA website in the Emergency Communications section located under the "Members Area" drop down menu.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

In VK6, ham college will be looking for candidates for their next foundation course due to commence on the weekend of the 23rd and 24th of January. The course runs for two days with basic amenities provided.

Ham college are also looking for candidates for their next standard licence course due to commence on 9th of February, one night a week for 6 months.

If your interested in getting your standard licence, act now or you will be facing another years wait. I learnt the hard way with my advance licence.

There's also going to be an all exam day on the 30th of January.

For details go to www.hamcollege.com.au and register your interest now

Cradle Coast Amateur Radio Club
http://www.my-x15.net/ccarc

Cradle Coast Amateur Radio Club remind all in their area of Tassie that be you a non amateur or a short wave listener and would like to become a licensed amateur radio operator, then go along to a meeting and find out about this interesting hobby.

If you cannot make the meeting but would like to find out more about the hobby then contact the learning facilitator, Keith Winkler VK7KW, or any of the committee members.

Full contact details are available on their website which like all "good clubs" can be easily found by looking up clubs when you log into wia.org.au

Oh and next meeting? January 30.

(David, VK7DC, Secretary, CCARC)

Stephanie is youngest radio amateur in the UK

Stephanie Gregory is all EARS - and she couldn't be happier she's making waves.

The bubbly seven-year-old is the youngest licensed radio amateur in the United Kingdom.

And it's all down to the help and support she's been given as a member of the Elderslie Amateur Radio Society (EARS).

Stephanie passed her amateur radio exams which means she no longer has to operate from their radio club under supervision.

She told the Paisley Daily Express: ""It looked like good fun so I asked if I could have a go. I thought it was brilliant. I've now been doing it since August and I thought it would be good if I could become a member of the same club as Daddy."

Read the full story by Jeff Holmes of the Paisley Daily Express

paisleydailyexpress.co.uk/renfrewshire-news/2009/12/22/stephanie-is-youngest-radio-amateur-in-the-uk-87085-25442928/

Dover boy is quite the ham

Andrew Copeland has a bright future in electronics, and he has the paperwork to prove it.

The 11-year-old resident of Port Dover in Canada recently took a gruelling 25-page test on the finer points of ham radio operation. It took him nearly two hours to answer 100 multiple-choice questions, but he passed with flying colours with a score of 85%.

By virtue of that performance, Andrew became one of the youngest people in Canada to earn an amateur radio licence.

"I wanted to accomplish something," Andrew said. "And when I learned I could be the youngest (licence holder) in Canada, I said OK. I looked at the guys at that meeting and said I wanted to be one of them."

Again read the full article by the Simcoe Reformer's Monte Sonnenberg simcoereformer.ca/ArticleDisplay.aspx?e"36410

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

TV in Norway 50 years

In 2010 it is 50 years since TV broadcasts began in Norway.

Celebrate world wide by listening and working two group stations.

LA1NRK.

LA5NRK.

Used throughout the anniversary year 2010 primarily on 20 meters.

Also from Norway and the Norsk Radio Relay League comes praise indeed to one of "our own".

A former director and "tireless wireless" worker for Intruder Watch which under his guidance was a world leader, none other than Glenn Dunstan VK4DU.

IARU monitoring service (IARUMS) succeeds again!

An Australian OTH (over-the-horizon) radar which has disturbed the 30 meter band has changed frequency due entirely to complaints from radio amateurs.

Tis is the La Trobe University's Tiger Radar project in Tasmania, (VK7)

After complaints from VK4DU Glenn and DJ9KR Uli to La Trobe University the uni decided to change their frequencies.

In the future, no amateur bands to be disturbed by the ionosphere based radar system!

Thank you to Glenn and Uli for their efforts!

http://www.iarums-r1.org/iarums/actions.pdf

You may recall back in October we brought you the chilling recording of the 999 call made in relation to the deaths of amateurs erecting an antenna in the "middle of the night" in Florida.

Now Peter VK1PE has a salutary story for us all and it relates to that tragedy.

Darwin Awards - 2009

Unfortunately for Amateur Radio, a tragedy related to a ham radio operator has been a featured finalist in the annual Darwin Awards. Named in honour of Charles Darwin, the father of evolution, the Darwin Awards commemorate those who "improve our gene pool by removing themselves from it." By dying.

The story goes that, in the evening of Monday 12 October 2009, in Palm Bay, Florida, some 40km south of Cape Canaveral, an Amateur Radio operator enlisted the assistance of her middle-aged son and daughter-in-law, and 15 year old grandson to put up a 50 foot vertical antenna. They raised the aerial pole in the dark, with the aid of a family friend on the roof. There was a mishap and the pole fell, striking a power line.

Inside the house, the couple's daughter, Melissa, and the man's mother, Barbara Tenn, KJ4KFF, and were uninjured. Neither was the 17 year old friend who had been on the roof of the house helping to erect the pole.

55-year-old Melville Braham, 49-year-old Anna and 15-year-old Anthony, remind us not to let an antenna pole fall onto a 13,000 volt power line -- well, any power line!

Police officers sue force over 'radio injuries'

Police officers are preparing to sue their own force over a series of illnesses they claim were caused by the radio system they use while out on patrol, the 'Telegraph' reports.

The Telegraph says that the Lancashire Constabulary was the first in Britain to try out the Airwave network, designed specifically to have longer range and more capacity to the emergency services and the military.

Nine years after its introduction scores of officers are claiming that radiation emissions from the system have caused them to suffer such ailments as nausea, headaches, stomach pains and skin rashes.

The local branch of the Police Federation has logged 176 individual complaints, and now senior officials at the police authority are seeking legal advice on how to deal with them.

They have already made budget changes to allow for "a contingent liability in respect of Airwave liability claims".

NEWS FROM ARNEWSLINE

THE CHANGING OF THE GUARD: EXPLORER KNUT HAUGLAND LA3KY - SK

The changing of the guard in Amateur Radio continues. This, with the sad news that Knut M. Haugland, LA3KY, the last surviving member of the crew that crossed the Pacific Ocean in 1947 on board the balsa wood raft the Kon Tiki has died at age 92.

Knut Haugland was a former Norwegian resistance fighter and explorer who was honoured with Norway's Norway's highest decoration for military gallantry, the War Cross with sword, for helping prevent the German nuclear program from acquiring heavy water to make weapons during World War 2. Similar honours were also bestowed upon him by Great Britain and France.

After the war ended he joined the Kon Tiki ocean going raft expedition of Norwegian anthropologist Thor Heyerdahl, as one of its radio operators. The
Kon-Tiki eventually sailed 4,900 miles from Peru to Polynesia in 101 days to prove Heyerdahl's theory that ancient mariners may have migrated across ocean stretches.

According to Wikipedia, during the Kon Tiki Pacific crossing Haugland and fellow crew member Torstein Raaby were in frequent radio contact with American amateur operators. Much of the communications consisted of sending meteorological and hydrographic data to be passed on to the Meteorological Institute in Washington, DC.. Despite the tiny radio which had an output of only 6 watts they managed to contact radio operators in Norway, even sending a telegram to congratulate King Haakon VII on his 75th birthday. Haugland also played himself in the 1950 documentary film about the Kon-Tiki voyage.

The passing of LA3KY was announced by the director of the Kon-Tiki Museum who said that Haughland died in an Oslo hospital on Friday, December 25th.

OPERATIONAL NEWS -

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2010

Ross Hull Contest.

Yes although with no fanfare and no publicity as such, it is on again this year!

This contest honours the late Ross Hull, a pioneer of VHF equipment techniques. Ross was born in Melbourne in 1902 but travelled to the United States and became the Associate Editor of QST in 1931, a position which he occupied until his untimely death in 1938.

He is best known for his discovery of tropospheric propagation on the VHF-UHF bands.

The contest now running right through January was first held over the summer of 1950 - 1951.

New Zealand DX Hall of Fame

A New Zealand DX Hall of Fame was set up a few years ago to honour those outstanding ZL DXers who have excelled in our radio sport hobby over many years.

The current panel of judges includes ZL1AIH, ZL3JT and ZL3NB.

The judges were unanimous in their selection for 2010.

Now Dot VK2DB in an ALARA note has asked "I hope you can all send a congratulatory email to Dave and Aola! davola@clear.net.nz

This email received will explain it all to you.

Hi Dot

Hope you and the family had a wonderful Christmas and New Year break.

Just to let you know that Ma and Pa have been inducted into the NZ DX Hall Of Fame (members 4 & 5) at the Papakura Radio Club last Wednesday Night 6th January.

33

Carol ZL1AJL

The award states,

To Dave and Aola Johnston,

It is my very great pleasure to inform you that you both have been inducted into the New Zealand DX Hall of Fame.

Dave A. Johnston ZL1AMN

The election of Dave as the 4th inductee recognizes ZL1AMN's extraordinary and unselfish contribution to the sport of Amateur Radio DXing in New Zealand.

His DXpedition exploits around the Pacific over many decades as ZL1AA/K, ZK2DJ, A35DJ, 5W1CA are legendary and he has enabled a generation of amateur radio operators worldwide to obtain that elusive new country.

His personal achievement in the ARRL DXCC program with Honour Roll on Phone with 350 entities is outstanding. Dave's contribution to DXing internationally has been immense by way of the ANZA Net anchor man for many years. Dave is the NZ co-coordinator for ITHE, the International Tour Host Exchange organisation which assists amateurs with accommodation when travelling around the World.

We wish Dave well in the future and hope that he will enjoy having the award plaque on his wall.

Aola B. Johnston ZL1ALE

The election of Aola Johnson ZL1ALE as the 5th inductee to the NZ DX Hall of Fame recognizes Aola's extraordinary and unselfish contribution to the sport of Amateur Radio DXing in New Zealand.

Aola's DXpedition exploits around the Pacific with her husband Dave over many decades has enabled a generation of amateur radio operators worldwide to obtain that elusive new country with a YL operator.

Aola has operated as A35YL, ZK2YL, 5W1BY and others. Her personal achievement in the ARRL DXCC program is outstanding with 349 entities credited. She is the only lady in New Zealand on the ARRL DXCC Honour Roll.

She is a member of WARO, CLARA, YLRL, ALARA, BYLARA, and YLISB.

We wish Aola well in the future and hope that she will enjoy having the award plaque on her shack wall.

Congratulations and 73!
Lee Jennings, ZL2AL

2010 Olympic Winter Games - special Canadian prefixes

These prefixes will be available for use in Canada from February 1st to March 31st, to commemorate the 2010 Olympic Winter Games in British Columbia.

Canadian stations with a VA can use VG
VY can use XK
VO can use XJ
VE can use VX.

Known announced activities are:

VX9NC - VE9NC will operate during that time using primarily digital modes
on all HF bands.

VG7W - VE7OM will be operating as VG7W until January 31.

Radio Netherlands Madagascar relay back on the air

Following on from last weeks report here on the WIA National News Service of
fires in the broadcast facilities based on Madagasca, word that RNW now have
three transmitters back on the air.

The fourth transmitter, a 250 kW ABB rig, has suffered some heat damage and
must be repaired, which will take up to a week. Head of Distribution
Jan Willem Drexhage says that the Dutch word for the damaged components is
"hoogspanningsschakelaarbeveiligingselectronica" which he suggests would be
a good word for Scrabble, at least if you're playing it in Dutch :-)

(Andy Sennitt, Radio Netherlands/HCDX)

Remembering the unit men - Volta

Hello I'm Jim Linton VK3PC with another in a series of brief looks at
those who made discoveries and have their names as units of measurement.

Alessandro Volta, born in Como Italy in 1745 was absorbed in the study of
electricity during his school years.

At the age of 20 he wrote to many leading scientists and those letters showed a high level knowledge of the topic.

His discovery of electrical current generation by placing two dissimilar metals in brine was the start of battery technology.

The best metals for the purpose at the time were zinc and silver, and Volta created a number of cells to find that when connected in series it was possible to receive an electric shock.

His work made him famous and wealthy, and his name was adopted in 1881 as the unit of electromotive force.

MRCS launches Malaysia's first disaster radio service

The Malaysia Red Crescent Society (MRCS), Johor branch has launched the first disaster radio service in that country which will focus on swift communication to help disaster victims.

State MRCS chairman Md Jais Sarday who launched the service called 'Disaster Communication Amateur Radio' said that it was a way to prepare for quick action during natural disasters.

Jais, who is also the state Youth and Sports committee chairman, explained that during the floods, there was a major breakdown in communication between relief teams as most of them relied on their handphones.

"This new radio service however, uses a satellite system which will eradicate that problem," he told a press conference at the state MRCS headquarters in Tampoi.

"Communication is very important for relief teams during natural disasters and we have experienced this first hand during the major floods in the state in 2006."

Jais also said that 10 MRCS members were already qualified to use the radio service while 56 Northern Region Malay Amateur Radio Association members have signed up to become MRCS members.

Members will be placed in each district and will relay information to the headquarters who will inform relevant agencies for further action, he said.

+ HAMS IN THE NEWS: WHITE HOUSE NAMES HAM AS NEW CYBERSECURITY
COORDINATOR

On December 22, President Barack Obama named Howard A. Schmidt,
W7HAS, as the new White House Cybersecurity Coordinator. According to
the White House, Schmidt -- an ARRL member -- is one of the world's
leading authorities on computer security, with some 40 years of
experience in government, business and law enforcement and "will have
regular access to the President and serve as a key member of his
National Security Staff. He will also work closely with his economic
team to ensure that our cybersecurity efforts keep the Nation secure
and prosperous."

In an exclusive interview with the ARRL, Schmidt said that he credits
Amateur Radio with getting him involved with technology: "In high
school, one of my friends was a ham and he got me interested in
```

shortwave radio, which in turn got me into building shortwave radios and equipment, many from Heathkit. As I got older, I took courses from NRI and Bell and Howell in electronics and built a number of projects, preparing me for my first ham radio ticket. I love technology, and it was Amateur Radio that caused me to build my first computer -- a Sinclair ZX-80 to use for EME calculations. I studied all about the OSCAR systems and would build equipment to monitor when they would pass within range of Arizona. Building these computers to support my ham radio hobby gave me the technical skills that I needed to start doing computer crime investigations and work on the early stages of computer forensics, in turn enabling me to start working on cybersecurity issues." Read more here <http://www.arrl.org/news/stories/2009/12/23/11264/?nc=1>.

==> + SPOTLIGHT ON AMATEUR RADIO: 2009 SEES SURGE OF NEW AMATEUR RADIO LICENSEES

This past year was a banner year for new Amateur Radio licensees. According to ARRL VEC Manager Maria Somma, AB1FM, the FCC issued more than 30,000 new ham radio licenses. "In 2009, the demand for Amateur Radio exam sessions remained elevated and is still running at a higher rate than before the FCC's restructuring of the license requirements in 2007," Somma said. "This high level of exam session activity has produced an elevated influx of new applications, far outpacing recent years." A total of 30,144 new licenses were granted in 2009 -- an increase of almost 7.5 percent from 2008. In 2005, 16,368 new hams joined Amateur Radio's ranks; just five years later, that number had increased by almost 14,000 -- a whopping 84 percent! Read more here <http://www.arrl.org/news/stories/2010/01/06/11278/?nc=1>.

==> + PUBLIC SERVICE: MARS GETS NEW NAME AS IT FINE TUNES MISSION

On Wednesday, December 23, the Department of Defense (DoD) issued an Instruction concerning MARS, effective immediately. This Instruction gives the three MARS services -- Army, Air Force and Navy/Marine Corps -- a new focus on homeland security and a new name: Military Auxiliary Radio System. The Instruction is the first major revision to MARS since January 26, 1988 -- as such, the first revision since the 9/11 attacks and Hurricane Katrina, two major events that changed the way Amateur Radio dealt with emergency communications. In the past, MARS had focused primarily on emergency communications and health and welfare support. The DoD's Instruction now directs the three MARS services to provide "contingency radio communications" to support US government operations, DoD components and "civil authorities at all levels," providing for national security and emergency preparedness events. MARS units will still continue to provide health and welfare communications support "to military members, civilian employees and contractors of DoD Components, and civil agency employees and contractors, when in remote or isolated areas, in contingencies or whenever appropriate." MARS must also be capable of operation in "radio only" modes -- without landlines or the Internet -- and sustainable on emergency power (when public

utility power has failed); some MARS stations must be transportable for timely deployment. Read more here <http://www.arrl.org/news/stories/2009/12/24/11267/?nc=1>.

==> + COMING UP IN QST: LOOK FOR THE FEBRUARY ISSUE OF QST TO ARRIVE SOON

The February issue of QST <http://www.arrl.org/qst> is jam-packed with all sorts of news and information that today's Amateur Radio operator needs. From product reviews to experiments, from public service to on-the-air activities, the upcoming issue of QST has something for just about everyone. You'll find a plethora of technical and general interest articles, as well as monthly columns such as How's DX, Hamspeak, Vintage Radio and more. Click here <http://www.arrl.org/news/stories/2010/01/05/11277/?nc=1> to discover what's in store for you in the February issue of QST, the official journal of the ARRL.

==> HINTS & KINKS : A BNC CONNECTOR TOOL

Scott McCann, W3MEO, of Queenstown, Maryland, made this tool by soldering a BNC connector to the shaft of an old screwdriver (see photo): "I cut off the blade and tinned the shaft with ordinary solder and flux. I then removed the center pin and Teflon from a BNC plug and soldered the plug onto the screwdriver shaft. While it was hot, I 'locked up' the nut and collar with solder. Now I have a BNC driver, very handy for installing and removing BNC jacks without marring them, which can happen using pliers or other 'make do' tools." Do you have an idea or a simple project that has improved your operating? Maybe you've taken something commonly found around the home and developed a ham radio use for it? Why not share your hints with fellow hams in "Hints and Kinks," a monthly column in QST. If we publish your hint in QST, you will receive $20. Send your hints via e-mail <h&k@arrl.org> or to ARRL Headquarters, Attn: "Hints and Kinks," 225 Main Street, Newington, CT 06111. Please include your name, call sign, complete mailing address, daytime telephone number and e-mail address.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members, such as speaking with representatives of the FCC's five Commissioners concerning BPL, representing Amateur Radio at various meetings leading up to WRC-12, rolling out new platforms for the ARRL's Tech Q&A, processing certificates and endorsements for the Hiram Percy Maxim 140th Birthday Celebration and more. This installment covers the month of December. Read more here <http://www.arrl.org/news/features/2010/01/04/11274/?nc=1>.

==> + NOW YOU KNOW!: 4U1 CALL SIGNS

By ARRL News Editor S. Khrystyne Keane, K1SFA

This past weekend when I was working the ARRL RTTY Round-Up <http://www.arrl.org/contests/rules/2010/rtty.html>, I came across a call sign that I had never seen before. But that's not what confused me (as I become more active on the air, I run across all sorts of interesting call signs, such as 3V8ST). No, what confused me was that the supercheck database <http://www.supercheckpartial.com/> and my logging program <http://www.n1mm.com/> told me that the call sign was located in the US. We all know that AA-AL, K, N and W are all US prefixes. Then why was 4U1WB showing up as being located in the US, too?

Upon assurances I was not going crazy -- and more importantly that the supercheck database and my logger were not broken -- I found out that 4U1WB <http://www.qrz.com/db/4U1WB> is a United Nations call sign assigned to the World Bank Amateur Radio Club at the World Bank in Washington, DC. There are four 4U1 call signs around the globe: 4U1WB; 4U1UN <http://www.qrz.com/db/4u1un>, assigned to the United Nations; 4U1ITU <http://life.itu.ch/radioclub/>, assigned to the International Amateur Radio Club at the International Telecommunication Union, and 4U1VIC <http://www.qsl.net/4u1vic/>, assigned to the Vienna International Radio Club at the Vienna International Centre.

In the past, the United Nations has issued 4U call signs to various entities, allowing its use in areas where the UN has had peacekeeping forces. In 1995, an operation from Western Sahara used 4U/KC0PA, while Burundi used 4U9U in 1994.

While 4U1UN and 4U1ITU count for credit toward the ARRL's DXCC award, 4U1WB and 4U1VIC do not. The DXCC rules define 4U1WB and 4U1VIC as "ineligible areas." These areas are classified as "extraterritorial legal entit[ies] of any nature, including, but not limited to, embassies, consulates, monuments, offices of the United Nations agencies or related organizations, other inter-governmental organizations or diplomatic missions." This rule also clarifies that these two stations are considered part of their "host entity" for DXCC purposes. This makes 4U1WB part of the US and 4U1VIC part of Austria for DXCC purposes.

For more on 4U1UN, be sure to check out the February issue of QST. So now when you see or hear a call sign come across the ether to your radio with a 4U1 prefix, don't be alarmed when you find out that the call sign is based in the United States. Now you know!

==> SOLAR UPDATE

Tad "I yet have visions for the night <http://englishhistory.net/keats/poetry/odeonindolence.html>" Cook, K7RA, reports: Looking at sunspot numbers for the past few years, we can identify three bottoms by using our 3 month moving average -- October 2007 at 3, August 2008 at 1.1 and 1.5 in March 2009. Between each of these months, sunspot numbers rose and declined. Now the 3-month average centered on November 2009 is 10.163, the highest since August 2007's average at 10.17. Currently, the Sun is blank; this is

one of only two days without sunspots since December 9, but look for more sunspot activity soon. Look for more information in the Solar Update, available on the ARRL Web site on Friday, January 8. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by John Keats' Ode on Indolence <http://englishhistory.net/keats/poetry/odeonindolence.html>.

==> + VEC NEWS: NCVEC RELEASES NEW TECHNICIAN CLASS QUESTION POOL

The Question Pool Committee (QPC <http://www.ncvec.org/page.php?id=333>) of the National Conference of Volunteer Examiner Coordinators (NCVEC <http://www.ncvec.org/>) released the new Technician class (Element 2) question pool <http://www.ncvec.org/page.php?id=356> on Monday, January 4. This new question pool will become effective for all examinations administered on or after July 1, 2010; it will remain valid until June 30, 2014. The current Technician question pool that became effective July 1, 2006 will expire June 30, 2010. The new Technician pool contains approximately 400 questions, from which 35 are selected for an Element 2 examination; it will contain graphics and diagrams, something new for this element. The current General class question pool <http://www.ncvec.org/page.php?id=350> was effective July 1, 2007 and is valid through June 30, 2011. The current Amateur Extra class pool <http://www.ncvec.org/page.php?id=351> was effective July 1, 2008 and is valid until June 30, 2012.

==> THIS WEEK ON THE RADIO

<http://www.youtube.com/watch?v=pz6aBjmFRRU> This week, there is a running of the NCCC Sprint on January 8. The Mongolian RTTY DX Contest and the Midwinter Contest (CW) are January 9. The Hunting Lions in the Air Contest, the Michigan QRP January CW Contest, the WW PMC Contest and the North American QSO Party (CW) are January 9-10. The SKCC Weekend Sprint and the Midwinter Contest (Phone) are both on January 10. Next week, there is another running of the NCCC Sprint on January 15. The Hungarian DX Contest and the North American QSO Party (SSB) are January 16-17. The Feld Hell Sprint is January 17, the Run for the Bacon QRP Contest is January 18 and the NAQCC Straight Key/Bug Sprint is January 21. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> + ARRL RECOGNIZES: ROBERT H. WELSH, N3RW, WINS DECEMBER QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for December is Robert H. Welsh, N3RW, for his article "How the Ionosphere Was Discovered." Congratulations, Robert! The winner of the QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/members-only/QSTvote.html>. Cast a ballot for your favorite article in the January issue by Sunday, January 31.

==> + SILENT KEY: KNUT MAGNE HAUGLAND, LAST SURVIVING CREW MEMBER OF KON-TIKI EXPEDITION, PASSES AWAY

Knut Magne Haugland of Norway passed away on December 25. He was 92. Haugland was one of five men, who with Thor Heyerdahl in 1947, successfully crossed the Pacific Ocean in a 45 foot raft made of balsa wood and bamboo -- named Kon-Tiki -- to prove that people from South America could have settled Polynesia in pre-Columbian times. Heyerdahl and his companions sailed the raft for 101 days more than 4300 miles across the Pacific Ocean before smashing into a reef in the Tuamotu Islands on August 7, 1947. The expedition used call sign LI2B and carried three watertight radio transmitters. The first operated on the 40 and 20 meters, the second on 10 meters and the third on 6 meters. Each unit was made up entirely of 2E30 vacuum tubes providing 10 W of RF input. As an emergency backup, they also carried a German Mark V transceiver originally re-created by Britain's Special Operations Executive in 1942. Other equipment included a hand-cranked emergency set of the Gibson Girl type for use on the maritime bands, a special VHF set for contacting aircraft and two British Mark II transmitters. The Kon-Tiki also carried a National Radio Company NC-173 receiver. Dry batteries and a hand-cranked generator supplied the power. Read more here <http://www.arrl.org/news/stories/2009/12/28/11269/?nc=1>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, January 24, 2010, for these online course sessions <http://www.arrl.org/cep/student/> beginning on Friday, February 10, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1691 - January 8, 2010

The following is a closed circuit and not necessarily for air. With an update on amateur Radio Newsline's finances, here's our producer Bill Pasternak, WA6ITF:

--

OK. Ill try to be brief. Its January, We've paid about half of the December bills and we have no funds to pay the rest. About $74 in the bank right now. Simply said, we need your financial support to keep Newsline coming your way. The easy way to donate is by Pay-Pal at www.arnewsline.org. Our new mailing address will be at the end of this weeks report. We sincerely thank your for your ongoing support. And there, I kept it as brief as I could.

Jim.

--

Thank you Bill. Now, Amateur Radio Newsline report number 1691 with a release date of Friday, January 8, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Putting a new repeater on the air in the U-K may soon get a lot harder to do; a possible way that the United States might inventory all of its spectrum; South Africa's SumbandillaSat goes to QRP operation and a 102 year old Canadian ham is back on the year after being off for the past two decades. Find out whom she is and who provided the gear on Amateur Radio Newsline(tm) report number 1691 coming your way right now.

(Billboard Cart Here)

**

SPECTRUM IN TRANSITION: REPEATERS IN THE UK WARNED TO USE IT OR LOOSE IT

The world-wide spectrum crunch is becoming a major concern to hams in the United Kingdom. That's where putting up and maintaining a repeater may soon become more complex as an item posted on the website of the RSGB Emerging Technology Co-ordination Committee indicates that the criteria for processing repeater applications will be tightened. It could also impact negatively on both the owners and users of current UK systems on 70 centimeters and above. Frank Haas, KB4T, has the details:

--

Published on January 3rd, the article titled "Taking Stock" says that it is likely that strict criteria will be applied in the new year for new United Kingdom repeater applications. It says that against the backdrop of low activity levels, and poorly performing repeaters, the need to justify new applications is likely to be enforced to a far greater extent.

The article also includes a warning to those system operators whose currently operational repeaters have failed to meet the current criteria. It says that long-term non-operational repeaters, repeaters licensed but failing to ever begin service and repeaters nominally operational but widely reported as being either deaf or inaccessible for other reasons has become all too prevalent. In simple United States terms, the adage "use it or loose it" would likely be apropos and be applied.

Along those lines the article post goes on to state that the recent interest in digital modes has been a welcome boost to the repeater sector of the hobby. But it notes that challenges to amateur use of bands above 2 Meters is likely to require even greater proof that hams need and value these bands. This, to support their society in fending off commercial interest at 70centimeters and above.

For the Amateur Radio Newsline, I'm Frank Haas, KB4T, in Holly Hill, Florida.

--

The article ends by noting that the focus on radio spectrum in the UK is going to intensify in the coming decade. It says that radio amateurs in that nation have to be seen as having their house in order and make good use of the valuable spectrum at their disposal in the so called "sweet-spot" of the radio bands.

(From http://www.ukrepeater.net/ via Southgate)

**

SPECTRUM IN TRANSITION: ONE POSSIBLE WAY TO CONDUCT A SPECTRUM INVENTORY

A follow-up on last weeks story concerning the likelihood of a congressionally mandated inventory of the entire electromagnetic spectrum. This, to ascertain what might be available for transfer to wireless broadband.

>From the e-mail we have received, there are a lot of questions as to how such an inventory would be accomplished. There are many ways and with one possible and probable answer here's Amateur Radio Newsline's Norm Seeley, KI7UP:

--

If the spectrum inventory process is conducted in the same way as has been other government mandated surveys, it will not be a true census or head count. Rather, it will likely be based on data already in the

government's possession and that which it can obtain, rather than actual "monitoring" of all of the spectrum from DC to light and beyond. The government already has a pretty good idea of whom is on the air and where they are operating. This is because the FCC is mandated to keep accurate records of whom it licenses and to what spectrum a given licensee is assigned. At least the initial count would be whom the FCC has "licensed" to operate on a given frequency or in a given frequency band. As such, it can only be as accurate as the FCC database and not truly indicative of whom is on what spectral parcel at what time.

More accurate would be the tally of frequency usage by the government itself as maintained by the National Telecommunications and Information Agency's Office of Spectrum Management. The Office of Spectrum Management or O-S-M is responsible for managing the Federal Government's use of the radio frequency spectrum is kind of an FCC for the government itself.

If the inventory is accomplished based on records of what civil and government operations use a given frequency or band of frequencies, then for ham radio bands its all but impossible to know exactly whom is active and where he or she is operating. This is because our licenses permit not only bands of frequencies, but we choose the spot in a given band on which we operate. This as opposed to most other services that have specific "frequency assignments" or "channels." The best that can happen in ham radio is a very, very rough estimate of whom might be on a given amateur radio band but not a true count of actual activity. This is especially true as you hit the amateur radio allocations at 1 point 2 Gigahertz and above.

All this said, what you are not likely to see is banks of technicians sitting in front of manually operated or even computer controlled receivers and scanners at monitoring centers or in vehicles roaming the nation and counting signals. Even with the most modern automated receiving gear, such an actual headcount could take years. And as we have already reported, Representative Rick Boucher of Virginia who is sponsoring the measure that would mandate such a government inventory of the airwaves says it needs to be completed as quickly as is possible.

So it is more likely to be accomplished empirically rather than as a finite head count of whom is on the air at the moment in time a given frequency is looked at in Seattle, Des Moines, New York or anyplace in the nation. That includes here in Scottsdale, Arizona, where I'm Norm Seeley, KI7UP, reporting for the Amateur Radio Newsline.

--

The bottom line: If a complete spectrum tally is conducted it is likely to be more of a paper inventory rather than a true physical head count. That said, it will be interesting to learn the actual method to be used. (ARNewsline(tm))

**

HAM RADIO IN SPACE: SUMBANDILLASAT POWER OUT REDUCED

SumbandilaSat has gone to a QRP power level. In order to conserve power for other operations on the new SO-67 South African SumbandilaSat ham radio satellite, ground control team have reduced the power of the transponder carrying amateur radio to 2 and 1/2 watts.

Initial reports from stations in Australia indicate that the reduction is hardly noticeable and that the signals remain stronger than most other amateur radio satellites. Availability of the ZS0SUM payload will be during daylight hours when the satellite is in full sunlight. The actual schedule is published on-line at www.amsatsa.org.za. We will have more ham radio space related news later on in this weeks newscast. (SA-AMSAT)

**

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the N5IUF repeater serving Dallas Texas.

HELPING HAMS: VE3 GROUP BRINGS 102 YEAR OLD OPERATOR BACK ON THE AIR

A 102 year old ham is back on the air after being QRT the past two decades. This, thanks to the generosity of a Canadian ham radio association that helps those in need.

Ethel Williamson, VE3DTW, is a former lighthouse keeper who turns 103 in March. She had been off the air for at least 20 years when the Welland branch of the Handy Ham Amateur Radio Club of Canada herd about her. The organization offered to set up a radio for her at Niagara Ina Grafton Gage Village long-term-care home so she could get back on the air. She accepted their suggestion and it all came to fruition on Monday, January 4th. That's when she made her first QSO with a station in Melbourne, Australia, via a local repeater tied to VK land using IRLP.

Ethel Williamson became a ham after the Second World War when she and her late husband, Cyril, raised their sons, Doug and Bruce, while running the Port Weller lighthouse. The couple lived at the landmark overlooking the lake for 25 years. Now she lives in the long term care facility but thanks to ham radio her voice is once again be heard, worldwide. More about this amazing lady can be found at

http://wellandtribune.ca/ArticleDisplay.aspx?e"46214 (Welland Tribune OnLine)

**

RESCUE RADIO: MALAYSIA RED CRESCENT FORMS AMATEUR BASED RESCUE RADIO SERVICE

The Malaysia Red Crescent Society's Johor branch has launched that nations first ham radio based rescue radio service. One that will focus on swift communication to help victims in time of disaster.

The new response group is called Disaster Communication Amateur Radio. The State Red Crescent Society chairman who launched the service said that it was a way to prepare for quick action during natural emergencies and other events where a swift communications response is required.

According to the chairman ten Malaysia Red Crescent Society members are already qualified to use the new radio service. Another fifty-six from the Northern Region Malay Amateur Radio Association have signed up to become Red Crescent members as well. If a disaster scenario strikes, they will relay information to the headquarters which will in turn inform relevant agencies for further action. (Malaysian Red Crescent release)

**

HAM TESTING: NCVEC RELEASES NEW TECH QUESTION POOL

Some new questions and some new answers. This as the National Conference of Volunteer Examiner Coordinators Question Pool Committee released the new Technician class Element 2 question pool on Monday, January 4th.

The new Technician pool contains approximately 400 questions, from which 35 are to selected for an Element 2 examination. The current Technician question pool became effective July 1, 2006 and will go out of service this after June 30th.

This new question pool will become effective for all Technician class examinations administered on or after this coming July 1st and will remain valid until June 30, 2014. (NCVEC)

**

RADIO EDUCATION: THE FOUNDATION FOR AMATEUR RADIO 2010 - 2011 SCHOLARSHIPS

Its January and it's the time when the Foundation for Amateur Radio puts out word that it plans to administer forty eight scholarships for the 2010 through 2011 academic year. This, to assist licensed radio amateurs in the pursuit of higher education.

The Foundation fully funds two of these scholarships. The remainder are administered by the Foundation, without cost for various donors. All licensed radio amateurs may compete for these awards but they must be planning to pursue a full time course of studies beyond high school and be enrolled, or have been accepted for enrollment, at an accredited university, college or technical school.

The awards range from $5,000 to $500 with preference given in some cases to residents of specified geographical areas or the pursuit of certain study programs. Non-US residents are eligible to apply for some of the scholarships.

Additional information and an application form may be requested by letter or QSL card, postmarked prior to January 31, 2010 from FAR Scholarships, Post Office Box 911, Columbia, Maryland 21044. Applications are also available for download from www.farweb.org. (FAR)

**

RECOMMENDED READING: "THUNDERSTRUCK BY ERIK LARSON

"Thunderstruck" is a book by Erik Larson that is a true story that interweaves notable researchers and inventors like Guglielmo Marconi, John Fleming, Heinrich Hertz, and Nikola Tesla with that of Dr. Hawley Crippen, a famous murderer.

Crippen, was an American physician hanged in Pentonville Prison, London, England, on November 23, 1910, for the murder of his wife, Cora Henrietta Crippen. He holds the unenviable distinction of being the first criminal ever to be captured with the aid of wireless communication.

As you might surmise, the story takes place between the late 1800's and the early 1900's and is historically accurate . This is especially true in its treatment of how Marconi became a major "mover and shaker" of his day accompanied by the obstacles that go with success.

Any ham that is a reader should enjoy this book. According to the QCWA's Val Erwin, W5PUT, once he started reading, he could not put it down.

"Thunderstruck" is available either in hardback or paperback at all normal book outlets and from on-line booksellers like Amazon dot com. (W5PUT)

**

RADIO BUSINESS: COMMEMORATIVE PK-232 25th ANNIVERSARY SOFTWARE CD FROM CSS

Creative Services Software has announced that the pre-order period is open for its PK-232 25th Anniversary Collectable Compact Disc. This is a limited edition CD that includes such well known programs as PakRatt for DOS, PkFax for DOS, PakRatt Lite, Pkterm 99 and many others. Also included are manuals for all the programs in .PDF file format so that those that have lost their manuals can print them out again. More information on this CD is available at www dot cssincorp dot com. (CSS Release)

**

ON THE AIR: THE NEW CW OPERATORS CLUB

The CW Operators' Club or CWops is a newly formed club aimed at encouraging the use of Morse in amateur radio communications, and to promote goodwill among radio amateurs around the world.

CWops is international in scope, membership and management. Its focus is the use of CW, whether for contesting, DXing or ragchewing.

More information on this new pro Morse organization is on-line at www.cwops.org. (N3JT, Southgate)

**

RADIO INFO: TAPR SEEKS ARTICLES FOR QUARTERLY NEWSLETTER

Tucson Amateur Packet Radio is seeking articles for the next issue of its quarterly newsletter Packet Status Register. All contributions are welcome, so if you have anything for the newsletter, please e-mail what you have to PSR Editor Stan Horzepa, WA1LOU before the January 15th deadline. Stan's e-mail is WA1LOU at TAPR dot org. (TAPR)

**

HAM RADIO BUSINESS: FRENCH RADIOCOM.ORG SHUTS DOWN

The French ham radio website radiocom.org is going Q-R-T after 10 years on the World-Wide-Web. Editor Francis Roch, F6AIU, says that a combination of the long hours that must be devoted to operating the website along with receiving little assistance from the European ham community have lead to the decision to close down effective January 1st. An editorial giving more information on the decision to shut down, writer in French is at the website at www.radiocom.org (Southgate, F8KBL)

**

THE SOCIAL SCENE: IRELANDS IRTS AGM APRIL 24 TO 25

On the ham radio social scene, the Dundalk Amateur Radio Society shall be hosting the 78th Irish Radio Transmitters Society Annual general meeting over the weekend of April 24th and 25th. The venue for the event is the Fairways Hotel, Dundalk Court, Louth. More info is on-line at www dot ei7dar dot com. (IRTS)

**

NAMES IN THE NEWS: KB1SF NAMED INTERIM AMSAT-NA TREASURER

Some names in the news. First up is former AMSAT North America President Keith Baker, KB1SF, who has been appointed as interim AMSAT Treasurer until the Board of Directors can name a permanent replacement for Gunther Meisse, W8GSM.

Keith Baker, KB1SF, appointment was made by AMSAT President Barry Baines, WD4ASW. As many of you will likely remember, Baker served AMSAT throughout the 1990's and early 2000's both as a Board of Directors member as well as Executive Vice President. This, before taking a turn

as President from 1998 until 2000.

It is expected that the AMSAT North America Board of Directors will meet in early January via teleconference to formally elect Keith to fulfill the current Treasurers term that expires in October of this year. (AMSAT-NA)

**

NAMES IN THE NEWS: NEW ZEALAND DX HALL OF FAME INDUCTEES FOR 2010

The New Zealand DX Hall of Fame has announced the election of three new members to that prestigious body. This years inductees include Dave Johnston ZL1AMN, Aola Johnston ZL1ALE and the late Dave Brown, ZL1HY. All three are being honored for their contributions to the art of DX'ing. The New Zealand DX Hall of Fame was established several years ago celebrate the achievements those outstanding Zed-L radio amateurs who have excelled in the radiosport aspect of the hobby over many years. (ZL2AL)

**

NAMES IN THE NEWS: CQ COLUMNIST DAVE INGRAM, K4TWJ, HOSPITALIZED

And a speedy recovery wish to CQ Magazine columnist Dave Ingram, K4TWJ. Dave is currently in a Birmingham, Alabama, hospital recovering from a heart attack he suffered on Thursday December 31st. He was initially treated with an emergency angioplasty to open three completely closed coronary arteries and reported to be improving. Get well cards and letters should be sent to K4TWJ at his callbook address. (ARNewsline(tm))

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: REPEATER PIONEER GEORGE LeDOUX, K1TKJ - S.K.

It is estimated that the median age of amateur operators is now 60+. So, it is no surprise that the monthly list of Silent Keys continues to grow. Each of those hams undoubtedly deserves a special note. However, it is with a lot of personal sorrow that I tell you of the passing of one of ham radio's legendary repeater pioneers. George LeDoux, K1TKJ of Modesto, California.

Originally from Litchfield, Connecticut, in the late 60's, George became transmitter supervisor for the New York City Spanish language TV station WXTV with it's tower located atop the 55 story City Service building at 70 Pine Street in midtown Manhattan. George was an early adopter of 2 meter FM and viewed the opportunity to build a repeater in the nations largest city at 500 feet in the air as irresistible. And so, the WA2SUR repeater became a reality.

George didn't invent repeaters. That was accomplished by the late Arthur M. Gentry, W6MEP, almost a decade earlier. What George did was to bring them from mere signal repeating devices to the level of early ham radio social networking on 2 meters. A place where a ham could go to forget for a while life's day to day drudgery. And his WA2SUR repeater was among the first if not the very first to adopt this "lets have fun attitude". Soon, the "Sewer" as it became known, had over 500 active amateurs and wide coverage throughout New York, Connecticut and New Jersey. However, it was affable George LeDoux's personality that spearheaded what became a social group of repeater users' rarely paralleled before or since.

If you ventured onto 2 meters in the late 1960's and lived anywhere within 100 miles or so of Manhattan, then you quickly found WA2SUR and bought a set of crystals to get on that fun meeting place. While most other systems prided themselves on emergency preparedness or the distance they could cover, in the case of WA2SUR, the pride for K1TKJ was in knowing he had created a place in ham radio for folks to just have fun.

And have fun they did. Not only were their multiple layers of conversations 24 hours a day, but also picnics, parties, dinner gatherings and the like. And George oversaw it all from his perch atop 70 Pine Street in New York City and from where his voice could be heard daily, usually laughingly saying what became his well known fun signature line of: "Shut up. Shut up. Get off my frequency." If George hurled that barb your way, you knew that you had been accepted as a member of the WA2SUR family.

After leaving WXTV George moved west to California where he became the Chief Engineer of another television station. In April of 1984 he began an in house manufacturing operation for the station to supply its own needs for a new UHF transmitter.

It was a good design and word spread. Soon that station was building two, and then three transmitters with George's highly efficient design. After satisfying their own needs and the needs of the other stations, George's employer decided to stick to broadcasting and to get out of the manufacturing business. A deal was struck in which the assets were transferred and Astre Systems Inc. which was formed in July of 1986 with George LeDoux, K1TKJ, as its president.

At the time of his passing he was upgrading the modulators and transmitter control circuitry for the 14 one hundred thousand watt transmitters at shortwave station WYFR in Okeechobee, Florida owned by

Family Radio. Because of this, K1TKJ was making frequent trips to Florida and to his suppliers to build his custom made boards.

On Sunday morning, December 28th, he was about to board a plane in San Francisco to Salt Lake City to investigate delays from one of his suppliers. He was in the waiting area at the airport when he suffered shortness of breath. Others in the waiting area tried to calm him, but soon, he fell into unconsciousness and was not able to be revived.

George LeDoux, K1TKJ, is survived by his wife Cindy and 5 grown children. His son George was a partner in the Astre Systems business. A memorial service was held on Friday, January 8th at Grace Lutheran Church in Modesto.

Ironically, George's daughter Christine LeDoux is a world renowned Country Folk singer and had written several songs about her dad including a somewhat prophetic one about his failing heart called "Angel you've come too soon".

George LeDoux, K1TKJ will be missed by many of us such as myself who knew him well.

73 my good friend. (W2JKD, ARNewsline(tm))

**

EMERGING TECHNOLOGY: FUEL CELL POWERED MOBILES MAY BE HERE SOON

A new way to get around may one day have an impact on the way we hams operate mobile in motion. Don Wilbanks, AE5DW, reports on an emerging technology called the FCV:

--

Fuel Cell powered vehicles or FCV's are expected to be a technology that could revolutionize road transportation and possibly the way hams operate mobile in the coming years.

FCV's are normally powered by pure hydrogen gas onboard in high-pressure tanks, but some can also be used with hydrogen rich fuels such as methanol, natural gas or even gasoline. Previously, FCV's only worked efficiently in warm weather, but this latest technology permits operation at temperatures as low as minus 13 degrees Fahrenheit. This should make the concept accessible for almost everyone anywhere.

So far Fuel Cell powered vehicles only have a maximum range of about 250 miles, but that's more than enough for most everyday shopping or job commutes. And FCV technology improves so should the distance these vehicles can travel before refills.

I'm Don Wilbanks, AE5DW.

--

This emerging technology also has the potential to significantly reduce energy use and harmful emissions, as well as our dependence on foreign oil. And being far electrically quieter than todays cars and light trucks means better signal reception when operating on the road. (Technology Today)

**

HAM RADIO IN SPACE: ARISS DEBRIEFING SESSION HELD

In ham radio space related news, an Amateur Radio on the International Space Station debriefing session was scheduled with Expedition 20 and 21 crew members Nicole Stott, KE5GJN and Robert Thirsk, VA3CSA on Tuesday, January 5th. The feedback provided by the astronauts will help ARISS update program procedures. (ANS)

**

HAM RADIO IN SPACE: ARISS HELPS CELEBRATE MARCONI EVENT

An International Space Station school contact was planned for January 7th with participants at Marconi Commemoration Event at the University of Rome Tor Vergata. The event was scheduled to begin at approximately 09:00 UTC and was to be a telebridge between NA1SS and W6SRJ.

The University of Rome Tor Vergata is one of the largest research-based institutions in Italy. It is an international center for research and education and it is well known for scientific studies. In recent years its activity of technology transfer and cooperation with other public and private organizations in different fields has given it an increasingly important role. (AA4KN)

**

HAM RADIO IN SPACE: NEW RS38 SATELLITE BEACON HEARD

Mike Rupprecht, DK3WN, reports on the hearing a new CW satellite beacon from the RS38 bird on 435.490 MHz. In an e-mail to the AMSAT Bulletin Board, Rupprecht indicates that it is coming from the Russian UGATUSat satellite and indicating that UGATUSat is RS-38. An audio file of the beacon in operation can be heard at www dot dk3wn dot info. (DK3WN, Southgate)

**

ON THE AIR: BLACK SEA CONTEST CLUB CONTEST

On the air, word that the Black Sea Contest Club will sponsor the "Black Sea Cup International Contest 2010" which will be held between 1200 UTC on February 6th to 1159 UTC on February 7th. For more information on the contest, please visit the BSCC web page at http://bscc.in (BSCC)

**

DX

In DX, word that LA9SN will be operational portable as CE0Z from Juan Fernandez Island from March 16th to the 23rd. Listen out for him on 80 through10 meters using mostly CW at 100 watts. QSL via his home callsign.

DL5AXX will be active as J38XX from Grenada between February 10th to the 24th. His activity will be focused on the lower bands, but he will also participate in the ARRL International DX CW Contest on February 20th and 21st as a single operator all band entry. QSL via his home callsign.

(Above from various DX news sources.)

**

THAT FINAL ITEM: K8CX PRESENTS THE 2009 DX SOUND BITES

And finally this week, get ready for some recent nostalgia. This as Tom Roscoe, K8CX, provides DXers and all other hams with 146 memorable DX sound clips from 2009. Its all just a mouse click way at Tom's famous ham gallery Web site where you can listen to snippets of some top gun DXpeditions like VK9NI which operated from Norfolk Island last July:

--

Actual contact audio - hear it in the MP3 version of this weeks newscast downloadable at www.arnewsline.org

--

And while at Tom's website be sure to also check out some of his other features, including his 12 years of "Rare DX Sound Clips," his QSL Card Museum, the Dayton Photo Galleries and his Tribute to Silent Key ham radio operators. And its all in cyberspace at hamgallery.com. (Southgate)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 10th January 2010

The news headlines

Chinese amateur radio satellite in space and working well

New CW amateur radio club

Final call for Presidential Dinner tickets

The news team and all the staff at RSGB HQ would like to wish our newsreaders, listeners and online readers a very happy New Year.

On 15 December at 0230UTC China launched its first amateur radio satellite, Hope 1. It received an official Orbital Satellite Carrying Amateur Radio designation, HO-68, six days later. The communication payload includes a CW beacon and three cross-band 145 to 435 MHz transponders for SSB, CW, FM and digital AX.25 packet operation. The linear transponder, used for SSB and CW working, has proved very popular. It has a bandwidth of 50kHz, which allows about 10 to 15 simultaneous contacts to take place.

Essex CW Amateur Radio Club is a new group that is passionate about CW. It aims to maintain and promote the use of Morse Code. CW is extremely effective under poor signal-to-noise conditions and opens up many new contacts and activities within the amateur radio hobby. Although formed in Essex, it welcomes members from anywhere in the UK or abroad who share the passion for CW. The club will use the callsign G1FCW on air. It welcomes proficient CW users as full members and those aspiring to become proficient as associate members. The group plans to undertake a range of activities that involve CW, including but not limited to contesting, practice sessions and encouragement for those learning the code. Further information may be obtained from visiting the club's website, www.essexcw.org.uk.

There is still time to order your ticket for the RSGB Presidential Installation Dinner on 16 January. It will be held at the Daresbury Park, Chester Road, Warrington. The keynote speaker will be Tim Ellam, VE6SH, President of the International Amateur Radio Union. Tickets cost just £25 and are available from the RSGB Shop at www.rsgb.org/dinnerticket, or by telephone from HQ on 01234 832 700, selecting option 1 for sales.

John Ellerton, G3NCN will be ceasing his GB2CW broadcasts until May as he has to have a major operation and will not be well enough until then to resume. We wish him well with the procedure.

The RSGB Spectrum Defence Fund is continuing to make progress with the aim of challenging Ofcom as regards its interpretation of the various Acts and Directives that cover PLA/PLT and the threat they pose. The RSGB is appreciative of the efforts and support from Society members, the UKQRM group and its membership who were amongst the very first to donate, among many others. If you would like to donate you can do so online via the RSGB website or by cheque to Spectrum Defence, RSGB, 3 Abbey Court, Priory Business Park, Bedford MK44 3WH.

2

Mid Ulster Amateur Radio Club have a MI6 Course beginning on Wednesday 13 January. Anyone interested please contact Martin, MI0YMF on 02838 348 451 or go to www.muarc.com for details.

SOS Radio Week is a fund raising event for the Royal National Lifeboat institution and is supported by many radio clubs in the UK. The event starts at 0000 on 23 January and finishes at 2359 on 31 January. This includes the RNLI's own SOS fund raising day on 29 January. Club will be participating at different times throughout the week. The latest information is on the website www.sosradioweek.org.uk.

Matt Cox, M3COX is seeking information about the life and radio activities of Norman Clark, G2BUC for Norman's family. Anyone who knew him please e-mail matt at m3cox@live.co.uk.

Bolsover Amateur Radio Society has re-launched its monthly shack night. The club will be active around the bands on the first Wednesday of every month. Details of which bands will be posted on www.g4rsb.org.uk news page a few days before the event. The club will also be running a Sunday night net on 2m, around 145.450MHz at 8pm. All amateurs are welcome to call in.

G0JLX is running another series of courses, initially for Foundation and Intermediate licences, starting on Saturday 9 January. Advanced courses and exams are available on request. The courses and exams will be held at Bishop's Waltham Scout HQ. For information on any course, please contact Andy, G0JLX on 07768 282880 or by e-mail to g0jlx@mail.com.

And now for the details of rallies and events for the coming week

On 17 January the Red Rose Winter Rally will take place in the Lowton Civic Centre, postcode WA3 2AH, just off the A580 East Lancs Road. Doors open at 10am and there is free car parking. Visitors will find trade stands and a bring and buy as well as special interest groups and an RSGB bookstall at the rally. Further details from Steve on 01942 888900.

Also on 17 January, the Dover Amateur Radio Club Rally will be held at Whitfield Village Hall, Dover CT16 3LY. Talk in will be via GB3KS.

Following a fire at the Afan Lido in Port Talbot, the rally organisers of the Swansea Radio Rally, due to be held on 21 February, are now discussing an alternative venue for the event. When a new booking has been made, details will appear on the Swansea ARS website www.radioclubs.net/swanseaars and the RSGB website.

Now for the news of special events

We have not received details of any special event stations operating this week.

3

And now the HF DX news compiled from 425 DX News and other sources.

Cezar, YO8TLC will be active as 8Q7CE from the Maldives, which is IOTA reference AS-013, until 25 January. He plans to operate holiday style on 40, 30 and 20 metres, mainly CW and some SSB. QSL via his home call, direct or bureau.

Gerry, VE6LB will be active as A6/VE6LB from Dubai, United Arab Emirates until 8 February. He plans to operate holiday style on 40 to 12 metres mainly CW with 100 watts and a wire antenna. QSL via his home call and LoTW.

Tom, C6ANM will be active from January through to April on 160 to 6 metres CW and SSB, including participation in the CQ WW 160m DX Contests, both CW and SSB, and in the ARRL DX SSB Contest. He will primarily operate from Nassau. QSL preferably via LoTW or alternatively direct to WA2IYO.

Now the contest news

There'll be a great deal of activity on 80m on Sunday 10th, when CW AFS takes place. For newcomers and the less proficient, frequencies around 3580kHz are reserved for slower speed contacts. As a general rule, the lower you go in the allocated band of 3510 to 3590kHz, the faster the Morse gets. Times are 1400 to 1800UTC and the exchange is signal report and serial number.

Participation in the UK Activity Contests has rocketed since they were introduced. 12 January sees the 432MHz Activity Contest taking place between 2000 and 2230UTC. The exchange is signal report, serial number and locator.

January is an 80m spectacular and the SSB leg of the 80m Club Championship is on 13 January. With 10W and 100W categories and socially acceptable 90-minute operating sessions, it is quite straightforward for many to partake. People operate as individuals, but all the scores made by members of a club are added together to build the overall results table &#65533; and there's no limit to the number of members who can join in. Times are 2000 to 2130UTC and the exchange is

signal report and serial number.

The SSB AFS takes place on Saturday 16 January. The allocated band of 3600 to 3750kHz will be absolutely packed. Times are 1400 to 1800UTC and the exchange is signal report and serial number.

Now the solar factual data for the period from the 14th December to the 3rd of January, compiled by Neil Clarke, G0CAS on the 4th of January.

First a brief look at the present solar minimum. This sunspot minimum as lasted a lot longer than most predicted. In fact cycle 23 lasted 12 years 10 months, although this is still due to be confirmed. If it is confirmed, this would make it the second longest cycle on record. The longest was cycle 4 and lasted 13 years 7 months and started in October 1784. What followed was that the next sunspot maximum was the lowest on record. Strangely, both 2008 and 2009 had the same number of sunspot groups but the important factor is that while the majority of spots in 2008 belonged to the old cycle, in 2009 the majority belonged to the new cycle. One observation that as happened without too much attention is how quiet the geomagnetic field as been. Last minimum saw no days at all with the Ap index at zero, whereas this in minimum there

4

have so far been 25, eight of which occurred during December 2009. The number of days with the Ap index at one unit was 11 last minimum and so far this minimum there have been 90. The last four months of 2009 saw only 2 days when the Ap index was in double figures, the 22nd and the 30th of October, with an Ap of 14 and 11 units respectively.

During the period sunspots were visible every day except for the 25th. Solar activity was very low to low. C class solar flares took place on 7 days. The largest was a C7 on the 18th. Solar flux levels declined from 87 units on the 17th to 75 by the 1st. The 90 day solar flux average on the 3rd was 75 units. Geomagnetic activity was quiet every day. The most disturbed day was the 14th with an Ap index of only 4 units. In fact that was the most disturbed day for the whole of December. The average for the month was an incredible Ap one point three units. Solar wind speeds were slow for the majority of the period. Particle densities were low except for a couple of days around the 19th. Bz showed only minor variations most days.

And finally the solar forecast. This week solar activity is expected to be at very low to low levels with a slight chance that a C class solar flare could take place. Solar flux levels are expected to be around the 80 mark. Geomagnetic activity should be mostly quiet everyday. MUFs during daylight hours at equal latitudes should be about 20MHz for the south and 17MHz for the north. Darkness hour lows are expected to be around 7MHz. Paths this week to Australia should have a maximum usable frequency with a 50 per cent success rate of about 21MHz. The optimum working frequency with a 90 per cent success rate will be around 18MHz. The best time to try this path will be between 0900 and 1300UTC.

And that's all for this week from the propagation team.

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA Oxford and District Amateur Radio Society has moved its meeting days and venue. From the start of 2010 its meetings are at 7.30pm on the first and third Tuesday of every month, at the Gladiator Club, 263 Iffley Road, Oxford OX4 1SJ. Contact the ODARS club secretary, Janet Proudman, 2E0LLM on 01865 723764 or by email to janet,proudman@googlemail.com. On Monday 11 January Coulsdon Amateur Transmitting Society is having its annual dinner at the Rubbing House, Epsom Racecourse. Contact Andy, G8JAC, by email to g8jac@btinternet.com. On Monday 11 January Felixstowe and District Amateur Radio Society is closed. Contact Paul, G4YQC, by email to pjw@btinternet.com. On Monday 11 January Milton Keynes Amateur Radio Society is having a New Year quiz night. Details on the web at www.mkars.org.uk. On Tuesday 12 January Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008. On Tuesday 12 January Harwell Amateur Radio Society is preparing for the rally and having a quiz night. Contact Malcolm, G8NRP, on 01235 524844. On Wednesday 13 January Aylesbury Vale Radio Society is holding its annual dinner. Contact Roger, G3MEH, on 01442 826 651. On Wednesday 13 January Chelmsford Amateur Radio Society is having a committee meeting at Danbury. Contact Martyn, G1EFL, on 01245 469 008. On Wednesday 13 January Dover Radio Club is having a Christmas gadgets show-and-tell. Contact Brian, G4SAU, by email to g4sau@DARC.org.uk. On Wednesday 13 January Farnborough and District Radio Society is having a talk on EMC by G3KND. Contact Derek, G3OFA, by email to mail@farnboroughradio.org.uk. On Wednesday 13 January Norfolk Amateur Radio Club is having an informal, construction and workshop evening. Contact Chris Danby, G0DWV, on 01603 419204.

On Wednesday 13 January South Essex Amateur Radio Society is making final preparations and plans for the Canvey Rally. Contact Norman, M0FZW, on 01268 692776. On Wednesday 13 January Worthing and District Amateur Radio Club is having a talk on fixing things with adhesives, solders and brazing by Norman Billingham, M0EBI. Contact Roy, G4GPX, on 01903 753 893. On Thursday 14 January Bittern Dx Group is having an informal evening and invites anyone with an interest in amateur radio

to attend. Contact Linda, G0AJJ, on 01692 404154.

6

On Thursday 14 January Chelmsford Amateur Radio Society commences its Foundation Course. Contact Martyn, G1EFL, on 01245 469 008. On Thursday 14 January Edgware and District Radio Society is holding its AGM. Contact Mike, G4RNW, on 020 8950 0658. On Thursday 14 January King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV, by email to ral-g3rsv@supanet.com. On Thursday 14 January Lowestoft and District Pye Amateur Radio Club is having its annual dinner at the Trowel and Hammer. Contact Phil, G0JSG, on 01502 585448. On Thursday 14 January Reading and District Amateur Radio Club is having a talk on HV power distribution to railways by Richard O'Keeffe, G0FFL. Contact Pete, G8FRC, on 01189 695 697. On Thursday 14 January Shefford and District Amateur Radio Society is working on the club project. Contact David, G8UOD, on 01234 742 757. On Friday 15 January Mid-Sussex Amateur Radio Society is having a Radio Night. Contact Peter, G4AKG, on 01444 239371. On Friday 15 January Wey Valley Amateur Radio Group is having a club night. Details on the web at www.weyvalleyarg.org.uk.

On Sunday 17 January Dover Radio Club Dover is holding its rally. Contact Brian, G4SAU, by email to g4sau@DARC.org.uk, or see www.darc.org.uk for details.

NEWS FOR THE SOUTH-WEST On Monday 11 January Cornish Radio Amateur Club Computer Section is having a talk on Photoshop Layers by Alex, G4DEO. Contact Steve, G7VOH, on 01209 844939. On Tuesday 12 January Blackmore Vale Amateur Radio Society is having a talk on the magnetron by Chuck, G0MDK. Contact Tony G0GFL, on 01258 860741. On Wednesday 13 January Taunton and District Amateur Radio Club is operating the club station and holding a Morse class. Contact William, G3WNI, on 01823 666 234. On Wednesday 13 January Thornbury and South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048. On Thursday 14 January South Bristol Amateur Radio Club is having a display of club archives by Muriel, G4YZR. Contact Len, G4RZY, on 01275 834 282. On Thursday 14 January Swindon and District Amateur Radio Club is having a talk on the development of the Morse key by Dennis, G3LLZ. Contact Den, M0ACM, on 07810 317750. On Thursday 14 January Yeovil Amateur Radio Club is having a talk on test equipment by Bob, G7LNJ. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

7

NEWS FOR THE MIDLANDS On Monday 11 January Gloucester Amateur Radio And Electronics Society is operating club equipment. Contact Anne, 2E1GKY, on 01452 548478, daytime. On Monday 11 January South Birmingham Radio Society is having a contest planning meeting. Contact Don, on 0121 458 1603. On Monday 11 January Sutton Coldfield Amateur Radio Society has its first meeting of the new year. Contact Robert Bird by email to spirit.guide@hotmail.co.uk.

SARL NEWS - SUNDAY 10 JANUARY 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web-stream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325; 14,235; 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750; 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit.)

In the news today:

SARL NATIONAL CONVENTION - BOOK FROM NEXT WEEK

BACAR LAUNCH IN THE WESTERN CAPE

PEARS VHF/UHF CONTEST NEXT WEEKEND

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

SARL NATIONAL CONVENTION - BOOK FROM NEXT WEEK

Bookings for the SARL National Convention will open next week. The convention, to be held from Friday 23 to Sunday 25 April 2010 in Port Elizabeth, will be hosted by the Port Elizabeth Amateur Radio Society.

There will be welcoming spitbraai on the Friday evening. On the Saturday, there will be variety of activities after the AGM, which will be in the morning. Delegates have a choice of visiting the Seaview Game Park, a visit to Hightech Automotive, home of the AC Cobra. Book for the PIC course presented by John Willescroft, ZS6EF, or attend a DXing think-tank hosted by Donovan van Loggerenberg, ZS2DL.

The annual Awards Banquet will be held at the Italian Social Club with Hans Blondeel Timmerman, PB2T, President of Region 1 of the International Amateur Radio Union, as the guest speaker.

The convention will end with a breakfast on Sunday morning.

There will be many other surprises and lucky draws. Watch regular updates on SARL News and on www.sarl.org.za. The booking form will be available from Wednesday 13 January 2010.

HOME CONSTRUCTION COURSE - CAPE TOWN FULLY BOOKED

The SARL Home Construction course in Cape Town on 23 January 2010 is now fully booked. There is, however, still space left at the Durban and Port Elizabeth venues.

Full details and a booking form are available on www.sarl.org.za, select 'Activities' and then 'RTA" and navigate from there. If you have booked for any of the courses, your name will appear on the RTA pages. Please check, and if your name is not there send an e-mail to rta@sarl.org.za.

BACAR LAUNCH IN THE WESTERN CAPE

The first flight of BACAR-2010 is planned for Sunday 24 January. The payload will be multifunctional and include a 20 and 40 m SSB transceiver, a 2 m parrot repeater, a 2 metre Doppler beacon (equipped with GPS) as well as a camera.

SARL News and www.amsatsa.org.za will carry regular updates.

SARL MEMBERSHIP BROKE THE 1 300 BARRIER

The SARL started the New Year with 1 323 members. Our target for the end of January is 1 400 and we need your help to achieve this. Talk to your friends who are not yet members and convince them that their support is vital to make the SARL's voice stronger when we negotiate with the authorities. Right now, the subscription fee for the next six months is only R200. Visit www.sarl.org.za for details on how to join, or call Mariska on 011 675 2393.

PROPOSE YOUR FRIEND FOR A SARL AWARD

We are sure that you know someone in your circle of club members who excels in some aspect of Amateur Radio. Propose that person for an award to be presented at the annual awards dinner at the National Convention in Port Elizabeth. You can find full details in 'ClubTalk' on the SARL news pages. Go to www.sarl.org.za, select 'News' and then 'ClubTalk'.

CONTEST NEWS

The first session of the annual PEARS VHF/UHF contest starts at 18:00 CAT on Friday 15 January and closes at 16:00 CAT on Saturday 16 January. The second session commences at 16:01 CAT on Saturday and ends at 14:00 CAT on Sunday 17 January. Participation can be as a base station, a field station, a club or multi-operator station or as a limited station. Activity is on FM, SSB and digitally on 2, 4 and 6 m, as well as 23 and 70 cm. A valid contact consists of an exchange of call signs, signal reports and location, such as the six digit-Maidenhead grid locator or co-ordinates. The rules are available

at www.zs2pe.co.za.

PEARS HF QSO Party. It is with pleasure that PEARS announces the results of the PEARS HF QSO Party held on 6 December 2009. Congratulations to the winners and many thanks to all those who took part. The complete results will be made available on the PEARS website.

Unlimited Category

1st Jan Botha, ZS4JAN, 162 points; 2nd Andr&#65533; le Roux, ZS2AL 110; and 3rd Otto van Rooyen, ZS2Q, 97 points.

Restricted Category

1st Johan Visagie, ZR4LP/6, 60; and 2nd Petrus Delport, ZR6BVS, 10 points.

DX Category

1st Andy Cory, 3DA0TM, 66 points.

Novice Category

No entries were received.

MOTIONS FOR THE ANNUAL GENERAL MEETING

In last week's SARL New the incorrect fax number was regrettably given for the submission of motions for the SARL AGM. The correct fax number is 088 011 675 2793.

Remember that each motion must include a concise description of the motion and a motivation in support thereof. A proposer and seconder must sign each motion.

Motions must reach the Secretary not later than Sunday 31 January 2010. Motions must be addressed to The Secretary, SARL and mailed to PO Box 1721, Strubensvallei, 1735, or faxed to 088 011 675 2793.

CLUB NEWS

The Antique Wireless Association (AWA) is pleased to announce its new committee for 2010. President - Don Radford, ZS5DR, technical advisor - Rad Handfield-Jones, ZS6RAD, and secretary/public relations officer, Andy Cairns, ZS6ADY.

The AWA thanks Rad, ZS6RAD, the outgoing President, who served the AWA well over the last two years and we wish the new committee well for the coming year.

PROPAGATION

Hannes Coetzee, ZS6BZP, is away this week and Hans, ZS6AKV, is standing in. He reports that geomagnetic conditions are at quiet levels. Local HF working frequencies are unstable to slightly elevated from predicted average monthly values. The outlook is that there is one active area on

the solar disk. Propagation conditions should be fair, with unstable to elevated values from predicted local monthly average HF active frequencies during mornings while becoming low during afternoons.

An interesting feature is the performance of the 20 m band. On the route between Johannesburg and Cape Town, good performance is predicted for most of the daylight hours. The charts show an interesting dip around 15:00 CAT when 7 MHz seems to peak. If one looks at the 7 MHz chart, is almost like a sine wave repeating itself every few hours. It is expected to be performing well for the most of the day.

DX-wise, 20 m will yield some good DX at times with short openings to just about all corners of the earth. 10 and 15 metres will present some surprises with DX-stations from areas we have not heard from for some time. Propagation is like the weather, the only sure way you know it is going to rain, is to look up to the clouds. If you do not call 'CQ DX' and listen on the various frequencies, you will miss out.

Visit www.spaceweather.co.za for detailed predictions.

DIARY OF EVENTS

15 to 17 January 2010 - PEARS VHF/UHF Contest; 23 January - Home Construction course in Cape Town; 24 January - BACAR launch in the Western Cape; 31 January - President's net at 19:30; 31 January - Closing date for AGM motions; 6 and 7 February - AWA CW Activity Day; 28 February - New closing date for the SumbandilaSat essay competition; 28 February - Final date for entries in the ARRISS-SAT project to be submitted to youth@sarl.org.za; 27 March - 2010 SA AMSAT Space Symposium.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz.

Sentech sponsors the ARMI transmissions on the non-amateur frequencies. You have listened to a bulletin of the South African Radio League compiled by Dennis, ZS4BS. The editor was Jannie, ZR6PHD.

Thank you for listening, 73.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 10th January 2010

Free IRTS Membership!

A reminder to IRTS members that all members who pay their annual membership subscription by direct debit will be entered in a draw at the 2010 Annual General Meeting, with five prizes of free membership for a year.

Full details are in the December issue of Echo Ireland. A direct debit mandate was included with the latest Echo Ireland or can be downloaded from the Downloads
page of the IRTS web site.

IRTS Committee Meeting

Affiliated Club reps are reminded that the next IRTS Committee meeting will be held at the Maldron Hotel in Portlaoise at 11am on Saturday the 23rd of January
should they wish to attend.

IRTS Winter 80m Counties Contest

Congratulations to all who took part in the IRTS Winter 80m Counties Contest. Conditions during the Contest were very good locally with 31 Counties being heard.

During the last hour conditions opened to mainland Europe with F, PA, ON, OZ, SM, DL, and Italy worked in some logs. Thanks to all those that sent in their logs, at present there are 30 logs received via email, with 27 of them using the Super Duper logging program by
Paul EI5DI.

Thanks also to all you contesters for leaving the frequencies between 3.650 and 3.700 and 3.775 to 3.800 free for those not interested in contesting.

Please send in your logs even if only a few QSO's to
contestmanager /at/ irts.ie

Region 4 Theory Classes

13 candidates are to attend radio theory classes starting on next Wednesday 13th January at the Limerick Institute of Technology. Classes will commence at 1900
in room 3B.04

Anyone looking for further information should contact Ger McNamara EI4GXB on 087-2532512
ei4gxb /at/ gmail.com or QTHR.

Wicklow Town Club first meeting

The meeting is scheduled for January 13th at 19.30pm 2010 in The Glebe National School in Wicklow town.

Iian's mobile is 086 8057242 if you need to call. All
are welcome to attend

Special Event Goes Maritime Mobile

As part of the special event initiative with Ei2GBW and GB2Ei, maritime mobile station G2YC/MM will be QRV from cruise ferry MV Julia on the Irish Sea during January
and March.

Dates for activation of G2YC/MM are 25 Jan, 30/31 Jan, 1-4 March, 20/21 March and 31 March/1 April. Ei2GBW and GB2Ei, which are not allowed to operate maritime mobile, will continue land-based operations through early April 2010.

Stations working the two special event stations and the maritime mobile station will qualify for the "Spirit of Inisfallen Award." See the Ei2GBW listing on QRZ.com
for further details.

CQ CQ calling news items

As is common through the year we have occasional lulls in news from EI. If your group or club are involved in anything that you would like to share with our Listeners or readers please pass on the information to our editor.

CW Club

Essex CW Amateur Radio Club is a new club with a
difference- it is for CW only.

This new club was formed late last year by a small group of enthusiastic CW operators who wish to see the continued use of Morse Code together with all its advantages for world wide communications.

Essex CW Amateur Radio Club is affiliated to the RSGB
and the club call is G1FCW.

Further information can be obtained from the
club's website:

http://www.essexcw.org.uk

AREN AGM.

On Saturday February 6th all AREN members are requested to attend a
meeting being held in the Park Hotel,
Clonmel County Tipperary.

Contact John Ronan, EI7IG for further information.

2010 Olympic Winter Games - special Canadian prefixes

The following Amateur Radio prefixes will be available for use in
Canada from February 1st to March 31st, to commemorate the 2010 Olympic
Winter
Games in British Columbia.

Canadian stations with a VA prefix can use VG, VY can use XK, VO can
use XJ, and VE can use VX.

Amateur radio satellite has 'near miss'

The Japan Amateur Radio League (JARL) website is reporting that a
Russian rocket body came close to the Amateur Radio satellite SEEDS
(CO-66).

The near miss occurred on January 7th at 08:02: when the rocket body is
said to have come within 100 metres
of SEEDS (CO-66).

SEEDS was launched in April 2008 and transmits SSTV & Digi-Talker
messages and occasional singing! Which gets changed regularly, this
satellite has a big audience as both the SSTV & Digi update
regularly.

SEEDS transmits on a frequency of 437.485 MHz using either CW running
110mW output or FM with
450 mW output.

EI4DIB Tony's Canadian Visit

Tony EI4DIB and his XYL Madeline will be visiting Canada during the
summer. Tony has also been invited to participate in the Radio Amateurs
of Canada R.A.C field day by the Surrey Amateur Radio Club, British
Columbia over the weekend of the 25th-26th June. The Club callsign is
VE7SAR.The RAC field day is the highlight of many Canadian Club

activities each year, and Tony &
Madeline will feel very welcome.

Tony hopes to work some EI stations while having the
Field Day opportunity.

Limerick Radio Club

The next meeting of Limerick Radio Club will take place next Thursday
14 January at 7.30pm at the Limerick
Institute of Technology.

Members are reminded that club meetings takes place on
the 2nd Thursday of the month.

Rallies

Phoenix A.R.C Rally 14th February

The Rally will be held as usual at Coolmine Community School near
Blanchardstown on Sunday 14th February 2010.Doors open from 9am to
2.30pm. Usual traders will be present and to encourage a real Amateur
Radio orientated Rally bring and buy tables
will be free of charge.

For tables contact Tony at 087-2349997 or Tom at 01-8211043 this is the
first rally of the New Year and usually a very enjoyable occasion.
Refreshments and plenty of car parking are available.

Dundalk Rally 25th April

The Rally will commence at 11.00am, followed by the
IRTS AGM at 2.00pm.

Further details for booking, traders tables or any other info please
e-mail the following, Thos EI2JD chairman /at/ ei7dar.com or Peter
EI4HX secretary /at/ ei7dar.com

For more information on Rallies please check the
IRTS Website.

This week in History

1838 Samuel Morse publicly demonstrated his telegraph for the first
time in Morristown, New Jersey.

1838 The first telegraph message was sent using
Morse code.

1904 Marconi Co's CQD - Distress signal introduced.
Replaced by SOS in 1906.

1946 First EME moon bounce signal by amateur N4CBC
112MHz, 3000W.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following
Sunday's bulletin.

21. Ohio/Penn DX Bulletin #942

Ohio/Penn DX Bulletin No. 942

The Ohio/Penn DX PacketCluster
DX Bulletin No. 942
BID: $OPDX.942
January 11, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AA1M, K1XN & GoList, NJ1Q, NG3K & ADXO, N4AA & QRZ DX, N4GN, N4II, KH6BZF, KL7JR, N7NG, N7UN, AA8LL, K8DD, K8YSE, W8AV, 4J5T, AT International, CT1IUA, DL3APO, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, G3RWF, I1JQJ/IK1ADH & 425 DX News, IK8VRH, OH2BN, OZ6OM & 50 MHz DX News, PA2NJC, Pete's-DX-Newsdesk, RSGB IOTA Web Site, TA0U, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK4AN and ZL2AL for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 3rd-January, through Sunday, 10th-January there were 209 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5A, 5B, 5N, 5R, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FW, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, JA, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VK9W, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5B, CYPRUS (Early announcements). Zoli, HA5PP, will once again be active as 5B/HA5PP during both the CQWW DX SSB Contest (October 30-31st) and CQ WW DX CW Contest (November 27-28th) as a Single-Op/Single-Band (TBD) entry. QSL via HA5PP.

5X, UGANDA. Nick, G3RWF, will once again be active as 5X1NH from Fort Portal in western Uganda, and will be there between January 21st and March 20th. He informs OPDX that he is doing voluntary work there, so his activity is usually outside the work hours. Nick states that he has worked nearly 40,000 QSOs in his previous visits in 2008 and 2009. He prefers to operate CW but plans to also be on the Digital modes with some SSB. Activity will be on all bands except 160m (no room for an antenna). His rig is a K3. QSL via his home callsign and LoTW.

5Z, KENYA (Update/Date Change). Anthonio, IK8VRH, informs OPDX that the dates have been changed for their Dxpedition to Kenya. Operators Enrico/ 5Z4ES, Francesco/IK8TEO, Antonio/IK8UHA and Anthonio/IK8VRH are planning to be in Kenya and activate two IOTA islands between February 12-25th. Callsign will be 5Z0H (IK8VRH informs OPDX that this will be the only time [first time] the 5Z0 prefix will be used), and islands mentioned are Lamu Island (AF-040) and Wasini Island (AF-067). Activity will be on all bands using CW, SSB and RTTY. The group will also be in the ARRL International DX CW Contest (February 20-21st). QSL via LoTW, by the Bureau or direct to IK8VRH: P.O. Box 173, I-80016 Marano (NA), Italy. Visit the 5Z4H Web page at: http://www.ddxc.it

7P, LESOTHO. Art, ZS6BQI, will be active as 7P8BA from Maseru between January 14-18th. Activity will be on 40-10 meters mainly on the CW and Digital modes. QSL via his home callsign (QRZ.com).

8Q, MALDIVES. Tom, PF4T, will be active as 8Q7TB from Embudu between June 5 ï¿½ 25th. Activity will be on 40 and 20 meters using SSB, RTTY and BPSK31. He will also try 17/15/10 meters. Tom states, "Working conditions will be very simple consisting of 100 watts PEP from an Yaesu FT897d transceiver. The antenna will be a Windom FD4 80-40-20-17-15-10 meters and an Inverted V G5RV 40-20 meters. The Inverted V will be 20m suspended from the top of the coconut palms approximately 10 meters from the sea." QSL via PF4T direct for a quick reply or by the Bureau via PA0LEY or PF4T. Visit his Web page at: http://8q7tb.pf4t.nl

9M, EAST MALAYSIA. Members of a newly formed DX group called "The North Borneo Worldwide DXers" (NBWDX) with operators from East Malaysia, West Malaysia and Brunei, will activate Crocker Range Mountains for the first time ever on January 16th and 17th. The altitude of the operation will be near 6000 feet ASL with temperatures expected to be very cold (almost or close to freezing). Operations will be situated at a remote interior of Sabah (just a two hour drive about 90km away from the bustling city of Kota Kinabalu). It is within the National Park Nature reserves area. This multi-national team made up of Borneo Amateur Radio Club (BARC), Sabah Amateur Radio Society (SARS), as well as a number of hams enthusiast and SWLs, will use the callsign 9M4STA. Activity is expected to be a multi-band and multi-mode operation. QSL Manager will be Buzz, NI5DX.

C6, BAHAMAS. Tom, N1GN, will once again be active as C6ANM from Nassau (NA-001) between now and April. Activity will be on 160-6 meters using CW and SSB. He plans to be an entry in the CW and SSB parts of the CQ 160m Contests and the ARRL DX SSB Contest. QSLs are preferred via LoTW or direct to his QSL Manager Patricia, WA2IYO.

CU2. AZORES (QRV on Low Bands). A group of Finnish DXers will put the Azores on 160m and above with new vertical and beverage antennas starting January 16th. The activity will include the CQWW 160M CW Contest (January 29-31st), the ARRL International DX CW Contest (February 20-21st) and the ARRL International DX Phone Contest (March 6-7th), using the callsign CR2X. Group members are: Ilmo/OH2BO, Pertti/OH2PM, Ville/OH2MM, Martti/OH2BH (CU2KG) and Juha/OH8NC (CU2KH). There will also be some activity before and after the contests. Additionally, Jose/CU2CE and Francisco/CU2DX and others are due to take part in CQWW WPX SSB Contest (March 27-28th). QSL CR2X/CU2KG via OH2BH, CU2KH via OH8NC.

D2, ANGOLA. Vasiliy, D2QMN, continues to be quite active on 20 meters PSK usually after 0500z and other various times. There has been a report that he is now active on 80m after building a new antenna. OPDX has not seen any QSNs listed on the DXClusters yet, but keep looking. QSL via RZ3EC.

D2, ANGOLA. QSL Manager Mike, CT1IUA, reports that he now has the hand written logs from Paulo, D2CQ (aka CT1ITZ), and is putting them in the PC log. He will then start to reply on all direct cards. Mike adds, "For those who haven't work D2CQ yet, Paulo will be back in Angola, in February 2010, and this time he is taking his 5 band beam antenna! He is going to work in Angola for the next few years, so there will be plenty of time to work him." For updates, visit: http://algarvedx.com/ct1iua

E5, SOUTH COOK ISLANDS (Also North Cook). Richard, AD7AF, will once again be active E51WWA from Muri Beach on Rarotonga (OC-013) between January 12th and into the third week of February. Activity will be 40-15 meters using mainly CW. SSB and the Digital modes will be used as propagation conditions allow. Also, 80 and 10 meters will be used if conditions are favorable. He will use a K3 operating barefoot into a vertical and wire antennas. QSL via AD7AF. PLEASE NOTE: E51WWA was last active in the South Cook Islands between January 27th-February 23rd, 2008. Activity from February 9-20th, 2008, E51WWA was active on Mauke (OC-083), South Cooks. All other activity was from Rarotonga (OC-013), South Cooks. LAST MINUTE UPDATE. Richard will also be active from Manihiki (OC-014), North Cook Islands between February 3-15th. His callsign is to be determined.

EF8, CANARY ISLANDS. Val, RD3AF, will be active as EF8M from Santa Maria de Guia, Las Palmas Gran Canaria (AF-004, DIE S-005, WLOTA L 0969), during the CQ 160-Meter CW Contest (January 29-31st) as a Single-Op/All-Band/ High-Power entry. QSL via UA3DX.

EL, LIBERIA. Chris, ZS6RI (aka-ZS8IR, ZD9IR, 5H9IR), is once again back in Liberia for one month as of January 2nd. His callsign is EL8RI. Activity will be mainly CW on 30 meters, but also on 20m from time to time running 100 watts. QSL via his home callsign, by the Bureau, direct or LoTW.

FO/A, AUSTRAL ISLANDS (Update). Peter, DL3APO, informs OPDX that all preparations are going well for the upcoming Raivavae (OC-114, DIFO FO-122, WLOTA L-2581) operation in the Austral Islands group. He states that the first day of operation will be January 18th, and the last February 5th. German operators are Wulf/DL1AWI, Peter/DL3APO and Mat/DL5XU.

They will be active as FO/DL1AWI, FO/DL3APO and FO/DL5XU. Their focus
will be mainly the lower bands 160-30 meters but will work some higher
bands on SSB and RTTY. QSL via their home callsigns, direct or by the
Bureau. They will also have an online log available (via SAT-Phone,
no Internet is available at this small island) and some news/pictures
at: http://www.df3cb.com/logsearch/cgcg/logsearch.php
--and/or--
http://dl9awi.de/fo.htm

HP9, PANAMA. Rene, HP1DCP, will be active as HP1DCP/HP9 from the HP9 zone
(Los Santos Province) during the ARRL DX CW Contest (February 20-21st) as
a low power entry. QSL via EA5KB.

IOTA NEWS.....................
NA-062. Wade, AA8LL, will be operating as AA8LL/4 from Key Largo,
FL., between Janaury 15-19th. This also counts for the USI
as FL049S. Activity will be holiday style, operating mostly
CW and RTTY on 80-15 meters (IOTA frequencies) using 200w
and wire antennas. QSL direct or by the Bureau via AA8LL.
Logs will also go to the LoTW and eQSL.

NA-231. (Update/NEW RARE IOTA). As mentioned in OPDX.933, Cezar,
VE3LYC, will attempt to activate East Pen Island, Nunavut,
for three days during the period between March 26-31st. It
was announced this past week that the Industry Canada issued
him the callsign VY0V to be used during this operation. East
Pen Island is located in CQ Zone 4. Cezar would like to remind
everyone that an earlier try he undertook with Ken/G3OCA in
July 2007 was unsuccessful. The outcome of this new attempt
will be determined by local conditions, weather and safety
factors. Details from QRZ.com states: "For this trip Cezar
has retained the services of two local guides. All the camping
gear will be loaded on sleds towed by snowmobiles. Under good
weather conditions, the travel to the island should take around
10 hours. Radio equipment will be carefully packed to minimize
the severe beating it will take during transportation. Since
the sled has no struts, the uneven ground surface will make
it jump up to 30/40 cm and land hardly. Inside the tent, con-
densation will have to be eliminated before switching on the
rig. Weather conditions are of concern. Outside temperature
is expected to be at the time -20C or lower. The team could
leave for the island in good weather, but the situation can
change very rapidly up North. In less than an hour a blizzard
could make the travel impossible. Out there they will have
to put up the tent and wait for a change in weather before
continuing their journey. This is a rather difficult project,
and although Cezar is fully committed to it, he wants to
convey to everyone that it may have to be aborted if safety
concerns dictate it." At this time Cezar is looking for group
and individual donors who understand and appreciate the nature
of this difficult project and are willing to join in the

effort. Support for this project is welcome via PayPal at:
tiberius.trifu@gmail.com
QSL info is via direct (two options; see QRZ.com) and by the
Bureau via VE3LYC.

JD1/O, OGASAWARA. Look for JM1YGG/JD1, JA2ZL/JD1, JD1BMV and JD1BNB to be active from Chichijima (AS-031) between February 6-14th. Activity will be on 80-12 meters using CW, SSB and RTTY. QSL JM1YGG/JD1 and JA2ZL/JD1 via their home callsign. QSL JD1BMV via JK1EBA and JD1BNB via JA3MCA. QSLs can be sent direct or by the Bureau.

J6, ST. LUCIA (Update). Members of the "Buddies in the Caribbean" DX-pedition group which specializes in 100 watt or less low power radios and the Buddipole portable antenna system is off again to a new DXpedition site on February 2-11th, 2010. This is an annual effort to demonstrate "ultra-lite" DXpeditioning into magnificent "vista" locations, operate a field portable battery-only radio with backpackable, lightweight antennas and most of all "have fun!" The nine operators from eight states mentioned are: Budd/W3FF, Chris/W6HFP, Scott/NE1RD, Dan/WZ1P, Steve/WG0AT, Mike/KC4VG, Guy/N7UN, Paul/KB9AVO and Wey/K8EAB. The team negotiated with the amateur license regulatory process through the St. Lucia Telecom to receive their J6/homecall licenses in six weeks. In early February they intend to have 3 villa stations in operation on 160-15 meters and some occasional operations on 10m and 6m, propagation permitting, using CW, SSB, and the Digital modes. At the same time, several teams will be battery-only field portable either at St. Lucia beaches or mountain tops. QSL via LoTW, eQSL, or mail to operator's home callsign (SASE required). For more details, see the following Web pages:
** http://sites.google.com/site/caribbeanbuddies/home
http://caribbeanbuddies.blogspot.com/
** Please note that this Web site has an on-line chat feature for realtime dialog with the DXpedition team.

J7, DOMINICA. Seth, SM0XBI, will once again be active as J79XBI (while on holiday) between now and until the end of March. Activity will be SSB only on all bands. QSL via LoTW (preferred) or to his home callsign by the Bureau.

KH6BZF PROPAGATION FORECAST/REPORT (For January 11-17th)....

NEW OFFICERS FOR 2010. Members of the South Florida DX Association elected the following officers for 2010 during their January meeting:
President: Ed Callaway, N4II
Vice President: Bill Dzurilla, NZ5N
Secretary: Dave Novoa, W4DN
Treasurer: Bruce Phegley, W4OV
Director: Al Maslin, N3EA
Director: Don Search, W3AZD
Director: Jim Settle, KG4VPC
Director: Ray Smolenski, N4RU
Visit the club's Web page at: http://www.qsl.net/k4fk

PJ2, NETHERLANDS ANTILLES. NODXA member Goose, W8AV, will be on the Island of Curacao (SA-006, WLOTA LH-0942) from the PJ2T Signal Point station signing PJ2/W8AV, February 9-22nd. He plans to be on 160-10 meters using CW and RTTY. He will also be one of the PJ2T operators during the ARRL International DX CW Contest (February 20-21st) and possibly in the CQWW WPX RTTY Contest (February 13-14th), depending on the station maintenance work schedule.

PJ4, NETHERLANDS ANTILLES. Hennie, PE1MAE, will once again be active as PJ4/PE1MAE from Bonaire (SA-006, WLOTA LH-1279) for a couple of months starting around January 10th until the middle half of March. Activity will be mainly SSB on 40 meters (around 7175 kHz) at 0000z. He will also be on 80 and 20 meters, possibly the other bands. Hennie will specifically be looking for PA and Europeon stations. He will only run 100 watts into a Delta Loop antenna. QSL via PA2NJC, direct or by the Bureau.

QSL INFO AND NEWS.....
QSL ROUTE NEEDED. Goose, W8AV, is looking for a QSL route for the 1993 operation of TY8NG. If you can help him, please contact him at: W8AV@aol.com

PIRATE ALERT. Natig Gasimov, 4J5T, President of the Federation of Radio Sport of Azerbaijan, informs that the callsign 4K2JF/p, (4J-4K once used for Franz Jozef Land, but now allocated for Azerbaijan) appeared on the HAM bands, and has never been issued by the Ministry of Communications of Azerbaijan. Any activity under this callsign is to be considered illegal.

QSLS VIA LoTW: RK3RZM, RP3RQ, RP3RST, RP3RTK, RX3RXX, RP63RQ, RP63RTK, RP64RTK, UA3R and ZY0T.

QSLS RECEIVED VIA MAIL: 5W0KH, 8P9SS, 9L1NH, 9N7RB, AI5P/VK9N, C91LW, CU2A, CR2X, CU2X, EL8RI, FH/DJ7RJ, FK/AI5P, FK8CP, FO8RZ, FR5ZL, FR5ZQ/G, GW3YDX, H44MY, HC8GR, J28KO, JK2VOC/BA4TB, K8CC/C6A, KH8/N9YU, KP4AO, OH2BH, OJ0B, P29VCX, P29VLR, RX9FM, TO7RJ, TN5SN, TX5C, UP0L, V73NF, VK9XW, VP2MUM, VQ9JC, VY0O, YJ0PX, YN2GY, ZK2DL, ZL/AI5P and ZY0T

QSLS RECEIVED VIA THE BUREAU: None reported this week!

SPECIAL ACTIVITIES BY YUKON JOHN! "Yukon John", KL7JR, informs OPDX this February he plans to be on air using the following special callsigns:
February 6-10th - Look for "N7I" from Honolulu, HI, to celebrate the

16th anniversary of the U.S. Islands (USI) awards
program. Oahu Island is HI#008S. Activity will be on
20-10 meters SSB. QSL KL7JR.

February 18-22nd - Look for "XK1RST" (VY1RST) to be active from
Destruction Bay, Yukon. Activity to celebrate the
2010 Canada Winter Olympics and also the Jacquot
Island activation (new one) between February 15-20th.
Operations will be 80-10 meters SSB. QSL via VY1RST.

SV5, DODECANESE (EU-001). Willi, DJ7RJ, will once again be active from
Kos Island as SV5/DJ7RJ between February 24th to March 17th. Activity
will be on all HF bands, 160-6 meters (preferably on the low bands)
using CW and SSB. QSL via his home callsign.

TC2010, TURKEY (Special Event). Members of the Turkish group called
TCSWAT (TC Special Wireless Activity Team) will activate thirteen special
callsigns with the TC2010 prefixes from several different locations
throughout the calendar. Part of this activity is to celebrate "The
European Capital of Culture" for the city of Istanbul, which is designated
by the European Union for one calendar year, and where the city can show-
case its cultural life and development. Istanbul was one of the three
cities designated for the 2010 title. Other special activities will
include the celebrations of the 150th anniversary of the Sile Lighthouse,
the World Basketball Championship, MLOTA (Marmara Lighthouse On The Air)
and etc... TCSWAT will start its activities with the following callsigns to
be activated between January 15-18th: TC2010CCE, TC2010CCA and TC2010CCI.
For more detailed information on these special events and their relevant
awards, please the following Web pages:
http://www.ta0u.com
http://www.ta0u.com/2010/eng/pdf/2010AWARDCatalogue.pdf
http://www.ta0u.com/2010/Eng/Calendar.html

V2, ANTIGUA. Valeriy, VE3LFW, will be active as V26VP from Antigua (NA-100,
WLOTA LH-1118) between January 15th and the middle of February. Activity
will be on all bands. QSL via his home callsign, direct or by the Bureau.

V3, BELIZE. Art, NN7A, will be active as V31JZ/p from Turneffe Islands
(NA-123) between February 24th and March 3rd. Activity will be holiday
style. QSL via his home callsign, by the Bureau or direct to: Art Phillips,
P.O. Box 73, Eckert, CO 81418 USA.

WIA CHANGE. Eddie DeYoung, VK4AN, WIA Awards Manager and Awards Committee
Chairman, reports: "The Wireless Institute of Australia (WIA) AWARDS
PROGRAM has been extensively revised. Please review the following link,
then update your Web site and links to the WIA award program accordingly:
http://www.wia.org.au/members/awards/about
Publicity via your Web page(s) would be appreciated."

XX9, MACAU. Georg, DK7LX, states that it has taken him about a year to
plan an operation from here, but expects to be active as XX9TLX from
Coloane Island (AS-075) Macau. Dates are yet to be confirmed. Activity

will favor CW. Due to the local environment, he will not be able to erect huge antennas and will only use a light-weight radio with 100 watts. He will NOT operate on all bands, especially 160m. There will not be online logs. QSL via his home callsign, direct or by the Bureau.

YASME EXCELLENCE AWARDS. "On January 8, 2008, The Directors of The Yasme Foundation announced the establishment of the Yasme Excellence Awards. The Directors stated that these awards would be given from time to time as the board feels appropriate. These awards are given for service and dedication to amateur radio as recognized by the foundation's Directors. Awards were later announced for the year 2007. No awards were given for 2008. The Yasme Foundation Board of Directors is now pleased to announce the latest winners of the Yasme Excellence Awards.
The Awards for 2009 have been given to the following amateurs --
Jamie Dupree/NS3T ï¿½ For his creation of the Radiosport Web site (http://www.radio-sport.net/). This takes contest reporting into a new genre - the sports reporter. Jamie also created the Radio-Sport.Net World Rankings database that has been used by many contesters around the world. Radiosport.net is an important new forum for Amateur Radio operation.

Bob Bruninga/WB4APR ï¿½ For the invention of APRS and the continuing enhancement of its capabilities. Recently, Bob has expanded the messaging ability of the system to allow sending information in support of emcomm and other activities. Since APRS doesnï¿½t require the complexity of other systems such as Winlink, APRS is a valuable addition to the amateur's tool kit. Bob is a tireless, personal promoter and publicizer of amateur radio.

George Wallner/AA7JV and Tomi Pekarik/HA7RY (award divided equally) ï¿½ In 2009, George and Tomi completed DXpeditions to Mellish Reef, VK9GMW and the Chesterfield Islands, TX3A. These expeditions represent a somewhat unique and refreshing approach to DXpeditioning. They show that a small group can exchange time for equipment and mega-funds and come out ahead. By focusing on fewer bands for a longer period, they have been able to log more unique calls from smaller stations. This brings more operators into the HF DX environment
and encourages other expeditions to adopt these useful tactics.

Don Hill/AA5AU - Don has been a leader in RTTY contesting for many years. His persistent efforts have finally borne fruit as in recent years, RTTY/Digital contesting has grown at the fastest rate of any contest activity. His Web page (http://aa5au.com/rtty.html)

is the first stop for all RTTY contesters, and he
is well-known as the "RTTY Elmer" in digital
contest-
ing circles.

Tursoon-Zadeh/EY8MM - Nodir has been a beacon from Central Asia on
Topband as well as 6-Meters. Not only technically
and operationally skilled, Nodir has worked to
establish a QSL Bureau for Tajikistan and is the
Vice President of the Amateur Radio Society of
Tajikistan.

Rich Strand/KL7RA - Rich was the driving force behind the highly
successful W1AW/KL7 and KL5O operations, both of
which highlighted a resurgence in Alaskan contesting
and DX activity over the past couple of years. Rich
works hard to promote operating standards and
educate the new contest and DX operators about good
operating practices. This is resulting in more
Alaskan HF operation which also encourages beginning
DXers elsewhere in North America.

For additional information about the Yasme Foundation, visit our Web
site
at www.yasme.org. On behalf of The Yasme Foundation, congratulations to
the 2009 winners!"....
Wayne A. Mills, N7NG, President The Yasme Foundation
Directors -- K3ZO, N7NG, N0AX, OH2BH, W6BSY, W6OAT, W6RGG, W6SZN

YN2, NICARAGUA. Operators Stan/AC8W (YN2WW), Hank/K8DD (YN2DD), Jim/KB8TXZ
(YN2TX) and Lee/N8LJ (YN2LJ) will be active for one week between February
16-25th. Their activity will include the ARRL DX CW Contest (February
20-21st)
as a Multi-Single entry using the callsign YN2WW. Operators will be active
on
all bands before and after the contest. Look for: YN2DD on CW and RTTY 17m,
YN2WW primarily on 30m, YN2LJ on the low bands CW and YN2TX on SSB. QSL
YN2DD and YN2WW via K8DD. QSL YN2TX via KB8TXZ and YN2LJ via K8ESQ.

ZL NEWS (Update - New Zealand DX Hall of Fame Members). Last week we
reported that the 2010 New Zealand DX Hall of Fame inductees were the
following: Dave A. Johnston/ZL1AMN, Aola B. Johnston/ZL1ALE and Dave
Brown/ZL1HY (SK). There was an inquiry last week on who where the past
recipients on the award and if there is a Web page available. Lee, ZL2AL,
informs OPDX and its readers that a Web site is not yet available, but
it will come in time. He adds that the award just started last year and
the first three to receive the award were:
#1 Roy Jackson/ZL4BO (SK a few months ago)
#2 Ron Wright/ZL1AMO
#3 Jock White/ZL2GX (SK)
Lee states, "This was the second year..... We are presenting plaques
like the CQ Hall of Fame to the living inductees and just a letter of

commendation to the SKs."

22. Flashing Light Bill Amendment Introduced (Nebraska)

Newsgroup: rec.radio.amateur.misc
Date: 2010-01-12 18:14:46 UTC
From: ARRL NE Section <memberlist@www.arrl.org>
Message-ID: <20100112172202.33FC5327526@bmailer.arrl.org>
Source record: 6141

Several Emergency Coordinators and others involved in emergency communications in Nebraska raised concern last year about a new law that prohibited the use of flashing lights on storm-spotter's vehicles. Many felt that the flashing lights protected spotters parked in isolated areas where occasional high speed traffic presented a danger.

I am pleased to report, thanks to J.R. Reider, K0JWR, that a bill was introduced by Senator Bill Avery (District 28) to amend the law and allow use of flashing amber lights by storm-spotters. The bill is LB 719. You download the pdf file of the bill at:
http://nebraskalegislature.gov/FloorDocs/Current/PDF/Intro/LB719.pdf

Pat Gerdes, KA0SGL, along with other Emergency Managers took the initiative to make this happen.

Please take a moment and send an email or letter to your State Legislator in support of this bill. Showing support in this manner not only helps the bill, but it keeps our Legislators aware of all the hams who volunteer at their own risk to protect our communities.

Thanks and 73,
Art K0AIZ

Was there a problem with that? Mis-use and so forth?

Obviously, the answer is don't make them sorry they did that.

25. Information about Haiti and Amateur Radio

Newsgroup: rec.radio.amateur.misc
Date: 2010-01-13 16:32:56 UTC
From: ARRL NE Section <memberlist@www.arrl.org>
Message-ID: <20100113161848.B1A56327770@bmailer.arrl.org>
Source record: 6144
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

I received the following from Steve Ewald, WV1X, at ARRL HQ.
****

On Tuesday (January 12) there was a 7.0 magnitude earthquake in Haiti, which has since been followed by serious aftershocks. Communications in and out of Haiti have been disrupted. No word has been received as of yet from any of the national HH Amateur Radio operators. The DailyDX notes that HH2/HB9AMO, Pierre, is OK and was located about 140 km north of Port-au-Prince in Cap Haitien at the time.

The IARU Region II Area C Emergency Coordinator, Arnie Coro, CO2KK, is coordinating the multi-national response by hams. There are organized nets on 7045 and 3720 kHz and amateurs are asked to monitor but also keep the frequencies clear of non-essential traffic. Amateur Radio operators should also be aware that emergency traffic pertaining to the Haitian earthquake is expected on the SATERN frequencies of 14265, 7265 and 3977 according to SATERN's leader, Major Pat McPherson. The Salvation Army has a website up for H&W traffic and other news at www.satern.org.

Amateur Radio operators are circled around Haiti in Cuba, Florida, the Dominican Republic, Puerto Rico, Venezuela and other locations listening for any calls, but so far no HH stations had checked in.

Please keep clear of frequencies :
14265
7045
7265
3977
3720

The situation is still chaotic and more information will be posted as soon as possible. Information is being validated and shared between many amateur groups and news sources as it unfolds.

==========

Thank you.

73,

Steve Ewald, WV1X

THE 2010 NAME GAME

Moving into a new year brings up an important proposition. What do we call
the year ahead? Is it 'two thousand and 10' or 'twenty 10'?

Well, this week "Thats Life" magazine solves the terrible dilemma with news
from The National Association of Good Grammar in the US which has officially

declared that 'twenty 10' is correct. Phew!

Oh and to read the FULL STORY, check out issue 3 on sale now.

ACMA NEWS

The Australian Communications and Media Authority has released a discussion paper as part of its review of the pricing, planning and licensing arrangements for spectrum in the 2.5 GHz band.

The 2.5 GHz band is currently used primarily by free to air TV broadcasters for electronic news gathering (ENG).

'This review has two important objectives,' said Chris Chapman, Chairman of the ACMA. 'It is intended to identify how the 2.5 GHz band should be planned and allocated so that it accords with its highest value use. Also, we need to identify suitable long-term spectrum arrangements to support the essential ENG services, especially since there has been uncertainty about the long-term spectrum arrangements for ENG services in Australia since the international identification and harmonisation of the 2.5 GHz band for wireless access services in 2000.

This review is an important step in removing that uncertainty, identifying appropriate future arrangements for ENG services and moving forward.'

The 2.5 GHz band has also been identified through previous public consultation as a candidate band to address emerging demand for broadband wireless access services. Indeed, it is the primary, internationally harmonised band for these services.

The discussion paper, Review of the 2.5 GHz band and long-term arrangements for ENG, is available on the ACMA website.

The closing date for comment is Friday 12 March 2010.

Submissions should be sent to 2.5GHzproject@acma.gov.au, which is also the contact point for further information.

Media contact: Donald Robertson, Media Manager.

HOME OF THE GOOD GUYS

HELPING HAMS: VE3 GROUP BRINGS 102 YEAR OLD OPERATOR BACK ON THE AIR

A 102 year old ham is back on the air after being QRT the past two decades. This, thanks to the generosity of a Canadian ham radio association that helps those in need.

Ethel Williamson, VE3DTW, is a former lighthouse keeper who turns 103 in March. She had been off the air for at least 20 years when the Welland

branch of the Handy Ham Amateur Radio Club of Canada herd about her. The organization offered to set up a radio for her at Niagara Ina Grafton Gage Village long-term-care home so she could get back on the air. She accepted their suggestion and it all came to fruition on Monday, January

4th. That's when she made her first QSO with a station in Melbourne,

Australia, via a local repeater tied to VK land.

Ethel clapped her hands in delight as the voice of a stranger in Melbourne, Australia, broke the static on the little ham radio that sits by the window in her room at a St. Catharines long-term care home.

"Can you imagine" she said Monday afternoon, shortly after chatting to the man through the radio's hand-held microphone, "To be able to talk to Australia -- it's a miracle, it really is."

"I can't believe that. It's wonderful, it's just wonderful," she said after testing it out the first time.

More about this amazing lady can be found at

Four weeks to go to the big event in Victoria

All roads lead to the Centre Victoria RadioFest at the Kyneton Racecourse, an hour from Melbourne, Ballarat and Bendigo on Sunday 14 February.

All the major commercial traders will be there, they would not miss it and neither should you.

Looking for bargains, components, bits and pieces, connectors, cable, sealed lead acid batteries or antennas?

Then come and check out the second-hand market or car-boot sales alley. Want to make a sales table or car-boot space booking? Then be quick and obtain an application form from the website radiofest.amateurradio.com.au

Other attractions are digital amateur television, emergency communications, mini-lectures, historical and military radio displays and lots, lots more.

See you at the WIA Supported Centenary Activity - the Centre Victoria RadioFest at Kyneton on Sunday the 14th of February.

I'm Bruce Lees VK3FFF and you're listening to VK1WIA.

VKR Roundup
http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNEWS from VK4WIA. I'm Geoff Emery, VK4ZPP and here are some

questions for you.

What kind of "actor" are you?

When it comes to making decisions and getting things done, it seems there are 3 kinds of actors.

First, there is the detractor who can never find a positive in any-one else's ideas. They can be seen whispering behind hands, slipping around

groups and proving that it was tried 20yrs ago and didn't work. They always vote no.

Secondly, there is the reactor that appears solid, reliable and capable

of continuing forever. However the reactor sports a short fuse and when

put on the spot by having to provide output soon raises a head of pressure that explosively bursts over every one around. Reactors seldom

vote.

And lastly there is the plain actor who reads the script and is prepared to play their part in the activities. The actor has the confidence to question whether things can be better done and is thrilled that some-one else has found a better way of doing things. Actors always vote.

Before your next club meeting, check out what kind of actor are you.

For QNews, I'm Geoff, VK4ZPP and that's what I think.

GYMPIE
www.gceginc.org.au

I'm Roger Stierli, VK4BNQ filling in for Trevor Taege VK4BAT with the news from the Gympie Communications & Electronics Group:

I'd like to take this quick opportunity to welcome Trevor to our Club and thank him for recording the Q-News segments for the Gympie Group - enjoy your holidays Trev... Another new member has just joined the Club so a big welcome from all the GCEG members to Graeme Alder. Now with 23 members, despite the lack of club rooms, we are slowly growing in numbers and reckon this will be the year for the new "Home" to happen.

At the last Club meeting we looked back and noted several really good achievements for the year considering that much time and effort had also gone into trying to finalise negotiations for our own club rooms. We have a fine group of members who enjoy the many different aspects of the hobby and always have a good time when together.

To list just a few achievements:

The 70cm repeater is back up and running, we've built a Digital SSTV EasyPal repeater, an APRS digipeater and have an informative website that continues to develop - www.gceginc.org.au

Last Sunday the weather was just perfect for the Club's Christmas New Year BBQ and we all had a very relaxing fun time at one of our favourite spots on the north side of town. Thanks to Barry VK4KKN who brought along the big barby.

Finally, an Icom IC-721 and a Yaesu FT-980 have been generously donated to the Gympie Group. Many thanks from all of our Club members to Stan Hunter VK4CSH and John Van den Brenk, the son of silent key Eddy, VK3CUD.
The radios will be put to good use as soon as we set up the Club station and one of the sets may well help us with the John Moyle Field Day. The Group will be participating in this year's contest and with planning underway, we have once again chosen the location of Mt. Wolvi for this year's event.

For Gympie Area News, I'm Roger, VK4BNQ.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray VK4CF back with news from the Redcliffe AR Club".

It is with some sadness that I have to report the loss of the mother of one of our club members Mal, VK4UMS. Mal's mum passed away peacefully aged 91 and her funeral was held last Tuesday at the Albany Creek Crematorium.

Mal as the only child read a very moving his tribute to his mum which included some of his mum's favorite sayings, including, "Don't half do it, do it once and do it properly" and one possibly for all amateurs,

"Waste not want not and don't throw it out it might be useful!".

To you Mal and your partner Rosemary the club passes on it deepest sympathy.

There are reports also that the 6 and 2 metre bands have not been to kind to Queensland amateurs in trying to contact Kev, VK4UH and the team at Pitcan Island. Despite a brief contact with Kev on 6 metres by Peter VK4EA from his car in a shopping centre carpark, the signals have been far kinder to NSW and Victorian stations. It has been very disappointing for all concerned but it has been a lot of fun and a full report will be provided in later news segments.

At last Monday's night meeting which was chaired by a nervous Scott, VK4FLAE, and here are details of the first working bee for 2010. This will be held on Saturday 13 February at the home of Charles, VK4BTC at 7 Kelly Court, Redcliffe and it is to start about 8.30 am. The main tasks are to strip out and refit new panels in the caravan. So come with your power tools and with Geoff, VK4FRNS, as the head carpenter and assist for a few hours to get the van ready for the John Moyle weekend.

A reminder that the third Monday of the month is the every important tech talks and Doug, VK4KET will be presenting next Monday night on mining and next month is will be David, VK4DC on a home brew antenna tuner.

So until next week, for Redcliffe club I'm Ray VK4CF.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

Happy New Year from your president. What a busy year it is going to be with contests, equestrian communications a bit of foxhunting and much rag chewing on our nets and repeaters.

On the home brew side there is much to be done; our club spider beam has to be finished in time for the John Moyle. I have to sort out problems with drift in the 70cm cavity of the GI-46 tube amplifier to get it ready for next November. With promises of an extra grid from Mario I will have our 200 watts on 23cm going better than ever. More 10 GHz DRO units have been ordered from USA and a new approach with the antenna and DRO being atop a 20 foot aluminium two section pole is contemplated. This will be developed during the year and we will phase out the gunn diode units.

I always mention conditions and I could say what conditions. At present awful, I tuned around looking for activity over Xmas and was amazed by the lack of any. There was a dog-pile on 18 MHz on CW with some rare DX station being chased by worldwide but that was all.

I wish all, new happy ham experiences for 2010 and may cycle 24 truly start.

Best DX de John VK4TL ï¿½ President

TOWNSVILLE
vk4wit@wia.org.au

4773 1196 or 0408 001142
po box 333 Garbutt East, QLD 4814
www.tarc.org.au

GOOD MORNING AND GREETINGS ! THIS IS DON VK4FNQA, WITH NEWS
FROM NORTH QUEENSLAND.

AS THE NEWS GOES TO AIR THIS MORNING SOME HAMS IN THE TOWNSVILLE
REGION ARE COMMUNICATING WITH HORSIES (AND THEIR RIDERS) IN THE
FIELD, AS PART OF THE TOWNSVILLE ENDURANCE RIDERS AND ARABIAN
HORSE ASSOCIATIONS BLUEWATER ENDURANCE RIDE CLINIC, BASED OUT
OF THE NORTH QUEENSLAND EQUESTRIAN CENTRE.
SOME OF THE HAMS WERE ON SITE YESTERDAY CHECKING OUT HOW MANY
TRACKS WERE PASSABLE AFTER THE RAINS THAT HAVE HAPPENED IN THE
AREA AND ALSO CAMPED OUT DURING THE NIGHT DOING SOME VHF AND
UHF DX AS PART OF THE WIA SUMMER VHF UHF FIELD DAY CONTEST.
BUT FOR NOW THE HAMS ARE MAINTAINING A SAFETY NET ACROSS ALL
OF THE RIDE EVENT AND WILL BE ON STATION UNTIL 1PM TODAY.

THE NEXT COMMUNICATIONS SUPPORT EVENTS HAPPENING IN THE
NORTH QUEENSLAND REGION WILL BE -

A HORSE ENDURANCE RIDE AT MOSS VALE STATION, BETWEEN BOWEN
AND COLLINSVILLE ON SATURDAY 20TH AND SUNDAY 21ST MARCH AND
A THRILLING AUTOSPORTS HILLCLIMB UTILISING THE MOUNT STUART ROAD
AND HAPPENING ON SUNDAY 29TH MARCH.

IF YOU CAN HELP OUT ON ANY OF THESE EVENTS PLEASE CONTACT
GAVIN VK4ZZ ON MOBILE 0427 182469 OR ON THE LOCAL REPEATERS
AND GET YOUR CALLSIGN ON THE LIST.

WELL, THATS ALL FOR THIS WEEK FROM TROPICAL PARADISE...
THIS HAS BEEN DON VK4FNQA FOR THE TOWNSVILLE AMATEUR RADIO
CLUB INC, AND YOU HAVE BEEN LISTENING TO QNEWS FROM VK4WIA.

THE FINAL FINAL

Struth, dja see there's 30 Qu'nsland radio clubs listed in the callbook?

Blimey and we hardly hear from most of 'em on the news each S'ndee.

Yeah, you mean there's all those amateurs not doin' anything?

Well, must be they're doin' nothin, cos they don't tell the rest of us.

Reach out and share your world of amateur radio via QNEWS. It's so easy

to do!

Type out what you want to say, in the way you would listen to it, record
what you wrote in WAV or MP3 format and upload the audio and email the
script.

Now that wasn't hard, was it?

Let's hear from your club on QNEWS.

qnews@wia.org.au

tarc.org.au

ANOTHER SUCCESSFUL T.R.E.C. PROMOTION.

During December TREC set up another public display promoting Amateur Radio
in Atherton a small Northern Queensland Town.
Much interest was shown by members of the public.
A raffle was also conducted at the same time and the club funds were boosted
by quite a tidy sum.
Chris VK4YCG, John VK4TL, Dave VK4DK and Stu VK4SDD manned the display.

Free IRTS Membership!

IRTS members who pay their annual membership subscription by direct debit
will be entered in a draw at the 2010 Annual General Meeting, with
five prizes of free membership for a year.
A direct debit mandate was included with the latest IRTS magazine.
"Nice Idea" IRTS.

MORE HAMS UP ON AIR IN USA.

This past year was a banner year for new Amateur Radio licensees.

According to the ARRL, the FCC issued more than 30,000 new ham radio
licenses, an increase of almost 7.5 percent from 2008.

Read more here
arrl.org/news/stories/2010/01/06/11278/?nc=1>

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL,
Amateur Radio Newsline, NZART and the WW sources of the WIA.

BACAR LAUNCH IN THE WESTERN CAPE

The first flight of BACAR-2010 is planned for Sunday 24 January.

This Balloon Carrying Amateur Radio (BACAR) payload will be multifunctional
and include a 20 and 40 m SSB transceiver, a 2 m parrot repeater, a 2 metre

Doppler beacon (equipped with GPS) as well as a camera.

SARL News and www.amsatsa.org.za will carry regular updates.

New Amateur Radio DX group to activate Crocker Range Mountains

Members of a newly formed DX group called 'The North Borneo Worldwide DXers' (NBWDX) with operators from East Malaysia, West Malaysia and Brunei, will activate Crocker Range Mountains for the first time January 16 and 17.

The altitude of the operation will be near 6000 feet ASL with temperatures expected to be very cold (almost or close to freezing). Operations will be situated at a remote interior of Sabah (just a two hour drive about 90km away from the bustling city of Kota Kinabalu). It is within the National Park Nature reserves area.

This multi-national team made up of Borneo Amateur Radio Club (BARC), Sabah Amateur Radio Society (SARS), as well as a number of ham radio enthusiasts and SWLs, will use the callsign 9M4STA.

Activity is expected to be a multi-band and multi-mode operation.

QSL Manager will be Buzz, NI5DX.

==========

NEWS FROM ARNEWSLINE

REPEATERS IN THE UK WARNED TO USE IT OR LOOSE IT

The world-wide spectrum crunch is becoming a major concern to hams in the United Kingdom. That's where putting up and maintaining a repeater may soon become more complex as an item posted on the website of the RSGB Emerging Technology Co-ordination Committee indicates that the criteria for processing repeater applications will be tightened.

It could also impact negatively on both the owners and users of current UK systems on 70 centimetres and above.

Frank Haas, KB4T, has the details:

Published on January 3rd, the article titled "Taking Stock" says that it is likely that strict criteria will be applied in the new year for new United Kingdom repeater applications. It says that against the backdrop of low activity levels, and poorly performing repeaters, the need to justify new applications is likely to be enforced to a far greater extent.

The article also includes a warning to those system operators whose currently operational repeaters have failed to meet the current criteria. It says that long-term non-operational repeaters, repeaters licensed but failing to ever begin service and repeaters nominally operational but widely reported as being either deaf or inaccessible for other reasons has become all too prevalent. In simple United States terms, the adage "use it or loose it" would likely be apropos and be applied.

Along those lines the article post goes on to state that the recent interest in digital modes has been a welcome boost to the repeater sector of the hobby. But it notes that challenges to amateur use of bands above 2 Meters is likely to require even greater proof that hams need and value these bands. This, to support their society in fending off commercial interest at 70 centimetres and above.

For the Amateur Radio Newsline, I'm Frank Haas, KB4T, in Holly Hill, Florida.

The article ends by noting that the focus on radio spectrum in the UK is going to intensify in the coming decade. It says that radio amateurs in that nation have to be seen as having their house in order and make good use of the valuable spectrum at their disposal in the so called "sweet-spot" of the radio bands.

(www.ukrepeater.net/ via Southgate)

ASTRONOMERS SAY 2009 WAS A BETTER YEAR FOR SUNSPOTS THAN 2008

According to several scientific journals, 2009 will fall short of 2008 's record of days with no sunspots or other solar activity. Astronomers note that the solar surface continues see occasional sunspots as we conclude a very active December 2009. This they say insures that 2009 will fall several days short of the 266 blank days of 2008 which was the year with the greatest count of sunspot free days since 1913.

The astronomical community says that the overall solar flux continues to gradually trend upward and there's every reason to believe the year 2010 will not dip below the low sunspot counts of the past three years. This they say is based on the actual trends since September and not only forecast data.

They say that sunspot groups over the past three months have emitted more flares of greater intensity than at any other time in solar cycle 24.

They believe that this is further evidence that the solar disc is awakening from its extended sunspot sleep. What the researchers cannot or won't promise is better High Frequency DX conditions which usually accompanies increased solar activity.

WHITE HOUSE NAMES W7HAS AS NEW CYBERSECURITY COORDINATOR

The White House has named Professor Howard A. Schmidt, W7HAS, of Issaquah, Washington as its new Cyber security Coordinator.

A long time public servant, Schmidt became interested in computer forensics as a police officer. He started working with the Air Force in the early 1990's when he was called upon to assist the Office of Special Investigations to assist in countering hackers trying to penetrate Department of Defence systems.

In addition to his work with the Air Force, W7HAS served as an information security advisor to the government for more than 30 years working for the FBI and the Bush administration after the September 11, 2001 terror attacks on U-S soil. He left the public sector in 2003 to join eBay. Schmidt was also the first chief security officer at Microsoft and a co-founder of the

company's Trustworthy Computing initiative.

Howard Schmidt holds a bachelor's degree in business administration and a master's degree in organizational management from the University of Phoenix. He also holds an Honorary Doctorate degree in Humane Letters. In addition to amateur radio, he is an avid Harley Davidson rider, private pilot, fisherman and outdoorsman.

In his new position he will have regular access to the President and serve as a key member of his National Security Staff. He will also work closely with the President's economic team to ensure that cyber security efforts keep the United States both secure and prosperous.

Ross Hull Contest 2010

The Ross Hull Contest for 2010 is under way now. Remember too that you can include Summer Field Day contacts in your Ross Hull log. The rules were published in December Amateur Radio magazine, and they are also available on the contest web page.

Please note that if you use VK3A V V's VKCL contest logging program, you need to download the latest version (2.20), which is now available on the VKCL web site.

Special incentive for this year's VHF-UHF Field Days

The WIA conducts three Field Day contests each year for the VHF-UHF and Microwave bands, these are in Summer, Winter and Spring.

Contest Manager John Martin VK3KM has announced that everyone who takes part in all three Field Days this year will receive a special certificate.

The WIA Centenary 2010 Field Day Cumulative Certificate and will be issued to those who qualify by submitting a contest entry in each three Field Days.

The Summer VHF-UHF Field Day is coming up soon on the 16th and 17th of January.

Full details were published in December Amateur Radio magazine, and they are also available on the WIA contest web page.

One station to keep an ear out for will be that of the TREC who will operate the Summer VHF/UHF Field Contest at Hallorans Hill in VK4

VK4WAT will be calling on 6m, 2m, 70cm, 23cm and 3cms.

The results for the Spring VHF-UHF Field Day have been finalised.
The first placegetters in each category were:

Section A Single operator, 24 hours - VK5ZT, Tim Dixon.
Section B: Single Operator, 8 hours - VK3HY, Gavin Brain.
Section C: Multi-operator, 24 hours - VK5LZ, the Elizabeth Radio Club
Section D: Multi operator, 8 hours - VK3ALB, the Blasco family station.
Section E: Home station - VK3MY, Ross Keogh.

Congratulations to all.

Full details will be published in the January - February edition of Amateur Radio magazine, and they are also available on the contest page of the WIA web site, wia.org.au

(sourced to TREC, the WIA Centenary Committee & John VK3KM Contest manager)

Special Event Goes Maritime Mobile

As part of that special event initiative with Ei2GBW and GB2Ei, maritime mobile station G2YC/MM will be QRV from cruise ferry MV Julia on the Irish Sea during January and March.

Dates for activation of G2YC/MM are 25 then 30 and 31 Jan,
1-4 and 20/21 March along with 31 March/1 April.

Ei2GBW and GB2Ei, which are not allowed to operate maritime mobile, will continue land-based operations through early April 2010.

Stations working the two special event stations and the maritime mobile station will qualify for the "Spirit of Inisfallen Award."

See the Ei2GBW listing on QRZ.com for further details.

Remembering the unit men - Ampere

Hello I'm Jim Linton VK3PC with another in a series of brief looks at those who made discoveries and have their names as units of measurement.

Andre-Marie Ampere was born in 1775 in France and showed his aptitude to mathematics at the age of 12. His academic career involved physics, chemistry and mathematics.

Ampere learned in 1820 of the discovery that a magnetic needle could be reflected when placed near a cable carrying current.

Within a week Ampere established the relationship between electricity and magnetism and prepared a paper on the subject.

He developed Ampere's Law of electromagnetism. However the main reason we know of him today is his development of an instrument called the galvanometer to measure the size of current flowing in a conductor.

The unit of current is named in his honour.

VK2WI restores the 40 metre AM service.

After a period where only a SSB transmission was made on 7146 KHz for the news - a new antenna - recently installed on a remote part of the site has enabled the AM transmission mode to be reinstated.

The mode will be used for both the morning and evening WIA and VK2 bulletins.

Call backs will be in the SSB mode.

The evening session resumes tonight after 3 weeks of a morning only session.

This note in from Bill VK5WCC of S.E.R.G. Mount Gambier IN vk5.

"Good morning, callbacks this morning equalled 14.

Propagation everywhere this morning; one of the callers, vk3GL called in on his handheld from his backyard 45Km S/E of Melbourne. Also several other interstaters".

2009 DX Sound Bites

Tom, K8CX, has done it again.

He has provided DXers with 146 memorable DX sound clips from 2009.

Home wireless video developments

The use of 60 GHz for home video networking moves a step closer with plans to incorporate SiBeam chips in an HD TV and Blue-Ray player, while the WHDI Consortium is moving ahead with plans for 5 GHz.

EE Times reports that at the Consumer Electronics Show, Vizio Inc will announce plans to use the 60 GHz chips from SiBeam Inc in a high definition TV and Blu-ray player that will ship in June. The startup claims the U.S. TV maker's move is a sign its technology is leading a hotly competitive race to enable wireless video in the home.

Read the full EE Times article 'Vizio puts 60 GHz in HDTV, Blu-ray drive
www.eetimes.eu/semi/222100258

Earlier in December, the WHDI Consortium announced it has completed a spec for a second generation of the 5 GHz technology from startup Amimon. It promises to carry high definition video up to 100 feet and through multiple walls at maximum data rates up to 3 Gbits/second using a 40 MHz channel. The 60 GHz approaches are typically limited to about 10 meters with limited

penetration through walls.

FISTS Club - UK & Europe www.fists.co.uk
FISTS Club - Americas www.fists.org

2 new clubs have been formed among Amateur Radio operators who are Morse Code enthusiasts.

First is called CWOPS (The CW Operators' Club).

CWops encourages the use of CW in Amateur communications, and it promotes goodwill among Amateurs around the world by planned CW activities.

"CWops is international in scope, membership and management.

Its focus is the use of CW, whether for contesting, DXing or rag chewing. Moreover, it promotes every form of sending -- if it's CW, CWops supports it!

"For further information, go to cwops.org

The 2nd club is Essex CW Amateur Radio Club

Although the founders were from Essex, England, they welcome members from much further a field. In fact they would like to hear from like-minded folk from anywhere in the UK and beyond.

Essex CW ARC is looking to organise a whole range of CW activities including contest participation e.g. CW NFD, demonstrations at special events, talks and promotion of CW at local radio clubs.

One important area for the club is assisting those who wish to learn CW.

Amateur radio satellite has 'near miss'

The Japan Amateur Radio League website is reporting a Russian rocket body came close to the Amateur Radio satellite SEEDS (CO-66).

The near miss occurred on January 7 when the rocket body is said to have come within 100 metres of SEEDS (CO-66).

SEEDS was launched in April 2008 and transmits SSTV & Digi-Talker messages and occasional singing! Which gets changed regularly, this satellite has a big audience as both the SSTV & Digi update regularly.

SEEDS transmits on a frequency of 437.485 MHz using either CW running 110mW output or FM with 450 mW output.

(irts)

STUDS IN SPACE!

New Indian Amateur Radio Satellite StudSat (STUDent SATellite) is slated for a March launch and will carry a camera capable of 90 metre resolution.

Work on StudSat started in 2007, it resembles a small cube of
10 cm x 10 cm x 13.5 cm, weighs about 850 gm and has a volume of
1.1 litres.

It is proposed to use a 10mW CW beacon on UHF and also a half duplex 9k6 or 4k8bps FSK TC/TLM link with 1 watt output also on UHF.

Further information on StudSat can be found at

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO

EMERGENCY FREQUENCIES IARU REGION 3
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

>From the CQ / WorldRadio Online Newsroom via VK4ZPP:

Some ham radio activity from Haiti is beginning to be heard, following devastating earthquake.

Father John Henault, HH6JH, in Port-au-Prince, made contact late Wednesday morning with the Intercontinental Assistance and Traffic Net (IATN) on 14.300 MHz, the IARU Global Centre of Activity frequency for emergency communications.
Based on relays monitored at W2VU, Father John reported that he and those with him were safe, but had no power and no phone service. He was operating on battery power and hoping to get a generator running later in the day. He asked the station copying him, William Sturridge, KI4MMZ, in Flagler Beach, Florida, to telephone relatives with information that he was OK.

The following frequencies are in use for earthquake-related traffic and should be kept clear unless you are able to provide requested assistance:
14300 (IATN),
14265 (SATERN);
7045 (IARU Region II)
3720 (IARU Region II)

Additional frequencies may be activated on different bands at different

times of day, so be sure to listen carefully before transmitting to make sure you are not interfering with emergency traffic.

Further was reported by - IARU R3 Chairman of the Disaster Communications Committee, Jim Linton VK3PC

"A listening watch is being maintained for two emergency stations in Port-Au-Prince that have not been activated.

It is also known, that in addition to 14.300, the Salvation Army Team Emergency Net is 14.265 is in use. An IARU request remains current to keep 7.045 and 3.720 clear.

Authorities predict that the worst earthquake in 200 years to hit Haiti could result in a death roll of 100,000.

Haiti was only just beginning to show signs of recovery from a series of hurricanes in 2008 that killed hundreds and left up to a million homeless.

Rev John Henault OMI, is from the Missionary Oblates of Mary Immaculate and works in Haiti helping to provide care for homeless and orphaned children."

REWIND - A LOOK BACK IN HISTORY

HOW RECORDS WERE MADE

And finally this week, have you ever wonder how records were made. We are talking records as in phonograph not computer files. Amateur Radio Newsline Bill Pasternak, WA6ITF, knows because he has seen the movie:

Running almost 24 minutes, the movie is called "The Sound and the Story." And it is the story of the record industry as told back in 1956 by RCA when it was one of the worlds biggest producers of phonograph records, record players and associated products.

"The Sound and the Story" follows the process of making a 33-1/3 RPM "Long Play" or "LP" record, from original recording to first its play on a consumer record player. The movie begins with a lesson in early recording technology including the mastering on an early Ampex tape machine that's fed by a crude by today's standards recording console used back then. It in turn is fed by a number of RCA ribbon microphones of the type we have all seen at radio museums or for sale on-line on eBay. The show also touches on practices such as multiple takes and terms such as dynamic range, though with little explanation of what any of this means.

The exacting and surprisingly complex methods used in crafting the record "master" and the process of stamping the platters are illustrated in great detailed. Additionally there is an explanation of the distribution system that was used at RCA's Indianapolis plant, which also supplied the roots of the RCA Music Service and other similar operations. These operations -- as we all know -- are now just memories of an era gone by.

"The Sound and the Story" clearly was aimed at the general audience with viewers of the film also learning that RCA really took its end to end record quality control very seriously. However, those with experience in the record industry or the technically curious will have much to entertain them for the 20 some odd minutes that this show plays.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the studio in the City of Angels.

"The Sound and the Story" would make an excellent program for radio club viewing if a tape, DVD or even a projectable 16 millimetre film print were to be made available. Meantime you can enjoy this piece of electronic nostalgia on-line at www.archive.org/details/SoundAndTheS

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and here are some

questions for you.

What kind of "actor" are you?

When it comes to making decisions and getting things done, it seems
there are 3 kinds of actors.

First, there is the detractor who can never find a positive in any-one
else's ideas. They can be seen whispering behind hands, slipping around

groups and proving that it was tried 20yrs ago and didn't work. They always vote no.

Secondly, there is the reactor that appears solid, reliable and capable

of continuing forever. However the reactor sports a short fuse and when

put on the spot by having to provide output soon raises a head of pressure that explosively bursts over every one around. Reactors seldom

vote.

And lastly there is the plain actor who reads the script and is prepared to play their part in the activities. The actor has the confidence to question whether things can be better done and is thrilled that some-one else has found a better way of doing things. Actors always vote.

Before your next club meeting, check out what kind of actor are you.

For QNews, I'm Geoff, VK4ZPP and that's what I think.

GYMPIE
www.gceginc.org.au

I'm Roger Stierli, VK4BNQ filling in for Trevor Taege VK4BAT with the news from the Gympie Communications & Electronics Group:

I'd like to take this quick opportunity to welcome Trevor to our Club and thank him for recording the Q-News segments for the Gympie Group - enjoy your holidays Trev... Another new member has just joined the Club so a big welcome from all the GCEG members to Graeme Alder. Now with 23 members, despite the lack of club rooms, we are slowly growing in numbers and reckon this will be the year for the new "Home" to happen.

At the last Club meeting we looked back and noted several really good achievements for the year considering that much time and effort had also gone into trying to finalise negotiations for our own club rooms. We have a fine group of members who enjoy the many different aspects of the hobby and always have a good time when together.

To list just a few achievements:

The 70cm repeater is back up and running, we've built a Digital SSTV EasyPal repeater, an APRS digipeater and have an informative website that continues to develop - www.gceginc.org.au

Last Sunday the weather was just perfect for the Club's Christmas New Year BBQ and we all had a very relaxing fun time at one of our favourite spots on the north side of town. Thanks to Barry VK4KKN who brought along the big barby.

Finally, an Icom IC-721 and a Yaesu FT-980 have been generously donated to the Gympie Group. Many thanks from all of our Club members to Stan Hunter VK4CSH and John Van den Brenk, the son of silent key Eddy, VK3CUD.
The radios will be put to good use as soon as we set up the Club station and one of the sets may well help us with the John Moyle Field Day. The Group

will be participating in this year's contest and with planning underway, we have once again chosen the location of Mt. Wolvi for this year's event.

For Gympie Area News, I'm Roger, VK4BNQ.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray VK4CF back with news from the Redcliffe AR Club".

It is with some sadness that I have to report the loss of the mother of one of our club members Mal, VK4UMS. Mal's mum passed away peacefully aged 91 and her funeral was held last Tuesday at the Albany Creek Crematorium.

Mal as the only child read a very moving his tribute to his mum which included some of his mum's favorite sayings, including, "Don't half do it, do it once and do it properly" and one possibly for all amateurs, "Waste not want not and don't throw it out it might be useful!".

To you Mal and your partner Rosemary the club passes on it deepest sympathy.

There are reports also that the 6 and 2 metre bands have not been to kind to Queensland amateurs in trying to contact Kev, VK4UH and the team at Pitcan Island. Despite a brief contact with Kev on 6 metres by Peter VK4EA from his car in a shopping centre carpark, the signals have been far kinder to NSW and Victorian stations. It has been very disappointing for all concerned but it has been a lot of fun and a full report will be provided in later news segments.

At last Monday's night meeting which was chaired by a nervous Scott, VK4FLAE, and here are details of the first working bee for 2010. This will be held on Saturday 13 February at the home of Charles, VK4BTC at 7 Kelly Court, Redcliffe and it is to start about 8.30 am. The main tasks are to strip out and refit new panels in the caravan. So come with your power tools and with Geoff, VK4FRNS, as the head carpenter and assist for a few hours to get the van ready for the John Moyle weekend.

A reminder that the third Monday of the month is the every important tech talks and Doug, VK4KET will be presenting next Monday night on mining and next month is will be David, VK4DC on a home brew antenna tuner.

So until next week, for Redcliffe club I'm Ray VK4CF.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

Happy New Year from your president. What a busy year it is going to be with contests, equestrian communications a bit of foxhunting and much rag chewing on our nets and repeaters.

On the home brew side there is much to be done; our club spider beam has to be finished in time for the John Moyle. I have to sort out problems with drift in the 70cm cavity of the GI-46 tube amplifier to get it ready for

next November. With promises of an extra grid from Mario I will have our 200 watts on 23cm going better than ever. More 10 GHz DRO units have been ordered from USA and a new approach with the antenna and DRO being atop a 20 foot aluminium two section pole is contemplated. This will be developed during the year and we will phase out the gunn diode units.

I always mention conditions and I could say what conditions. At present awful, I tuned around looking for activity over Xmas and was amazed by the lack of any. There was a dog-pile on 18 MHz on CW with some rare DX station being chased by worldwide but that was all.

I wish all, new happy ham experiences for 2010 and may cycle 24 truly start.

Best DX de John VK4TL ï¿½ President

TOWNSVILLE
vk4wit@wia.org.au

po box 333 Garbutt East, QLD 4814
www.tarc.org.au

GOOD MORNING AND GREETINGS ! THIS IS DON VK4FNQA, WITH NEWS FROM NORTH QUEENSLAND.

AS THE NEWS GOES TO AIR THIS MORNING SOME HAMS IN THE TOWNSVILLE REGION ARE COMMUNICATING WITH HORSIES (AND THEIR RIDERS) IN THE FIELD, AS PART OF THE TOWNSVILLE ENDURANCE RIDERS AND ARABIAN HORSE ASSOCIATIONS BLUEWATER ENDURANCE RIDE CLINIC, BASED OUT OF THE NORTH QUEENSLAND EQUESTRIAN CENTRE.
SOME OF THE HAMS WERE ON SITE YESTERDAY CHECKING OUT HOW MANY TRACKS WERE PASSABLE AFTER THE RAINS THAT HAVE HAPPENED IN THE AREA AND ALSO CAMPED OUT DURING THE NIGHT DOING SOME VHF AND UHF DX AS PART OF THE WIA SUMMER VHF UHF FIELD DAY CONTEST.
BUT FOR NOW THE HAMS ARE MAINTAINING A SAFETY NET ACROSS ALL OF THE RIDE EVENT AND WILL BE ON STATION UNTIL 1PM TODAY.

THE NEXT COMMUNICATIONS SUPPORT EVENTS HAPPENING IN THE NORTH QUEENSLAND REGION WILL BE -

A HORSE ENDURANCE RIDE AT MOSS VALE STATION, BETWEEN BOWEN AND COLLINSVILLE ON SATURDAY 20TH AND SUNDAY 21ST MARCH AND A THRILLING AUTOSPORTS HILLCLIMB UTILISING THE MOUNT STUART ROAD AND HAPPENING ON SUNDAY 29TH MARCH.
IF YOU CAN HELP OUT ON ANY OF THESE EVENTS PLEASE CONTACT GAVIN VK4ZZ ON MOBILE 0427 182469 OR ON THE LOCAL REPEATERS AND GET YOUR CALLSIGN ON THE LIST.

WELL, THATS ALL FOR THIS WEEK FROM TROPICAL PARADISE...
THIS HAS BEEN DON VK4FNQA FOR THE TOWNSVILLE AMATEUR RADIO CLUB INC, AND YOU HAVE BEEN LISTENING TO QNEWS FROM VK4WIA.

THE FINAL FINAL

Struth, dja see there's 30 Qu'nsland radio clubs listed in the callbook?

Blimey and we hardly hear from most of 'em on the news each S'ndee.

Yeah, you mean there's all those amateurs not doin' anything?

Well, must be they're doin' nothin, cos they don't tell the rest of us.

Reach out and share your world of amateur radio via QNEWS. It's so easy

to do!

Type out what you want to say, in the way you would listen to it, record what you wrote in WAV or MP3 format and upload the audio and email the script.

Now that wasn't hard, was it?

Let's hear from your club on QNEWS.

==> + PUBLIC SERVICE: HAITI EARTHQUAKE: "IT'S CHAOS, I'M TELLING YOU --
IT'S REAL CHAOS"

On Tuesday, January 12 at 4:53 PM Haiti time (2153 UTC), a magnitude
7.0 earthquake hit 10 miles (15 kilometers) west of Port-au-Prince, the
island nation's capital. Communications in and out of Haiti have been
disrupted. The ARRL encourages US amateurs to be aware of the emergency
operations on the following frequencies: 7.045 and 3.720 MHz (IARU
Region 2 nets), 14.265, 7.265 and 3.977 MHz (SATERN nets), and 14.300
MHz (Intercontinental Assistance and Traffic Net); the International
Radio Emergency Support Coalition (IRESC) is also active on EchoLink
node 278173. There was no firm estimate on how many people were killed
by Tuesday's quake. Haitian President Rene Preval said the toll could
be in the thousands: "Let's say that it's too early to give a number."
```

On Wednesday afternoon, Fred Moore, W3ZU, assisted Jean-Robert Gaillard, HH2JR, with a phone patch to his friend Ariel in Miami. "It's bad, it literally is bad," Gaillard told Ariel. "We don't know how many people are dead. We do not know what to expect. It's chaos, I'm telling you -- it's real chaos. We are really in a disaster area. It's really a war zone. Many, many buildings in the downtown area are stripped from the ground with many people buried underneath them - you name it, it's bad." Gaillard, who lives in Port-au-Prince, was using his neighbor's generator to make the contact. "It's really chaotic. I've never been in a war, but this is what a war zone would be like. Dead bodies all over the place, dead bodies buried. All I can tell you is that I'm okay, my house is okay. We've had 30 aftershocks, the main one yesterday. We are expecting some more shocks, so I'm a bit nervous to be inside the house."

"The scope of the disaster clearly shows that the response to this is going to be a long term effort," said ARRL Media and Public Relations Manager Allen Pitts, W1AGP. "The ARRL has been in contact with communications leaders of the American Red Cross and Salvation Army, as well as other key Amateur Radio operators throughout the region. As teams from the hundreds of responding agencies worldwide are formed for deployment, many will have Amateur Radio components. ARRL is committed to providing communications aid to our served agencies and working with the international community in this time of crisis. At this time there are no known requests from agencies for amateurs to travel to Haiti, but this can change. If it develops that there are ARESÂ® assignments for a deployment in Haiti, these will be vetted and processed through each Section's Section Emergency Coordinators." Read more here <http://www.arrl.org/news/stories/2010/01/14/11290/?nc=1>.

==> + ARRL STANDING COMMITTEES MEET PRIOR TO 2010 ANNUAL MEETING

The ARRL Board of Directors holds its 2010 Annual Meeting this weekend -- January 15-16 in Windsor, Connecticut. Directors, Vice Directors and ARRL Board officers will be in attendance. The meeting will be preceded on Thursday, January 14 with meetings of the Administration and Finance Committee and the Programs and Services Committee. The Administration and Finance (A&F) Committee is chaired by Northwestern Division Director Jim Fenstermaker, K9JF. This committee studies, advises and makes recommendations for all administration and financial matters of the League, including recommending the annual budget to the Board, making recommendations in regard to staff management and monitoring investment of ARRL funds. The Programs and Services Committee (PSC), headed by Midwest Division Director Bruce Frahm, K0BJ, studies, advises and makes recommendations for all programs and services provided by the League, including operating activities and the Field Organization. Reports on the 2010 Annual Meeting will be available next week. Read more here <http://www.arrl.org/news/stories/2010/01/12/11284/?nc=1>.

==> + ARRL ON-THE-AIR: WARM UP WITH THE ARRL JANUARY VHF SWEEPSTAKES!

VHF weak-signal operators will be on the bands in force the weekend of January 23-25 as the ARRL January VHF Sweepstakes hits the airwaves. This contest gives the VHFer in all of us a chance to do some contesting during the winter months. ARRL Contest Branch Manager Sean Kutzko, KX9X said that January may not seem like the ideal time to hold a VHF+ contest: "After all, sporadic-E propagation is most commonly associated with summer months; however, the propagation gods like to surprise and confound, and there have been plenty of QSOs made via sporadic-E in the colder months through the years. Plenty of other chances for enhancement exist as well, thanks to tropospheric ducting and auroral propagation. Thanks to the advent of WSJT software, making QSOs via meteor scatter in the wee hours of the morning on 6 and 2 meters has never been easier. You have plenty of opportunities to make long-haul QSOs on the VHF+ bands in January!" Read more here <http://www.arrl.org/news/stories/2010/01/13/11282/?nc=1>.

==> AMATEUR RADIO IN SPACE: ARISS NOTES RECORD NUMBER OF ISS-TO-SCHOOL CONTACTS

When the Amateur Radio on the International Space Station (ARISS) program began coordinating ISS-to-school contacts in 2001, only one school -- Luther Burbank Elementary School in Burbank, Illinois -- participated. Ten years later, more than 120 schools participated in the ARISS program in 2009 alone. The number of ARISS-coordinated ISS-to-school contacts has climbed dramatically since that first contact in 2000. In 2001, there were 42 contacts, and in 2002, there were 40 contacts. During the first five years of the program -- 2000-2004 -- there was an average of 31.4 QSOs between the ISS and schools. In 2004, ARISS only conducted 35 contacts -- the lowest in its 10 year history -- but in 2005, 55 schools had contacted the ISS through the program. In 2006, there were 47 QSOs, 75 QSOs in 2007 and 62 in 2008. The 121 QSOs in 2009 show a jump of 95 percent over the 2008 numbers -- setting an ARISS record for the number of contacts. Read more here <http://www.arrl.org/news/stories/2010/01/12/11285/?nc=1>.

==> + PUBLIC SERVICE: NHC TO PROVIDE GREATER LEAD TIME FOR WATCHES, WARNINGS

Beginning with the 2010 hurricane season, NOAA's National Hurricane Center in Miami will issue watches and warnings for tropical storms and hurricanes along threatened coastal areas 12 hours earlier than in previous years. According to NHC experts, advancements in track forecasts are making it possible for forecasters to provide greater lead time. Tropical storm watches will be issued when tropical storm conditions are possible along the coast within 48 hours. Tropical storm warnings will be issued when those conditions are expected within 36 hours. This is an increase of 12 hours from those issued in previous years. Hurricane season runs from May 15-November 30 in the Eastern Pacific and on June 1-November 30 for the Atlantic Basin. Read more here <http://www.arrl.org/news/stories/2010/01/14/11287/?nc=1>.

==> + FOCUS ON THE FCC: FCC SEEKS PUBLIC'S HELP IN REFORM EFFORT

According to its chairman, the Federal Communications Commission wants to change the way it is seen by the American public. In order to further that effort, on January 7, FCC Chairman Julius Genachowski announced that the Commission had launched a new Web site -- Reboot.FCC.gov-- saying it is the first-ever Web site dedicated to soliciting public input on ways to improve citizen interaction with the FCC, "creating a forum where the public can participate in improving the FCC." Read more here <http://www.arrl.org/news/stories/2010/01/08/11281/?nc=1>.

==> ARRL PUBLICATIONS : TWO LEAGUE PUBLICATIONS NOW AVAILABLE FOR KINDLE

In December 2009, the ARRL's Tech Q&A <http://www.amazon.com/ARRLs-Tech-Q-A-ebook/dp/B002YNSBNE/ref=sr_1_2?ie=UTF8&s=books&qid=1259944328&sr=8-2-catcorr> debuted on Amazon.com for use with Kindle wireless reading device. Now we are pleased to announce that the ARRL's General Q&A <http://www.arrl.org/catalog/?item=9957> and the ARRL's Extra Q&A <http://www.arrl.org/catalog/?item=1379> are now available directly from the online bookseller for use on the Kindle . Kindle is shaped much like a book with a paper-like screen that displays text and pictures. Those who have the Kindle application installed on their Apple <http://www.apple.com/> iPhone <http://www.apple.com/iphone/> or iPod touch <http://www.apple.com/ipodtouch/> -- or even on their computer -- can download the book for use on these devices. When you download the Tech Q&A, General Q&A and the Extra Q&A, you get access to these study tools quickly and easily, smoothing the path to your first -- or next! -- ham radio license. Studying on the Kindle is perfect for today's busy lifestyle, whether you're at home, in the office, traveling or just on the go. Each version of the Q&A lets you review questions and answers from that element's entire question pool so you can pass your exam. All three versions are available for purchase from Amazon.com for $9.99 each.

==> + NOW YOU KNOW!: HURRICANE NAMES

By ARRL News Editor S. Khrystyne Keane, K1SFA

<http://docs.lib.noaa.gov/rescue/mwr/056/mwr-056-09-0350.pdf> For several hundred years, many hurricanes in the West Indies were named after the particular saint's day on which the hurricane occurred: In his 1938 book Hurricanes, Ivan R. Tannehill describes the major tropical storms of recorded history and mentions many hurricanes that were named after saints. On July 26, 1825, Hurricane Santa Ana <http://en.wikipedia.org/wiki/1825_Santa_Ana_hurricane#1825_Atlantic_hurricane_season> struck Puerto Rico with exceptional violence. Hurricane San Felipe (the first) <http://en.wikipedia.org/wiki/1870%E2%80%931879_Atlantic_hurricane_seasons#San_Felipe_Hurricane> and Hurricane San Felipe (the second) <http://docs.lib.noaa.gov/rescue/mwr/056/mwr-056-09-0350.pdf> also hit

Puerto Rico on September 13 in both 1876 and 1928.

During World War II, the practice of giving hurricanes women's names became widespread in weather map discussions among forecasters, especially Air Force and Navy meteorologists who plotted the movements of storms over the wide expanses of the Pacific Ocean. In 1953, the United States abandoned a confusing two year old plan to name storms by the phonetic alphabet in use at the time (Able, Baker, Charlie and so on) when a new, international phonetic alphabet was introduced. That year, the United States began using female names for storms. The practice of naming hurricanes solely after women came to an end in 1978 when men's and women's names were included in the Eastern North Pacific storm lists. In 1979, male and female names were included in lists for the Atlantic and Gulf of Mexico.

Since 1953, Atlantic tropical storms have been named from lists originated by the National Hurricane Center (NHC <http://www.nhc.noaa.gov/index.shtml>). They are now maintained and updated by an international committee of the World Meteorological Organization (WMO <http://www.wmo.int/pages/index_en.html>). There are six lists of hurricane names <http://www.nhc.noaa.gov/aboutnames.shtml> and they are used in rotation. This means that the 2010 list will be used again in 2016. According to the NHC, the only time that there is a change in the list is if a storm is so deadly or costly that the future use of its name on a different storm would be inappropriate for reasons of sensitivity such as 2005's Hurricane Katrina). If that occurs, the offending name is stricken from the list and another name is selected to replace it at the WMO annual meeting. Check out the list of retired names on the NHC Web site <http://www.nhc.noaa.gov/retirednames.shtml>.

Several names have been changed since the lists were created. For example, on the 2007 list (which will be used again in 2013), Dorian has replaced Dean, Fernand has replaced Felix and Nestor has replaced Noel. For 2010, Colin replaced Charley, Fiona replaced by Frances, Igor replaced by Ivan and Julia replaced by Jeanne. Before 1979 -- when the first permanent six-year storm name list began -- some storm names were simply not used anymore. For example, in 1966, "Fern" was substituted for "Frieda," and no reason was cited. There are only 22 names on each list since the WMO does not use names that begin with Q, U, Y or Z. The names for 2010 are Alex, Bonnie, Colin, Danielle, Earl, Fiona, Gaston, Hermine, Igor, Julia, Karl, Lisa, Matthew, Nicole, Otto, Paula, Richard, Shary, Thomas, Virginie and Walter.

In the event that more than 21 named tropical cyclones occur in the Atlantic basin in a season, additional storms will take names from the Greek alphabet: Alpha, Beta, Gamma, Delta and so on. If a storm forms in the off-season, it will take the next name in the list based on the current calendar date. For example, if a tropical cyclone formed on December 28, it would take the name from the previous season's list of names. If a storm formed in February, it would be named from the subsequent season's list of names.

You can find lists of names for storms on the NHC Web site for every region of the globe <http://www.nhc.noaa.gov/aboutnames.shtml>, including the Eastern North, Central North and Western North regions of the Pacific Ocean, Australia, Fiji, Papua New Guinea, the Philippines and the Northern and Southwest portions of the Indian Ocean. Now you know!

==> SOLAR UPDATE

Tad "Blinded alike from sunshine and from rain <http://englishhistory.net/keats/poetry/eveofstagnes.html>" Cook, K7RA, reports: Recent growing sunspot activity remains strong. Weekly averages of daily sunspot numbers over the nine weeks from November 12-January 13 were 9, 12.6, 0, 1.9, 21.1, 31.4, 21.9, 14.6 and 26.4. Sunspot region 1035 re-emerged as region 1040 on January 7 and his grown steadily. For January 7-13, the total area of region 1040 -- as expressed in millionths of a solar hemisphere -- was 80, 40, 70, 130, 300, 300 and 380. It has passed the 0 degree meridian (the imaginary vertical line on the visible Sun that faces straight toward Earth), but looks as if it has perhaps another 5 or 6 days before it crosses the Sun's western horizon. Look for more information in the Solar Update, available on the ARRL Web site on Friday, January 15. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by John Keats' The Eve of St Agnes <http://englishhistory.net/keats/poetry/eveofstagnes.html>.

==> + IN THE WORKSHOP: DEADLINE FOR SECOND HOMEBREW CHALLENGE APPROACHING

All entries for the Second ARRL Homebrew Challenge must be received in the ARRL Lab no later than close of business on February 28, 2010. Since that is a Sunday, the judges will accept entries arriving with the first mail delivery on Monday, March 1, 2010. In 2006, the ARRL sponsored a successful competition for a 5 W, 40 meter voice/CW transceiver that could be built for $50. This second Homebrew Challenge offers an opportunity to boost that power to 50 W with an amplifier built from no more than $125 of parts. Rules, subsequent requests for clarification and responses, as well as a list of prizes, can be found on the ARRL Homebrew Challenge Web page <http://www.arrl.org/qst/hbc/>.

==> THIS WEEK ON THE RADIO

<http://www.youtube.com/watch?v=TuV-D37BQn0> This week, there is a running of the NCCC Sprint on January 15. The Hungarian DX Contest and the North American QSO Party (SSB) are January 16-17. The Feld Hell Sprint is January 17, the Run for the Bacon QRP Contest is January 18 and the NAQCC Straight Key/Bug Sprint is January 21. Next week, be sure to check out the ARRL January VHF Sweepstakes on January 23-25. On January 22, there is another running of the NCCC Sprint. Look for the YL-ISSB QSO Party (SSB), the MIE 33 Contest and the BARTG RTTY Sprint on January 23-24. The SKCC Sprint is January 27. All dates, unless

otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> ARRL STAFF VACANCY

ARRL is soliciting applications to fill the HQ position of Emergency Preparedness and Response Manager. The person in this position will develop and maintain ARRL's Emergency Communications and Emergency Preparedness functions, both internally and externally. Candidate review by the hiring committee will begin in mid-January. Please see ARRL Web site <http://www.arrl.org/announce/jobs/> for application information and job requirements.

==> THE ARRL CONTEST UPDATE SEES CIRCULATION MILESTONE

The December 23 and January 6 issues of the ARRL Contest Update <http://www.arrl.org/contest/update> newsletter cracked another barrier with more than 25,000 subscribers. Containing material that goes beyond straight contest reporting, subscribers to the Contest Update find it full of all types of useful material. The newsletter -- available free to ARRL members and published every two weeks by e-mail or Web access -- got its start as a modest text-only bulletin in March 2002. Having expanded its coverage to topics of interest to any active ham, the newsletter's byline and mission became "News and Techniques for the Active Operator" in 2008 as it pioneered the ARRL's graphic newsletter format. A typical newsletter contains news and human interest stories, press releases about new products for hams, photos and links to multimedia content, an editorial segment, a big section of technical items that any ham can put to work -- and even a chuckle or two. You will also find contest results from your state's QSO party, as well as a calendar of upcoming contests and due dates for contest logs. Why not give the newsletter a try? Back issues are available online <http://www.arrl.org/contest/update>. To sign up for free delivery, log in to the ARRL Web site with your call sign and password, then click "Member Data page" and "Modify membership data." At the bottom of the page, click the box next to "ARRL Contest Update (biweekly contest newsletter)" and you're ready to read!

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, January 24, 2010, for these online course sessions <http://www.arrl.org/cep/student/> beginning on Friday, February 10, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page

<http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline report number 1692 with a release date of
Friday, January 15, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio responds as an earthquake ravages
Haiti, Sweden pulls interference causing B-P-L gear off store shelves,
the FCC appears headed toward an extreme makeover and the sound of
heavy and light iron will be taking to the air the weekend of February
7th. Find out the details on Amateur Radio Newsline(tm) report number
1692 coming your wayright now.

RESCUE RADIO: HAM RADIO FIRST RESPONDERS ACTIVATE FOLLOWING HAITI
QUAKE

A powerful earthquake has struck off the coast of Haiti. The tremor
hit on Tuesday, January 12th at 2153 UTC. According to the US
Geological Survey the epicenter was about 10 miles south-west of
Port-au-Prince and hit a magnitude 7.3 on the Richter Scale. The first
tremor was followed by two aftershocks with magnitudes of 5.9 and 5.0.

Soon after the first jolt amateur radio first responders were activated
in Cuba to listen for any distress calls from is Caribbean neighbor.
Bill Pasternak, WA6ITF, is in the newsroom with more.

--

HH2JR: " I am able to communicate for the first time. I hope you are
copying me OK. The situation is chaotic and I am only alive thanks to
god. Over."

--

That's just part of a conversation captured by Newsline listener Brian
Crow, K3VR, on Wednesday, January 13th as hams in quake ravaged Haiti began
returning to the airwaves. Jean-Robert Gaillard, HH2JR, was one of the
first and with Fred Moore, W3ZU, running the patch he described what Haiti
was like when he finally was able to get a chance to view the devastation
first hand:

--

HH2JR: "Yesterday was really bad but I managed today to go and visualize
-- myself and a couple of friends. We took some pictures and its really
chaotic. I've never been through a war but its what a war (signal

fade). Dead bodies all over the place and dead bodies (signal fade) to be buried."

--

HH2JR also described the aftershocks:

--

HH2JR: "I'm OK and my house is OK and that's all I can tell you. (signal fade) We have had thirty aftershocks, Repeat three zero aftershocks since the big one yesterday at ten (minutes) to five in the afternoon. Over to you."

--

That contact was among the first of the personal ham radio on scene accounts of living through a killer quake but not the first ham radio response to this disaster. Soon after the quake hit, CQ Magazine editor Rich Moseson, W2VU, put out an e-mail alert that quoted IARU Region 2 Area C Emergency Coordinator, Arnie Coro, CO2KK. Corro said that he was already coordinating a multi-national response by hams with organized nets on 7.045 and 3.720 MHz. The net control stations were identified as CO8WM and CO8RP located in the city of Santiago de Cuba. According to Corro these nets were in direct contact with the National Seismology Center of Cuba located in that city. CO2KK asked hams world-wide to monitor the two net frequencies, but to also keep them clear of non-essential traffic. International Radio Emergency Support Coalition is also active on EchoLink node 278173.

On Wednesday the ARRL put out a notice saying that amateur radio operators should also be aware that emergency traffic pertaining to the Haitian earthquake is expected on the Salvation Army SATERN net frequencies. According to SATERN's leader, Major Pat McPherson, those frequencies are 14.265, 7.265 and 3.977 MHz. The Salvation Army is accepting health and welfare traffic requests on its Web site.

As to the health and welfare of hams living in Haiti. Part of that was covered in the January 13 edition of The Daily DX newsletter. It reported that the Reverend John Henault, HH6JH, made contact late Wednesday morning with the Intercontinental Assistance and Traffic Net on 14.300 MHz. This is the IARU Global Center of Activity frequency for emergency communications. HH6JH said that he was safe, but had no power and no phone service. Also that he was operating on battery power and hoping to get a generator running later in the day. The newsletter also noted that Pierre Petry, HH2/HB9AMO who was in Cap Haitien about 140 km north of Port-au-Prince is okay. Petry is in Haiti working for the United Nations World Food Program.

Daily DX also reports that members of two ham radio groups from the neighboring Dominican Republic, the Radio Club Dominicano (RCD) and Union Dominicana de Radio Aficionados (UDRA) are preparing to go to Port au Prince. Once there the team will be installing an emergency radio

communications station operating as HI8RCD/HH and a mobile station. The team of Dominican Republic Amateur Radio operators includes HI8PGG, HI8FLB, HI8CJG, HI8DBF, HI8SAR, HI8JLH, HI8ROD and HI3TEJ.

The situation in Haiti is still chaotic and literally changing from moment to moment. The most important thing is to keep 3.720, 7.045, 7.265, 14.265 and 14.300 clear for emergency and priority traffic and quake relief nets on these frequencies. We will post updates in text form on our Newsline Facebook web update page as they become available. To access it just go to facebook.com and friend Amateur Radio Newsline.

And for the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles. Don

--

Haiti's ambassador to the United States is Raymond Joseph. He called the quake a major catastrophe, telling the various news services that he is calling on friends of Haiti to come to the country's aid. (ARNewsline(tm), CQ, ARRL, SATERN, Daily DX. Audio supplied by K3CR)

RESCUE RADIO: NEBRASKA MAY ASSURE WEATHER SPOTTERS EMEREGENCY LIGHTS

Still with rescue radio related news, word that a measure has been introduced into the Nebraska state legislature to assure that storm and severe weather spotters will be permitted to continue to have distinctive lighting on their vehicles. This after several of the states Emergency Coordinators and others involved in crisis communications in Nebraska raised concerns last year about a new law that prohibited such visual notification devices being used.

Many weather spotters felt that these lights protected them while parked in isolated areas where occasional high speed traffic presented a danger. Now, thanks to James R. Reider, K0JWR, a bill was introduced on January 6th by District 28 Senator Bill Avery to amend the law on vehicle lighting to allow use of distinctive amber lights by storm-spotters.

In part the measure states that rotating or flashing amber lights can be displayed by any motor vehicle being operated by or on behalf of a weather spotter. This, by a person who holds an unrevoked and unexpired amateur radio station license issued by the Federal Communications Commission. It also applies to emergency management workers while they are engaged in responding to an emergency.

The measure has been designated as Nebraska is LB 719 and is available for download at the U-R-L in this weeks printed Amateur Radio Newsline report. Nebraska hams are being asked to take a moment and send an email or letter to their respective State Legislators in support of this bill. You download the .pdf of the bill at http://nebraskalegislature.gov/FloorDocs/Current/PDF/Intro/LB719.pdf (K0AIZ)

**

THE BPL WAR: SWEDEN WITHDRAWS SOME BPL/PLT MODEMS FROM MARKETPLACE.

Score one in the BPL war for ham radio. The latest issue of the EUROCOM newsletter has a welcome item on the withdrawal by Sweden of polluting Power Line Adapters.

The January 5th edition notes that Sweden has withdrawn some Broadband over Powerline or PLT Modems of the nations market. The Swedish administration argued that those devices did not meet the protection provided by the harmonized standard. It also noted that in many cases harmful interference could actually be measured. It said that in those cases reception in accordance with ITU Regulation was no longer possible an therefore the essential requirements violated. (Southgate)

**

RADIO LAW: AUSTRAILIAN RADAR LEAVES 10 MHz HAM BAND

The IARU R1 website reports that an ionespheric Radar in Australia has left the amateur radio spectrum in the 10 MHz band. The report says that following complaints filed by VK4DU and DJ9KR to the La Trobe University that the Tiger Radar in Bruny, Tasmania agreed to change the frequency data bases. Also. Guarantees were made that in the future no ham radio band will be interfered by this ionespheric radar system. (IARU Region 1)

**

HAM RADIO IN SPACE: INDIA'S STRUDSAT TO LAUNCH IN MARCH

India's StudSat or Student Satellite, now slated for a March 2010 launch and will carry a camera capable of 90 meter resolution.

StudSat is described as a small cube weighing about 850 grams. The satellite is intended to be launched in 700 km Sun-synchronous orbit. It will perform the function of a remote sensing satellite and take images of earth's surface with a resolution of 90 meters, the best achieved by any "PICO" category satellite in the world.

Radio wise it will likely carry a 10 milliwatt UHF CW beacon and also a half duplex FSK link with 1 watt output also on UHF. Work on StudSat started in 2007. And we will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (ANS)

RADIO POLITICS: AN EXTREME MAKEOVER FOR THE FCC

FCC Chairman Julius Genachowski is asking for public assistance on how his agency can better serve the needs of America. On January 7th, the FCC Chairman announced the establishment of a new website called Reboot.FCC.gov. Genachowski calls it the first ever website dedicated to soliciting public input on ways to improve citizen interaction with the FCC. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--

In his own words, FCC Chairman Julius Genachowski sees the new website as creating a forum. One where the public can participate in improving the FCC.

According to Genachowski, his agency wants to change the way it is seen by the American public. And in his remarks following the new cyberspace portal's launch he called it a website dedicated to public education and discussion on how the FCC can continue to improve its operations, both on and offline.

The Reboot.FCC.gov Web site highlights five key elements of FCC reform for public discussion and feedback. These are the redesign of the primary FCC Web site at www.fcc.gov. This, to better serve the needs of the American people.

Second is the launch of an additional website called FCC.gov/data. This to serve as an online clearinghouse for the Commission's public data.

There is also what the FCC Chairman terms as the reevaluation of how citizens engage in government and exploring new ways to increase public participation through the use of new media tools. Another point involves overhauling and reforming the systems available on the FCC's primary website.

Finally, but by no means least is modernizing the efficiency of agency proceedings. This last initiative also seeks input on ways to improve the quality of agency decision-making, reduce backlogs and enhance the public's ability to understand and participate in Commission proceedings. To assist in accomplishing this goal, the new website also plays host to the first ever FCC wide blog, online workshops on the Commission's reform agenda and the first set of new tools to increase transparency and access to public data.

Julius Genachowski says that transforming the FCC into a model of excellence in government is one of his top priorities. But he adds that the success of such a transformation depends on strong public participation throughout the process.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, watching and reporting on this FCC extreme makeover from Los Angeles.

--

FCC Chairman Genachowski says that this is an effort that is consistent with the President Obama's Open Government directive. This as a method of creating a forum where the public can participate in improving the FCC. (FCC)

**

RADIO LAW: WHITE SPACE WIRELESS MIC BILL GETS INDUSTRTY SUPPORT

A bill introduced by Representative Bobby Rush of Illinois that would require the FCC to allow thirteen classes of professional wireless microphones to register in a location database has won industry support from microphone manufacturer Shure. Just prior to the January 4th commentary cutoff sate the company threw its weight in favor of the so-called protected white spaces that would protect professional wireless mics from interference caused by such devices as wireless laptop computers and smart radios that the FCC is allowing to share the TV band as well.

The database will show users that the new unlicensed wireless devices must avoid when searching for channels to use. The protected classes of wireless microphones include those used at amusement parks, arenas, convention centers, educational facilities, fairgrounds, government facilities, houses of worship, lodging facilities, museums, recording studios, restaurants, stadiums and theaters. Not protected are consumer level wireless mics that have become popular with wedding photographers and home video hobbyists including some hams who use them for amateur TV related projects. (B&C)

**

ENFORCEMENT: TEXAS UNLICENSED STATION WHICH CLAIMED FCC HAD NO JURISDICTION FINED $10000

A couple who claimed that the FCC had no jurisdiction over their unlicensed radio station because it operated only in Texas will have to pay a $10,000 fine after all. Amateur Radio Newsline's Mark Anramowicz, NT3V, reports:

--

This story goes back to last August when in response to a complaint the Houston office of the FCC's Enforcement Bureau used its direction-finding gear to T-hunt down an illegal signal 90.1 MHz. to an Austin home. It then issued a notice of unlicensed operation Jerry and Deborah Stevens which the Stevens acknowledged. The Stevens then requested additional time to provide information in their reply.

The commission granted 30 days to provide the information it had requested. During that time the investigating agents identified further illegal broadcasts on two subsequent dates as coming from the Stevens' property. The Stevens' responded by admitting operating radio transmitting equipment, though only within the boundaries of the state of Texas. They also questioned the FCC's jurisdiction over intrastate communications.

In November the FCC issued its $10,000 Notice of Apparent Liability to the couple. The Stevens contested it and again questioned the FCC jurisdiction

in the matter. They also questioned whether the resident agent who signed the N-A-L had the authority to do so.

Now the FCC has upheld the Notice of Apparent Liability against the Stevens for their 90.1 MHz unlicensed operation. In doing so the agency reiterated that the law explicitly sets forth the commission's jurisdiction
over all radio transmissions, both interstate and intrastate.

But the finding goes further. The FCC order states that resident agents at each installation are delegated authority by the Commission to act upon applications, requests or other matters, which are not in hearing status. As such resident agents may indeed issue a written notice of apparent liability in cases where they believe that FCC rules or the Communications Act have been violated. It then ordered that the N-A-L be confirmed and ordered the Stevens to pay.

Watching the FCC enforcement log, I'm Mark Abramowicz, NT3V, in Philadelphia for the Amateur Radio Newsline.

--

The fine was confirmed by the regional director of the South Central Region of the Enforcement Bureau. The Stevens' were given the customary 30- days to pay the fine or to file an appeal. The complete finding in this case is on-line at http://www.fcc.gov/eb/FieldNotices/2003/DOC-294712A1.html (FCC)

**

PUBLIC SERVICE: HAM RADIO AND THE B2V CHALLENGE CUP RELAY

Hams are once again needed to assist in providing communications for the Santa Clarita, California contingent taking part in the upcoming Baker to Vegas Challenge Cup Relay. The race takes place April 16th to the 18th. The course begins about 12 miles west of Baker California on Highway 127, heads to the fabled city of Pahrump, Nevada, turns onto the Blue Diamond Highway towards Las Vegas.

There 250 teams each with 26 runners, 3 support vehicles with at least two support people in each vehicle divided by two shifts each supported by 12 volunteer ham radio operators. There are 20 stages to this event and they do run through the night, hot, cold, high winds and rain.

If this event interests you and you would like to volunteer, please contact KI6CCW (a)t arrl (dot) net. More about the Baker to Vegas Challenge Cup Relay is on-line at www.bakervegas.com. (KI6CCW)

**

PUBLIC SERVICE: THE BOSTON MARATHON AND HAM RADIO

Amateur radio volunteers are also be needed for communications assistance for the April 19th Boston Marathon. The 26 mile course follows a route from rural Hopkinton to Boston. Marathon Amateur Radio Communications is a

consortium built on the cooperative efforts of the Framingham Amateur Radio Association and Minuteman Repeater Association. These clubs work together to provide radio communications along the entire route of the event. If you want to volunteer for this one just take your web browser to www.mmra.org/marc and follow the instructions to sign up. (K1KW)

**

NAMES IN THE NEWS: UTAH HAM AND TEACHER HONORED BY GOVERNOR

Some names in the news. First up is Glen Westbroek, KD7LLE, who is an Orem, Utah, ham radio operator and Junior High School science and technology teacher. Westbroek was one of seven recipients presented with the Governor's Medal for Science and Technology at a January 5th ceremony in Salt Lake City.

According to a news release from the Governor's Office of Economic Development, Westbroek has taught at Orem Junior High since 1995 and has traveled the state sharing his expertise. He received the award for his contributions to professional teacher development in Utah's science core as well as for his creation of "Sci-ber Text." "Sci-ber Text" is Utah's online textbook for grades 3 through 9.

Westbroek was presented the award personally from Utah Governor Gary Herbert. The online "Sci-ber Text" created by KD7LEE can be found at http://utahscience.oremjr.alpine.k12.ut.us. (Provo Daily Hearald)

**

NAMES IN THE NEWS: 2009 YASME EXCELLENCE AWARD WINNERS NAMED

The Directors of The Yasme Foundation have announced the recipients of the 2009 Yasme Excellence Awards. Those named include Jamie Dupree, NS3T, for his creation of the Radiosport Web site; Bob Bruninga, WB4APR, for the invention of APRS and George Wallner, AA7JV and Tomi Pekarik HA7RY for their DXpeditions to Mellish Reef.

Also named are Tursoon-Zadeh, EY8MM who created central Asia beacons on 160 and 6 meters, Don Hill, AA5AU for his leadership in RTTY contesting and Rich Strand, KL7RA. Strand was the driving force behind the highly successful W1AW/KL7 and KL5O operations, both of which highlighted a resurgence in Alaskan contesting and DX activity.

The YASME Foundation say that these awards will be presented from time to time as the board feels appropriate. They will be given for service and dedication to amateur radio as recognized by the foundation's directors. (N7NG)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from

our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: E-COUPONS AND INSTANT DISCOUNTS GAINING IN POPULARITY

its new to the general public but not to amateur radio. Jim Meachen, ZL2BHF, has the latest on instant discounts and electronic coupons:

--

Electronic coupons, arriving by cell phone, e-mail and posted on social networking websites are helping generate new business among younger customers.

According to coupon processing company Inmar Inc., use of electronically generated discounts by those under 30 has more than doubled in the first half of 2009 compared with the same period last year. They now account for more than 3 percent of all coupons used. That's up from roughly 2 percent in 2008.

Electronic coupons offer the same benefits for retailers as any discount program. This equates to increased consumer traffic, increasing sales, building loyalty, and attracting new customers. Best of all from a merchandising standpoint is that potential customers can print digital coupons from Web sites or e-mail, and eliminating the cost of postage to the company making the offer.

Im Jim Meachen, ZL2BHF.

--

We should add that electronic coupons and instant discounts are not new in amateur radio as many hams are well aware. Many manufacturers have been offering one or the other for years. (EIN)

**

HAM RADIO IN SPACE: SEEDS CO-66 IN A NEAR MISS

In heam radio space related news the Japan Amateur Radio League website is reporting that part of a Russian rocket came close to the SEEDS CO-66 amateur radio satellite. The near miss occurred on January 7th when the rocket body is said to have come within 100 meters of the ham radio bird. No damage occurred to SEEDS from the incident. You can monitor CO-66 on 437.485 MHz using either CW running 110 milliwatts or FM with 450 milliwatts out. (JARL)

**

HAM RADIO IN SPACE: HAM LEAD GROUP TO BUILD EUROPEAN GPS SATELLITE SYSTEM

Surrey Satellite Technology in the United Kingdom which is headed up by Martin Sweeting, G3YJO, has been awarded a contract to build 14 spacecraft in cooperation with O-H-B in Germany. This, for the Galileo Satellite Navigation project.

The contract was announced by the European Commission in Brussels. The Galileo project is intended as an the European Union's version of the US Global Positioning System but also implementing a number of significant improvements. This will mean that it should give users quicker, more reliable fixes, and enable them to locate their positions with an error of one meter as compared with the current GPS error level of several meters.

Plans are to have the satellites coming off the the production line in the second half of 2012. Arianespace will use Russian-built Soyuz rockets to launch these global positioning spacecraft in batches of two. System planners say that by early 2014 there could be up to 16 spacecraft in the Galileo network. That they say is enough to make a significant difference to users with Galileo and GPS-enabled receivers. (G1LKJ, BBC, SpaceHorizons)

**

RADIO IN SPACE: KEPLER SPACE TELESCOPE DISCOVERS 5 NEW PLANETS

The orbiting Kepler Space Telescope has spotted five new planets that range in size from about the diameter of Neptune to that of Jupiter orbiting stars that are hotter and larger than the Sun.

The newly discovered planets are located in distant parts of space. Data radioed back from orbital space observatory shows them to be real and distinct entities.

NASA dubbed the planets Kepler 4b, 5b, 6b, 7b, and 8b. Spokesman Jon Morse, says that these are only the first of many Kepler discoveries rolling off the assembly line.

Kepler was launched March 6th with a mission to spend the next three years hunting for Earth's sister planets. NASA says that this telescope will improve its chances by focusing on planets that are similar to Earth in size and are located at a distance from their sun that would permit the existence of water. (NASA)

**

WORLDBEAT: UK POLICE SUE OVER RADIATION EXPOSRE FROM TWO-WAY SETS

Some United Kingdom police officers say that they are preparing to sue their own force. This, over a series of illnesses they claim were caused by the radio system they use while out on patrol.

According to the on line edition of the London Telegraph, the Lancashire Constabulary was the first in Great Britain to try out the Airwave network, designed specifically to have longer range and more capacity to the emergency services and the military. Nine years after its introduction scores of officers are claiming that radiation emissions from the system

have caused them to suffer such ailments as nausea, headaches, stomach pains and skin rashes.

The local branch of the Police Federation has logged 176 individual complaints. now senior officials at the police authority are seeking legal advice on how to deal with them. In fact, they have already made budget changes to allow for a contingent liability in respect of Airwave liability claims. You can read the full Telegraph article at www.telegraph.co.uk/health/healthnews/6920973/) (G3RZP, Southgate)

**

WORLDBEAT: DUTCH STATION PC600P CELEBRATES PURMEREND

The Dutch city of Purmerend was founded 600 years ago and now local radio amateurs will activate the special call PC600P three times in 2010 to commemorate this event. The dates are January 1st to the 27th, May 1st to the 28th and from Sep 1st to the 28th. PA3HGP is the QSL manager. He will confirm all QSOs via bureau automatically. Cards are also available as eQSL or via Logbook to the World.

**

WORLDBEAT: 2010 ANTARACTIC ACTIVITY WEEK

The 7th annual Antarctic Activity Week to celebrate Antarctica takes place from February 22nd to the 28th. It planners say that this years event could be better than previous years with many more stations advising of their intended participation, and the hope of an improving solar cycle. More information on this event is on-line at www dot waponline dot it.

**

ON THE AIR: POLAND, SPECIAL EVENT STATION COMMEMORATES CHOPIN

On the air, the special call 3Z0FCH will be active until June 30th. This in remembrance of Polish composer and pianist Fredric Chopin who would have celebrated his 200th birthday this year.

Fredric Chopin was born on March 1st 1810 and passed away on October 17, 1849. During his short lifetime he learned piano and most of his compositions such as his Piano Concerto No. 2 in F minor were written primarily for the as solo for that instrument. Because of this he is responsible for major innovations in the piano sonata, mazurka, waltz, nocturne, polonaise, and prelude.

Now in memory of the man and in celebration of his music 3Z0FCH is on the air. If you make contact, please QSLs to SP7PAD either direct or via bureau.

**

DX

In DX, seven hams have formed a multi-national group for a planned DXpedition to Kurdistan from April 3rd to the 11th. They will have ten day visas issued by the Government of Kurdistan ad plan to operate 160-10 meters using the callsign YI9PSE. Modes will be CW, SSB and RTTY. They will have at least 3 stations on the air with AA6G acting as their pilot. QSL will be via N6NKT. Further information can be found at www dot yi9pse dot com

RA4LW, will be active from Moldavia as ER4KAA during the CQ 160 Meter CW Contest from as a single operator high power entry. Operation is January 29th to the 31st and QSL only direct via his home callsign.

VE6LB will be operating portable A6 from Dubai through February 8th holiday style in CW on 40 through 15 meters. He has 100 watts into a G5RV antenna. QSLs direct to his home call or electronically via Logbook to the World.

E70A who has been active from Djibouti as J28OO since November of 2007 has changed his callsign to J28AA. He operates CW, SSB and RTTY on 80 through 10 meters with an emphasis on 80, 40 and 20 using Morse. His QSL manager is K2PF, either direct or Logbook to the World.

UA1PAW is now operating as R1ANR from Novo Runway in Antarctica and is expected to be there until the end of February. With the higher band closed due to bad propagation, look for him at about 20.00 UTC on 40 meters. His QSL Manager is ZS1ANF.

Lastly, YO8TLC will be active as 8Q7CE from the Maldives until January 25th. He plans to operate holiday style on 40, 30 and 20 meters, mainly CW and some SSB. QSL via his home call either direct or via the bureau.

**

THAT FINAL ITEM: OLD TIME RADIO: AM TRANSMITTER RALLYE FEBRUARY 6 - 7

And finally this week, if you are a fan of old time heavy iron ham radio transmitters, or at least those that sound like heavy iron, listen up. The 2010 A-M Transmitter Rally will take place the weekend of February 6th to the 7th. Festivities begin at 6:00 AM Eastern Standard Time on the 6th and run until 2:00 AM the following morning. And if you have not heard what good A-M sounds like on the ham bands, you are in for a treat because it sounds like this:

--

Actual contact audio. Hear it by downloading the MP3 file at www.arnewsline.org

--

The 2010 A-M Transmitter Rally will be on 160 through 10 meters on the usual A-M frequencies. The purpose of this event is to encourage the use of Amplitude Modulation on the ham bands, and to highlight various types of AM equipment in use today. This event is open to any and all radio amateurs who are running full carrier amplitude modulation AM and any type

of equipment may be used. Complete details with scoring, awards, logbook templates, and additional information is at www.classeradio.com slash amtr dot pdf

GB2RS NEWS

Sunday 17th January 2010

The news headlines

Keep earthquake net frequencies clear

Ionospheric radar to leave amateur bands

Azores contest station looking to put 160m on the map

Following the earthquake in Haiti on 13 January, all radio amateurs are requested to keep 7045kHz and 3720kHz clear for possible emergency traffic. IARU Region 2 Area C Emergency Coordinator Arnie Coro, CO2KK, reports that as of 0245UTC on 13 January nothing had been heard from radio amateurs in Haiti, but that the frequencies were being kept active in case any Haitian hams manage to get on the air.

After complaints from Glenn, VK4DU and Uli, DJ9KR to the La Trobe University in Australia, the Tiger Radar in South Australia will change its frequency databases. In the future no amateur band should be interfered with by this Ionospheric Radar System.

A group of Finnish DXers will put the Azores on 160m and above with new vertical and Beverage antennas, starting on 16 January. The activity will include CQWW 160m CW and ARRL CW/SSB contests, using the callsign CR2X. There will also be some activity before and after the contests. QSL CR2X/CU2KG via OH2BH, CU2KH via OH8NC.

Donations to the RSGB Spectrum Defence Fund continue to flow in, and the Society is very grateful to all those radio amateurs who have given their support to date. The Fund is extremely important in ensuring the future of amateur radio and the defence of the spectrum allocations we currently enjoy. This should be of concern to all radio amateurs so please support your National Society by making a contribution, whether you are an RSGB member or not.

Have you logged on to the RSGB website and read the General Manager's blog? To keep up to date with RSGB matters and to be close to what's going on, it's a must. You can find the blog on the RSGB website, www.RSGB.org.

SOS Radio Week 2010 starts at 0000 on 23 January and ends at 2359 on 31 January. During that time individual operators and amateur radio groups

all over the UK and Ireland will be making as many contacts as they can to raise money for the Royal National Lifeboat Institution. There are currently thirty individuals and groups registered and details of when and where they will be operating from can be found on the event website at www.sosradioweek.org.uk. However, it's not too late to join in and register for the event. Simply go to the website and select the option to register for the event.

Mike Musgrove, G4NVT, QSL sub manager for the G4N series of callsigns, is stepping down. His call series is being combined with the G4M group, under the management of Cliff Rowe, G4MAR. The Society would like to thank Mike, G4NVT for his long service to his fellow amateurs and advise all G4Ns that all outstanding

2

cards and envelopes have been transferred to the new sub manager. Details of the changes are available in the QSL section of the RSGB Members' Only website.

Gilford Castle in Northern Ireland will be activated on 22 January from 10pm on various HF bands using SSB and PSK as part of the Castles and Stately Homes on the Air scheme in Northern Ireland. The activation is being run by Bobby, 2I0ULL.

And now for the details of rallies and events for the coming week

Today, 17 January, the Red Rose Winter Rally will take place at Lowton Civic Centre, postcode WA3 2AH, just off the A580 East Lancs Road. Doors open at 10am and there is free car parking. Visitors will find trade stands and a bring and buy as well as special interest groups and an RSGB bookstall. Further details from Steve on 01942 888900.

Also on today, 17 January, the Dover Amateur Radio Club Rally will be held at Whitfield Village Hall, Dover CT16 3LY. Talk in will be via GB3KS.

The next rally will be on 31 January, when the Horncastle Winter Rally will take place at the Horncastle Youth Centre, Lincolnshire LN9 6DZ. Doors open at 10am for disabled visitors and 10.30am for other visitors, entry will be £1.50. More details from Tony, G3ZPU, on 01507 527835.

Following a fire at the Afan Lido in Port Talbot, the rally organisers of the Swansea Radio Rally, due to be held on 21 February, have re-located to the Court Herbert Sports Centre, Neath Abbey SA10 7BE, 2 miles from M4 J43 via A465. Details on the web at www.radioclubs.net/swanseaars.

Now for the news of special events

The Scarborough Special Events Group will be on the air as GB4RNLI for the RNLI SOS week, commencing on 23 January. The QSL card will show the Scarborough Mersey class all-weather lifeboat and the D Class inshore

lifeboat exercising in the South Bay with HMS Explorer, an Archer class P2000 coastal training craft and a rescue helicopter from RAF Leconfield. QSL via the Bureau or direct to club call G0OOO.

Special event club station PA30EPC will be active on all bands PSK from South Holland until 30 January. QSL via PA4JB.

To coincide with the 26th Arab Scouts Conference from Khartoum, Sudan, the special callsign ST26ASC will be used between 22 and 28 January. QSL manager will be ST2M.

On 22 January, Lincoln Short Wave Club will put GB4VK on the air for Australia Day.

And now the HF DX news compiled from 425 DX News and other sources.

Tom, GM4FDM, and Ron, PA3EWP, intend to be in Senegal from 26 January to 9 February. Look for 6W/GM4FDM and 6W/PA3EWP to be active, with emphasis on the low bands and RTTY. QSL 6W/GM4FDM via GM4FDM and 6W/PA3EWP via PA7FM.

3

Bernhard, DL2GAC will be active again as H44MS from the Solomon Islands for three months. His expected arrival and departure dates are 21 January and 20 April.

Now the contest news

On 19 January the UHF UK Activity Contest will take place between 2000 and 2230UTC on the 1.3 and 2.3GHz bands using all modes. The exchange is signal report, serial number and locator.

21 January sees the 80m Club Championships data leg take place from 2000 to 2130UTC. Exchange is signal report and serial number.

The BARTG RTTY Sprint takes place on 23-24 January between 1200 and 1200 on band between 3.5 and 28MHz. In this event BARTG have made the contest exchange really short just a serial number. There are categories for Single Op All Band, Single Op Expert, Multi Op and SWL, and multipliers for working continents and DXCC countries.

Now the solar factual data for the period from the 4th to the 10th of January, compiled by Neil Clarke, G0CAS on the 11th of January.

The solar disc had sunspots visible every day except for the 6th. Solar activity was low on the 4th and the 9th when a C1 class solar flare took place on both days. The remaining days activity was very low, however, numerous B class solar flares occurred most days. Solar flux levels increased from 73 units on the 4th to 84 by the 10th. The average was 78. The 90 day solar flux average on the 10th was 75, that's the same level as last week. Interestingly, this time last year it was only 68 units. X-ray flux levels, which for months remained below the minimum reporting level this week remained above and the

average was A4.4. Geomagnetic activity was very quiet again with the most disturbed days only seeing the Ap index at 2 units. The average was Ap one unit. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 260 and 330 kilometres per second. Particle densities were very low everyday. Bz never varied more than minus 6 and plus 5 nanoTeslas throughout the period.

In cork, Southern Ireland, Charles, EI5FK, who is a regular reporter to the `spots and flares' forum, reported that during the morning of the 9th he heard the following beacons, 3B8MS, Z21ANB and ZS6DN on 28MHz. With solar flux levels in the 80's, a quiet geomagnetic field and the right time of the year opening like this are just possible.

And finally the solar forecast. This week solar activity is expected to be very low. There is a slight chance that solar activity could increase to low if any C class solar flares take place. Solar flux levels should be in the mid to upper 70s for most of the week. Geomagnetic activity is expected to be quiet everyday. MUFs during daylight hours at equal latitudes should be around 21MHz for the south and 18MHz for the north. Darkness hour lows should be about 7MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of around 26MHz. The optimum working frequency with a 90 per cent success rate will be about 21MHz. The best time to try this path will be between 1200 and 1700UTC.

And that's all for this week from the propagation team.

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to newsreaders: Please read the local news items appropriate to your service area.]

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA On Sunday 17 January Dover Radio Club is running the Dover Radio Rally. Contact Brian, G4SAU, by email to g4sau@DARC.org.uk. On Monday 18 January Basingstoke Amateur Radio Club invites you to build your own CW oscillator from components that will be provided. Just bring your own soldering iron and cutters. Contact Clive, G4ODM, on 01256 326050. On Monday 18 January Braintree and District Amateur Radio Society is working on the MKARS 80m kit and having an operating evening. Contact John, M5AJB, on 01787 460 947. On Monday 18 January Burnham Beeches Radio Club is having a talk on the Moxon Square by G0SKA. Contact Dave, G4XDU, on 01628 625 720. On Monday 18 January Milton Keynes Amateur Radio Society is having an open shack night.

Details on the web at www.mkars.org.uk. On Monday 18 January Surrey Radio Contact Club is having a fixit and natter night. Contact Ray, G4FFY, on 020 8644 7589. On Tuesday 19 January Andover Radio Amateurs Club is having a follow up to SDR design, entitled why SDR? Contact Martin, M0MWS, on 0777 618 1646. On Tuesday 19 January Bromley and District Amateur Radio Society is holding its AGM. Contact Andy, G4WGZ, on 01689 878089. On Tuesday 19 January Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008. On Wednesday 20 January Dover Radio Club is having a natter and operating night. Contact Brian, G4SAU, by email to g4sau@DARC.org.uk. On Wednesday 20 January Norfolk Amateur Radio Club is having a talk entitled propagation as she really is, by Pat Gowen, G3IOR. Contact Chris Danby, G0DWV, on 01603 419204. On Wednesday 20 January Worthing and District Amateur Radio Club is having a club dinner at the Sussex Potter. Contact Roy, G4GPX, on 01903 753 893. On Thursday 21 January Horsham Amateur Radio Club is having a social evening. Details on the web at www.harc.org.uk. On Thursday 21 January King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV, by email to ral-g3rsv@supanet.com. On Thursday 21 January Lowestoft and District Pye Amateur Radio Club is having a night at the shack. Contact Phil, G0JSG, on 01502585448.

5

On Thursday 21 January Shefford and District Amateur Radio Society Club is holding its construction contest. Contact David, G8UOD, on 01234 742 757. On Thursday 21 January Sutton and Cheam Radio Society is having a talk on D-Star by Chris Howard, M6HUD. Contact John, G0BWV, on 020 8644 9945. On Friday 22 January Itchen Valley Amateur Radio Club is having a talk on DX operation and contesting by Don Field, G3XTT. Contact Charlie, M0WYM, on 02380 439560. On Friday 22 January Mid-Sussex Amateur Radio Society is having a talk by Chris Saunders on NVIS and 5MHz. Contact Peter, G4AKG, on 01444 239371. On Friday 22 January Radio Society of Harrow is having a talk on LEDs, humble indicators to shining beacons. Contact Linda, G7RJL on 020 8386 8586. On Sunday 24 January Hastings Electronics and Radio Club is holding its club lunch. Contact Gordon, on 01424 431 909.

NEWS FOR THE SOUTH-WEST On Monday 18 January Appledore and District Amateur Radio Club is having a talk on an ultra portable cheap Slim Jim 2m antenna by Terry, G4CHD. Contact Brian Jewell, M0BRB, on 01237 473251. On Tuesday 19 January Blackmore Vale Amateur Radio Society is having an HF evening in the club shack. Contact Tony G0GFL, on 01258 860741. On Tuesday 19 January West Devon Radio Club is having an open night. All are welcome, and there will be a radio knowledge quiz with a prize for the winner. Contact Jules Cuddy, M1AGY, on 01752291588. On Wednesday 20 January Exmouth Amateur Radio Club is having an operating and mystery night. Contact Mike, G1GZG, on 01395 274172. On Wednesday 20 January Taunton and District Amateur Radio Club is having a talk by Rob, G0WSC and Kelvin, M0AID their DX operating experiences. Contact William, G3WNI, on 01823 666 234. On Wednesday 20 January Thornbury and

South Gloucestershire Amateur Radio Club is having a video night. Contact Tony, G0WMB, on 01454 417048. On Wednesday 20 January Trowbridge & District Amateur Radio Club is holding its AGM at the Southwick Village Hall, Southwick. New members are welcome. Please contact Ian Carter, G0GRI, on 01225 864698, evenings and weekends. On Thursday 21 January South Bristol Amateur Radio Club is having a talk on Echolink operation by David, G7PKJ. Contact Len, G4RZY, on 01275 834 282. On Thursday 21 January Swindon and District Amateur Radio Club is having a natter night. Contact Den, M0ACM, on 07810 317750. On Thursday 21 January Yeovil Amateur Radio Club is having a members junk sale. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

NEWS FOR THE MIDLANDS On Monday 18 January Gloucester Amateur Radio and Electronics Society is having a DF Hunt. Contact Anne, 2E1GKY, on 01452 548478, daytime. On Monday 18 January Leicester Radio Society is having a talk and demo on voice over internet and remote operation of a station. Contact the duty committee member on 07804 595749.

On Monday 18 January South Birmingham Radio Society is having a committee meeting. Contact Don, on 0121 458 1603. On Monday 18 January Welland Valley Amateur Radio Society is having a talk on short wave bands and satellites by Roy, M3HZN. Contact Peter D Rivers, G4XEX, on 01858 432105. On Tuesday 19 January Loughborough and District Amateur Radio Club is having a video evening on the subject of space. Contact Chris, G1ETZ, on 01509 504 319. On Wednesday 20 January Bolsover Amateur Radio Society is inviting members to bring in any unfinished projects to see if they can't get them fixed up and going. Details from postmaster@g4rsb.org.uk. On Wednesday 20 January Hinkley Amateur Radio Society is on the Air. Contact John, M0JAV, on 07836 731544. On Wednesday 20 January Lincoln Short-Wave Club is having a shack activity and natter night. Contact Pam Rose, G4STO, on 01427 788356. On Wednesday 20 January Midland Amateur Radio Society is having a laptop computer evening. Contact Norman, G8BHE, on 01214 229 787. On Wednesday 20 January South Notts Amateur Radio Club is having a talk on RAYNET. Contact Terry, M0RIA, on the web at www.radioclubs.net/snarc. On Wednesday 20 January Telford and District Amateur Radio Society is having a circuit sharing evening. Contact Mike, G3JKX, on 01952 299 677. On Thursday 21 January Cheltenham Amateur Radio Association is having a video evening at its new venue, Brizen Youth Centre. Contact Derek Thom, G3NKS, on 01242 241099. On Friday 22 January Bromsgrove and District Amateur Radio Club is having a discussion on remote operation. Contact Chris, M0BQE, on 01905 776 869. On Friday 22 January Coventry Amateur Radio Society is having a video night. Contact John, G8SEQ, on 07958 777363. On Friday 22 January South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603. On Sunday 24 January Lincoln Short-Wave Club is running its Big Australian Breakfast special event station at the Lawn, Union Road, Lincoln. Contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND On Monday 18 January Angel Of The North Amateur Radio Club is on the air and continues its Advanced Licence course. Contact Nancy Bone, G7UUR, on 0191 4770036. On Monday 18 January Sheffield Amateur Radio Club is having a talk on slow scan TV by Trevor, M0TWS. Contact Trevor Wood, M0TWS, by email to trevorwood6@yahoo.co.uk. On Monday 18 January Thornton Cleveleys Amateur Radio Society is having a talk on planning permission by Ken, G3RFH. Contact John Foster, 2E0EZY, on 01253 399377. On Tuesday 19 January Chester and District Radio Society is seeing the efforts of its construction contestants. Contact Barbara Green on 07957 870770. On Tuesday 19 January Otley Amateur Radio Society is having a shack night. Contact Paul, 2E0PAK, on 07768 996370.

7

On Wednesday 20 January Hornsea Amateur Radio Club is holding its annual dinner. Contact Gordon MacNaught, G3WOV, on 01377 240573. On Thursday 21 January South Cheshire Amateur Radio Society is having an on-air club net on S14 because there is no meeting. Contact Chris Wiseman, G0RDK, on 01782 773185. On Thursday 21 January South Manchester Radio And Computer Club is having an an open night. Contact Ron, G3SVW, on 0161 969 3999. On Friday 22 January East Cleveland Amateur Radio Club invites members to bring in something interesting. Contact Alistair, G4OLK, on 01642 475 671. On Friday 22 January South Manchester Radio And Computer Club is having its annual dinner. Contact Ron, G3SVW, on 0161 969 3999.

NEWS FOR SCOTLAND On Tuesday 19 January Livingston and District Amateur Radio Society is having a club evening. Contact Norman, on 07740 946192. On Wednesday 20 January Ayr Amateur Radio Group is working on its construction project. Contact Charlie, MM0GNS, on 01563 551704. On Wednesday 20 January Glenrothes and District Radio Club is having a talk on glass jewellery by Lillian followed by a bread tasting. Contact Dave Francis, 01383 823878. On Wednesday 20 January Paisley YMCA Amateur Radio Club is having a club night. Contact Bill Anderson, 2M0BZZ, on 01505 613633. On Thursday 21 January Aberdeen Amateur Radio Society is having a talk by Ian, GM8MHU on the inverted L antenna. Contact Lewis, GM4AJR, on 01224 575 663.

NEWS FOR WALES On Monday 18 January Dragon Amateur Radio Club is having a video evening. Contact Stewart Rolfe, GW0ETF, on 01248 362229. On Monday 18 January Llanelli Amateur Radio Society is closed due to the ongoing refurbishment of the property. Contact Craig, MW0MXT, on 01269 840292. On Thursday 21 January Porthmadog And District Amateur Radio Society is having a natter night. Contact Glyn MW5CAD 01286 830078. On Thursday 21 January Swansea Amateur Radio Society is having a joint meeting with the IET with a talk by Ken Eaton, GW1FKY entitled amateur radio is out of this world. Contact Nick Lewis, MW0JGE, on 01792 402035.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

And that's the end of this week's GB2RS news broadcast,

prepared by the Radio Society of Great Britain.

33. Dr. Arthur Becker-Weidman: INTERVENTIONS NOT USED

The Center For Family Development, established by Dr. Arthur Becker-Weidman does not use wraps, compression hold, or holds that utilize provocative stimulation. The following are interventions NOT USED . . . . shaming a child or eliciting fear to get compliance. Coercing a child to engage in long or painful physical activities in order to get compliance or a response. Wrapping a child, lying on top of a child, “rebirthing,” or similar techniques. Interventions based on power/control and submission. Interventions that are based solely on compliance.

Important information for all RAC Members

On Tuesday, January 12 at 4:53 PM, Haiti time (2153) UTC a magnitude 7.0 earthquake hit 15 kilometers west of Port-au-Prince, the nation's capital. Communications in and out of Haiti have been disrupted. The RAC requests that all Canadian Hams be aware of the emergency operations on the following frequencies: 7.045 3.720 MHz (IARU Region 2 Nets), 14.265, 7.265 and 3.977 MHz (SATERN Nets), and 14.300 MHz (Intercontinental Assistance and Traffic Net). The International Radio Emergency Support Coalition (IRESC) is also active on EchoLink node 278173.

SARL NEWS - SUNDAY 17 JANUARY 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web-stream, visit www.sarl.org.za, click on ARMI and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325; 14,235; 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750; 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit.)

SILENT KEYS

It is with deep regret that the passing of two radio amateurs must be announced.

Meyer Koch, ZS5MK, became a silent key on 13 January. Meyer had been a staunch member of Midlands ARC and served on the Committee for several years. Our sincere condolences are extended to his wife Norma and family.

Maurice Dobson, ZS5BCA, of Margate passed away in July 2009. We extend our sincere condolences to his wife Nell and family.

PAUSE

In the news today:

BACAR TAKES TO THE AIR NEXT SUNDAY

BOOK EARLY FOR NATCON-2010

SARL HELD WORKSHOP WITH ICASA

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

BACAR TAKES TO THE AIR NEXT SUNDAY

BACAR 2010 will be launched from the Worcester Airport on Sunday 24 January at 11:00 CAT. The duration of the flight will depend on the direction of the prevailing upper air wind. Spectators are welcome to

join the launch at the airport. Commentary of the launch will be covered on 7 082 kHz. More frequencies will be announced in next week's SARL News.

BACAR 2010 has an extensive payload:

A 5 W FM parrot repeater 145,550 MHz FM working with a rubber duck antenna. The repeater receiver and transmitter use the same frequency. Transmit simplex and listen to your signal returning. The beacon is activated if the repeater is not used for a period of one minute. The beacon sends the following in voice: ID, GPS location, altitude and temperature.

The 20 m transmitter operates on 14,285 MHz SSB at 0,5 W peak envelope power (or PEP).

The 40 metre transmitter operates on 7,090 MHz SSB at 0,5 W PEP.

The 2 Meter SSB transmitter operates on 144,350 MHz SSB at 0,5 W PEP.

The 2-, 20- and 40 m transmitters will - for test purposes - send a DSB-suppressed carrier transmission in order to evaluate its use with simple receivers. The transmitters will transmit every three minutes with the following information in voice: ID, location, altitude and temperature.

For more detail about the GPS and camera on board, visit www.amsat.org.za. Monitor the website during the flight for updates and pictures. The website will be updated as new information becomes available.

BOOK EARLY FOR NATCON-2010

Full details of the SARL National Convention to be held in Port Elizabeth from 23 - 25 April have been published on the web, as well as a downloadable booking form. Early birds will be entered into the draw for an ARRL Handbook. Book accommodation and flights early, as Port Elizabeth is also hosting the Iron Man competition over the same period.

SARL AWARDS

Have you considered nominating someone from your club for one of the SARL annual awards? Full details can be found on the SARL website at www.sarl.org.za. Click on 'News' and then 'Clubtalk'. Nominations close on 31 January.

THE BPL WAR: SWEDEN WITHDRAWS SOME BPL/PLT MODEMS

The score is 1-0 for amateur radio in the BPL war. The latest issue of the EUROCOM newsletter has a welcome item on the withdrawal by Sweden of polluting power line adapters.

The 5 January edition notes that Sweden has withdrawn some broadband-over-powerline (or PLT) modems from the nation's market. The

Swedish administration argued that the devices did not meet the protection provided by the harmonized standard. It also noted that in many cases, harmful interference could actually be measured. It said that in those cases, reception in accordance with the ITU Regulations was no longer possible and therefore, the essential requirements violated.

Locally, there is still no news about the interim PLT regulations, which are awaiting approval by ICASA.

SARL HELD WORKSHOP WITH ICASA ABOUT LICENSING

On Friday last week, the SARL presented a workshop on "What is Amateur Radio?" at the head office of ICASA in Sandton. The aim of the workshop was to give the licensing staff insight into the various aspects of Amateur Radio. The two-hour workshop was lead by Hans van de Groenendaal, ZS6AKV, and Francois Botha, ZS6BUU. Francois used the opportunity to explain the importance of amateur radio during major disasters and used the Haiti earthquake as an example. Mark Zank, who could not attend, provided valuable input Power Point to presentation, covering the examination process.

LICENSE RENEWAL NOTICES NOT IN THE MAIL YET

ICASA has not yet mailed the amateur radio license invoices. The invoices are currently being printed and should be in the mail soon.

CONTEST NEWS

The 2010 Diary of Events and the 2010 SARL Contest Manual (both in PDF format) and the 2010 Log and Summary Sheets (a zipped file) have been uploaded to the Contest page on the SARL website.

The first of six SARL 80 m Club Contests will be run on Wednesday 27 January from 19:30 to 20:30 CAT. This will be a phone-only contest; the exchange is a RS report and a consecutive serial number starting at 001. Each contact counts one point and stations may only be contacted once during the session. The individual scores count towards a radio club's overall score.

In March, the SARL 80 m Club Contest will feature PSK and RTTY.

CLUB NEWS

The West Rand Amateur Radio Club is busy compiling a history of the club since its establishment in 1938. If you have any information, stories and photographs regarding the history of the club, please send it to Willem, ZS6WWJ, whose e-mail address is willem@zs6wwj.co.za. Your contribution will be acknowledged in the book the West Rand ARC intends publishing at the end of 2010.

PROPAGATION

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. 2010 started with a useful amount of sunspot activity. Currently sunspot region 1 040 is exciting HF enthusiasts. A new record solar flux of 95,4 for Cycle 24 was reached on Tuesday. The effective sunspot number is expected to be between 20 and 30 for the coming week. Overall conditions are on the rise.

15 and 20 m will provide the best opportunities for DX. Conditions to India will be good from the afternoon onwards. During the late afternoon and early evenings, it will be moderate towards Europe. In the afternoons there are good possibilities of contacts with the USA on 15 m. Contacts with New Zealand will be possible for a short stint on 15 and 20 m during the mornings. Contacts with Australia will be possible on 20 m for a short spell during the mornings and the afternoons. During the afternoons and evenings, 20 and 15 m contacts may also be possible with Brazil.

Local conditions are going to be good on 40 m during the daytime. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the middle of the day. With summer here, 20 m is also once again very useful for contacts over the longer distances, especially up to two o'clock in the afternoons. 80 m is the frequency of choice in the evenings.

Visit www.spaceweather.co.za for detailed predictions.

DIARY OF EVENTS

15 to 17 January 2010 - PEARS VHF/UHF Contest; 23 January - Home Construction course in Cape Town; 24 January - BACAR launch in the Western Cape; 27 January - SARL 80 m Club Contest; 31 January - President's Net at 19:30; 31 January - Closing date for AGM motions; 6 and 7 February - AWA CW Activity Day; 28 February - New closing date for the SumbandilaSat essay competition; 28 February - Final date for entries in the ARRISS-SAT project to be submitted to youth@sarl.org.za; 27 March - 2010 SA AMSAT Space Symposium.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz.

Sentech sponsors the ARMI transmissions on the non-amateur frequencies. You have listened to a bulletin of the South African Radio League compiled by Dennis, ZS4BS. The bulletin editor was Jannie, ZR6PHD.

Thank you for listening, 73.
/EX

*Dates for Official Broadcast (OB) and Head Quarter's Infoline
*Attachments for Branches: NZART Headquarters Infoline 199.doc
****
New Zealand DX Hall of Fame Members for 2010
==========

The New Zealand DX Hall of Fame was set up a few years ago to honour those outstanding ZL DXers who have excelled in our radio sport hobby over many years. The current panel of judges includes Ken McCormack ZL1AIH, Duncan McMahon ZL3JT and Bill Carney ZL3NB. The judges were unanimous in their selection for 2010. Their individual citations are below.

Dave A. Johnston ZL1AMN

The election of Dave Johnston as the 4th inductee to the NZ DX Hall of Fame recognizes Dave's extraordinary and unselfish contribution to the sport of Amateur Radio DXing in New Zealand. His DXpedition exploits around the Pacific over many decades as ZL1AA/K, ZK2DJ, A35DJ, 5W1CA are legendary and he has enabled a generation of amateur radio operators worldwide to obtain that elusive new country.

His personal achievement in the ARRL DXCC program with Honour Roll on Phone with 350 entities is outstanding. Dave's contribution to DXing internationally has been immense by way of the ANZA Net anchor man for many years. Dave is the NZ co-coordinator for ITHE, the International Tour Host Exchange organisation which assists amateurs with accommodation when traveling around the World.

We wish Dave well in the future and hope that he will enjoy having the award plaque on his wall.

Aola B. Johnston ZL1ALE

The election of Aola Johnson ZL1ALE as the 5th inductee to the NZ DX Hall of Fame recognizes Aola's extraordinary and unselfish contribution to the sport of Amateur Radio DXing in New Zealand. Aola's DXpedition exploits around the Pacific with her husband Dave over many decades has enabled a generation of amateur radio operators worldwide to obtain that elusive new country with a YL operator.

Aola has operated as A35YL, ZK2YL, 5W1BY and others. Her personal achievement in the ARRL DXCC program is outstanding with 349 entities credited. She is the only lady in New Zealand on the ARRL DXCC Honour Roll.She is a member of WARO, CLARA, YLRL, ALARA, BYLARA, and YLISB.

We wish Aola well in the future and hope that she will enjoy having the award plaque on her shack wall.

Dave ZL1HY - (SK)

The posthumous election of Dave Brown ZL1HY as the 6th inductee to the NZ DX Hall of Fame recognizes Dave's amazing DXing achievements over many decades. His help and inspiration that he gave to other DXers has been immeasurable. His personal achievement in the ARRL DXCC program is legendary with DXCC No. 59 in September 1947. ZL1HY was the first Oceania station to achieve the TOP position in world DXing with 375 confirmed on phone in 1992. It was the first time this honour ever left America. His last QSO was in April 1992 He was an outstanding ZL radio amateur for decades.

This award honours Dave Brown's wonderful DXing skills and will show how accomplished this great New Zealand DXer was.

We offer our heartiest congratulations to these three outstanding ZL radio amateurs

73, Lee Jennings ZL2AL
New Zealand DX Hall of Fame Panel Convener

****
How To Check For Band Openings

Picture this: you switch on your HF rig, you turn your tuning knob across the various frequencies, hearing nothing but noise. You mutter "The bands

are dead..." so you switch off and go back to watching TV. Does this scenario sounds familiar? In that case, read on!

Did you know that the The Northern California DX Foundation (NCDXF) operates a worldwide network of high-frequency radio beacons on 14.100, 18.110, 21.150, 24.930, and 28.200 megahertz. These beacons help both amateur and commercial high-frequency radio users assess the current condition of the ionosphere. The entire system is designed, built and operated by volunteers.

Each beacon transmits every three minutes, day and night. The table at

http://www.ncdxf.org/beacon/beaconschedule.html

gives the minute and second of the start of the first transmission within the hour for each beacon on each frequency. A transmission consists of the callsign of the beacon sent at 22 words per minute followed by four one-second dashes. The callsign and the first dash are sent at 100 watts. The remaining dashes are sent at 10 watts, 1 watt and 100 milliwatts.

New Zealand has a station in this network, supported by NZART, located in the Wairarapa with the callsign ZL6B

****
NZART Branch 12 Presents The National System Award 2010
National System Award 2010 -Historic Places, is presented by The Hamilton Amateur Radio Club, Branch 12 NZART in association with the New Zealand Historic Places Trust. Based upon the original idea of the Wellington VHF Group. This is a FUN award available to all amateurs to demonstrate the coverage and use of the National System, to promote our history and category 1 Historic places.

Detailed documentation is available from:-
http://zl1ux.tripod.com/nsaward.htm

The award will run from 1 January 2010 to 7 February 2010.
****
ZL3 Radio Buildathon
The 3rd ZL3 Radio Buildathon will be held on Saturday January 30th in Christchurch and all radio amateurs from ZL3 District are invited to come along and build a ZL3 Pixie Twins kit. Youngsters and budding hams 8 - 80 are most welcome. There's a kit for them too!

After building your fun 80m QRP CW transceiver you can enter two competitions.

One is for the best DX CW contact within NZ using a ZL3 Pixie Twin.

The other is for the funniest housed unit. Let your imagination run wild!

A superb 40M QRP CW kit transceiver from www.smallwonderlabs.com USA will be awarded to each of the winners.

Please register your interest now as places must be limited.

Bring along your friends, members of clubs you belong to, and workmates.
Here's a great way for them to find out about the fun you're having in
amateur radio.

Email David at ZL3DWS@nzart.org.nz or call 03 358 2424

HF Contests

2010 JOCK WHITE MEMORIAL FIELD DAY CONTEST
When:- Saturday, 27th February 2010 and Sunday 28th February 2010
Times :- Saturday 1500 NZDT until 2400 NZDT and
Sunday 0600 NZDT until 1500 NZDT
Updated Contest Rules and Other Operating Information will be available from
the NZART Website prior to the commencement of the contest.
NZART Website http://www.nzart.org.nz/contests/rules.html

2010 ARRL INTERNATIONAL CW CONTEST
When : - Saturday, 20 February 2010 and Sunday, 21 February 2010
Times :- 0000 UTC (20th) until 2400 UTC (21st).
Bands :- All Bands
Mode:- CW Only
Contest Rules and Other Operating Information are available from the ARRL
Website,
http://www/arrl.org
A good contest as is the later SSB Contest (March 6 and 7) to garner those
missing US States for the elusive Worked All States award.

2010 ARRL INTERNATIONAL PHONE CONTEST
When :- Saturday, 6 March 2010 and Sunday, 7 March 2010
Times:- 0000 UTC (6th) until 2400 UTC (7th)
Bands :- All Bands
Mode :- Phone Only
For Contest Rules and other Operating Information please refer to the

Contest
Website - http://www.arrl.org/contests

2010 RSBG COMMONWEALTH CONTEST (BERU)
When :- 13 and 14 March 2010
Times :- 1000 UTC (Sat.) until 1000 UTC (Sun.)
Bands :- All Bands
Mode :- CW Only
Considered to be one of the more gentlemany contests that has been in existence since the mid-1930's. Apart from the individual performances there is a Team's event, based on individual nation's participation. The NZART Team under the astute leadership of Frank Hunt, ZL2BR won this event in 2007 and finished third last year. Frank is looking for Team participants to make up the NZ Team. Interested - contact Frank by "snail mail" at :- 8 Manu Crescent, New Plymouth. 4310., or email :-
zl2br@ihug.co.nz
Contest Rules and other operating information is now available from the Contest
website :- http://www.beru.org.uk/

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 17th January 2010

IRTS Committee Meeting

Affiliated Club reps are reminded that the next IRTS Committee meeting will be held at the Maldron Hotel in Portlaoise at 11am on Saturday the 23rd of January
should they wish to attend.

Haitian Amateur Radio Frequencies

All radio amateurs are requested to keep 7045 kHz and 3720 kHz clear for possible emergency traffic related to the major earthquake in Haiti.

ADDITIONAL AMATEUR FREQUENCIES that may be active with EMERGENCY traffic: are as follows 3977, 3985, 7265,
7290, 14265, and 14300 kHz.

REMINDERS: Avoid transmitting within 3 kHz (on either side) of these frequencies except for EMERGENCY or
PRIORITY traffic.

Engineers Week

Engineers Ireland,Engineers week takes place from Monday the 8th of February. As part of this event activities are taking place all around the country.

In Dublin a new group is hosting an introduction to Amateur Radio for those who are not involved in
Amateur Radio.

The same group is presenting more activities such as soldering, circuit boards & micro controllers. Places are limited and most events are free or at cost price. If you know of people who may be interested please pass
on the word

Booking is via the website: http://www.tog.ie

All events can be found at: http://www.engineersweek.ie

North Sea Gas Platform Station

The first Amateur Radio HF activation of Shearwater Gas Platform in the North Sea will take place during SOS
Radio Week Jan 23-31.

The Royal National Lifeboat Institution (RNLI) provides a 24-hour life saving service in the seas and waters around the coast of the British Isles and SOS Radio Week is the perfect opportunity for Radio Amateurs to lend their support to this charity.

The website http://www.sosradioweek.org.uk/ reports that Charlie Christie, GM1TGY hopes to be operational from the Shearwater Gas Platform in the North Sea during SOS Radio Week - the first HF operation from the platform as, being a modern rig, it does not have a radio room. The above website lists additional activity from other SOS participants also.

Once again the website is
http://www.sosradioweek.org.uk/

AREN AGM.

On Saturday February 6th all AREN members are requested to attend a meeting being held in the Park Hotel,
Clonmel County Tipperary.

Contact John Ronan, EI7IG for further information.

CQ CQ calling news items

As is common through the year we have occasional lulls in news from EI. If your group or club are involved in anything that you would like to share with our Listeners or readers please pass on the information to our editor.

Wicklow Radio Club

Following their first successful meeting, it is hoped at the next meeting to have a station set up to receive digital modes for a demo. There is a request that if anyone is familiar with Digi modes and can provide an introduction on the night it would be much appreciated.

Further plans are also being made for Contest and Field Day participation, as well as activating the rare square that Wicklow Lighthouse is located in with 6m activity also planned in the summer.

The Next meeting is scheduled for Wednesday Feb 10th at 19:30 in the Glebe National School, Wicklow Town. All
are welcome to attend.

Rallies

The Mid Ulster Amatuer Radio Club's January Radio Sale will be held on
Saturday the 30th January 2010 from 11am at Brownlow Resource Centre,
Brownlow Road, Craigavon. Entrance fee is a £1 with a free tea/coffee
to warm up with. This is a Radio Sale the actual Club
Rally is being Held in May.

Phoenix A.R.C Rally 14th February

The Rally will be held as usual at Coolmine Community School near
Blanchardstown on Sunday 14th February 2010.Doors open from 9am to
2.30pm. Usual traders will be present and to encourage a real Amateur
Radio orientated Rally bring and buy tables
will be free of charge.

For tables contact Tony at 087-2349997 or Tom at 01-8211043 this is the
first rally of the New Year and usually a very enjoyable occasion.
Refreshments and plenty of car parking are available.

Dundalk Rally 25th April

The Rally will commence at 11.00am, followed by the
IRTS AGM at 2.00pm.

Further details for booking, traders tables or any other info please
e-mail the following, Thos EI2JD chairman /at/ ei7dar.com or Peter
EI4HX secretary /at/ ei7dar.com

Lagan Valley ARS Rally 20th March

The Lagan Valley ARS Rally will be held at 11.30am in
The Village Centre, Hillsborough

Contact: Jim Henry, GI0DVU on 048 9266 2270

Mid Ulster Radio Club Rally 29th May

This year the Rally will be held at Drumgor Youth Centre, Drumgor
heights, Craigavon. More details will be available closer to the time.
If interested in booking a table for the event or for more information,
please go to www.muarc.com or contact
0044(0)2838348451.

For more information on Rallies please check the
IRTS Website.

This week in History

1788 12/1 First Fleet sights Van Diemen's Land
(Tasmania).

1910 13/1 New York Metropolitan Opera first live radio
broadcast.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following
Sunday's bulletin.

39. [RAC-Bulletin] RAC Bulletin 2010-002E : Haiti, the Amateur perspective

Newsgroup: rec.radio.amateur.misc
Date: 2010-01-17 21:56:14 UTC
From: rac-bulletins@eton.ca
Message-ID: <4B538764.3000007@rac.ca>
Source record: 6158
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC News Bulletin - January 17th, 2010

Haiti, the Amateur perspective.

We have all seen the tragic human toll and devastation of the Haitian hearthquake as reported by the media. We have been asked what the Amateur community is doing about it.

To our knowledge, since the hearthquake, less than half a dozen Hams have been reporting from Haiti and have done so very sporadically. Most have severe constraints for electricity, fuel or other required facilities.

Apart from a couple of Hams embedded with the UN or the Red Cross, none other have succeeded to enter the country and stay to operate.

Yesterday, a convoy of Dominicans made up of representatives from that government and including 8 Amateurs, entered Haiti by road on its way to their Embassy in Port-au-Prince. Almost at destination they were attacked by gunfire resulting in one dead and several wounded. All 8 Amateurs are safe. The convoy turned around and is now safely back in the Dominican Republic.

Outside of Haiti,there are scores of Hams listening on the published HF frequencies for emrgency communications and ready for any QSPs.

Here in Canada, our Vice President Field Services, Doug Mercer, VO1DTM, is watching the situation very closely, ready to give any help that might be needed.

We also have French speaking operators like Gerry, VE2AW and Richard, VE2DX, that are ready on the frequencies to speak to anyone in need in Haiti.

We are also getting ready for the future. At the Request of the Salvation Army SATERN I have recruited about 20 Hams, fluent in French, that are now poised to leave for Haiti when required.

This is the situation as of now and we will update you when we have something significant to report.

73,

Daniel A. Lamoureux, VE2KA
Vice President International Affairs, Radio Amatuers of Canada

** PLEASE NOTE: Due to the major earthquake in Haiti, all radio amateurs are requested to stay clear of frequencies 14300, 14265, 7265, 7045, 3977 and 3720 kHz so that emergency traffic for Haiti can be passed and handled. Additional frequencies may also be activated throughout the day on different bands.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 10th-January, through Sunday, 17th-January there were 226 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4U1U, 4W, 4X, 5B, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FS, G, GD, GI, GJ, GM, GU, GW, H40, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9W, VP2E, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work

First Worry Later" (WFWL).

2009 CQ DX MARATHON (Important Information!). John, K9EL, Program Manager for the CQ DX Marathon, reports: "Submissions for the 2009 edition of CQ Magazine's DX Marathon will be accepted until January 31, 2010. All participants are urged to review their scoresheets carefully as many submissions already received have zone errors, especially with regards to Zone 2. Please also watch submissions for Zones 3,4,5 as the prefix for U.S. stations is not necessarily an indication of the actual station's location. Please check the zone carefully for any Antarctica QSOs as well. The DX Marathon website (www.dxmarathon.com) provides details on countries and zones, including a special page just for Zone 2 stations. If errors are discovered, revised scoresheets may be submitted until January 31st. The callsigns of submitted logs will be posted on the DX Marathon web site and updated on a regular basis until January 31st. High claimed scores will be posted after January 31st."

3C0, ANNOBON ISLAND. Operators Elmo/EA5BYP and Javier/EA5KM will be active from Annobon Island (AF-039) sometime in April. Dates and callsigns will be announced soon. Activity will be on 160-10 meters using CW, SSB and RTTY, with an emphasis on the lower bands and CW. Look for updates on their Web page (still under construction) at: http://personal.telefonica.terra.es/web/ea5yn

6W, SENEGAL (Early Announcement). Stan, EI6DX, will once again be active as 6W/EI6DX from Somone which is located 70 km southeast of Dakar, in November (specific dates TBD). He will concentrate on the lower bands and CW. Stan will take part in the CQ WW DX CW Contest (November 27-28th) as a Single-Op/All-Band/Low-Power entry. QSL via RX3RC, by the Bureau or direct. Look for updates at: http://www.ei6dx.com

7Q, MALAWI. QSL Manager Allan, G0IAS, informs OPDX that Harry, 7Q7HB (G0JMU), is again heading to the warmer climate of Malawi for a period of 3 months or so. He was stuck in Nairobi but was hoping to be in 7Q-land via Lusaka on Thursday. Activity will probably be on the Digital modes and CW. QSL as usual is ONLY DIRECT to G0IAS with sufficient funds for return cards. NO BUREAU cards. NO eQSLs. Just old fashioned paper cards DIRECT!

C6, BAHAMAS. Operators Bob/N4BP (C6AKQ), Mike/W4RUM (C6AUM) and Tim/N4UM (C6ARU) will be in Freeport, Lucaya, Bahamas, beginning Monday, February 15th, with Kevin/K4PG (C6APG) joining them on Thursday, February 18th. The operators will enter the ARRL International DX CW Contest (February 20-21st) as individual entries (Bob/C6AKQ on 80 meters, Kevin/C6APG on 40 meters and Mike/C6AUM possibly on 160 meters. Tim will announce his entry when he knows). Prior to the contest, they will be operating on the 30/17/12 meter bands, HF bands using CW and the Digital modes. QSL direct to their home callsigns with SASE and/or LoTW.

CE0Z, JUAN FERNANDEZ ISLAND (Update/Change/Reminder). Toshi, JA8BMK, will be active as CE0ZA between January 19th and February 2nd. Activity will be on 160-10 meters with a focus on the lower band, and he is expected

to be using CW, SSB and the Digital modes. He will use an amp, and antennas will be a yagi and vertical. QSL direct to JA8BMK at: Toshi Fukuta, 2115-3 Nobori, Yoichi, Hokkaido 046-0002 Japan. PLEASE NOTE: We reported earlier that Marco, CE6TBN, was expected to join hom, but now it seems he is elsewhere and will NOT be joining Toshi.

CN, MOROCCO. Jim, W7EJ, will be active as CN2R during the CQ 160-Meter CW Contest (January 29-31st) as a Single-Op/High-Power entry. QSL via W7EJ. See the station from CN2R at: http://www.arraysolutions.com/Users/cn2r.htm

CN, MOROCCO. Mat, MJ0ASP, will be active as CN2MR between February 18ï¿½26th. Activity will be on the HF bands using mostly CW. He likes to contest, so he will probably be in the ARRL International DX CW Contest (February 20-21st). QSL via his home callsign (see QRZ.com).

DAYTON HAMVENTION ACTIVITIES.....
* The SouthWest Ohio DX Association (SWODXA) is pleased to again sponsor the DX Dinner(TM) in conjunction with the 2010 Dayton Hamvention(r). The dinner will be Friday, May 14th, at the Crowne Plaza Hotel, Dayton, Ohio.
This will be a very special celebration as it is their 25th annual dinner.
As in the past, there will be some major door prizes given away. Program details and a list of the prizes will be available on the SWODXA website and blog as soon as both are confirmed. Note they have moved their web site and the new address is: http://www.SWODXA.org
There will be a cash bar starting at 6 pm with dinner served at 7:15. Tickets are $40 per meal payable in US funds. (Sorry they do not process Paypal or credit card payments.) Attendees have their choice of strip steak, baked tilapia, or eggplant parmesan. Meal choice must be indicated as tickets are purchased. They attempt to honor group seating requests when tickets are ordered together. Each table seats ten, and seats are assigned as the requests are received. Check or money orders, payable to SWODXA, should be sent to Kirk Swallow, W8QID at his CBA. Be sure to include a SASE for ticket return. This is an excellent opportunity to meet and renew old acquaintances, so come join them for an evening of fun and great fellowship. They look forward to seeing you there!

* Tim, K3LR, Dayton Contest Dinner Chairman, reports: "The North Coast Contesters are proud to announce: 'The 18th Annual Dayton Contest Dinner'
2010 Contest Dinner tickets are on sale now exclusively via our web site. Thanks to Scott, KA9FOX and QTH.com for designing, building and running our web site: http://contestdinner.com
Master of Ceremonies for the Dayton Contest Dinner is CQ Magazine Contest Editor John Dorr, K1AR. The 2010 CQ Contest Hall of Fame Inductions will be formally announced by the CQ WorldWide Contest Director Bob Cox, K3EST. Our excellent keynote dinner speaker will be announced later.
The Contest Dinner will be held on Saturday night, May 15, 2010, at 6:30 PM Cash bar opens at 5:30 PM. Located at the Crowne Plaza Hotel

(Official Contester Hotel) 5th and Jefferson Streets (Next to the Convention Center) Dayton (Downtown), Ohio in the VAN CLEVE BALLROOM. Seating is random. Tables are set in rounds of 10. Tickets are only available on: http://contestdinner.com
Many contest operators from around the world attend this event. If you enjoy radio contesting, you do not want to miss the Contest Dinner in Dayton, Ohio. We expect a quick sell out. Get your tickets early!"

DX MAGAZINE PUBLISHES 2009 MOST WANTED RESULTS. The DX Magazine's "2009 Most Wanted Survey" has been posted on their Web site and published in the latest Jan/Feb 2010 issue. The survey that most DXers go by is now available at: http://dxpub.com/dx_news.html
The survey was conducted between September and October of 2009. The listing shows the top 100 World-Wide and also includes the ranking for 2008, for comparison. The "Top Ten Most Wanted" are as follows:

2009	PREFIX / COUNTRY	2008	2009	PREFIX / COUNTRY	2008
1	P5 NORTH KOREA	1	6	VK0H HEARD ISLAND	8
2	KP1 NAVASSA	3	7	FT5W CROZET	9
3	ZS8 MARION ISLAND	5	8	FR/G GlORIOSO	4
4	3Y/B BOUVET	7	9	FT5Z AMSTERDAM	10
5	7O YEMEN	2	10	S. SANDWICH IS.	12

Look for a complete breakdown by mode to be published in the March/April 2010 issue.

E5, NORTH COOK ISLANDS (Update). Richard, AD7AF, currently active as E51WWA from Muri Beach on Rarotonga (OC-013) in the South Cook Islands, has announced that he will be active as E51WWB from Tauhunu Village, Manihiki (OC-014), in the North Cook Islands, February 3ï¿½15th. Activity will be 40-15 meters using mainly CW. SSB and the Digital modes will be used as propagation conditions allow. Also, 80 and 10 meters will be used if conditions are favorable. He will use a K3 operating barefoot into a vertical and wire antennas. QSL via AD7AF.

EF8, CANARY ISLANDS. Operators Luis/EA8AY, Anders/EA8CN, Jeronimo/EA8NC and Anders/SM6CNN will be active as EF8N during the ARRL DX CW Contest (February 20-21st) as a Multi-2 entry. QSL via EA8AY. Visit the contest team's Web page at: http://www.ea8ay.com/an8r_team

EPC ACTIVITIES.....
* Visit the European PSK Club (EPC) Web page at: http://eu.srars.org

* Jurij, MM0DFV, reports to look for the European PSK Club (EPC) special station PA30EPC to be active on all bands PSK from South Haolland between now and January 30th. QSL via PA4JB.

* YR5EPC (EPC # 9000) is another new EPC special event station (SES) from Transylvania, Romania. It will be active on PSK on all bands between now and December 31st. QSL manager and station's trustee is Ioan, YO6AJI. Station's location is Floresti, a commune in Cluj County (EU Area RO15). YR5EPC is the 37th EPC official club station. This is

another chance to get more points for the ECSA award series. Copy of the licence can be seen at the EPC Club Station's section on their Web site.

FRENCH ANTARCTIC TOUR (Update/Change). Mehdi, F5PFP (FT5YJ/CE9XX/VP8DLM), reports that the French Antarctic expedition by yacht initially scheduled for 2012 will take place in February-March 2011. The entire trip will last six weeks. There is an opportunity for one last person to join the expedition as amateur radio operator or tourist. For more informations please E-mail him at: f5pfp@orange.fr

HH, HAITI. Phil, F4EGS, will be joining the International Forces and Non-governmental organizations (NGO) which are working to help the survivors in Haï¿½ti after the earthquake. He will be staying around the Port au Prince
Airport area. Phil will be taking his FT-100 and a dipole and may be on the air passing ham traffic as HH/F4EGS.

IOTA NEWS.....
NA-079. Members of the Amateur Radio Outdoor Adventures, Inc., will be activating Grid Square EL84, March 11-15. Activity will be from Fort Jefferson, Garden Key in the Dry Tortugas (USI FL-013S, USA-316, Monroe County, Florida) 72 miles west of Key West. They will have a dedicated satellite station with an Icom 910H and a pair of V/U M2 yagis with ARR preamps, Yaesu 5500 with an LBV Tracker. They will try and hit all the passes that they can. They will have a 12 member team and will be operating 24 hours a day. It was mentioned that they will be on HF also. Callsign was not provided.

NA-116. You may have one more day to work Carlos, TI8II, from San Lucas Island (expected to go QRT on January 18th). Operations began on Friday, January 15th. Activity is on SSB, RTTY and PSK. QSL via his home callsign.

NA-182. (Operators Needed!) John, VE8EV, is planning for a trip to an island in the Northwest Territories (NWT) in the Inuvik Region East Group in late April. As a SSB only operator, John would like to bring along a good CW operator too. He would also like to have the 2nd operator be able to coordinate a fundraising campaign and not be afraid of a little winter Arctic camping. If interested in participating in this IOTA operation, please contact John at: ve8ev@arrl.net
Visit John's Blog page at: http://ve8ev.blogspot.com

SA-041. (Update) Members of the Araucaria DX Group will activate the 2nd most wanted IOTA group (Maranhao State West Group) in South America as PW8J between June 9-15th. This IOTA group consists of 23 islands, one of these islands is called "Ilha dos Lencois" and it is the location for this DXpedition. According to the group's Web page, 4 experienced DX operators will be on the air around the clock. Operators mentioned are: Ciro/PY7ZY (Team

Leader), Fred/PY2XB, Jim/PY7XC and Andre/PY0FF. Lencois Island
will be activated for the first time. Likewise, a new DIB and
a new Grid Square will be activated (GI78nq). Activity will
be on 80-10 meters using CW and SSB. QSL via PY7ZY, by the
Bureau or direct. For more details, visit their Web page at:
http://www.pw8j.com
ADDED NOTE: After returning from SA-041, the group will activate
Sao Luis Island (SA-016) between June 16-18th. The callsign
will be PW8L.

J7, DOMINICA. Gaynell, KK4WWW, will be heading back in Dominica for a
mission trip and will be active again as J79WWW between January 20th
and February 4th. He will be operating from there as much as possible
during his free time. QSL via N4USA.

JD1, MINAMI-TORISHIMA. Masa, JA6GXK, will once again be active as JD1BMM
from Marcus Island (IOTA OC-073, JIIA OC-073-001) between January 20th
and mid-February. Activity is usually on all bands and modes. QSL by the
Bureau or direct (QRZ.com address). PLEASE NOTE: A report states that
this may be "the last chance to make a QSO with JD1/M" for some time.
The Japanese Coast Guard radio station on the island is closing down on
December 1st, and the amateur radio club station will close in February.

KH6BZF PROPAGATION FORECAST/REPORT (For January 18-24th)....
Jan 18 AN SOLAR REFERENCE
Jan 19 AN ---------------
Jan 20 AN AN - Above Normal/Geomagnetic Level is QUIET
Jan 21 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Jan 22 AN LN - Low Normal
Jan 23 AN
Jan 24 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LX, LUXEMBOURG. Lars, DF1LON, will be active as LX7I during the CQ 160-
Meter CW Contest (January 29-31st) as a Single-Op entry. QSL via LX2A.
Visit the following Web page at: http://www.lx2a.com

OH, FINLAND (OPENING FOR WORLD'S NORTHERNMOST CONTEST TEAM, OH8X). "Far
above 60 degrees North in the icy arctic reaches of Northern Finland lies
a log house with an original Finnish sauna and cozy sleeping quarters along
with the radio station OH8X with its massive antennas springing up from the
barren tundra. See www.radioarcala.com
Should you like to experience the deep North with its blazing Aurora
Borealis coupled with unique polar openings to the United States, this is
your chance. Radio Arcala will host four or five younger contest types
participating as a multi team in the ARRL DX (CW) Contest on the weekend of
February 20-21, 2010. The event will start Thursday evening on the 18th and
finish on Monday the 22nd. SSB/WARC operating will also be available on

those days, including on a limited scale during the contest weekend.
Your destination will be the city of Oulu from where we will take care of you. Just drop us a note and explain your desire as well as your potential as an operator on a multinational CW team. Send your email to team leader Marius Hauki, LB3HC [mhauki@gmail.com] and he will give you more details. Please contact Marius soon, but no later than January 30th.
You may also approach your favorite Contest Club and/or contest operators in your area for their expected support in making your trip a reality. You would owe them an adventure report upon your return."

OY6, FAROE ISLANDS. Operators Alex/OZ7AM and Tom/OY3AA will be active as OY6A from Torshavn (EU-018) during the CQ 160-Meter CW Contest (January 29-31st) as a Multi-Op entry. QSL via LoTW. Visit the Faroese Radio Amateurs Web page at: http://www.fra.fo

PA9, NETHERLANDS. A team will be active from the PA6Z superstation during the CQ 160-Meter CW Contest (January 29-31st) as a Multi-Op entry. QSL via PA9M. Visit the PA6Z superstation Web page at: http://www.pa6z.nl/index.html

PACIFIC TOUR. Tim, NL8F, will be heading to the Pacific again. He will start at Cocos (Keeling) Island (OC-003) between March 3ï¿½10th. Activity will be on 80-10 meters, plus 6 meters, and an entry in the ARRL International DX Phone Contest (March 6-7th). He will be using a vertical antenna. Currently, Tim does not know what his callsign will be (apparently it takes time for the WIA to process callsigns), but he is hoping for VK9COF (or possibly VK9C/NL8A). From Cocos, Tim will then head to the South Cook Islands and once again operate as E51COF from Rarotonga Island (OC-013) between March 20ï¿½30th. Activity will also be on 80-10 meters. QSL both operations via K8NA.

QSL INFO AND NEWS.....
NO LONGER P.O. BOX. Corrado, IT9DAA, informs that effective January 1st, rental fees for Post Office Boxes in Italy have raised dramatically. Therefore, all QSL requests should be sent to his home address (QRZ.COM): Corrado Ruscica, Via Capitano Salemi 41, 96019 Rosolini SR, Italy.

QSLS VIA LoTW: 3D20CR, 4A1DXXE, 4U64UN, CE2WZ, EI4GXB, F5NMK, G6PZ, IY1Y, JR1NHD, K5D, KH2L, MI0SAI, OK3R, ON4AOI, ON5UQ, P49X, SQ2NNN, UR5FBM, UX5IO, VA3MJR, VA7CRZ, VA7RN, ZP4KFX and ZS2Y

QSLS RECEIVED VIA MAIL: 4S7EA, 4U1ITU, 5K0T, 5N0OCH, 5W0KH, 5R8IC, 9G5TT, 9G5XX, BA4TB, C4I, C91LW, EP3BN, FS/W6IZT, FT5GA, H44MY, HI3A, IO5O, IV3DXW, J79WW, KL7RA, MS0WRC, ON5CD, OY9JD, P29VCX, P29VLR, SV2ASP/A, T77C, TF4M, TX5SPA, TX5SPM, V88/SM3TLG, VE9DX, VK9GMW, YJ0PX, ZK2DL and ZY0T

QSLS RECEIVED VIA THE BUREAU: 5R8IC, D68BT, ER4DX, J8/DL7AFS, J8/DJ7ZG, RA9LL, S50O and SX7A

SPECIAL EVENT. The Nacogdoches Amateur Radio Club (W5NAC) will again hold a special event station in remembrance of the Columbia Space Shuttle disaster on February 1, 2003. The event will occur on Saturday, February

6th. Ham operators from other areas are welcome to attend the event at the McMichael Middle School located in Nacogdoches. If you cannot come to Nacogdoches, listen for the special event station on 20 or 40 meters. Operation will begin at 0800 CST (1400z) and end at 1500 CST (2100z). They plan to operate on 7200 and 14270 kHz, plus or minus QRM. The local VHF repeater 146.84, negative offset, 141.3 PL, will be monitored as a talk-in channel.

SV/A, MOUNT ATHOS. Kostas, SV1DPI, provided some interesting news from Monk Apollo, SV2ASP, this past week. First he reports about some PIRATE operations and that Monk Apollo was NOT active on January 12th at all. So do not send QSL cards. He also mentions that some activity by PIRATES takes place after he goes off the air for 20-30 min. So beware of this. Kostas states that Monk Apollo's favorite mode is RTTY because it is more quiet and doesn't disturb the other monks. He is expected to be active on 160m RTTY (1838-1840 kHz), on 80m (around 3580 kHz), on 40m (7038 kHz) and 30m (10140 kHz). Activity usually takes place during his free time around 1700-2100z. He can be active during other times, so watch the bands and don't forget that his time is always very limited. Monk Apollo does update his QRZ.com site from time to time. For more info on him, see: http://www.qrz.com/db/sv2asp

T32, EAST KIRIBATI ISLANDS. Don, G3BJ, will be returning to the Pacific and will be active as T32BJ from Christmas Island (OC-024) between January 20ï¿½26th. Activity will be holiday style with a focus on the low bands, Europe and CW only. QSL via his home callsign.

T6, AFGHANISTAN. Jim, WA2EWE, will be active T6AF from Kabul during the ARRL DX CW Contest (February 20-21st) as a Single-Op/All-Band/Low-Power entry. When Jim can find time, you can usually look for him on RTTY or PSK on 20 or 17 meters. He was heard this past Friday on 20m RTTY. QSL via LoTW, eQSL or WA2EWE by the Bureau or direct.

TC2010, TURKEY (Special Event/Update). Members of the Turkish group called TCSWAT (TC Special Wireless Activity Team) activated the special callsigns TC2010CCE (European side), TC2010CCA (Asian Side) and TC2010CCI (Island side) this past weekend. The following schedule was released for upcoming operations:
March 20-22nd TC2010PSG August 28-31st TC2010WBC
May 28-30th TC2010CC (..) September 1-5th TC2010WBC
June 4-6th TC2010RKM September 10-12th TC2010RH
July 1-4th TC2010DHO TC2010AH
July 8-10th TC2010VS September 24-26th TC2010IDO
July 30-31st TC2010IIM October 2-8th TC2010CC (..)
August 14-15th TC2010LT December 10-12th TC2010GT
For more detailed information on these special events and their relevant awards, please the following Web pages:
http://www.ta0u.com
http://www.ta0u.com/2010/eng/pdf/2010AWARDCatalogue.pdf
http://www.ta0u.com/2010/Eng/Calendar.html

TR8, TUNISIA. Members of the Club Central D'Amateur Radio Scouts Tunisien (CAST) and the Radio Club of Tunisian Scouts (3V8ST) will be active with a special callsign TS8RW between January 18th and February 14th. Activity is to celebrate the "Ariana Rover Scout Leader" (ARSL) organized event called ROVER WEEK. This is an activity for adults (Rover Scout Leader) which include amateur radio workshops, cultural activities and conferences on "Radio Scouting - Service for Others".

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

January 20, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Winter Excitement - ARRL January VHF Sweepstakes
- Meanwhile, Far Below - CQ WW 160 CW Contest
- GACW Contesters Of the Year - LU7YS and DJ1YFK
- Dayton Contest Dinner Tickets Available
- Marconi Anniversary Videos
- WPX SSB, WA Salmon Run, and QRP ARCI Results
- What's At the Center Of A Bird Wattmeter Element?
- The New ARRL Web Site - Almost Here!

NEW HF OPERATORS - THINGS TO DO

If you are in the process of improving your CW and don't feel quite
ready to tackle a major contest, give the North American QRP CW Club's
monthly straight-key sprint a try? Once a month, you can give your fist
a workout and improve your Morse methods - it's a great way to get "up
to speed." Watch for other monthly contests in Contest Corral
<http://www.arrl.org/contests/>, as well.

BULLETINS

While it doesn't seem like there is much traffic coming out of Haiti on
the ham bands, that could change at any time due to the needs of relief
teams or from unforeseeable circumstances. Remember to keep the active
emcomm frequencies (3977, 3985, 7265, 7290, 14265, and 14300 kHz) clear
during contests. Even if YOU don't hear anything, that doesn't mean
that there isn't some local communications there that would hear your
signals. If you do have a high-performance station and some emcomm
experience, you may be able to help as a relay or net control station,
as N3HBX was able to do on the Salvation Army Emergency Net last week.
After all, this is why we have contests in the first place - to build
operating skill and station capabilities.

BUSTED QSOS
```

- A couple of our sharp-eyed readers pointed out that lead is also absent from plumbing solder because it was banned to prevent it slowly leaching out into the drinking water. (Thanks, Steve K7AWB and Jake K9WN)
- Rich K1HTV corrects the call of the W3LPL operator identified as W3RZ to WR3Z .

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

January 23-24

- ARRL January VHF Sweepstakes
- Linc Cundall Memorial CW Contest
- Locust QSO Party--CW
- NAQCC Monthly Straight Key Sprint
- YLISSB QSO Party--Phone
- BARTG RTTY Sprint

January 30-31

- CQ WW 160 Meter Contest--CW
- REF French Contest--CW
- UBA Contest--Phone
- Winter Field Day
- WAB Top Band Phone Contest
- WSJT Sprint
- Classic Exchange--CW

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The GACW - CW Group of Argentina <http://gacw.no-%20ip.org> has announced the 2009 GACW LU and DX Contesters Of the Year <http://www.contesting.com/articles/1043> Certificates of Excellence. >From Argentina, Sergio Landoni LU7YS <http://lu7ys.blogspot.com/> is recognized for his long contribution to the amateur radio contester's community. From the DX contesters, Fabian Kurz DJ1YFK <http://fkurz.net/> is recognized for his amateur radio community contribution and contester skills. Well done, Sergio and Fabian! (Thanks Hector LU6UO, Guillermo LW1EXU, and Gabriel LU5FZ)

News comes from BY4AA about a big Chinese hamfest held for the first time in 2009. The Shanghai Radio Administration Bureau (SRAB), SRSA, Chinese Wireless Association - MTTI Of P.R.CHINA and Shanghai Tarsus Hope Exhibition Co., Ltd., are sponsoring the China (Shanghai) International HAM Radio Expo & Festival <http://www.chinahamexpo.com/indexen.asp> on April 3-5, 2010 at INDEXEN Shanghai." There is plenty of information for visitors and exhibitors on the Web site. Perhaps CHINA HAM will become another stop on the Grand Tour of Dayton, Frederichschafen, and Tokyo!

Bill W5WVO has posted news of the 2010 WSJTGroup Sprint <http://www.ykc.com/wa5ufh/Sprint/W5WVO_Sprints.html> series, to be

held on the last Saturday morning of the month, beginning on January 30th. Subsequent sprints will be held on February 27th, March 27th, and April 24th. Results are due in Bill's Inbox <w5wvo@cybermesa.net> by the following Saturday! There is more discussion on the WSJT Yahoogroup reflector <http://groups.yahoo.com/group/WSJTgroup>.

A late change in the Locust QSO Party <http://www.k6vva.com/> is also afoot - the contest will start at 0200Z on Jan 21 (6 PM PST Wednesday evening, Jan 20) instead of the 0100Z (5 PM PST) reported originally. (Thanks, Eric K6VVA)

The North Coast Contesters are proud to announce that tickets are on sale for the 18th Annual Dayton Contest Dinner <http://contestdinner.com/> in the downtown Dayton Crowne Plaza hotel on Saturday night, May 15, 2010 at 6:30 PM. MC'ed by John K1AR, 2010 CQ Contest Hall of Fame Inductions will be announced and there will be a keynote speaker to be announced later.

Many of us have the voluminous AC6V.com <http://ac6v.com/> Web site bookmarked for its encyclopedic lists of links to everything ham radio. Since Rod's passing two years ago, the call sign reassignment clock has been ticking, but fear not! Recently, Rod's son Jeff - previously licensed as a Technician - realized the gravity of the situation and hit the books for a licensing blitz. Jeff is now the Amateur Extra class licensee AC6V! Nice to see the call stay "in the family" and good work, Jeff! (Thanks, Dennis N6KI)

Bob K0RC reports that he has moved his Contest Visualizer utilities <http://cid-d96c61feb759dc6e.skydrive.live.com/browse.aspx/Public> to a new Web host. Using previous URLs navigates to the disorganized remnants of the previous site.

Maybe the sprint sponsors are on to something? The British Journal of Sports Medicine reports that too much sitting - "prolonged bouts of immobility <http://www.physorg.com/news183065121.html>" -- can be as bad for you as too little exercise. Perhaps we'd better swap out the shack chair for a rowing machine!

After a long decline in favor of GPS and other radionavigation systems, LORAN-C finally goes dark in the US. Although LORAN was once a dominant and primary presence on 160 meters, a story on the Inside GNSS <http://www.insidegnss.com/node/1806> Web site quotes the US Coast Guard as planning for decommission of the stations beginning February 8 and transmissions ceasing entirely by October 1, 2010. This apparently also closes the effort to create a backup "eLORAN" system. (Thanks, George K5TR)

In the previous issue's <http://www.arrl.org/contests/update/index.html?issue=2010-01-06>Creative Compendium, Barry W6YE posed a paddle-pounding puzzle to ponder - "The name of what food has the most consecutive dits in Continental Morse code <http://en.wikipedia.org/wiki/Morse_code>?" The answer is found in

the dairy case - CHEESE! (eleven straight dits) And if someone asks you which foods you like best and you're in a hurry, a good answer would be CHEESIEST with a sweet stream of sixteen in a row!

Web Site of the Week - Here we are in 2010, the year of the next WRTC, to be held in Russia this time. It would be great to learn a bit of Russian, whether you're attending in person or not, and Eric K9GY gets the ball rolling with this set of introductory Russian words and phrases <http://www.ehow.com/how_10747_learn-key-phrases.html>.

WORD TO THE WISE

Full Calls - Every so often, it's important to remind folks, particularly beginning contesters, to give your full call in pileups. I know, with everybody else giving out those four-character short calls, a king-sized six-character call seems slow, but that's fifty-percent more characters for the station you're calling to have a chance at recognizing and your suffix just might be the one heard after the faster calls are done. Giving a full call is more effective for everyone in the pileup.

==> SIGHTS AND SOUNDS

Guy, N7UN enjoyed this two-part set of YouTube videos (Part 1 <http://www.youtube.com/watch?v=fdS-nvO-Tfc> and Part 2 <http://www.youtube.com/watch?v=z9M3y3SvcC4&NR=1>) by the Marconi Radio Club (W1AA) of the 100th anniversary of the first wireless message sent between the USA and Europe from Cape Cod Massachusetts. There is a lot of historical footage, still photos, and audio to support the "Ken Burns-like" video production! Marconi's daughter, Electra, even used a microphone to make contact with the International Space Station! Guy also sent a link to some great still photos of Marconi Beach <http://cozybeach.com/cape-marconi-beach.shtml> in the Cape Cod National Seashore park.

Did you notice the VHF/UHF Yagi array on page 48 of the August 2009 issue of National Geographic? A reader noticed the array and wrote a letter to the editor, published in the December 2009 issue. Can anyone identify the owner of that station?

If you like a challenge, the Where In the Universe <http://www.universetoday.com/category/where-in-the-universe/> site will definitely keep your memory banks busy. Every day brings another astronomical photo - some well-known and some obscure - for you to identify. Great fun!

In March 1941, nine months before Pearl Harbor, hams in the US were thinking about war-time operations. This Popular Mechanics article <http://www.vintageprojects.com/articles/radio-hams.pdf> about amateur radio begins with a practice exercise as follows - ""Simulate destruction of your main transmitter. Rig up your emergency equipment and report back on the air as soon as you can!" Now that's a Field Day! (Thanks, Tim W7TRH)

==> RESULTS AND RECORDS

While the ARRL Web site conversion is underway (see Conversation section), some of the online contest results will find temporary homes in other quarters. Watch ARRL Contest Manager Sean KX9X's blog <http://www.arrl.org/blog/Notes%20From%20The%20Contest%20Branch> for announcements when writeups for the September VHF QSO Party, 10 GHz and Up, and IARU HF Championship are online. The accelerated Sweepstakes score publication will likely be handled in the same way.

The results for the 2009 Canada Day Contest
<http://www.rac.ca/en/rac/programmes/contests/files/2009%20Canda%20Day%20Writeup%20V1.1-Web.pdf>
have been published on the Radio Amateurs of Canada Web site. Plaques and certificates will be going out in the next 30 days. Plaques will be mailed as in previous years and the certificates will be emailed out as PDF files suitable for printing. (Thanks, Bart VE5CPU, RAC Canada Day Contest Manager)

The rules for the CQ WPX Contest <http://www.cqwpx.com/rules.htm> are now available in 12 languages! Translation has been performed for the following languages: French by F6BEE, Spanish by EA4KD, German by DK9VZ, Russian by UA2FM, Japanese by JK3GAD, Bulgarian by LZ2CJ, Czech by OK1DSZ, Dutch by PA3AAV, Greek by SV1DPI, Portuguese by PY2WS, and Finnish by OH6LI. CQ WPX Contest Director Randy, K5ZD thanks all of these volunteers and is looking for someone to translate the rules into Chinese, as well. Regarding the WPX SSB contest - the results should be hitting your mailboxes shortly -- log checking reports are available for all submitted logs. Email Randy (k5zd@cqwpx.com) with the call sign you used during the contest to receive a copy.

The salmon have been cleaned and smoked - results for the 2009 Washington Salmon Run QSO Party
<http://www.wwdxc.org/salmon-run/announcements/2009-salmon-run.html>
have been posted on the WWDXC Web site. A record 269 logs were received, 91 from Washington State stations and a whopping 178 from out of state. (Thanks, WWDXC Salmon Run Committee)

The QRP ARCI contest results <http://www.qrparci.org/> Web site on has been updated with the final results for all the closed 2009 contests, the claimed scores for the 2009 Holiday Spirits Homebrew Contest and the claimed scores for the 2010 Pet Rock Celebration. Contest results dating back to the Spring QSO Party in 2005 are now available, as well! (Thanks, QRP ARCI Contest Manager, Jeff VA3JFF)

OPERATING TIP

No nutation is good nutation! Nutation - loosely meaning an involuntary rocking, swaying, or nodding, is a bad thing if it's you doing the nutating while trying to stay awake during a late-night contest adventure. If your nutation detector starts firing, it's time to change something in the shack - stand up, change the temperature, try another chair, or even...go take a nap!

==> TECHNICAL TOPICS AND INFORMATION

What's at the center of a Bird wattmeter element? Read the detailed
"Photo Tour of a Bird Wattmeter Element
<http://www.repeater-builder.com/projects/bird-element-tour/bird-element-tour.html>"
by Robert WA1MIK and find out! The accompanying text shows how the
author repaired a "dead bird" and performed a hamshack calibration on
the revivified element. (Thanks, Pete N6ZE)

The WRTC-2010 <http://www.wrtc2010.ru/> technical team has updated and
added rules regarding Station Setup (paragraph 16) and Radio Operating
Rules (paragraph 17). In addition, a compilation of questions and
answers discussed on the WRTC-2010 email reflector has been published
on the "Rules FAQ" page. Having been associated with the WRTC events
since the beginning, it is always fascinating to watch the definition
of the events evolve along with the technology that top operators now
employ. (Thanks, Dmitri RW3FO)

Codrut , YO3DMU has released a new version of his amazingly flexible
PstRotator <http://www.qsl.net/yo3dmu/index_Page346.htm> program. It
works with a wide variety of rotators, tracks the Moon, and supports
multi-user remote operation over the Internet. The user interface
offers quite a selection of methods for pointing and display, as well.

While you have lots of options to choose from, Paul AA9GG recommends
the Teko enclosures
<http://www.tekoenclosures.com/enclosures/tekal.htm> for building
projects. He reports success using the TEKAL 3 boxes, in particular.

What IS that noise, anyway? Well, now that he is retired from being
ARRL President, Joel W5ZN relaxes by listening to these recordings of
various common noise sources
<http://www.arrl.org/tis/info/HTML/rfi-noise/>! Seriously, perhaps one
of these MP3 files will clue you in to the QRN bedeviling your
operation. Knowing the nature of the noise source is an important clue
in isolating and fixing the problem.

Mobile noise can be a real problem, so it's nice to have some
manufacturer support. DX Engineering provided a link to Ford's EMC
guidelines on mobile radios
<http://www.fordemc.com/docs/download/Mobile_Radio_Guide.pdf>. Some of
the material is specific to Ford vehicles, but most of the directives
apply just as well to any car or truck. (Thanks, Dave WA3GIN)

Having caught up on my reading, I have a few recommended articles from
November 2009 magazines:

Nuts and Volts included "Computer to Computer Link Using Laser Pointers
<http://www.nutsvolts.com/index.php?/magazine/article/computer_to_computer_link_using_lase
r_pointers>",
by Ed Ringell who may also be AA1WZ. The project uses the popular
Arduino microcontroller, some inexpensive electronics, and a 5 mW red
laser pointer to build a 4800-baud data link that could easily be
adapted to laser QSOs for VHF+ contests and other experimentation.

Circuit Cellar <http://www.circuitcellar.com> featured "Low-Distortion FSK Generation", by Dennis Seguine and based on Bell 202 modulation and a Cypress PSoC microcontroller. Why bother? Lower distortion FSK is easier to demodulate at lower signal-to-noise ratios and lowers the BER (bit error rate). The article explains how waveform construction works and minimizes harmonic distortion through the proper selection of digital waveforms. This technique could be useful for any FSK mode developer along with Dennis' September 2006 article, "Simplified FSK Signal Detection".

High Frequency Electronics <http://www.highfrequencyelectronics.com/> included "Transmission Line and Lumped Element Quadrature Couplers", by Gary Breed K9AY. Quadrature couplers combine and divide power with 90-degree phase differences in both transmitting and receiving applications. This tutorial lays out the basic properties and design information.

Technical Web Site of the Week - ARRL Propagation Bulletin Editor, Tad K7RA recommends Carl K9LA's personal Web <http://mysite.verizon.net/k9la> site for propagation resources. "He writes the excellent monthly propagation column for WorldRadio Online <http://www.cq-amateur-radio.com/WorldRadio.html>, with a new issue on the twentieth of each month.". Tad notes on the site also has links to back issues starting with February 2009.

==> CONVERSATION

The New ARRL Web Site - Almost Here!

Over the past year or so, you've heard bits and pieces about the "new ARRL Web site" that is being assembled. Now that it's almost here, I'm sure you're wondering what to expect! First, I think it's reasonable to ask, "What's wrong with the current site?" The simplest response is that like a once-small library whose collection is larger than its shelf space, we've simply outgrown the structure of the current site.

The ARRL site in its current form is very, very large - more than 40,000 individual pages of information. I'm sure you've noticed that navigating around those many pages can be difficult when you leave familiar territory. Trying to maintain that many pages is time-consuming, as well, to the point of overload for the ARRL's team of Webmeisters. Recognizing that problem, the ARRL initiated a project two years ago to develop a new architecture for the Web site. That process re-organized the material, made it easier to navigate and maintain, and gives the ARRL staff more direct abilities to generate and publish material. It's been re-done from the ground up!

When the new site "goes live", what you'll find is an attractive graphic layout that lets you quickly zoom in on your interests. The new organization is based on feedback from users of the current site and staff alike so that it more accurately represents the way you want to see and access to ARRL material.

Is the new site just a repackaged version of the old site? Not at all - nearly every page has been reworked and updated. Outdated and obsolete material has been eliminated. As the introduction approaches, the number of individual pages has been cut approximately in half. You should be able to get what you want easier and faster.

After you get used to the new site, you'll really begin to appreciate its capabilities over time. There will be more material coming directly from the authors and staff with less delay for manual formatting. The "machinery" making the Web site operate will enable more material to be presented "live" and not just as unchanging or "static" text.

How about contest information? Located in the "On The Air" section of the site, it will be easier for you to find information about ARRL contests, records, rules, calendars, and results. We're just beginning to take advantage of the new "machinery" and will be developing "one-button" contest packages to streamline how you retrieve information. The same can be said for every other part of the site - licensing, technology, awards.

While the new site is activated, the ARRL Webmeister team is busy making sure all the links link and the controls control what they are supposed to. That means updates to the current site won't be as frequent as they usually are, including contest results and other updates. The normal publication schedules will resume after the new site has taken flight.

So don't miss out on the big changes coming to ARRL on the Web very soon. Keep an eye on ARRL Web stories, your bulletins, and your newsletters for news, guidelines, and instructions to make your transition to the new site an easy one.

73, Ward N0AX

==> CONTESTS

20 January to 2 February

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

Linc Cundall Memorial CW Contest--CW, from Jan 20, 2300Z to Jan 21, 2300Z and Jan 23, 2300Z to Jan 24, 2300Z. Bands (MHz): 1.8-7. Exchange: See Web site. Logs due: 30 days. Rules <http://www.antiquewireless.org/hamevents2010.htm>

Locust QSO Party--CW, from Jan 21, 0100Z to Jan 21, 0200Z. Bands (MHz): 3.5-7. Frequencies: 3.553, 7.053. Exchange: Name, state or province or 'DX'. Logs due: Jan 31. Rules <http://www.k6vva.com/lqp>

NAQCC Monthly Straight Key Sprint--CW, from Jan 21, 0130Z to Jan 21, 0330Z. Bands (MHz): 3.5-14. Frequencies: Monthly on 2nd or 3rd Wednesday. Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://www.usatek.net/%7Eyoel>

YLISSB QSO Party--Phone, from Jan 23, 0000Z to Jan 24, 2359Z. Bands (MHz): 1.8-28. Exchange: Call sign, RS(T), ISSB number. Logs due: Mar 19. Rules <http://www.ylsystem.org/>

BARTG RTTY Sprint--Digital, from Jan 23, 1200Z to Jan 24, 1200Z. Bands (MHz): 3.5-28. Exchange: Serial. Logs due: Mar 1. Rules <http://www.bartg.org.uk/>

CQ WW 160 Meter Contest--CW, from Jan 29, 2200Z to Jan 31, 2200Z. Bands (MHz): 1.8. Exchange: RST and S/P/C. Logs due: Feb 28. Rules <http://www.cq160.com/>

REF French Contest--CW, from Jan 30, 0600Z to Jan 31, 1800Z. Bands (MHz): 3.5-28. Exchange: RST and serial or department ID. Logs due: 30 days. Rules <http://www.ref-union.org/concours>

UBA Contest--Phone, from Jan 30, 1300Z to Jan 31, 1300Z. Bands (MHz): 3.5-28. Exchange: RS and serial. Logs due: 30 days. Rules <http://www.uba.be/en/hf>

Winter Field Day--Phone, CW, Digital, from Jan 30, 1700Z to Jan 31, 1700Z. Bands (MHz): 1.8-28, 50+. Exchange: Call sign, RS(T), category, local temp. Logs due: Feb 28. Rules <http://www.spar-hams.org/>

WAB Top Band Phone Contest--Phone, from Jan 30, 1900Z to Jan 30, 2300Z. Bands (MHz): 1.8. Exchange: See Web site. Logs due: 21 days. Rules <http://www.worked-all-britain.co.uk/contest>

Classic Exchange--CW, from Jan 31, 1400Z to Feb 1, 0800Z. Bands (MHz): 1.8-28, 50, 144, Frequencies: CW 1.810, 3.545, 7.045, 14.045, 21.135, 28.050, 50.100, 144.100 . Exchange: RST, QTH, model of rcvr and xmtr. Logs due: 30 days. Rules <http://qsl.asti.com/CX>

VHF+ CONTESTS

ARRL January VHF Sweepstakes--Phone, CW, from Jan 23, 1900Z to Jan 25, 0400Z. Bands (MHz): 50+. Exchange: Grid square. Logs due: Feb 25. Rules <http://www.arrl.org/contests>

WSJT Sprint--Digital, from Jan 30, see Web to Jan 30, see Web. Bands (MHz): 50,144. Exchange: NA report or NA grid. Logs due: Next Sat. Rules <http://www.ykc.com/wa5ufh/Sprint/W5WVO_Sprints.html>

Winter Field Day--Phone, CW, Digital, from Jan 30, 1700Z to Jan 31, 1700Z. Bands (MHz): 1.8-28, 50+. Exchange: Call sign, RS(T), category, local temp. Logs due: Feb 28. Rules <http://www.spar-hams.org/>

Classic Exchange--CW, from Jan 31, 1400Z to Feb 1, 0800Z. Bands (MHz): 1.8-28, 50, 144, Frequencies: CW 1.810, 3.545, 7.045, 14.045, 21.135, 28.050, 50.100, 144.100 . Exchange: RST, QTH, model of rcvr and xmtr.

Logs due: 30 days. Rules <http://qsl.asti.com/CX>

==> LOG DUE DATES

20 January to 2 February

January 20, 2010 ARCI Holiday Spirits Homebrew Sprint, email logs to: contest@qrparci.org, paper logs and diskettes to: ARCI Holiday Spirits, c/o Jeff Hetherington, VA3JFF, 139 Elizabeth St. W., Welland, Ontario L3C 4M3, Canada. Rules <http://www.qrparci.org/content/view/8108/118/>

January 20, 2010 RSGB 80m Club Championship, SSB, email logs to: ccssb.logs@rsgbhfcc.org, upload log at: http://www.vhfcc.org/cgi-bin/hfenter.pl, paper logs and diskettes to: (none). Rules <http://www.rsgbcc.org/hf/rules/2010/r80mcc.shtml>

January 22, 2010 AGB New Year Snowball Contest, email logs to: eu1eu@qsl.net, paper logs and diskettes to: Igor "Harry" Getmann, EU1EU, P.O.Box 143, Minsk 220005, BELARUS. Rules <http://www.qsl.net/eu1eu/agb_nysb.htm>

January 23, 2010 North American QSO Party, CW, email logs to: (see rules, web upload preferred), upload log at: http://www.ncjweb.com/naqplogsubmit.php, paper logs and diskettes to: Bruce Horn, WA7BNM, 4225 Farmdale Avenue, Studio City, CA 91604, USA. Rules <http://www.ncjweb.com/naqprules.php>

January 24, 2010 Run for the Bacon QRP Contest, email logs to: (none), upload log at: http://www.fpqrp.com/autolog.php, paper logs and diskettes to: (none). Rules <http://www.fpqrp.com/fpqrprun.php>

January 25, 2010 DARC 10-Meter Contest, email logs to: 10m@dxhf.darc.de, paper logs and diskettes to: (none). Rules <http://www.darc.de/referate/dx/xgdczr.htm>

January 26, 2010 RAEM Contest, email logs to: raem@srr.ru, paper logs and diskettes to: Alex Pashkov, P.O.Box 177, Novosibirsk 630032, Russia. Rules <http://raem.qrz.ru/contest/raem_2009/rules_eng_2009.php>

January 26, 2010 LZ Open Contest, email logs to: LZ1GL@yahoo.com, paper logs and diskettes to: (none). Rules <http://www.lzopen.com/lz-open-contest/rules/rulesF.htm>

January 27, 2010 PODXS 070 Club QRP DX Scramble, email logs to: n3dqu@yahoo.com, paper logs and diskettes to: Jay Budzowski, N3DQU, 070 Club QRP DX Scramble, 109 S. Northview Ave., New Castle, PA 16102-1633, USA. Rules <http://www.podxs070.com/qrp-dx-scramble>

January 28, 2010 South Dakota QSO Party, email logs to: K7RE@arrl.net, paper logs and diskettes to: SD QSO Party Entry, 10559 West Hwy 14, Spearfish, SD 57783, USA. Rules <http://www.w0blk.org/files/rules.pdf>

January 30, 2010 North American QSO Party, SSB, email logs to: (see rules, web upload preferred), upload log at:

http://www.ncjweb.com/naqplogsubmit.php, paper logs and diskettes to:
Bruce Horn, WA7BNM, 4225 Farmdale Avenue, Studio City, CA 91604, USA.
Rules <http://www.ncjweb.com/naqprules.php>

January 31, 2010 Stew Perry Topband Challenge, email logs to:
tbdc@contesting.com, paper logs and diskettes to: BARC, 15125 SE
Bartell Rd, Boring, OR 97009, USA. Rules
<http://jzap.com/k7rat/stew.rules.txt>

January 31, 2010 Lighthouse Christmas Lights QSO Party, email logs to:
(none), paper logs and diskettes to: Dave Ruch, NF0J, P.O. Box 20696,
Bloomington, MN 55420-0696, USA. Rules
<http://arlhs.com/LCL-2009-guidelines.html>

January 31, 2010 RAC Winter Contest, email logs to:
canadawinter@rac.ca, paper logs and diskettes to: Radio Amateurs of
Canada, 720 Belfast Road, Suite 217, Ottawa, Ontario K1G 0Z5, Canada.
Rules
<http://www.rac.ca/en/rac/programmes/contests/files/2009_Canada_Winter_Contest_Rules-FrenchandEnglish.PDF>

January 31, 2010 Original QRP Contest, email logs to: oqrpc@qrpcc.de,
paper logs and diskettes to: Lutz Gutheil, DL1RNN, Bergstrasse 17,
38446 Wolfsburg, Germany. Rules
<http://www.qrpcc.de/contestrules/oqrpr.html>

January 31, 2010 AGCW Happy New Year Contest, email logs to:
hnyc@agcw.de, paper logs and diskettes to: Daniel Schirmer, DL5SE, Am
Teich 15, 25917 Stadum, Germany. Rules
<http://www.agcw.org/en/?Contests:Happy_New_Year_Contest>

January 31, 2010 NRAU-Baltic Contest, CW, email logs to: sm3cer@ssa.se,
paper logs and diskettes to: NRAU-Baltic Contest, Jan-Eric Rehn,
Finstavagen 26, 7 tr., SE-863 31 Sundsbruk, Sweden. Rules
<http://www.sk3bg.se/contest/nrau.htm>

January 31, 2010 NRAU-Baltic Contest, SSB, email logs to:
sm3cer@ssa.se, paper logs and diskettes to: NRAU-Baltic Contest,
Jan-Eric Rehn, Finstavagen 26, 7 tr., SE-863 31 Sundsbruk, Sweden.
Rules <http://www.sk3bg.se/contest/nrau.htm>

January 31, 2010 SARTG New Year RTTY Contest, email logs to:

The ARES E-Letter

Published by the American Radio Relay League
*****************************************

January 20, 2010

Editor: Rick Palm, K1CE <k1ce@arrl.net>

==> THE VIEW FROM FLAGLER COUNTY

The almost-incomprehensible Haitian earthquake destruction is among the
worst I've seen in my three decades of association with ARRL and
disaster management/Amateur Radio communications. I monitored the
SATERN <http://www.satern.org/> Net on 14.265 MHz, and the Maritime
Mobile Service Net <http://www.mmsn.org/> on 14.300 MHz, where a
Flagler County amateur Bill Sturridge, KI4MMZ, was performing a fine
job relaying communications with Jean-Robert Gaillard, HH2JR, and
others. I heard HH2JR, who had a good signal, say he was OK and didn't
need anything at the moment, but had no power and no phone. The 14.300
MHz frequency is one of the three global "center of activity" disaster
frequencies set aside by the International Amateur Radio Union (IARU).
(For more on this plan, see the lead story below).

I also followed developments on the ARRL Web <http://www.arrl.org/>
site, and the IARU Region 2 Web
<http://www.iaru-r2.org/haiti-earthquake/> site. The IARU Region 2 Area
C (which includes Haiti) Emergency Coordinator is long-time friend and
emcomm veteran expert Arnie Coro, CO2KK, who requested amateurs to keep
3720 kHz and 7045 kHz frequencies clear for emergency communication
until further notice. The overall IARU Region 2 Emergency
Communications Coordinator (EMCOR) is Dr. Cesar Pio Santos, HR2P. I
also found SITREPs on the VoIP SKYWARN/Hurricane Net Support Site
<http://www.voipwx.net/>.

A post to the Region 2 Web site reported this: "After arriving to Port
au Prince an HI8RCD/HH team had to abort their mission due to the
present insecurity. The eight member team arrived safely back to
Jimani, Dominican Republic. The team installed a VHF repeater that
covers both Port au Prince and Santo Domingo (DR) and is in use for the
Red Cross and the Civil Defense.

"Victor Baez, HI8VB, Secretary of the Radio Club Dominicano (RCD)
reported that the RCD with UDRA, the Uniï¿½n Dominicana de Radio
Aficionados, had prepared to go to Port au Prince last Friday to
```

install the emergency station HI8RCD/HH and a mobile station. Victor has a blog <http://www.hi8vb.tk/> [in Spanish], which hopefully he will update with more news from Haiti. The IARU Web site also suggested hams follow the news of the support radio amateurs are providing in Haiti on Twitter here <http://twitter.com/iaru_r2>."

The ARRL encouraged US amateurs to be aware of emergency operations on the following frequencies: 7.045 and 3.720 MHz (IARU Region 2 nets), 14.265, 7.265 and 3.977 MHz (SATERN nets), and 14.300 MHz (Intercontinental Assistance and Traffic Net); the International Radio Emergency Support Coalition (IRESC) is also active on EchoLink node 278173.

ARRL Media and Public Relations Manager Allen Pitts, W1AGP, stated "The ARRL has been in contact with communications leaders of the American Red Cross and Salvation Army, as well as other key Amateur Radio operators throughout the region. As teams from the hundreds of responding agencies worldwide are formed for deployment, many will have Amateur Radio components. ARRL is committed to providing communications aid to our served agencies and working with the international community in this time of crisis. At this time there are no known requests from agencies for amateurs to travel to Haiti, but this can change. If it develops that there are ARES assignments for a deployment in Haiti, these will be vetted and processed through each Section's Section Emergency Coordinators."

I wanted to be involved, but listened only, and did not transmit on any of the emergency frequencies as there was nothing I could contribute. Actually, when you think about it, not transmitting is a de facto contribution. I did make a donation to Doctors Without Borders, and that made me feel part of the relief effort.

In other news, congratulations go to veteran ARRL leadership official Kay Craigie, N3KN, who was just elected President of the organization. Craigie was chairman of the ARRL National Emergency Response Planning Committee, which released a landmark report and recommendations <http://www.arrl.org/announce/reports-2007/january/NERPC-32aa.pdf> on major disaster communication issues in January, 2007. Her selection bodes well for the ARES and Amateur Radio disaster communications communities as I'm sure they will remain priorities for her new administration.

Outgoing ARRL President Joel Harrison, W5ZN, who did not seek re-election, was also a proponent of Amateur Radio emcomm programs and oversaw the significant surge of interest in ARES and emergency communications by Amateur Radio over the past decade. Craigie, like Harrison, came up through the ranks of ARES and the ARRL Field Organization to rise to the top elected position in the organization.

==> "CENTER OF ACTIVITY" FREQUENCIES FOR DISASTER COMMUNICATIONS

The International Amateur Radio Union <http://www.iaru.org/> (IARU) Administrative Council (AC) held its annual meeting in mid-October, 2009, in Christchurch, New Zealand. There has been a movement in the last several years to try to identify "centers of activity" frequencies across all three IARU regions that can be used in disaster relief operations. It has at times been difficult to arrive at a consensus on what frequencies should be used. The IARU Administrative Council noted that all three regions have now reached consensus on three global Center of Activity (CoA) frequencies for use in the event of emergencies: 14.300, 18.160 and 21.360 MHz. When no emergency operations are being conducted, these frequencies are open for normal amateur usage. However, GAREC <http://www.iaru-r1.org/index.php?option=com_content&view=article&id=319:global-amateur-radio-emergency-communications-garec-conference-2009&catid=48:emcom&Itemid=99>-09 calls upon IARU member-societies, among others, "whenever emergency communications are being conducted on frequencies that propagate internationally, to use any available real-time communications channels, including but not limited to e-mail bulletins, web-sites, social networking and DX-clusters to draw the attention of the largest possible number of Amateur Radio operators to on-going emergency communications, in order to avoid interference with emergency traffic." Member-societies are being encouraged to develop an effective method of notifying amateurs within their own country of any such emergency traffic being handled on the CoA frequencies, or elsewhere in the amateur bands. - IARU Electronic Newsletter, November 2009

==> NHC TO PROVIDE GREATER LEAD TIME FOR WATCHES, WARNINGS

Beginning with the 2010 hurricane season, NOAA's National Hurricane Center <http://www.hurricanes.gov/> in Miami will issue watches and warnings for tropical storms and hurricanes along threatened coastal areas 12 hours earlier than in previous years. According to NHC experts, advancements in track forecasts are making it possible for forecasters to provide greater lead time. Tropical storm watches will

be issued when tropical storm conditions are possible along the coast within 48 hours. Tropical storm warnings will be issued when those conditions are expected within 36 hours. This is an increase of 12 hours from those issued in previous years.

Similar increases in lead-time will apply to hurricane watches and warnings. The hurricane watches and warnings will generally be timed to provide 48 and 36 hours notice, respectively, before the onset of tropical storm force winds. That additional time will also allow people preparing for the storm -- securing oil rig platforms, getting food and water stockpiled, boarding windows and such -- enough time to finish preparations and get to safe shelter.

According to WX4NHC <http://www.wx4nhc.com/> Coordinator John McHugh, K4AG, the NHC has improved the track accuracy in their forecasts over the past few seasons, cutting the error rate to roughly one-third its level in 1970 and half the level of 15 years ago, thanks to advances in computer models and increased satellite measurements of atmospheric conditions. (WX4NHC is the Amateur Radio station at the NHC). "The extra 12 hours that has been added to both the tropical watches and warnings will be of benefit to the Amateur Radio volunteers of WX4NHC who have for the past 30 years supported NHC in their mission," McHugh told the ARRL. "This increase in time will allow us to better schedule their operating time along with those of our supporting groups of the Hurricane Watch Net (HWN <http://www.hwn.org/>) and the VoIP Hurricane Net (VoIPWXNet <http://www.voipwx.net/>) and allow people to better plan the release from their day jobs."

Hurricane season runs from May 15-November 30 in the Eastern Pacific and on June 1-November 30 for the Atlantic Basin. - ARRL Letter

==> MICHIGAN EMCOMM GROUP RECOGNIZES ONE OF ITS OWN

Muskegon, MI, December 27, 2009 -- The Muskegon County Emergency Communication Services, a local non-profit Amateur Radio group involved in providing emergency communications, has awarded James Wolffis, KD8DLQ, the "Al Ronning Outstanding Service Award." The award is given each December to a member of the group that has gone above and beyond the call of duty in service to this organization. Recognition is given in memory of Al Ronning, K8AER, who was a member of the group who died in an automobile crash in 2006. "Ronning was an inspiration to other members of the group in his tireless effort towards public service," said James Duram, K8COP, Muskegon County EC. Duram presented the plaque at the group's December meeting.

MCECS <http://home.comcast.net/%7Emcecs.net/> is a volunteer group of Amateur Radio operators that provides non-commercial communication services for public service events, walk-a- thons, and emergency communications to public safety agencies. - MCECS press release

==> NORTH FLORIDA DIGITAL GROUP TO PRESENT D-STAR ACADEMY

The North Florida Digital Group <http://www.arrl-nfl.org/dstar.html> will present a D-STAR <http://www.icomamerica.com/en/products/amateur/dstar/id1/default.aspx> Introduction and Training Academy on February 6, 2010, from 8:30 AM until 5 PM EDT, in Tallahassee, Florida.

The training academy is designed to inform amateurs on everything they need to know about D-STAR from its concept to operating equipment proficiently.

>From the amateur who doesn't know what D-STAR is to one who wants to become expert in its operation and the amateur who wants to understand the system first before jumping into this aspect of communication technology, this is the Academy to attend.

Ray Novak, N9JA, Division Manager of Icom Amateur and Receiver Products, is the featured speaker. Other notable speakers and instructors are also expected.

This is an information and training academy only. There will be no equipment sales. The goal is to inform and teach everyone interested in understanding and using D-STAR. Attendees will be provided training sessions along with hands on instruction on how to use and operate the D-STAR radio of their choice.

Areas of instruction will include: descriptions of the modes of operation; programming D-STAR radios using a computer program; field programming while on the go; using call sign routing and its programming; setting up repeater linking; using reflectors and their usage protocols; low speed data communication using the UHF and VHF radios; using 1296 MHz high speed data and internet access; using the D-Rats data program; using the DVDongle on a computer to access the D-STAR gateway; introducing the new DVDongle with its own transceiver to provide short range hand-held coverage; and setting up and configuring a D-STAR repeater system for internet operation.

There will be a social get together on Friday evening. Contact Donna Barker, WQ4M <WQ4M@arrl.net>, for updates, questions or additional information.

==> LETTERS

Power versus Volt Amps

I read the ARRL ARES E-Letter on a regular basis and appreciate your hard work. I was disappointed in the technical aspects of the emergency power article in the last issue; specifically in the discussion of the available "power" from the generator and the "power" needed by a load. Simply put, when dealing with AC, the voltage times the current is only loosely related to the power the device needs.

In any AC equipment that yields the total Volt Amps needed by the equipment, the importance is that it sets the wire size needed to connect the device, but does not tell you how much real power is going

to be consumed by the device. The power (expressed in Watts) needed can vary from 0 to the VA number. It can never be higher than the VA rating. Unless one knows the power factor of the equipment you have no way of knowing the power requirement. Power factors run from a low of about 0.55 up to 1 and can be leading or lagging. The VA rating is only equal to the power rating if the load has a unity power factor. Incandescent light bulbs have a unity power factor. Typical power supplies have a power factor of around 0.6 unless they are power factor corrected.

Running leading and lagging power factor loads in parallel lets the two power factors offset each other, raising the resulting power factor towards one. A unity power factor results in the lowest input current possible at a given voltage for a given power load. That is why the electric utility will periodically hang large capacitors on their lines: the capacitive reactance power factor offsets the inductive power factor of motors in the system. Reducing the system current draw makes it more efficient since the line distribution losses go up as the square of the current.

Generators also have two ratings: the power they can deliver as well as the total VA rating. The power is a function of motor size driving the generator. The amperage rating is a function of the wire size and magnetics used in the generator itself. Generator manufacturers often don't distinguish between the VA rating and power rating in Watts, so you aren't alone in this thinking. In some cases the manufacturer only gives a single rating which means the rated load must have a unity power factor to avoid overloading the generator. My Generac 4000, for example, has a rating of 4000 watts and a VA rating of 4000 as well. I suspect that the current rating would be the real limiting factor and the maximum power for a non-unity PF load should be derated.

Your conclusions are generally correct, but it misleads the reader in thinking you are talking power when in fact you are talking volt amps. In other circumstances (such as determining what size wire is needed for a given power level) the difference can be vital. I am also of the opinion that technical information ought to be technically correct. -- Jim Russell, NQ5L, Georgetown, Texas

More 220 MHz Rigs Needed

I have been looking for dual band 144/220 radios for several months now. I can't find them, even on eBay. I think we should start a nationwide ham uprising to get the various manufacturers to make dual band and tri-band mobile radios again. Without these we are using only 2/3 of the capability. My TM-742 had to go back for repairs because the 2 meter section quit. We use 220 MHz here in New Mexico as sort of a "private" frequency to send critical messages that the news media cannot hear: They don't have the 220 MHz frequencies programmed into their scanners. - Bob Skaggs, KB5RX, Santa Fe, New Mexico

WXSpots

In re last month's lead item on the Blacksburg, Virginia, SRD activity, I get reports on 2 meters, and especially on WXSpots. The WXSpots program has worked out to be a supreme system for us here in the Blacksburg CWA. I get all the reports, and then telephone them into the NWS Forecast office. The forecasters are very appreciative, and have actually changed their messages they send out to the media, based on what our people have reported in. When things are serious, and I can't get down my steep driveway, and therefore, can't get into the SKYWARN Desk itself at the NWS, I make periodic telephone calls into the office. And that system has been working well for us. -- Carter Craigie, N3AO, Blacksburg, Virginia SKYWARN

[WXSpots is free software and can be found here <http://www.wxspots.com/>. It has seen significant enhancements since its original release. I have been a user. From its Web site: "WXSpots is free software that all responsible weather enthusiasts are welcome and encouraged to use. The software runs on your PC and connects to a server so that you can join our weather community. All observed reports of severe (and routine) weather are relayed to everyone connected. WXSpots will also connect to your home weather station and automatically report when you are experiencing strong winds. Reports can be screened by State, County or a list of Counties. The WXSpots community includes weather hobbyists, SKYWARN observers, meteorologists, meteorology students, and those interested in severe weather observations.

"In addition to observed reports, WXSpots includes messaging features so that everyone can talk about the weather they are seeing, share links and information on forecasts and thoughts on future weather developments." - ed.]

==> OHIO'S TENTH DISTRICT FORMS EMCOMM PROMOTION TASK FORCE

Effective January 23, a new committee in the Ohio ARES Tenth District will work to promote emergency communications. The mission of the task force will be to promote ARES, public service communications, and disaster communications by Amateur Radio. The task force will be headed up by a new Assistant DEC to be announced at a January 23 training session. The goal is to reach out to new licensees and educate seasoned veterans. Anyone interested in learning more about the EMCOMM Promotion Task Force should contact the new ADEC, but can also contact the DEC for more information. - Matthew Welch, W8DEC <w8dec@oh.rr.com>, DEC; District Sound Off, January issue

==> JOB OPENING AT HQ

The ARRL currently has an opening for an Emergency Preparedness and Response Manager to be based at ARRL HQ. The successful applicant will represent the League with governmental and non-governmental emergency and disaster response organizations and partners -- primarily at the national level - for planning, continuity and operational purposes.

Job requirements include developing plans, protocols and procedures to address Amateur Radio's role in emergency communications operations at the multi-section, regional, and national level, as well as leading and training the ARRL Headquarters Incident Management Team to provide support and coordination for multi-section, regional or national incidents in the planning, mitigation and response phases. The position requires maintaining and reporting situational awareness through disaster intelligence collection during large disaster and emergency circumstances that require a multi-section, regional or national response.

The Emergency Preparedness and Response Manager will also create and improve operational solutions and processes for ARES, including training and operational standards consistent with NIMS/ICS response protocols in conjunction with ARRL staff and members of the Field Organization.

The successful applicant will represent the ARRL at national (and regional, when requested) Amateur Radio organizations, served agency partner meetings, conventions and exercises, and provide assistance and guidance to Section Managers and Section Emergency Coordinators regarding emergency preparedness and response.

Applicants interested in this position should hold a General class license or higher and have a Bachelor's degree, at least five years experience with Amateur Radio emergency communications in ARES (or equivalent) and have successfully completed the ARRL EmComm Level I course. Experience as emergency communications professional and/or first responder desired, including knowledge of and experience with ICS and NIMS. Completion of FEMA Courses IC-100, IC-200, IC-700, IC- 800 and IC- 802 is highly recommended.

==> MARS NAME CHANGES

On Wednesday, December 23, the Department of Defense (DoD) issued an Instruction concerning MARS, effective immediately. This Instruction gives the three MARS services -- Army, Air Force and Navy/Marine Corps -- a new focus on homeland security and a new name: Military Auxiliary Radio System. The Instruction is the first major revision to MARS since January 26, 1988 -- as such, the first revision since the 9/11 attacks and Hurricane Katrina, two major events that changed the way Amateur Radio dealt with emergency communications. In the past, MARS had focused primarily on emergency communications and health and welfare support. The DoD's Instruction now directs the three MARS services to provide "contingency radio communications" to support US government operations, DoD components and "civil authorities at all levels," providing for national security and emergency preparedness events. MARS units will still continue to provide health and welfare communications support "to military members, civilian employees and contractors of DoD Components, and civil agency employees and contractors, when in remote or isolated areas, in contingencies or whenever appropriate." MARS must also be capable of operation in "radio only" modes -- without landlines or the Internet -- and sustainable on emergency power (when public

utility power has failed); some MARS stations must be transportable for timely deployment. - ARRL Letter

==> K1CE FOR A FINAL

The ARRL is culminating its massive two-year effort to completely re-design its very popular Web site with a launch date of February 3. The site has been completely re-done from the ground up. With the ARRL staff working with Fathom, a Web site development company in Hartford, Connecticut, it has taken over two years to revise it. The new Web site will feature more than 20,000 pages of content. The navigation and architecture has been vastly improved, and the content has been completely updated. I can't wait to see it!

I've always been a Cushcraft fan, but recently when I called to order another in a long line of 2-meter FM Ringo Rangers I've owned over the years, Ham Radio Outlet was out of stock, and the sales rep recommended a Diamond antenna instead. I ended up purchasing a Diamond X30 144/440MHz ground plane antenna. The height is about 4 feet. The three radials are 7" long. Its rated wind velocity is 134 miles/hour. The antenna is encased in a fiberglass outer shell. It works as a ï¿½ wavelength at 2-meters and 5/8 wavelength at 40 cm.

I really like this antenna! It took about 5 minutes to put together, and another couple of minutes to install it on top of a pipe mast. It works great, is well-built and simple, and is also inexpensive at about $65. These antennas would be perfect for field deployment in disaster situations. And no, I am not paid to endorse Diamond or any other brand of amateur equipment.

I'm also working on drafting QST Product Reviews of two Yaesu radios: the FT-250 and the FT-270. I haven't tried them yet, but when I do, I'll pass along some thoughts on their suitability for rigorous disaster use. The hand-held 2-meter walkie-talkie is the mainstay of emergency communications, of course.

See you next month! 73's from Flagler County, Florida - Rick, K1CE

The ARES E-Letter is published on the third Wednesday of each month. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/FandES/field/ares-el/.

==> + HAITI EARTHQUAKE: DOMINICAN HAMS ATTEMPT TO INSTALL REPEATERS IN
HAITI

Members of the Radio Club Dominicano (RCD) -- the Dominican
Republic's IARU Member-Society -- and Union Dominicana de Radio
Aficionados (UDRA) arrived in Haiti late last week to install an
emergency radio communications station and a mobile station. Shortly
after they arrived, the hams returned to the Dominican Republic for
safety reasons.

"Within a few hours though, reports via the RCD Facebook page reported
that the HI8RCD team of eight amateurs was back in the [Dominican
Republic] border town of Jimani," said IARU Region 1 Emergency
Communications Coordinator Greg Mossop, G0DUB. "Their convoy, which
included other non related Dominicans, was assaulted. The radio
amateurs are uninjured, but they decided to leave the capital for
safety [reasons] and return to the border unescorted. They report the
situation as 'extremely unsafe.'"
```

The team was able to install two VHF repeaters: one in the Dominican Republic border town of JumanÃ and another Port-au-Prince. Mossop said that these repeaters have been used by the Red Cross and Civil Defense since, until quite recently, there has been no other way to communicate. The station at the embassy in Haiti could not be activated.

"The HI8RCD team of amateurs is still in JumanÃ, where many wounded are arriving," said IARU Region 2 Secretary RamÃ³n Santoyo, XE1KK. "They are helping Haitians to contact their relatives and friends outside of Haiti, but they can't help the world to find specific individuals in Haiti. They are receiving many e-mails with such requests, but security and road conditions make impossible to look for specific individuals in Haiti at the present." Read more here <http://www.arrl.org/news/stories/2010/01/18/11293/?nc=1>.

==> + ARRL LEADERSHIP: BOARD RAMPS UP FOCUS ON EMCOMM ISSUES, LOOKS TO LEAGUE'S CENTENNIAL

<http://www.arrl.org/news/stories/2010/01/16/11292/?nc=1> The ARRL Board of Directors held its 2010 Annual Meeting on January 15-16 in Windsor, Connecticut, under the chairmanship of President Joel Harrison, W5ZN, to consider and act on a number of recommendations from committees, as well as motions by Directors. With the election of ARRL First Vice President Kay Craigie, N3KN, as the League's 15th President, the 2010 Annual Meeting of the ARRL Board of Directors was off to a fast-paced start. Craigie, who ran unopposed, takes over the top leadership position from Harrison, who in October announced that he would not be seeking re-election. Craigie officially took office as President at the adjournment of the Annual Meeting. Read more here <http://www.arrl.org/news/stories/2010/01/19/11294/?nc=1>.

==> + PUBLIC SERVICE: HAM HELPS OUT IN RIVERSIDE COUNTY DESERT RESCUE

On the afternoon of Saturday, January 16, Christopher Walsh, KJ6BBS, of Irvine, California, was listening to radio traffic on 446.760 MHz, a channel used by the Los Angeles area-based Pocket Auto-Patch Association (PAPA) system -- an Amateur Radio network of 22 interlinked analog and digital D-STAR repeaters that provides extensive coverage of the Southern California region and beyond -- when he heard an emergency radio call break from Jose Hernandez, KI6PCK, of Thousand Oaks, California, reporting an injured male who had broken some ribs from an ATV-type accident. Read more here <http://www.arrl.org/news/stories/2010/01/20/11296/?nc=1>.

==> ARRL RECOGNIZES: BOARD RECOGNIZES OUTGOING ARRL PRESIDENT JOEL HARRISON, W5ZN

After more than 27 years of elected volunteer service to the ARRL, outgoing ARRL President Joel Harrison, W5ZN, has retired. In recognition of his dedication to the League over nearly three decades, the ARRL Board of Directors bestowed their thanks in the form of an engraved plaque. Presented by incoming President Kay Craigie, N3KN, on

behalf of the Board, the plaque recounts Harrison's elected service to the ARRL: Arkansas Section Manager, 1983-1988; Delta Division Director, 1988-1996; Vice President, 1996-2000; First Vice President, 2000-2006, and President, 2006-2010.

==> + ARRL RECOGNIZES: ARRL BOARD BESTOWS AWARDS AT 2010 ANNUAL MEETING

The ARRL Board of Directors had the pleasure and distinction of bestowing two annual awards at its 2010 Annual Meeting -- the inaugural George Hart Distinguished Service Award and the Bill Leonard, W2SKE, Professional Media Award. The Hart Award -- established by the Board at its 2009 Second Meeting -- is named in honor of George Hart, W1NJM, who served as Communications Manager at ARRL Headquarters and was the chief developer of the National Traffic System (NTS). The award is conferred upon an ARRL member whose service to the League's Field Organization is of the most exemplary nature. Selection criteria include the nominee's operating record with the National Traffic System, participation within the Amateur Radio Emergency ServiceÂ® (ARESÂ®), or station appointments and/or leadership positions held within the ARRL Field Organization.

The Bill Leonard, W2SKE, Professional Media Award is a national level award given each year to honor three professional journalists whose outstanding coverage in audio, video and print formats best reflect the enjoyment, importance and public service value of the Amateur Radio Service. Read more here <http://www.arrl.org/news/stories/2010/01/21/11300/?nc=1>.

==> + NEW ARRL WEB SITE COMING SOON!

It's almost here! After more than two years of planning, designing and writing, we are eagerly awaiting the launch of the new ARRL Web site. We've been able to make the online experience easier for our members -- from the online store, to registering for a class, to finding a club -- plus we've created a new, enhanced member profile with many more options available. We've made improvements with you in mind, making sure that our members will have the easiest, most enjoyable online experience possible. The new Web site will be available the first week of February.

==> + NOW YOU KNOW!: THE ARRL AMATEUR AUXILIARY

By ARRL News Editor S. Khrystyne Keane, K1SFA

The Amateur Auxiliary is composed of approximately 700 ARRL volunteer-appointees known as Official Observers (OO <http://www.arrl.org/FandES/field/org/oo.html>). Located across the country, they monitor the bands and notify amateurs of technical and operating discrepancies as a service to their fellow hams. Time and again, the FCC has indicated the responsibility to keep our operating standards and spectrum in shape rests with the Amateur Service. The Amateur Auxiliary program and its OOs are the League's answer to this challenge.

The OO Program has four main objectives: to foster a wider knowledge of and better compliance with the FCC rules; to extend the concepts of self-regulation and self-administration in the Amateur Service; to enhance the opportunity for individual amateurs to contribute to the public welfare, and to enable the FCC's Enforcement Bureau to efficiently and effectively utilize its limited manpower and resources. The role of the Amateur Auxiliary is to provide an unbiased forum for technical and operational advice and other assistance to amateurs who are receptive. The task is not to find fault or lay blame. It is to identify cause and effect, many of which are not based upon technical, but behavioral or social issues, as well as to find ways to achieve solutions to promote good amateur operating and engineering practice on our bands.

Even though you might consider yourself a good operator (and don't we all consider ourselves to be good operators?), you might receive an OO Notice. If you do get one, don't worry! The OO post card is simply a friendly note to alert you to possible equipment factors or operating practices that might have contributed to an apparent departure from a rule or the good amateur practice standard. Remember, OOs are friendly helper-advisors; their mission is to assist those who are receptive to being assisted. You do not need to reply to the notice, but you may want to take a few minutes to determine what caused the apparent problem and then take steps to fix it. Your corrective actions might even head off an FCC "pink slip" down the road (which, by the way, are not pink!).

Keep in mind that OOs are advised to avoid hair-splitting and to deal only with black-and-white rule discrepancies only. For example, an OO should not send a notice to someone who forgot to identify his station for 10 minutes and 8 seconds! If you feel that the OO sent you a notice that violates the principles of the program, send a copy to your Section Manager <http://www.arrl.org/sections/> or to Headquarters <k0bog@arrl.org> for evaluation and possible action -- quality control is critically important in a program as sensitive as this one.

To emphasize the positive nature of the Amateur Auxiliary Program, OOs will also send out "Good Operator Reports" to those operators whose radio signals and/or operating practices are consistent with the highest standards and are a model for others to follow. Every amateur should strive to pattern their operating and signals after your example.

Prospective OOs must pass a comprehensive examination based on a set of study materials before they can be certified as members of the Amateur Auxiliary; they must also be an ARRL member and be licensed for at least four years. If you are interested in becoming an OO, contact your Section Manager <http://www.arrl.org/sections/>. Now you now!

==> SOLAR UPDATE

Tad "Whose dwelling is the light of setting Suns <http://www.bartleby.com/145/ww138.html>" Cook, K7RA, reports: We saw

just one day with a blank Sun this week -- Tuesday, January 19 -- when sunspot group 1040 moved over its western limb. New sunspot 1041, which is really old sunspot group1039, emerged from the east, bursting with solar flares (five so far) and as a result, both the planetary and high latitude K index jumped to 5 at 1800 UTC on January 20. The M-class solar flare on Wednesday caused an SID, or Sudden Ionospheric Disturbance, and Friday's bulletin will talk about a Stanford University project encouraging homebrew SID detectors for ham station and classroom, allowing you to detect these events when they happen -- no more guessing as to why your receiver suddenly seems dead. Look for more information in the Solar Update, available on the ARRL Web site on Friday, January 22. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by William Wordsworth's Lines Written a Few Miles Above Tintern Abbey <http://www.bartleby.com/145/ww138.html>.

==> + ARRL PUBLICATIONS: THE 2009 ARRL PERIODICALS ON CD-ROM NOW SHIPPING

The 2009 ARRL Periodicals on CD-ROM <http://www.arrl.org/catalog/?item=1486> is now available and includes the complete 2009 fully searchable collection of three ARRL journals -- QST <http://www.arrl.org/qst>, QEX <http://www.arrl.org/qex>, and the National Contest Journal (NCJ <http://www.arrl.org/ncj>). In addition, the CD-ROM includes source code for software projects and PC board patterns, Section News, as well as the ever-popular Contest Soapbox and Contest Results. Search the full text of every article by entering titles, call signs or names. See every word, photo -- most in color -- drawing and table in technical and general-interest features, columns and product reviews, plus all advertisements. Print what you see, or copy it into other applications. System requirements: Microsoft Windows and Macintosh systems, using the industry standard Adobe Acrobat Reader software. CD-ROMs for other years are also available <http://www.arrl.org/catalog/?category=What%27s+New&words=periodicals>.

==> THIS WEEK ON THE RADIO

This week, be sure to check out the ARRL January VHF Sweepstakes <http://www.arrl.org/news/stories/2010/01/13/11282/?nc=1> on January 23-25. On January 22, there is a running of the NCCC Sprint. Look for the YL-ISSB QSO Party (SSB), the MIE 33 Contest and the BARTG RTTY Sprint on January 23-24. The SKCC Sprint is January 27. Next week, there is another running of the NCCC Sprint on January 29. The CQ 160 Meter Contest (CW) is January 29-31. The REF Contest (CW), the UBA DX Contest (SSB) and the SPAR Winter Field Day are January 30-31. The Classic Exchange (CW) is January 31-February 1. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> + SILENT KEY: CQ MAGAZINE COLUMNIST DAVE INGRAM, K4TWJ (SK)

Dave Ingram, K4TWJ, who penned the "World of Ideas" and "How It Works" columns in CQ Magazine, passed away Wednesday, January 20, from complications due to a heart attack late last year. He was 67. A writer and columnist at CQ since 1981, Ingram -- an ARRL member -- began his career at the magazine writing the amateur television "World of Video" column that later morphed into the "World of Ideas," covering code keys, stealth antennas, building "new vintage" tube gear, mobiling and more. Ingram also served as CQ's QRP Editor. "His enthusiasm for whatever caught his interest was contagious and spread widely through his informal, yet educational writing style," recalled CQ Managing Editor Rich Moseson, W2VU. Ingram also wrote for RadCom -- the Radio Society of Great Britain's member journal -- and other international ham magazines. Funeral arrangements are pending. -- Information provided by CQ Magazine

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, January 24, 2010, for these online course sessions <http://www.arrl.org/cep/student/> beginning on Friday, February 10, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

46. Amateur Radio Newsline(tm) Report 1693 - January 22, 2010

Amateur Radio Newsline(tm) Report 1693 - January 22, 2010

Amateur Radio Newsline report number 1693 with a release date of
Friday, January 22, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams come under gunfire as they try to
assist earthquake devastated Haiti, amateur radio is victimized by
rescue radio hoax in Arizona and the ARRL makes history by electing its
first ever woman president. Meet her on Amateur Radio Newsline(tm)
report number 1693 coming your way right now.

RESCUE RADIO: HAMS ATTACKED IN HAITI

Hams trying to bring communications back to Port au Prince Haiti were
forced to flea for their lives. This after the convoy they were a part
of was attacked by what was likely a roving band of looters. Bill
Pasternak, WA6ITF, is in the newsroom with the latest:

--

Radio amateurs from Radio Club Dominicano who were to be in Haiti under
the callsign HI8RCD/HH have had to abort their operations. This, after the
convoy they were travelling in was fired on.

The RCD initially reported that on Friday, January 15th, that their team
had crossed the Haitian border and headed toward the Dominican Embassy in
Port au Prince. Once there they then began installing ham radio equipment
but had to abort and flee the area when gunfire erupted.

Within a few hours the RCD Facebook page reported on a telephone
conversation between Hugo Ramï¿½n HI8VRS and Ramon Sanyoyo, XE1KK. There it
was confirmed that all 8 members of the HI8RCD team were back in the border
town of Jimani in the Dominican Republic. None of the hams had been
injured but decided to leave the Port au Prince for their own safety and
returned across the border unescorted.

Later they were able to establish two repeaters near the Haiti and
Dominican Republic border. One is at Jimanï¿½ on 146.880 MHz covering
Dominican Republic Border and most of Haiti including Port-Au-Prince. This
system is linked with 146.970 MHz covering 85% of the Dominican Republic
and the west of Puerto Rico. Other reports say that a third repeater near
the Dominican Republic border with Haiti is now operational on 145.350
MHz. All machines require a -600 kHz transmit offset and 100 hertz tone

for access.

In other Haiti relief news, YV5AMH has e-mailed Newsline to say that two Venezuelan hams identified as YV5JF and YV5VE, were to be operating from a base located 5 Km west of Port au Prince after January 20th. This operation is coordinated between the Radio Club of Venezola and the Office of Communications of the Bolivarian Army. It is strictly in support of Venezuelan humanitarian aid to Haiti. The Venezuelan hams plan to use SSB, BPSK-31 and SSTV on several frequencies in the 80, 40 and 20 meter bands but the exact nature of the communications services that they will be providing was not spelled out in the news release from YV5AMH.

And looking down the pike as it were, as time goes on the need for ham radio High Frequency communications is fast declining. This as satellites are repositioned to quickly restore both international telephone and Internet service to Haiti for aid workers to use.

What is expected to emerge ham radio-wise is a need for more bi-lingual emergency communications operators using 2 meter FM and possibly D-Star for on-island communications as the overall infrastructure of Haiti is rebuilt. Its believed that one group is already in route to Port au Prince to install a 2 meter D-Star machine that could become operational this week.

Also, to those foreign nationals inquiring about obtaining permission to operate ham radio in Haiti. It has to be noted that Haiti is not a signatory to any reciprocal licensing agreement. Also, the building that housed the Haitian Telecommunications Ministry was destroyed by the quake and a number of staff members lost their lives. So at this moment in time there is no way to get a Haitian license or operating permit. Those who might eventually be asked to come should coordinate licensing through the organization making the request.

While several amateur radio groups report that they are ready to send trained operators and communications gear into Haiti, as we go to air there has been no call for hams from the United States, Canada nor any European nation has yet been asked to make the trek. There are several reasons that have emerged. First is the question of language. In recent days it has been reported that any relief workers that are brought to Haiti will have to be fluent in Creole French as that's the language of the indigenous population.

More important is what you are seeing daily on your TV screen. With the chaos in the street, the looting and random violence, Haiti is not a safe place to be without a military escort. And the military is not about to spend its times babysitting hams. Even those hams tasked with rescue radio operations.

More on this story next week. I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

The bottom line. Haiti remains a very dangerous place and its best not to encourage anyone to even think about a self-deployment scheme. This is not a time nor a place for want-to-be heroes, no matter how important that they think their assistance might be. Going there on your own might mean that you will never be seen or heard from again.

**

RESCUE RADIO: HAMS VICTIMIZED BY ARIZONA MAYDAY HOAX

Back in the United States, reports of an injury accident in the desert near Maricopa, Arizona prompted a three hour search that began after an unknown station turned up on several 2 meter frequencies requesting help. And it now all appears to be a cruel hoax as we hear in this report from Amateur Radio Newsline's Norm Seeley, KI7UP:

--

David French, W7FAN, tells Newsline that on Sunday morning, January 17th a unknown operator showed up on several 2 meter frequencies. The unidentified station claimed to have been in a desert motoring accident and in need of help.

The story begins at 10:35 a.m.. That's when Richard Dabney, K6BZZ, in Maricopa was in QSO on the Phoenix 146.94 White Tanks repeater when the unidentified station interrupted his contact to request help. The station then said "Mayday, Mayday, Mayday" and gave information that he and his father were in the desert in a dune buggy and had rolled it over. The operator also stated that his father was a ham and that it was his father's radio that was being used.

The person on the radio stated that he was injured and the passenger was unconscious. He also made comments that led KB6ZZ to assume that the father was the passenger and gave some GPS coordinates before his signal faded out. The initial 911 call was made by K6BZZ.

At 10:45, Dennis Griffin, KD7CAC, copied a station breaking into a special event net on the 146.86 Mt Ord repeater located North-East of Phoenix and also requesting assistance. As there was a public service event taking place on the .86 machine he was moved the station to the 147.36 repeater also on Mt Ord. There, KD7CAC copied pretty much the same information as had KB6ZZ before the station again faded out. Griffin also alerted authorities, This time the Pinal County Sheriff's Dept via its 911 emergency exchange.

Unfortunately, neither operator thought to request a callsign or name on initial contact and the station was gone before they could follow-up. But the GPS coordinates he gave both operators tracked to an area of desert wilderness southwest of Maricopa.

In response, authorities established a command post at the Vija Truck Stop at State Route 84 and Interstate 8. Units from the Pinal County Sheriff's Office and Arizona Department of Public Safety Search and Rescue combed the area, but turned up nothing.

Later in the afternoon, a new set of coordinates was obtained which put the accident scene near Ajo. Pima County officials were notified, but their subsequent search yielded no results as well.

Authorities now believe that the distress calls were a cruel joke being played on the local ham community by a person and for reasons yet unknown. None the less, Maricopa, Arizona, hams proved that they could respond quickly when an emergency situation came their way, even if that emergency turned out to be a phony call for help.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, reporting from Scottsdale.

--

News reports say this is the second such hoax local authorities have received. As with the use this time of ham radio frequencies the motives for the bogus calls are unknown. (W7FAN, Maricopa 360)

HAM RADIO POLITICS: ARRL ELECTS KAY CRAIGIE, N3KN AS ITS NEW PRESIDENT

A historic day in the history of the American Radio Relay League. This as the Board of Directors elects First Vice President Kay Craigie, N3KN, of Blacksburg, Virginia, as the organization's first ever female president. Amateur Radio Newsline's Mark Abramowicz, NT3V, is at our East Coast Bureau with the details:

--

Kay Cragie says she is humbled to have been elevated to such an honor and is pleased the ARRL board had the confidence to entrust her with such an awesome responsibility.

Craigie, who began her service to the ARRL and its membership in 1986 as the Eastern Pennsylvania section manager, says she also recognizes the legacy of her predecessors.

"If you stand in the lobby at ARRL headquarters, you see photographs of all the presidents of ARRL going all the way back to Hiram Percy Maxim, W1AW," Craigie says. "I'm here to tell you when you think about joining that list of amazing, outstanding radio amateurs, if it doesn't throw you for just a little bit of a loop there's something wrong with you.

"Because these are people who had a tremendous contribution to amateur radio and I am just unbelievably honored to be joining that group."

Craigie moved up the ARRL ladder pretty quickly, becoming the Atlantic Division vice director in 1990 and then director in 1996.

N3KN was elected a vice president in 2000, and moved up to first vice president in 2006.

Craigie says during that time, she got the chance to work on many of the challenges facing the amateur radio service.

"We were believing that Part 15 devices were going to be a challenge for amateur radio," Craigie recalls. "Boy were we right. The whole issue of broadband over powerlines - not so much BPL but the interference that BPL can create - has been a real issue for us over the last several years. We're still working on that one."

"Another challenge that we're now seeing is the increasing demand for spectrum for mobile broad-band," she continues. "I have a Smartphone, lots of radio amateurs have Smartphones. We're using them. They gobble up a great deal of spectrum to serve us the way we want them to.

"And, the ARRL's job is to make sure that meeting the needs of that industry doesn't cut into the spectrum that amateur radio operators have to use and to experiment with."

Craigie says one of the big efforts she is committed to is attracting more qualified and dedicated people into the amateur radio service.

"We're making good strides on that, thanks to the efforts at the grass roots by individual instructors and radio clubs and groups who are getting out the word about amateur radio and helping people become licensed," Craigie says.

"Of course, we'd like to have more younger people involved in amateur radio. Amateur radio is a fellowship based on achievement. Everything else is just a demographic factoid, really.

"Achievement is the key and that's why amateur radio is so good for young people in that it stimulates them to achievement of a very positive and constructive kind and the League wants to do what we can do in cooperation with local hams to promote more young people getting involved in amateur radio."

Craigie - now a retired educator - was tasked to develop what became the league's Education and Technology program. She says it continues to work on a number of levels.

"This project is ongoing, it's successful, it has achieved things beyond my wildest dreams," Craigie says.

"And the League is very pleased to continue to offer school teachers the skills and the knowledge that they need to bring amateur radio into the classroom and help kids get excited about education, excited about science,

about technology about social studies, about languages - all the different things that you can use amateur radio to support in the classroom."

Finally, Craigie says, one of her top priorities is to continue to promote the valuable public service role of amateur radio.

"When you have situations where infrastructure is crippled, overloaded, amateur radio, as we say, is what works when all else fails," Craigie says. "And, in the circumstances like what we have in Haiti right now, of course, it's tremendously dangerous.

"We've seen news stories about amateurs who have attempted to help and then had to fall back to safer positions. But, amateur radio for the foreseeable future will be in a position to assist the authorities and to assist charitable relief agencies to help the public.

"Whether it's helping the public in our own communities, elsewhere in our country or in some cases, around the world. And we certainly commend the hams who have the dedication and courage to do that.
"And, of course we also encourage them to take some note for their own personal safety in those circumstances where that's a real issue."

You can download my entire interview with Kay Craigie from our website at www.arnewsline.org. Just scroll down to the words "Kay Craigie interview" and right click on the word "here" to save the file to your computer."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Kay Craigie, N3KN, assumed the reins ARRL from outgoing President Joel Harrison, W5ZN, at the close of the Annual Meeting. In October, Harrison had advised the Board that he would not seek re-election.

(ARNewsline(tm) with biographic information from ARRL)

**

HAM RADIO POLITICS: CHANGES TOP THE ARRL LEADERSHIP

The elevation of Kay Craigie to the presidency has lead to several other changes in the ARRL higherarchy. As a result, Vice President Rick Roderick, K5UR, being elected First Vice President and Midwest Division Director Bruce Frahm, K0BJ, elected to the Vice President position. This has created a vacancy in the Director position in the Midwest Division where following natural order of succession Vice Director Cliff Ahrens, K0CA, will take over as Director.

Another change was the election of Dakota Division Director Jay Bellows, K0QB, as International Vice President. Dakota Division Vice Director Greg Widin, K0GW, will move up to Director in that Division.

Last but by no means least word that ARRL Technical Relations Manager Brennan Price, N4QX, has been elected ARRL Chief Technology Officer. He replaces Paul Rinaldo, W4RI, who retired from the staff in 2008 but

retained the officer title through the end of its two-year term.

**

RESTRUCTURING: FCC ELIMINATES PART 23 OF ITS RULES

The FCC has issued an order that eliminates Part 23 of its Rules. Part 23 governed the International Fixed Public Radiocommunication Services.

According to a Commission January 14th release, this change eliminates an outmoded service and makes the frequencies available for other services. Among the re-purposing of the spectrum involved is to provide for newer disaster recovery communications services.

The Commission's rules defined the now defunct International Fixed Public Radiocommunication Services as a publicly available fixed service between the United States and foreign points that was created in the 1930's. For many years facilities on those frequencies provided an important form of international communications. More recently it was used for point-to-point microwave services.

You can read more at:
http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-10-7A1.doc (CGC, FCC)

**

RESTRUCTURING: BROADCAST TV VS. WIRELESS BROADBAND CONTINUED

The FCC appears to be backing off on reallocating broadcast spectrum for broadband, or so it seems according to a report from John Eggerton of Broadcasting & Cable Magazine. In his article Eggerton quotes Phil Bellaria of the FCC's broadband planning committee as saying the current plan being prepared for Congress does not include enforced reallocation of broadcast spectrum but includes a clause of what he terms as a voluntary opportunity.

By way of background, the FCC began suggesting such a spectrum reallocation late last year. This only weeks after the conclusion of the digital television transition. That's when the Commission's Blair Levin first mentioned the idea of taking broadcast spectrum for the national broadband plan and likely place it in the hands of wireless telephone service providers. A wireless industry spokesman had said that wireless broadband will need at least 800 MHz of additional spectrum in the next six years.

Broadcast TV occupies 300 MHz and according to Wireless Week, the wireless industry maintains that the record overwhelmingly demonstrates there's a need for additional spectrum for mobile broadband services. This includes the almost 300 MHz allocated for broadcast television use which the wireless industry appears to see as being spectrum most favorable to mobile broadband. (B&C)

**

ENFORCEMENT: FCC ISSUES CITITAION FOR UNAUTHORIZED WIRELESES VIDEO CAMERA

The FCC has issued an official Citation to Pinecomputer of Covina, California. This, for marketing unauthorized radio frequency devices in the United States.

According to the FCC, an investigation by the Enforcement Bureau's Los Angeles Office revealed that on November 10, 2009, Pinecomputer marketed model W203CA, 1.2 GHz wireless surveillance cameras and associated receivers which have not been approved for sale by the regulatory agency. The agency maintains that Section 302(b) of the Communications Act provides that no person shall manufacture, import, sell, offer for sale, devices which fail to comply with the FCC regulations in this area.

Violations of the Act or the Commission's Rules may subject the violator to substantial monetary forfeitures, seizure of equipment and criminal sanctions, including imprisonment. The FCC gave Pinecomputer fourteen days to request an in person meeting with the agency to discuss the allegations. (FCC)

**

THE SOCIAL SCENE: ORLANDO HAMCATION FEBRUARY 13 - 15

Amateur Radio goes on the Digital Road is the theme of the 2010 Orlando Hamcation slated for February 13th to the 15th at the Central Florida Fairgrounds. Highlights include over 150 commercial vendors, 400 swap table vendors and participants also the largest Tailgate Area in the southeast United States. For more information on this years Orlando Hamcation please visit www.hamcation.com on the World Wide Web. (Orlando Hamcation)

**

THE SOCIAL SCENE: SEVHFS CONFERENCE IN KENTUCKY APRIL 23 - 24

The next Southeastern VHF Society Conference will be April 23rd and 24th. This, at the new $17 Million Space Science Center at Morehead State University in Morehead, Kentucky. Further information including the registration form for the conference will soon be posted on the Southeastern VHF Society website. Its in cyberspace at www.svhfs.org /vhf/ (SEVHFS)

THE CHANGING OF THE GUARD: DAVE INGRAM, K4TWJ - S.K.

It is with great sadness that we report that our longtime friend and CQ Magazine columnist, Dave Ingram, K4TWJ, became a Silent Key the morning of January 20th. This as the result of complications from a massive heart attack he suffered on New Year's Eve.

Dave Ingram, K4TWJ, had been writing for CQ at least since 1981 and has been a CQ columnist since 1982, starting with an amateur television column called World of Video. That column eventually broadened its outlook and became Dave's signature monthly column in CQ known as the "World of Ideas." Regular topics included Morse code keys, stealth antennas, building "new vintage" tube gear and mobiling.

In addition, for the past decade, Dave has been CQ's QRP Editor and "How it Works" columnist. His enthusiasm for whatever caught his interest was contagious and spread widely through his informal yet educational style of writing.

But more than anything else, Dave was simply a nice guy. He was a ham who loved the hobby and blessed with the God-given ability to share that enthusiasm with anyone with whom he came in contact.

As this newscast is prepared funeral arrangements are not complete. Additional information will be posted on the CQ website news page when it becomes available. Condolence cards may be sent to Dave's wife, Sandy, WB4OEE, at their Callbook address. Contributions in Dave Ingram's memory be made to the American Heart Association

73 old friend. You will truly be missed.

(From information provided by CQ Magazine)

RADIO HONORS: DAYTON HAMVENTION SEEKING AWARD NOMINEES

The Dayton Hamventionï¿½ is once again soliciting nominations for its highly coveted Radio Amateur of the Year, Special Achievement and Technical Excellence awards. To many radio amateurs these are considered the ham radio equivalents of the entertainment industries Tony, Emmy and Oscars.

The Radio Amateur of the Year is someone who has devoted the better part of his or her life to improving the overall state of Amateur Radio. The Special Achievement Award is presented to a radio amateur whose one time accomplishment has had a significant and positive impact on the hobby. The Technical Excellence Award is given to an individual whose expertise in the scientific aspect of the hobby has lead to advancement in the overall state of the art. And this year, there will also be a onetime only a Club of the Year award. This to coincides with the 2010 Hamvention theme which is "Amateur Radio Clubs Worldwide: the Lifeline."

Applications for these awards can be found www.hamvention.org/awards.php. Submissions by e-mail go to awards@hamvention.org or via regular mail to Hamventionï¿½ 2010, Attention Awards Committee, Post Office Box 964, Dayton, Ohio, 45401. And less we forget, the cutoff date for submitting all nominations is March

15th. (Hamventionï¿½)

**

THE SOCIAL SCENE: SPEAKERS NEEDED FOR HAMVENTION TOWN MEETING

If you have ever dreamed of being a speaker at the famed Dayton Hamventionï¿½, 2010 may your chance to make that dream come true. Each year Amateur Radio Newslineï¿½ produces and hosts the Ham Radio Town Meeting at the Hamventionï¿½. And with the world financial recession continuing and so many people still out of work, we got the idea to dedicate this years session to advising how having a ham radio license might be a way to open doors to employment. If you are one of those people who landed a job because of your experience as a radio amateur, we would love to have you tell your story at this years Ham Radio Town Meeting.

OK, there are a few caveats. First off, you are on your own as far as travel and accommodations. The Hamventionï¿½ no longer pays the expenses for
speakers. Also, you will only get 10 minutes to tell your story after which you will be expected to answer questions from the audience at the Hara Arena and possibly those on-line in their homes.

If you are interested in being a presenter please e-mail us an outline of your proposed presentation to newsline (at) arnewsline (dot) org. Please be sure to include your postal address, e-mail address, phone number and other contact information. We will look over all submissions and get back to you if what you have to say fits with the goal of this year's Hamventionï¿½ Ham Radio Town Meeting.

This year's Ham Radio Town Meeting takes place on Saturday, May 15th at the
Dayton Hamventionï¿½. We look forward to hearing from you. (ARNewsline(tm))

**

HAM RADIO IN SPACE: A SOUNDS OF SPACE WEBSITE

Turning to ham radio space related news, word that DD1US now has an extensive collection of sounds from manned and unmanned space exploration including amateur radio operations on his website. This includes historic recordings like Sputnik 1 and Apollo 11. There is even a page devoted to clips of Amateur Radio satellites from Oscar 1 to Oscar 68. Its all on-line at www.dd1us.de. (Southgate)

**

HAM RADIO IN SPACE: FO-29 TO RETURN TO THE AIR

Fuji Oscar 29 ground controllers at the Japan Amateur Radio League plan to open the satellite for amateur radio use but it may not remain operational after eclipses due to power limitation issues. Depending on the power budget the JARL may need to selectively cancel satellite on time. All hams are reminded to please use as low power as necessary on the uplink to

complete their communications. (JE9PEL)

**

RADIOSPORTS: WSJT GROUP SPRING ON JANUARY 30

The first 2010 WSJT Group Sprint will be held on January 30th which is the last Saturday morning of the month. The rules will stay the same as for the last Sprint in April of 2009 and are posted at contest website at. http://www.ykc.com/wa5ufh/Sprint/W5WVO_Sprints.htm

For those who have never heard of a Sprint, these are short duration contests usually aimed at promoting activity on a given band or using a specific mode. In this case its to encourage the use of the WSJT low noise digital communications mode developed by Joe Taylor, K1JT. Subsequent Sprints for 2010 will be on February 27th, March 27th, and April 24th. (W5WVO)

**

RADIOSPORTS: DX MAGAZINE PUBLISHES 2009 MOST WANTED RESULTS.

The DX Magazine's "2009 Most Wanted Survey" has been posted on the publications Web site and printed in the January / February issue. The top five most sought after entities appear to be number five Yemen; number four Bvouvet Island; number 3 Marion Island, number two Navassa Island. The number one most wanted country is North Korea.

The survey was conducted between September and October of 2009. The listing shows the top 100 World-Wide most wanted and also includes their 1998 comparison ranking for 2008. Its on line at dxpub.com/dx_news.html/ (DX Magazine)

**

DX

In other DX, EA5BYP and EA5KM will be active from Annobon Island sometime in April. Dates and callsigns will be announced soon. Their will be on 160 through 10 meters using CW, SSB and RTTY, with an emphasis on the lower bands and Morse. More on this one as information is released.

JA8BMK will be active from Juan Fernandez Island as CE0ZA through February 2nd. His operation will
be on 160 through 10 meters using CW, SSB and the Digital modes. QSL direct only to JA8BMK.

W7EJ, will be active from Morocco as CN2R during the CQ 160 Meter CW Contest on January 29th through the 31st. This as a Single-Op/High-Power entry. QSL via W7EJ. And MJ0ASP will also be active from Morocco. Look for him as CN2MR between February 18th to the 26th. His activity will be on the HF bands using mostly CW. QSL via his home callsign

Above from various DX news sources

**

THAT FINAL ITEM: LORAN-C NAVIGATION SYSYEM GOING QRT

And finally this week, its time to say goodbye to the old LORAN-C radio navigation system is soon going QRT. Frank Haas, KB4T, is here with the story of a longtime friend to sailors world-wide:

--

LORAN is an acronym for the words long-range navigation. It's a radio navigation system that was developed during World War II for military ships and aircraft. It then was then perfected for civilian use and entered full time service in 1957.

LORAN-C operates in the low frequency portion of the electromagnetic spectrum from 90 to 110 kHz.. It has transmitted the past 52 years from 24 stations operated by the Coast Guard to determine positions at sea or in the air.

For decades, LORAN-C was the standard navigation system for ships, fishing boats, and other vessels. It also served as a supplemental navigation aid on many small to medium sized aircraft. And at its peak popularity, an estimated one and a half million LORAN-C receivers were in use.

But in the mid-1990's mariners and pilots began turning to global positioning systems for its almost pinpoint accuracy. Gradually, use of LORAN-C fell away. Now the Department of Homeland Security says that LORAN-C has become obsolete and is no longer needed for navigation or safety.

Most of the nation's LORAN-C transmission stations will be turned off on February 8th with the remainder being powered down by October 1st. This termination of service does not affect U.S. participation in the Russian American or Canadian LORAN-C chains. U.S. participation in these operations will continue at least temporarily in accordance with international agreements.

From Holly Hill Florida, I'm Frank Haas, KB4T, reporting for the Amateur Radio Newsline.

--

Some had thought that the government might keep LORAN-C as a terrestrial back-up system for the satellite based Global Positioning System but the Department of Homeland Security seems to believe that doing so is not a necessity. (Science OnLine, Boston Globe and various other published reports)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the

MOST WANTED SQUARES eMWS and DXCC eMWDXCC at MMMonVHF

The Team of MMMonVHF will use YOUR "Most Wanted" for showing
expedition the most wanted places (specially for MS in europe and
EME all over the world). Remember such nice trips to DXCCs like
5Z, 5H or V5 past year or the multi-square operations by UT6UG and
OH8K gangs...

Some of you did not update since 01/2008 and so maybe they are not
interested anymore or have had no changes. So therefore we decide
to build in a BUTTON at your ACCOUNT to click that there was "NO
CHANGES" in your "most wanted" since your last update. Otherwise we
will remember your after a years periode to see if you still have
interest in it...

NO problem, if not, but than we will skip these entry after 3 years
to have the table as update as possible (its not a question of
quantity, it shall be high quality!).

However, the eMWS and eMWDXCC pages make only sense if the data is
as much up-to-date as possible. So, please feel free to upload your
data as often as you want. Go now to the MOST WANTED Pages>
http://www.mmmonvhf.de/dxcc.php or http://www.mmmonvhf.de/emws.php
and have a look about the situation right now...
YOUR UPDATE IS WELCOME!!!

We did setup a new SUPPORT CHAT Tool at MMMonVHF and it is in the
last test phase now. Live!Zilla is a chat tool where Operator and

Admins from the Team of MMMonVHF can be requested for help and informations. It will be NOT a chat like KST or N0UK or any chat tool like MSN, SKYPE ... (as well no Multichat). If you wonna test click at the start page of MMMonVHF right above corner (near ACCOUNT and LOGIN) and open the Live!Zilla window... More to follow

14th International EME Conference Announcement

It is with great pleasure that W5LUA, VE4MA, WA8RJF and the North Texas Microwave Society officially announce the 14th International EME Conference. We cordially invite you and your family to Dallas, Texas on the 12th,13th and 14th of August 2010 for the premier technical and social EME event of the year. Whether you are an experienced EMEer or new to the lunatic fringe, the conference will offer a wide range of technical, social and site-seeing activities for everyone. All details you be able to request at w5lua"at"sbcglobal.net - SOURCE: Al Ward, W5LUA via MoonNet

*** 3B8 / LG89 ***

In 2010 Rene PE1L will try to make moonbounce qsos from Mauritius,
a top3 most wanted DXCC on 144 MHz. This time Eltje PA3CEE & Johan
PE9DX will join the party. LATEST NEWS from Eltje PA3CEE direct to
MMMonVHF, dated 2010-01-17:
The plan is to leave May 13th and build up the station before the
weekend. We want to be active at least during two whole weekends
when there is good activity in combination with good moon conditions.
Last operation presumably May 26th. There's a good possibility for
internet/loggers... If so, we will connect to N0UK so now and than.
We also want to make small impressions on YouTube on a regular basis
If internet will be low, we will try (one way) communication through
Twitter: http://twitter.com/pa3cee in order to inform with short
messages. All QSL via PA3CEE. See QRZ.com or website: www.pa3cee.tk

Working K5QE on EME during the January contest
This year, the ARRL January VHF Contest will be held Jan 23rd and
24th. We want to work as many EME stations on 2M as possible to
increase our grid count. Please help us with this event by
working us on JT65b or CW. Thank you very much. As usual, we will
be operating 2M on 144.142MHz Second sequence. All info and Moon
details youll find at: http://www.mmmonvhf.de/latest.php?id=3068
SOURCE: tnx to Marshall, K5QE, direct to MMMonVHF

*** W / FN32 ***
Fred N1DPM will be operating the January VHF SS contest from FN32qb
in the Single Op Low Power (SOLP) category. I am on 6 meters thru
10GHz. I am interested in anyone wanting skeds. Please email me
directly. I will be on during the overnight hours on FSK441 meteor
scatter calling CQ on 50.260 and listening up or down (if required)
as sent in the CQ. All details about the EME Operation anmd please
do SUBSCRIBE: http://www.mmmonvhf.de/latest.php?id=3069
SOURCE: Fred, N1DPM, via Reflector

*** W / EL96 & EL97 ***

I'll be operating Limited Rover in January VHF SS from EL96wk &
EL97vb on 50, 144, 432 Mhz SSB using my Icom 706 mk2g - vertical
polarization. (Sorry, no Horiz) I'm hoping for a nice 6 meter
opening. No scheduled times as of now - depends on weather and
band conditions. Please have a look for me. 73 GD luck in the
contest. George, WA2VNV Delray Beach, FL. (Dec-Apr winter months)
SOURCE: George, WA2VNV via Reflector

*** VP5 / FL31 ***
Jim, WB2REM and Glenn, KD2JA will be operating the special call
VQ5M from the Turks and Caicos Islands from June 11 until June 13
2010 during the ARRL June VHF Contest. This operation will be from
Providenciales Island (FL31VS) (IOTA: NA-002). Operation for the
contest will be on 6 meters SSB and CW only. Other than the contest
operation, from June 10 until June 17, Jim and Glenn will be
operating on 160-6 Meters, CW and SSB with their respective calls,
VP5/WB2REM and VP5/KD2JA. QSL VIA: KD2JA
SOURCE tnx to Bill, NG3k, direct to MMMonVHF

*** W / SPECIAL EVENT ***

The Nacogdoches Amateur Radio Club (W5NAC) will again hold a
special event station in remembrance of the Columbia Space Shuttle
disaster on February 1, 2003. The event will occur on Saturday,
February 6th. Ham operators from other areas are welcome to attend
the event at the McMichael Middle School located in Nacogdoches.
If you cannot come to Nacogdoches, listen for the special event
station on 20 or 40 meters. Operation will begin at 0800 CST
(1400z) and end at 1500 CST (2100z). They plan to operate on
7200 and 14270 kHz, plus or minus QRM. The local VHF repeater
146.84, negative offset, 141.3 PL, will be monitored as a talk-in
channel. SOURCE: Ohio/Penn DX Bulletin #943

*** Pacific on 6m ***

Tim, NL8F, will be heading to the Pacific again. He will start at
Cocos (Keeling) Island (OC-003) between March 3&10th. Activity
will be on 80-10 meters, plus 6 meters, and an entry in the ARRL
International DX Phone Contest (March 6-7th). He will be using a
vertical antenna. Currently, Tim does not know what his callsign
will be (apparently it takes time for the WIA to process call-
signs), but he is hoping for VK9COF (or possibly VK9C/NL8A).
>From Cocos, Tim will then head to the South Cook Islands and
once again operate as E51COF from Rarotonga Island (OC-013)
between March 20&30th. Activity will also be on 80-10 meters.
QSL both operations via K8NA.

GB2RS NEWS

Sunday 24th January 2010

The news headlines

* Latest on amateur radio from Haiti

* Could you volunteer with the National Coastwatch Institution?

* Satellites to be built in the UK

Following the earthquake in Haiti on 13 January, all radio amateurs are still requested to keep 7045kHz and 3720kHz clear for possible emergency traffic. Eight radio amateurs from Radio Club Dominicano who were operating under the callsign HI8RCD/HH have had to abort their operations in Haiti after the convoy they were travelling in was fired on. The repeater they installed remains in service linking the Haitian and Dominican capitals, and it is being used by the Red Cross and Civil Defence. John Henault, HH6JH who is engaged in missionary work with homeless children in Port au Prince continues to make contacts on 20m using power from a neighbour's generator. On 20 January, Jean-Robert Gaillard, HH2JR was assisted with a phone patch by W3ZU to assure friends he was safe. Another radio amateur in the country, Pierre Petry, HH2/HB9AMO, who works for the UN food program, is also safe. Calls to emergency services aren't getting through because systems that connect different phone networks were still not working. The International Telecommunication Union is deploying 40 satellite terminals and 60 units with broadband facility to re-establish basic communication links, along with experts to operate them.

The National Coastwatch Institution is to start up a new watchstation, manned by volunteers, at Calshot Tower overlooking the Solent. NCI Calshot's primary function will be to provide a visual watch along the main shipping channel down Southampton Water panning across to the Hamble and Portsmouth in the east and over to Cowes and Yarmouth on the Isle of Wight together with the more immediate surroundings of Fawley and Calshot itself. To help get the station started, an initial public meeting is being held at the Waterside Sports & Social Club, 179-181 Long Lane, Holbury, Southampton on Tuesday 26 January starting at 7.00pm when there will be an introduction to NCI. All potential volunteer watchkeepers and NCI supporters are welcome and encouraged to attend. No previous maritime experience is required. The most important asset a potential watchkeeper can bring to NCI is a sharp pair of eyes and an inquisitive nature. Progressive training for this vital work is

provided in line with nationally agreed standards and includes an introduction to understanding charts and maps, producing weather reports, keeping a log and learning about marine VHF radio procedure.

Surrey Satellite Technology, which is headed up by Martin Sweeting, G3YJO, has been awarded a contract to build 14 spacecraft for the Galileo Satellite Navigation project. Plans are to have the satellites coming off the production line in the second half of 2012. Arianespace will use Russian-built Soyuz rockets to launch these global positioning spacecraft in batches of two.

The RSGB has received the sad news that Bill Felton. G3XZF, one of our Lincoln 2m GB2RS newsreaders, passed away on 7 January. Jim, G0EJQ, who is the Region 13 Manager, will continue as a newsreader and Simon Shaul, M0SIY, of Market Rasen has been appointed to support him. The reading takes place each Sunday at 10.30am on 145.525MHz FM for the Lincoln area.

Spaces are available with the world's most northern contest team, OH8X, for young amateurs. Far above 60° North in the icy arctic reaches of Northern Finland lies a log house with an original Finnish sauna and cosy sleeping quarters along with the radio station OH8X with its massive antennas springing up from the barren tundra. If you would like to experience the far north with its blazing Aurora Borealis coupled with unique polar openings to the United States, this is your chance. Radio Arcala will host four or five younger contest operators participating as a multi team in the ARRL DX (CW) Contest on the weekend of 20 and 21 February. The event will start Thursday evening on the 18th and finish on Monday the 22nd. SSB/WARC operating will also be available on those days, including on a limited scale during the contest weekend. Just drop them a note and explain why you'd like to be part of the contest team as well as your potential as an operator on a multinational CW team. Send your e-mail to team leader Marius Hauki, LB3HC at mhauki@gmail.com and he will give you more details. Please contact Marius soonest but no later than January 30th. Full details at www.radioarcala.com.

The Marches ARS will be starting an Intermediate RCE Training Course on 4 February. The course will comprise 10 - 12 two hour sessions on Thursday evenings at the Llangollen RAFARS Club starting at 7.30pm. The Examination and Practical Assessment will take place at the Marches ARS Clubroom, Black Park, Chirk on the Sunday following the final training session. For further details and enrolment please contact Dave MW0AYM on 01691 777242 or by e-mail at david@pearson78.orangehome.co.uk.

Angel of the North Amateur Radio Club is starting both an Intermediate and Foundation course on Monday 8 February at 7pm. They have course books available for both courses. Please contact Nancy Bone, G7UUR on 0191 477 0036 in the evening for more information.

And now for the details of rallies and events for the coming week

On 31 January, the Horncastle Winter Rally will take place at the Horncastle Youth Centre, Lincolnshire LN9 6DZ. Doors open at 10am for disabled visitors and 10.30am for other visitors, entry will be £1.50. More details from Tony, G3ZPU, on 01507 527835.

Following a fire at the Afan Lido in Port Talbot, the rally organisers of the Swansea Radio Rally, due to be held on 21 February, have re-located to the Court Herbert Sports Centre, Neath Abbey SA10 7BE, 2 miles from M4 J43 via A465. Details at www.radioclubs.net/swanseaars.

Advance notice now from The Northern Cross Rally that will take place at Ossett School, Storrs Hill Road, Ossett. WF5 0DG on Sunday 14 February. Doors open at 10.15am for disabled visitors and 10.30am for everyone else. More details at www.northerncrossrally.org.

Now for the news of special events

GB1RB will be active on 25 January to celebrate the birthday of Robert Burns. The call will be activated by members of Kilmarnock and Loudoun ARC. More information can be found at QRZ.com GD0MAN will be run by the Isle of Man ARS for the RNLI SOS Radio day on 31 January. The station will operate on 80m at around 3.700MHz £100-200kHz between 6am and 6pm. They hope to run a separate data mode station on 40m or 20m.

GB1LBD for Life Boats, Derby will also be on the air as part of the SOS Radio Week's activities in raising funds for the Royal National Lifeboat Institution. Dave, G1VAC and Dave, G1VAB, will be operating for 24-hours, each contact made by GB1LBD being sponsored. The station will be operational from 1000 on Saturday 30 January through to 1000 on Sunday 31st and will be located in the Memorial Hall of the United Reformed Church in Carlton Road, Derby. Information on GB1LBD is available by e-mailing GB1LBD@GOOGLEMAIL.COM.

The Mid Ulster Amateur Radio club will also be on air for SOS radio week on Sunday 24 January from 10pm onwards. The club will be transmitting on various modes from the Lough Neagh rescue station in Kinnego Marina, Oxford Island, Lurgan. All details are on www.muarc.com.

Special event stations EI2GBW and GB2EI will be coordinating activities over the coming weeks to be QRV during G2YC/MM activations on cruise ferry MV Julia. All three stations will be activated on Monday 25 January from 0900 to 1800; and from 1200 on Saturday 30 January to 0600 on Sunday 31 January. All three stations will be QRV on 80m around 3.660 to 3.680MHz and or 40m around 7.120 to 7.140MHz SSB to enable as many stations as possible to work all three. For further details please see the EI2GBW page on QRZ.com.

And now the HF DX news compiled from 425 DX News and other sources.

Geoff, G0PFH will be operating from New Zealand from 31 January to 26 February, 20m SSB only. His callsign is ZL1PFH. In addition he will operate with the Halifax Radio Society's callsign, ZL/G2UG.

A group of operators from Croatia will be in Vanuatu until 5 February. The calls YJ0XX, YJ0MM and YJ0DX have been issued. They will have three rigs and one amplifier. QSL via 9A8MM.

Gerd, DJ4KW and Gisela, DK9GG will be active from Belize as V31YN and V31GW until 28 February, including a number of contests. On 2 to 7 February look for V31YN/P to be active from NA-180. QSLs via home calls (direct or bureau), or LoTW.

Now the contest news

The Worked All Britain 1.8MHz Phone contest takes place next Saturday, 30 January, from 1900 to 2300UTC.The exchange is signal report, serial number and WAB square. Full details of the rules and logsheets may be obtained from the WAB website www.worked-all-britain.co.uk or from the Contest Manager G0BFJ, QTHR.

On 26 January the 50MHz Activity Contest will take place between 2000 and 2230UTC. Using all modes, the exchange is signal report, serial number and locator. The final event of the month is the CQ WW 160m DX Contest on 29 to 31 January. There are categories for various power levels and Single Op and Multi Op stations. Outside of North America, send RST and CQ Zone (the UK is 14). Americans send RST and two-letter State code. Canadians send RST and three-letter Province code. The owner of even a modest station such as 100W and a long wire stands a chance of making a few QSOs across The Pond. Equip yourself with a linear and a vertical or inverted-L antenna with a good earth system and you'll increase your chances enormously.

Now the solar factual data for the period from the 11th to the 17th of January, compiled by Neil Clarke, G0CAS on the 18th of January.

First this week a look at the latest smoothed sunspot numbers which are for April, May and June 2009 and are 2.2, 2.3 and 2.7. This rise of point 4 may not sound very significant but it's the largest monthly increase so far this cyccle.

The solar disc was dominated by one sunspot group all week. The group looked large and impressive; however, it remained magnetically simple. Solar activity was very low but increased to low when C class solar flares took place on three days. The most impressive flare of the week was a long duration C1 which lasted almost 5 hours on the 15th. Solar flux levels increased to peak at 93 units on the 12th. This is the highest level since the 11th of December 2007. Levels then declined to 83 by 17th. The average was 88 units. The 90 day solar flux average on the 17th was 76, that's one unit up on last week. X-ray flux levels hovered around the B1 mark all week and the average was B1.1 units. Geomagnetic activity was quiet everyday and the average was Ap 3 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 280 kilometres per second on the 11th to 540 by the 13th. Particle densities were low throughout. Bz varied no more than minus and plus 5 nanoTeslas except for the 11th which varied between minus 9 and plus 10 nanoTeslas.

Several sporadic-E opening have been reported this week with Jim, GM8LFB in Northern Scotland reporting a very short skip opening to Central and Southern England during the evening of the 12th.

And finally the solar forecast. The big question is how long this spell of increased level of activity can go on. The solar disc could well have sunspots visible again on some days. This week solar activity is expected to be very low to low. Solar flux levels are expected to be in the 70's if the Sun is spotless most days and in the 80's if spots do appear. Geomagnetic activity is expected to be quiet everyday. MUFs during daylight hours at equal latitudes should be around 20MHz for the south and 17MHz for the north. Darkness hour lows should be about 7MHz. Paths this week to India should have a maximum usable frequency should have a maximum usable frequency with a 50 per cent success rate of around 22MHz. The optimum working frequency with a 90 per cent success rate will be around 17MHz. The best time to try this path will be between 0900 and 1300UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to newsreaders: Please read the local news items appropriate to your service area.]

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA On Sunday 24 January Hastings Electronics and Radio Club has a lunch at the King's Arms in Ninfield. Contact Gordon, 01424 431 909. QNEWS BROADCAST JANUARY 24 2010

Welcome to QNEWS from VK4WIA. I'm Geoff Emery, VK4ZPP and this one is
for you mate!

One of the things that brings most of us together in a recreational
pastime is feeling part of the big picture, knowing what is happening
and sharing our interest with others. As part of the WIA efforts to keep
us abreast of happenings, Graham, VK4BakerBaker, puts together
National News and QNEWS.

With QNEWS, we depend on the audio feeds that come from our clubs and
listeners. The ease of anyone that has a multimedia computer to write,

record and submit items for QNEWS has never been as great as it is now.

There are 30 Qld clubs affiliated with the WIA and listed in the
Centenary Edition Callbook. We know that things happen to suit local
needs, and a friendly voice speaking about a local event can let your
club members as well as the other listeners know what is happening. When
you think that about half to 2/3 of a page of typing is all you need to

fill 1&1/2 to 2 minutes of recording then here is a painless way of
getting the news out.

Think about this, if most clubs worked on sending about 4 news items each year, this would guarantee at least two club items each week. Our friends at Townsville keep their flag flying every week. With other regular contributors, this is not a big ask to spread the word.

We have listeners who depend on what they hear in the weekly news broadcast to keep up with their hobby. There are others who appreciate knowing that other amateurs are enjoying the hobby too. When news that can benefit us all, such as a grant scheme, a special event station or award, is announced, don't be shy....do what you do with your other friends....spread the word.

Think about some-one you would like to know about your news item, some-one you can't eyeball or 'phone and picture them in your mind's eye as you email QNEWS and say, "This one is for you mate".

Bunya Mts & District AmCom

Greetings to all, I'm Neil VK4NF President of the Bunya Mts & District AmCom INC. With a last reminder that our Ham & Wine Fest is on this coming Saturday the 30th January at Maclagan, doors open at 9am Stand holders allowed in at 7am. And there are a few spaces left for last minute table bookings, but be quick. C U on Saturday, regards to all.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray VK4CF back with news from the Redcliffe AR Club".

Alan VK4KZ the Redcliffe's Education manager has advised that he would like to conduct the next round of Foundation and Advanced courses starting early in Feb if possible.

If you have the desire to gain your amateur licence or even upgrade your current qualifications, please contact alan.jenner@bigpond.com or 5497 4634 and if there is no answer please leave a message.

Next Monday night the club will be re-starting the monthly fox hunting. Fox hunting happens the 4th Monday night of the month and all are welcome to enjoy this part of the hobby with Redcliffe club members.

There is a further reminder of the first working bee for 2010. This will be held on Saturday 13 February at the home of Charles, VK4BTC 7 Kelly Court, Redcliffe and it is to start at 8.30 am. The main tasks are to strip out and refit new panels in the caravan. So come with your power tools and assist for a few hours to get the van ready for the John Moyle weekend.

For the information of all intending visitors to the club the location of the club House is at MacFarlane Park Klingner Rd Kippa Ring (UBD Map 91 Ref G 1) , and meeting time is from 7.30 - 10 pm-ish with the club usually open by about 7 pm.

So until next week, for Redcliffe club I'm Ray VK4CF and you're listening to QNEWS from VK4WIA

WIANEWS FOR WEEK COMMENCING JAN 24 2010.

Brought to you by members of the
Sunshine Coast Amateur Radio Club or SCARC. - We have yours truly Noel
VK4NL, Gordon VK4VP, Wayne VK4WS, Robert VK4FVMP and Kirsty. - - - The
club has a linked repeater system operating on 146.850 MHz at Maleny and
146.825MHz at Noosa, a 6m repeater on 53.7MHZ with a -1MHz offset also at
Maleny, 70cm repeaters on 438.075MHz at Maleny and 438.175MHZ at Noosa and
an APRS digipeater at Radar Hill near Nambour. . . - If you are in the area
give a shout on one of these frequencies or if it's a Wednesday drop in to
85 Godfreys Rd Bli Bli (the old toll plaza building) from about 10am for a
social chinwag and get together. Our General Meeting nights are the first
Tuesday of the month at the clubrooms from 7:30pm and normally feature
a guest speaker.

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING JAN 24 2010

Hobart VK7 to Norfolk Island VK9 on Two Metres

Rex VK7MO has told VK7news of recent contacts made with the Norfolk Island DXpedition.

2 meters to the Australian mainland has proved to be more difficult but though the use of the digital mode FSK441 a number of contacts were made to VK2 and VK4 with the longest distance being Mark VK2EMA at 1999 km.

In the morning of Tuesday 11 January Rex again completed a JT65a QSO at around -20 dB with the VK9 team and after an hour or so he heard a weak SSB signal, VK9NA and exchanged reports of 5/1 and 5/2 over this 2403 km path.

Rex says that the use of digital modes that can take advantage of meteor pings or dig deep into the noise has been fundamental to the success of the expedition in working to the Australian mainland on two meters and 70 cm and that the digital modes have paved the way to SSB contacts through showing that propagation is possible.

(Rex VK7MO)

>From Norfolk to Broughton and H.A.R.A.O.A. have organized to be on Broughton Island (OC-212) from the 5th until the 7th February operating as VI2BI.

More info www.vi2bi.blogspot.com

QSL via VK2CL

The Lincoln Short Wave Club in the UK will be QRV for an Australia breakfast Day today Sunday 24th January:

The event is good fun, a fund raising event, the public turn up, hundreds and hundreds of them, and the Lincoln Short Wave club will be putting an amateur radio station in the mix for this event organised by their local council.

They will use the callsign G5FZ, first issued over 80 years ago, as 5FZ

and also GB4VK - a special event call.

QRV on 14 - 18 -21Mhz Conditions and sunspots permitting!

Please help Lincoln and GB4VK to make the event a BONZA DAY

The event is usually visited by the Australian Ambassador - it is taken very seriously in Lincoln - lots of Australians did the BIG QSY from Lincolnshire to VK - some even came willingly!

Lincoln is twinned with port Lincoln South Australia and they will make a big effort to talk to them as they recover from their ham radio losses in last months Bush Fires.

Canberra Region Amateur Radio Club for the 1st time in many a year WILL be having a general meeting in January. This will be the day following Australia Day this Wednesday 27th January commencing at 7:30 PM.

This meeting is really just a chat night, check your QSL cards, and if anyone wants to bring items they wish to sell, then a small Trash & Treasure night as well.

VK2
web service:- http://www.arnsw.org.au/html/news_vk2wi.htm
VKG Roundup http://www.police.nsw.gov.au/news

Next Sunday the 31 st is the first Trash & Treasure for the year at the VK2WI Dural site. Gates will open at 9 am. In the afternoon the Home Brew and Experimenters Group will meet on site with their first meeting for the year.

The Oxley Region Amateur Radio Club Inc (ORARC) 2010 Field Day weekend commences at mid-day on Saturday 12 June and concludes at 4pm on the afternoon of Sunday 13 June.

Please note that it is still on the Queens Birthday long weekend but this year that is the 2nd weekend in June.

This year is the 35th annual Field Day. The venue for both days is the Sea Scout Hall in Buller Street, Port Macquarie.

The 2010 Field Day programme and information will soon be posted on the club web site http://www.orarc.org/

Yarra Valley Hamfest

The annual Hamfest of the Yarra Valley Amateur radio group is back on its usual date, February 28.

The Hamfest opens at 10am and runs until 2pm.

Entry fee is still $5 and the booking fees are the same as the last 10 years at $15 for an 8 foot table.

Bring the family and you can perhaps visit the Healesville Sanctuary or go on to Marysville for afternoon tea and check out how the regeneration of the town and bush is proceeding.

On the 7th of February the club is holding a "recognition field day" at the Frank Thomson Reserve to acknowledge the work done by many radio operators during the fires.

Full details are on the web site http://www.yarravalley.ar.org.au

Nunawading, VIC, 3131

The course lf is free of charge tea and coffee provided

Please contact John VK3ARK@wia.org.au to reserve your place

SILENT KEYS

Silent Key Fitting Memorial

Cygnet Folk Festival

I can hear you saying already what is the connection with the Cygnet Folk Festival and amateur radio?

Well one of the many Saturday evening concerts caught Justin VK7TW's eye.

It was the Tom Moffat Blues Concert at the RSL.

Tom, now SK, was VK7TM and was well known in the Cygnet area (and of course throughout Australia through his prolific technical writing) and was an aficionado of Blues music and a great supporter of the Folk Festival.

The Cygnet Folk Festival Organising Committee last year, decided that the Blues stream of the Festival be named after Tom.

He would have been proud, the Blues music was excellent.

(73, Justin, VK7TW)

Another SKey, as recent as last Sunday, when we learnt that long time WICEN Victoria Stalwart Mark Dods VK3ZR fell silent. Our condolences to the Family from the WIA News Family.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

RESEARCHERS DEVELOP SINGLE ATOM TRANSISTOR

Researchers from the University of New South Wales, the University of Melbourne and Finland's Helsinki University have succeeded in building a micro-sized transistor whose active region composes only of a single phosphorus atom in silicon.

The working principles of the device are based on sequential tunnelling of single electrons between the phosphorus atom and the source and drain leads of the transistor.

The tunnelling can be suppressed or allowed by controlling the voltage on a nearby metal electrode with a width of a few tens of nanometres.

In the recently developed transistor, all the electric current passes through the same single atom. This allows researchers to study the effects arising in the extreme limit of the transistor size. The results of the development of this transistor has been published in Nano Letters. That's a journal of the American Chemical Society.

(Science OnLine)

Pakistan's Minister for Information and Broadcasting has declared 2010 as the Year of Radio due to its extensive outreach and it being the cheapest source to disseminate information to the masses.

"The medium of radio has become the most popular means of mass communication around the world, but in Pakistan radio is not given the attention it deserves," the minister said. "The present democratic government is committed to freedom of media and its promotion and would adopt measures to make the medium flourish in the country in view of its widespread coverage," he added.

Electronic and print media has progressed tremendously but more attention would now be paid to develop the medium of radio. He said, improved broadcasting quality, more innovative and entertaining content, and new technological developments in areas have made radio a resurgent medium,

extremely popular in many fields including education, advertising and entertainment.

Declaring 2010 as Year of Radio, he assured all government support to promote the medium so as to highlight the policies of the government besides challenges facing the country.

Director-General of Pakistan Broadcasting Corporation, Murtaza Solangi, appreciated the announcement of 2010 as The Year of Radio by the minister, saying the state-run Radio Pakistan is actively contributing towards the cherished goal of peace and national harmony.

(Source: Internews/R Netherlands Media Network Weblog)

3D HD TV

TV makers at the recent Consumer Electronics show in Las Vegas reckon you you could be watching 3D TV in your home by years end.

Most brands demonstrated 3D capable models hoping to cash in on the recent success of the 3D Avatar movie.

3D already has agreed-to standards, 3D capable Blu-ray players and movie and production houses plan to pump out 3D programming by years end.

Sony and the Discovery Channel will partner a 3D channel, and ESPN is planning SportsCenter 3D content. DirectTV and Fox Sports are also developing 3D TV content.

But will the cable players in Australia be up to speed? That's one of several questions here.

Most TV brands are opting for full resolution 1080p active shutter non-polarized glasses to create the 3D effect.

(published reports)

Now as promised earlier Region 3 Disaster Chairman Jim Linton VK3PC.

The human tragedy following the Haiti earthquake continues

The high loss of life, injury and destruction unleashed on Haiti has been of scale that almost defies description.

The loss communications again saw amateur radio used to provide some emergency communications. The local authorities had planned for disasters, Haiti has had more than its share in recent years but nothing like the earthquake.

Before the quake the only three hams were heard on air regularly from Haiti. All are reported to be safe.

Reverend John Henault HH6JH was the first to make contact with the outside world on the 20 metre band, describing the scene in and near the capital Port-Au-Prince during a series of personal amateur phone-patch third party traffic contacts facilitated by Fred Moore W3ZU in the United States.

The other who reported that he was safe is UN worker Pierre Petry HH2/HB9AMO.

While a number of radio amateurs have been prepared for travel to Haiti the major barrier is that Haiti is a Francophone nation and to be of any use, fluency in French language is required.

Eight radio amateurs from Radio Club Dominicano (RCD), from neighbouring Dominican Republic (under the callsign HI8RCD/HH) did reach Port-Au-Prince to provide emergency communications and began testing the equipment at their Embassy.

But after gunfire hit their convoy, seriously injuring someone, the radio amateurs decided it was not safe and returned home.

They did manage to set up two VHF repeaters linking the Haitian and Dominican capitals, and these are being used by the Red Cross and Civil Defence.

There are mostly unverified reports of radio amateurs being part of non-government organisations providing disaster relief support.
\
There are also late reports that two Venezuelan hams plan to use phone, data and SSTV on the 80, 40 and 20 metre bands in coordination with the military in support of Venezuelan humanitarian aid to Haiti.

I'm Jim Linton VK3PC, Chairman of the IARU Region 3 Disaster Communications Committee for the WIA news service VK1WIA.

GB2EI, Great Britain to Ireland Ferry Celebrations ends March 31 2010

VI3KIAH acknowledging Black Saturday Bush Fires 2pm to 8pm local Feb 7 2010

DX Magazine's '2009 Most Wanted Survey' has been posted on their Web site
and published in the latest Jan/Feb 2010 issue.

The survey that most DXers go by is now available at:
http://dxpub.com/dx_news.html

The "Top Five Most Wanted" are:

P5 NORTH KOREA
KP1 NAVASSA
ZS8 MARION ISLAND
3Y/B BOUVET
7O YEMEN

(sourced to SouthGate)

SY

For many years the prefix 'SY' was standing exclusively for the DXCC entity
Mount Athos in Greece.

This was later changed to 'SV/A' but for many Hams' the SY prefix is still connected to Mt Athos, although every Greek radio amateur may apply for a SY prefix now.

This is a thorn in the side of the only radio amateur on the Holy mountain, Monk Apollo, SV2ASP/A.

He asks DXers from all over the world to send an e-mail to the Greek licensing authority asking them to stop this practice.

yme@otenet.gr

At the moment Monk Apollo is very active in RTTY, because this mode is silent it does not disturb the other monks.

1838-1840, 3580, 7038 and 10140 kHz around 1700-2100 UTC.

(sourced to SouthGate)

AM Transmitter Rally

Building on the success of AM-specific operating events such as the Heavy Metal Rally, 1st Wednesday AM Night, and the Antique Wireless Association's Amplitude Modulation QSO Party, organizers announce the AM Transmitter Rally taking place February 6 on 160-10m using 'standard' Amplitude Modulation.

This event is open to any and all radio amateurs who are running full carrier amplitude modulation (standard AM), and any type of equipment may be used.

Although there is a "points" system to encourage friendly competition, there is also an awards incentive for categories that showcase the relaxed, satisfying nature of receiving and transmitting conversations on AM.

The event runs Saturday Feb. 6, to early Sunday Morning Eastern US time.

Commonly used AM Frequencies:

160 Meters: 1880-1885, 1930, 1945, 1975-1995.
80 Meters: 3730-3740, 3870-3885.
40 Meters: 7160, 7280-7295.
20 Meters: 14286.
15 Meters: 21425.
10 Meters: 29000-29200.

Complete details with scoring, awards, logbook templates, and additional information is at:

BBC lifeline programming to Haiti

BBC broadcasts special lifeline programming for Haiti in English, French and Spanish:

1200-1300 UTC 9410 HRI
11860 GUF

Internews' Country Director Philippe Allouard reports that at least 12 radio stations broadcasting to the Port-au-Prince area and one national radio broadcaster are back on the air in Haiti. In addition, Internews is bringing in a 300-watt transmitter that is expected to be able to broadcast up to 30 miles around Port-au-Prince.

Internews is also attempting to contact the 41-member network of community radio stations, RAMAK, with whom it has worked in the past in order to assess not only their safety, but also the state of their station's infrastructure and broadcasting capabilities.

193rd Special Operations Wing of the USAF, in an unprecedented humanitarian mission, says some 50 Airmen and three C-130 aircraft have departed in support of relief efforts in Haiti.

Two of the aircraft are cargo aircraft. The third, named Commando Solo, is an airborne radio and television station providing important information to the Haitian people.

In 1994, Commando Solo was used to broadcast radio and television messages to the citizens and leaders of Haiti during Operation Uphold Democracy.

This is, however, the first humanitarian mission of its type for the wing.

INTRUDER WATCH - ENFORCEMENT ZONE

Region III IARUMS Coordinator Peter Young VK3MV

VK IARUMS reflector email to subscribe intruders@wia.org.au

IARUMS NETS
Friday 0730 UTC 7.065.5 with VK4CEU David.

Amateur exclusive frequencies where any non-amateur signal is definitely an intruder.

Amateur HF Spectrum world wide
7.050 to 7.100
14.000 to 14.250
14.250 to 14.350 No broadcasters
21.000 to 21.450
24.890 to 24.990
28.000 to 29.700

Intruders reported here courtesy of the great work put in by IARU region 1.

7000.0 kHz is daily abused by numerous pirates and in Region 3, Far East pirates (Indonesia?) in LSB and USB, singing laughing and perhaps "seem to

be drunken."

DARC report an intrusion on 3560 at 1800 daily, the Voice of North Korea

Region one have a great innovation an on line logging program built for intruder watch!

Remembering the unit men - Faraday

Hello I'm Jim Linton VK3PC with another in a series of brief looks at those who made discoveries and have their names as units of measurement.

Michael Faraday born in 1791 was a brilliant mostly self-taught man who entered science in an unusual way, by working in a book bindery that allowed him to read scientific books.

Then he began to attend lectures on many different topics but was particularly interested in electricity and mechanics.

Faraday literally talked himself into a position of assistant at the Royal Institution in 1813 and later that year joined a scientific tour of Europe where he met Andre-Marie Ampere and other scientists in Paris.

Exposure to those leading men of science during the 18 month tour had a profound influence.

Through the work of others the relationship between electricity and magnetism had been established, but Faraday took it further by converting electrical into mechanical energy, and providing the first notion of magnetic lines of force.

In 1831 he discovered electro-magnetic induction, demonstrating that a magnet could induce an electrical current in a wire.

This English scientist initially had his surname 'Faraday' as the old unit of charge know called the coulomb (coo-lomb), named after a French physicist who defined electrostatic force of attraction and repulsion.

A shortening of 'Faraday' gives us the Farad, the international unit for a capacitance.

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

A little hint from NTARC's Jason VK7ZJA. Do you own a Nagoya NL-770R dual band mobile whip antennae? These neat antennae have a sprung-loaded folding joint in the base, but over time their owners may find that they'll fold over by themselves - usually when a truck passes going in the opposite direction.

A very quick and easy solution is to use a bit of bare copper wire and jam this in between the two sleeves of this folding joint. This solution has worked well for Jason VK7ZJA, and it should do the trick for others if they're having the same problem too.

Jimmy Porter GI3GGY on BBC Radio Ulster

The BBC have broadcast a show about Londonderry radio amateur GI3GGY

The 30 minute show was called 'Call Sign GI3 GGY' and the BBC description reads "Jimmy Porter, a radio ham for over 70 years, tells Paul Moore about his passion which led to an incredible life involving U Boats, Hollywood actors and recordings of Bloody Sunday".

The show should still be available on the web,
at http://www.bbc.co.uk/radioulster/

Jimmy GI3GGY is the longest serving reader on the RSGB GB2RS news service and he puts out a strong signal across the UK and Europe from his station on 40 metres. He was associated with Radio Free Derry which ran from 1969 to 1972 and his recording of Military radio communications made in 1972 attracted widespread media coverage.

WW SPECIAL INTEREST GROUPS --- REPEATERS

VK1RAC at Tidbinbilla Collimation Tower to close !

CRARC has been informed that CSIRO / NASA will be removing the Collimation Tower on "Black Hill and returning the site to natural bushland as the facilities are no longer required.

This means that shortly VK1RAC repeater on 146.900 MHz will need to be removed from site.

The CRARC committee is looking at procuring access to an alternate site for 146.900.

Alan VK1WX is compiling a history of this and other repeaters in the area, so if you have any "snippets" please let him know.

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO

EMERGENCY FREQUENCIES IARU REGION 3
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

Summerland VK2 and Wicen events coming up include:
Horse Enduro's, February 20-21 at Eden Creek the weekend after Summerland's AGM, and then an Enduro at Copmanhurst, 13-14 Mar. And 10-11 April tentative.

REWIND - A LOOK BACK IN HISTORY

50th anniversary of 1st UK 10 GHz contact

January sees the 50th anniversary of the first UK two-way contact on the 10GHz band by G3BAK and G3LZ.

After WWII there were a few UK amateurs taking an interest in microwaves. Two of them, began experimenting in 1949 and, in January 1950, were rewarded with the first UK two-way contact on the 10GHz band.

Des eventually migrated to Australia where he carried on his microwave activities, mainly on the 5.6GHz band, until his death in 2005.
He was VK2AHC at first, but then relocated to South Australia as VK5ZO.

His 10GHz equipment for that 1950 contact with G3LZ consisted of a mains powered klystron transmitter/receiver and the path was just a "few miles" (actually about 1.75 miles) across the Manchester Ship Canal in North West England.

Of just as much interest was his use of 70cm for talkback. At that time even the 432MHz band was for radio pioneers!

50. SARL NEWS - SUNDAY 24 JANUARY 2010

Newsgroup: rec.radio.amateur.misc
Date: 2010-01-23 20:00:13 UTC
From: website@sarl.org.za
Message-ID: <20100123200005.25B6633CC1@panix2.panix.com>
Source record: 6169
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 24 JANUARY 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web-stream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325; 14,235; 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750; 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit.)

SILENT KEYS

It is with deep regret that the passing of two radio amateurs is announced.

Dwight West, AD7AQ, ex ZS6NT, became a silent key on 25 December 2009. We extend our sincere condolences to his wife Lyn, family and friends.

Dave Ingram, K4TWJ, became a silent key on Wednesday 20 January as a result of complications from a severe heart attack he suffered on 1 January. Dave wrote the Ham Pride column in Radio ZS. We express our sincere sympathy to his wife Sandy, WB4OEE, family and friends.

PAUSE

In the news today:

A CUBESAT FOR SOUTH AFRICA

BACAR 2010 POSTPONED

NOMINATIONS AWAITED FOR SARL AWARDS

A NEW SARL CONTEST COMMITTEE

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

A CUBESAT FOR SOUTH AFRICA

The Cape Peninsula University of Technology (CPUT) has recently launched the F'SATI post graduate programme in Satellite Engineering covering the broad field of satellite communication and power systems. The academic programme has been developed to provide students with a foundation to pursue research in this field.

F'SATI, the French-South African Institute of Technology, focuses on Electronic Engineering, Information and Communication Technology addressing three niche areas. Two of these are offered at the Tshwane University of Technology (TUT): Enabled Environment and Communication) while the third, Satellite Systems Engineering is offered at CPUT.

The academic programme is supplemented by practical experiments on a real satellite. Students will build a 3U CubeSat. The CubeSat concept originated from a partnership between the California Polytechnique University in San Luis Obispo and Stanford University in Paulo Alto. Between them, they developed a standardized space platform for academic satellite projects. It has since grown to become an international partnership of over 40 institutes that are developing Pico satellites containing scientific payloads. A standard CubeSat is a 10 cm cube with a mass of up to 1 kg.

Prof. Robert van Zyl, deputy director of F'SATI said at the launch of the new satellite clean room facilities at CPUT's Bellville campus that students will be building a 3U CubeSat which is three standard 10 x 10 cm cubes stacked on top of each other. The payloads will include a camera, a parrot repeater and a transponder. In partnership with the Hermanus Magnetic Observatory, a HF beacon will be included to assist the HMO to calibrate their radar systems in the Antarctic. A new type of magnetometer is also under consideration.

Prof. Van Zyl said that the CPUT was fortunate to have received a substantial financial contribution from the Department of Science and Technology through the National Research Foundation. He said from now on the clock starts ticking to complete the project in time to have a flight model on the table by October 2011 when the International Astronomy Conference is held in Cape Town.

Delegates attending the SARL Radio-Technology-in-Action symposium, to be held in Cape Town later this year, will have an opportunity to visit the clean room facilities.

BACAR 2010 POSTPONED

BACAR 2010, which was scheduled for launch later this morning from the Worcester airport, has been postponed due to disagreements between authorities controlling the airspace. Cape Town Air Traffic Control withheld permission for the launch.

SA AMSAT and the BACAR team apologize to all radio amateurs who were planning to participate later this morning. A new date will be set as soon as the problems have been resolved.

SLOW MARCH TO 1 400

It is still an uphill march for the SARL membership to reach the target of 1 400 by the end of the month. On Friday the number stood at 1 340, 60 short of the target. If you have not yet renewed, do it now or join for only R200 until the end of June. Call Mariska on Monday at 011 675 2393 or better still complete the form on the web at www.sarl.org.za.

HAVE YOU PREPARED FOR THE STRATEGY INDABA ON THE AIR?

The Council of the SARL will meet for a strategy indaba in early March and you will have the opportunity to brief councillors of what you would like the SARL to focus on over the next two years. Take part in the discussion on the President's net on Sunday 31 January at 19:30.

If you cannot join the SARL President on the Net, send your ideas by e-mail to armi@sarl.org.za and your suggestions will be read out on the air. You may also fax them to 088 011 675 2793 but before Thursday afternoon.

ONLY SIX PLACES LEFT AT THE DURBAN HOME CONSTRUCTION COURSE

There are only six places left at the Home Construction Course to be held in Durban on Saturday 6 February at the University of KwaZulu-Natal. The cost is R300 for SARL members and R700 for non-members. If you have not yet booked for the Durban course, do not delay. The course fee includes a CD with schematic- and PCB -generating software for Windows together with a practical demonstration that will turn your circuit into a first case industrial grade project.

The course is intended to give the following skills How to make SMD quality PCBs; How to mount SMD components; How to make Industrial quality face plates and labels.

In Port Elizabeth, the course will be held on 20 February.

If you have booked, please check that your details are on www.amateurradio.org.za/hcc2010.htm or follow the RTA link from www.sarl.org.za. If you'd like to book, do not delay. The form can be downloaded from the home construction page.

NOMINATIONS INVITED FOR SARL AWARDS

The closing date for clubs and SARL members to submit nominations for the following SARL awards is drawing nearer.

Honorary Life Membership - the SARL's highest honour;

The Willie Wilson Gold Badge - awarded to the amateur who gave exceptional and meritorious service to the League;

The Jack Twine Award - bestowed on amateurs who, in the opinion of their fellow amateurs and the league's council, exemplify the qualities desirable in a radio amateur;

The Arthur Hemsley 2 m Trophy - awarded for extraordinary performance on EME or modes such as tropospheric propagation;

The Barney Joel Trophy - awarded for the best performance during the year whilst working HF mobile;

The Joseph White Plaque - awarded for exceptional achievements in the 432 MHz band during the past year;

The Bert Buckley Six metre Trophy - awarded for individual achievements with transmissions in the 6 m amateur band;

The ICOM Excellence Award - bestowed annually on the amateur who through his/her activity in the Amateur Service has brought international recognition to South Africa;

The Radio ZS VHF Trophy - awarded to the amateur who achieved the longest distance on the 2 m amateur band during the year.

Nominations must reach the Secretary by no later than 31 January. They must be addressed to The Secretary, SARL and mailed to PO Box 1721, Strubensvallei, 1735, or faxed to 088 011 675 2793.

REPORT ON THE PEARS NATIONAL VHF/UHF CONTEST

>From reports received so far it appears that there was more countrywide activity than ever before. It is the first time in the history of the PEARS contest that the country has really been criss-crossed on VHF.

Derek, ZS5Y, of Scottburgh logged Cape Town, Port Elizabeth, Kimberley, Pretoria, and more on 50 MHz; and - on 144 MHz - he worked Cape Town, Pretoria, Bloemfontein, Nigel, Haven, amongst others. He contacted all six divisions with the longest distance, 1 229 km, achieved on digital mode.

Andr&#xFFFD;, ZS2ACP, of Port Elizabeth, worked ZS6WAB in Polokwane over 1 181 km and Sian, ZS3SVD, in Delportshoop (630 km) on 50 MHz; this was followed by ZS6WAB (1 181 km) on 70 MHz. On 144 MHz ZS2ACP scored with the following contacts: ZS2GK (Haven, 368 km), ZS6TAF (Johannesburg, 909 km), ZS4N (Bloemfontein, 536 km), ZS5Y (Scottburgh, 646 km) and ZS6OB (Pretoria, 943 km). These digital contacts were made via meteor- and tropospheric scatter.

The tropospheric conditions on Friday night were poor at first, but as conditions were enhanced, the 144,400 MHz FM DX channel became a beehive of activity throughout the contest period. Initially the tropospheric inversion layer favoured the high-altitude stations, for example Eric, ZS2ECH, of Port Elizabeth worked ZS2NB in East London on 144,200 MHz SSB with a signal report of only 5-5, but later when the layer dropped lower, ZS2NB was romping in at S9-plus on FM. Numerous analogue contacts were made along the coast from Dana Bay to the Haven that included seven field stations.

The best analogue contact that occurred inland was between ZS3SVD in Delportshoop and ZS6CBQ in Krugersdorp on 144,200 MHz SSB over a distance of 400 km. We have learned a lot from this contest and next year's should be even better.

CONTEST NEWS

A NEW SARL CONTEST COMMITTEE

Are you interested in HF or VHF/UHF Contesting? The SARL would like to form a new Contest Committee. Some of the tasks of this committee would be the management of HF and VHF/UHF contests, updating contest rules, creating new contests, dealing with disputes and issuing the annual contest manual. If you would like to serve on this committee, please send you name to hfcontests@netactive.co.za by Sunday 31 January.

The SARL 80 m Phone Club Contest will be run on Wednesday 27 January from 19:30 to 20:30 CAT. This will be a phone-only contest; the exchange is a RS report and a consecutive serial number starting at 001. Each contact counts 1 point and stations may only be contacted once during the session. The individual scores count towards a radio club's overall score.

PROPAGATION

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Currently sunspot region 1 041 is still active. A new record solar flare for cycle 24 took place on Wednesday near region 1 041. The effective sunspot number is expected to be between 20 and 30 for the coming week. Overall conditions are slowly improving.

15 and 20 m will provide the best opportunities for DX. Conditions to India will be good from the afternoon onwards. During the late afternoon and early evenings, it will be moderate towards Europe. In the afternoons there are good possibilities of contacts with the USA on 15 m. Contacts with New Zealand will be possible for a short while on 15 m during the mornings. Contacts with Australia will be possible on 20 m for a short while during the mornings. During the afternoons and evenings 15 and 20 m contacts may also be possible with Brazil.

Local conditions are going to be good on 40 m during the daytime. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the middle of the day. With summer here, 20 m is also once again very useful for contacts over the longer distances, especially up to 14:00. 80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

27 January - SARL 80 m Phone Club Contest; 31 January - President's net at 19:30; 31 January - Closing date for AGM motions and SARL Awards; 31 January - Closing date for Contest Committee nominations; 6 and 7 February - AWA CW Activity Day; 6 February - Home Construction course in Durban; 20 February - Home Construction course in Port Elizabeth; 28 February - New closing date for the SumbandilaSat essay competition; 28 February - Final date for entries in the ARRISS-SAT project to be submitted to youth@sarl.org.za; 27 March - 2010 SA AMSAT Space

Symposium.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz.

Sentech sponsors the ARMI transmissions on the non-amateur frequencies. You have listened to a bulletin of the South African Radio League compiled by Dennis, ZS4BS. The bulletin editor was Jannie, ZR6PHD.

Thank you for listening, 73.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 944
BID: $OPDX.944
January 25, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, W2VU, WB2REM, NG3K & ADXO, N4AA & QRZ DX, K4UEE, KH6BZF, AC7DX, NN7A, K8YSE, WB8APD, K9AU, Algarve STAR DX Team, AT International, CX3AN, DF1DV, DJ2MX, DL7MAE & The DX News Letter, DX World.Net, EA1WX, F5NQL & UFT, F8DVD, I1JQJ/IK1ADH & 425 DX News, FO8RZ, IK7JWX, ON8VM, OZ6OM & 50 MHz DX News, ON5NT, Pete's-DX-Newsdesk, RSGB IOTA Web Site, SM3CVM, SV1DPI, TF4M, VA3QSL, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK4AAR and YO3JW for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 10th-January, through Sunday, 17th-January there were 214 countries active. Countries available: According to the AR-Cluster Network for the week of Sunday, 17th-January, through Sunday, 24th-January there were 233 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FO/a, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5I, TANZANIA. Igor, UA3DJY, is once again back in Dar Es Salaam, and is operating from the DIT Communications Club station, 5I3A, until March

1st. He will try to be active on all bands. This past weekend Igor was on 40/20/15 meters CW and 17/15 meters SSB. QSL via RK3AOL.

5I, TANZANIA. After the Tonga operation as A35HA and his Falkland Island operation as VP8BUH, Uruguayan globetrotter Bert, CX3AN, will visit Tanzania during the first 2 weeks of February. Look for him on the bands, joined by Igor/UA3DJY and Paul/5H3PF to activate the Dar Es Salaam's Institute of Technology (DIT) radio club station 5I3A. Activity will be mostly SSB and CW using a FT-1000 MP and a log periodic between 20-10 meters.

6V7, SENEGAL. Luc, F5RAV, will be active from La Somone between February 18th and March 1st. He will operate from Jean-Francois, 6W7RV, QTH as 6W7RV. QSL via only direct to his home callsign.

AO1, SPAIN (Special Event). Spanish operators will activate the special callsign AO1ANT between February 22-28th. Activity is to celebrate the international event "Seventh Antarctic Week". Their reference number will be WAP-180 and their activity will be on SSB, CW, PSK31 and RTTY modes, using all the amateur bands from 160-10 meters. Operators mentioned are: Javier/EC1KV, Daniel/EB1LA, Jose/EA1CUB, Jose/EA1CS, Juanjo/EA1WX, Juan/EA1AUM, Gil/EA1HFM and Fernando/EA1GHT. QSL via EA1GHT, direct or by the Bureau. For more information, visit: http://www.qrz.com/db/ao1ant
--or--
http://www.waponline.it

C6, BAHAMAS (Correction). Operators Bob/N4BP (C6AKQ), Mike/K4RUM (C6AUM) and Tim/N4UM (C6ARU) will be in Freeport, Lucaya, Bahamas, beginning Monday, February 15th, with Kevin/K4PG (C6APG) joining them on Thursday, February 18th. The operators will enter the ARRL International DX CW Contest (February 20-21st) as individual entries (Bob/C6AKQ on 80 meters, Kevin/C6APG on 40 meters and Mike/C6AUM possibly on 160 meters. Tim will announce his entry when he knows). Prior to the contest they will be operating on the 30/17/12 meter bands, HF bands using CW and the Digital modes. QSL direct to their home callsigns with SASE and/or LoTW.

C9, MOZAMBIQUE. David, GI4FUM (EI4DJ/3DA0DJ), who has recently returned from a visit with his family to the Mpumalanga region of South Africa which included 5 days in the Kruger National Park, announced that he is planning a DXpedition to Mozambique in October 2010, to operate in the CQWW DX SSB Contest and also possibly the JOTA. Watch his Web page for updates at: http://www.3da0ss.net

CQ NEWS. Richard Moseson/W2VU, Editorial Director of CQ Communications, Inc., reports: "Richard Fisher, KI6SN, Named Editor of WorldRadio Online --
(Hicksville, NY January 20, 2010) ï¿½ Veteran journalist and writer Richard Fisher, KI6SN, has been named Editor of WorldRadio Online, effective with the April issue, Publisher Richard Ross, K2MGA, announced today. Fisher will succeed Nancy Kott, WZ8C, who is stepping down.
Kott has been Editor of WorldRadio and WorldRadio Online for the past eight years, guiding the magazine through its transition a year ago from print to online publication. She announced her impending departure in the

February issue, which was posted online today.
Fisher, 59, recently completed a 35-year career in newspaper print and online journalism in a variety of reporting, editing and management roles. He also has a 17-year association with WorldRadio, first joining the magazine in 1993 as its QRP (low power) columnist ï¿½ a post he held until the magazine's transition from print to online in February 2009.
Fisher is currently a columnist for three magazines published by CQ Communications, Inc. In addition to his WorldRadio Online editing duties, he will continue to write the "Washington Beat" column for Popular Communications, the "Public Service" column for CQ Amateur Radio, and the "Trail-Friendly Radio" column for WorldRadio Online.
Fisher also manages two related Internet sites, "CQ Public Service On The Web" (http://www.CQPublicService.blogspot.com) and "Trail-Friendly Radio Extra" (http://www.TrailFriendlyRadio.blogspot.com).
He has been licensed 45 years, obtaining his Novice ticket in 1965 at age 14. Fisher is an Extra class licensee who enjoys CW, building has own gear, QRP, contesting, ragchewing, 2-meter FM simplex, antenna experimentation and outdoor operations. He is a co-founder of the Adventure Radio Society.
'The past year has been very exciting and very challenging for all of us as we have learned the logistics of online publishing,' commented CQ Communications Editorial Director Rich Moseson, W2VU. 'I have enjoyed working with Nancy through that process and I am sorry that she will be leaving. We wish Nancy all the best in her future endeavors.'
'I am confident that the magazine will continue to be in good hands,' Moseson added, 'and am looking forward to working even more closely with Richard Fisher than I already do in his hat as CQ Public Service Editor. He brings to the table not only an intimate knowledge of WorldRadio Online and its readers, but a wealth of experience in both print and online journalism that will benefit all of our publications.'
Fisher begins his new duties as Editor on January 25th."

DR2010, GERMANY. To celebrate "Essen und das Ruhrgebit European Capital of Culture 2010", look for the following special event stations to be on the air through the end of the year: DR2010L, DR2010O and DR2010N. More information including the rules for a short term award are available at: http://www.dr2010o.de

E7, BOSNIA-HERZEGOVINA. Mario, DJ2MX (9A4MX, N0MX, E73DX), informs OPDX that he will be part of E7DX contest team in the upcoming CQ 160m CW Contest (January 29-31st). QSL E7DX via E77E. Before and after the contest Mario will be active as E73DX on 160-10 meters using CW and SSB. QSL E73DX via DJ2MX, by the Bureau or direct to his new P.O. Box address:
Mario Lovric, P.O. Box 801143, 81611 Muenchen, Germany.

FO/A, AUSTRAL ISLANDS (Update/New Callsign/IOTA Op). German operators Wulf/DL1AWI, Peter/DL3APO and Mat/DL5XU should be active by the time you read this as TX3D from Raivavae Island (OC-114, DIFO FO-122, WLOTA L-2581) in the Austral Islands group. Activity will last through February 4th.
When the team arrived on January 19th, they only had 50% of their baggages. However, by Saturday, January 23rd, the team received the rest of their

equipment and baggages. Remember that their focus will be mainly the lower bands 160-30 meters but will work some higher bands on SSB and RTTY. QSL via TX3D via DL1AWI and FO/DL3APO via DL3APO. Send QSLs direct or by the Bureau. Direct QSLs must have one IRC (new) or two USDs in order to cover the postage. They will also have an online log available (via SAT-Phone, no Internet is available at this small island) and some news/pictures at: http://www.df3cb.com/logsearch/cgcg/
--and/or--
http://dl9awi.de/fo.htm

IOTA NEWS.....
EU-118. RARE IOTA (Update)! Operators Oscar/EA1DR, George/EA2TA, Christian/EA3NT, Col/MM0NDX and Bjorn/SM0MDG are planning a DXpedition to Flannan Isles (a extremely difficult island to land on) between June 18ï¿½21st. Last activation was in 2002 (also in 1989 and 1995). Callsign will be MS0INT. Their main target will be working as many JA stations as possible and giving everyone a fair chance of working the EU-118 IOTA reference. Therefore, they aim to be active on 80-10 meters trying to get advantage on the best bands, with 2 simultaneous stations on the air, one on CW and another on SSB. They state, "Since our stay on the island is limited, please remember that 1 QSO will be enough, no matter the band." QSL Manager will be M0URX. Their Web page is now available at: http://www.ms0int.com

NA-079. (Update) Members of the Amateur Radio Outdoor Adventures, Inc., will be activating Grid Square EL84, March 11-15. Activity will be from Fort Jefferson, Garden Key in the Dry Tortugas (USI FL-013S, USA-316, Monroe County, Florida) 72 miles west of Key West. Team members are: Mike/AC2V, Dave/N2NL, Chris/ KN3ZIG, Pete/AI4QY, Gary/K4MF, Max/KJ4EUT, Dan/W4UH, Pete/ WD4IXD, Fred/K9VV, Vick/WA0USA, Zoli/HA1AG and Jennifer LeSueur. Activity will be on HF, Satellite and Digital. Callsign was still not provided. A Web page is now available at: http://aroadventures.org

KH2, GUAM (OC-026). Look for members of TIARA (Tokyo International Amateur Radio Association) to once again be active as homecall/KH2 between February 25th and March 1st. Operators mentioned are: Yoshiyuki/JF1TEU (AB2ST/KH2), Ken/K0EN and Toshio/KG6WTW. Activity will be on all HF bands. They will mainly be looking for Europe. QSL via JF1TEU, by the JARL Bureau or direct.

KH6BZF PROPAGATION FORECAST/REPORT (For January 25-31st)....
Jan 25 AN SOLAR REFERENCE
Jan 26 AN ---------------
Jan 27 AN AN - Above Normal/Geomagnetic Level is QUIET
Jan 28 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Jan 29 AN LN - Low Normal
Jan 30 AN

Jan 31 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less
** A FORECAST UPDATE:
First the bad news: This past week we were experiencing some radio
blackouts. Radio blackouts reaching the R1 level was
occurring. For more details on this, visit the Space
Weather Web page at: http://spaceweather.com

The good news is: "Expect Solar Flux Index (SFI) is expected to peak
on February 7-9th, at levels in the high 80's to low 90's.
Expect some transcontinental propagation on the high bands
18-28 MHz with 10 meters leading the way"..Stay tuned!

*** EDITOR'S NOTE: Just for your information. Thomas F. Giella, NZ4O, has
changed his Solar Cycle 24 Web page to a new URL. This one
stop Web page is a gateway for solar, space and geomagnetic
weather data and goings on, plus his daily LF/MF/HF/6M
radiowave propagation forecast can now be accessed through
the new domain name: http://www.solarcycle24.org
Old domain was: http://www.solarcycle24.com

KP2, U.S. VIRGIN ISLANDS. Jeff, VA3QSL, will be active as KP2/VA3QSL from
St. Thomas (NA-106, USI VI004S) and St. Croix (NA-106, USI VI002S, WLOTA
LH-2477) between February 6-14th. His activity will be "vacation style"
on or near the IOTA frequencies on 40-15 meters using CW, SSB and PSK.
QSL to his home callsign, direct or by the Bureau.

NEW OFFICERS FOR 2010. Members of the "Honolulu Amateur Radio Club" held
their elections for 2010. The following officers were elected for 2010:
President : John Peters, K1ER/KH6
Vice President : Dan Greeson, KH6P
Treasurer/Secretary : John Peters, K1ER/KH6
Directors : Eran Agmon, WH6R
: Bill Kendall, KH6OO
: Tom Seale, KH6AAA
: Lee Wical, KH6BZF
Repeater Trustee (146.78/18 KH6WO): John Peters, K1ER/KH6
HARC Newsletter : John Peters, K1ER/KH6

NP3, PUERTO RICO. Sergio, NP3QE, will be active during the CQWW WPX SSB
Contest (March 27-28th) as a Single-Op/Single-Band (20m) entry. QSL via
his home callsign.

OR4, ANTARCTICA. Karel's, OR4TN, stay at the Princess Elisabeth Station in
the Antarctica has been extended now until February 25th. His license was
only valid until end of January. Thanks to the concerned authority in
Belgium for their very fast reaction, the OR4TN license has now been
extended also to the end of February 2010. QSL via ON5TN. Updates on

OR4TN can be found regularly on: http://www.qrz.com/db/or4tn
For more information about the Princess Elisabeth Station, go to:
http://www.antarcticstation.org

OR5, BELGIUM. Members of the European Union Amateur Radio Club (E.U.A.R.C.)
in Brussels will activate club station OR5EU during the next UBA SSB
Contest between January 30-31st. QSL by the Bureau or direct to ON4HVO.

PZ, SURINAME. Peter, PA1LP, will be active as PZ5LP from Nieuw Nickerie
between February 26th and March 26th. Specific bands or modes were not
provided, but he will be using a FT-857 w/100 watts into a G5RV and
LDG Z100 tuner. QSL via eQSL.

QSL INFO AND NEWS.....
Algarve STAR DX Team reports that the following new logs have been
uploaded to the "CT's Logs OnLine" at: http://algarvedx.com/logonline
The logs are: CT1FMX/p, CT2FFC/p, CT2HQS/p and CT2IRY/p. All are OK to
be used for DMHP, DPRN, WCA, WFF and DPRN (Portuguese Natural Parks
Award).

D2CQ logs are now available on the "CT's Logs Online" at the same
above Web page. QSL cards are via CT1IUA and all information can be
found on: http://algarvedx.com/ct1iua

K5D QSOS NOW ON LOTW! Bob, K4UEE, reports: "As of January 10th, 2010,
N2OO and his QSL team from the SJDXA, have confirmed 59,827 QSOs with
those individuals who had requested K5D confirmations. This includes
all direct requests and requests via the very popular OQRS (Online QSL
Request System). As requests were completed, the QSOs were simultaneously
uploaded to LOTW resulting in 25,412 matches. All bureau requests will
be filled in the next few months.
Now that all requested QSLs have been answered the remaining QSOs
have been uploaded to LOTW, resulting in an additional 12,647 matches.
The KP1-5 Project wishes to thank the QSL managers for their untiring
efforts over the last 8 months. These volunteers have done an
extraordinary
job of confirming your QSOs from this #6 Most needed DXCC entity."

PIRATE ALERT. Stations signing ZF2AS during the December 2009 160 meter
contest was apparently PIRATE. DO NOT QSL your card to W1UA. He is NOT
the QSL Manager for this operation.

QSL Manager Ron, AC7DX, reports: "The following station KA4IST/KH5 1998
operation logs have been sent to LoTW. Direct requests now go to WA3RHW.
I wish to thank all the various operators who helped me convert 15
different stations and many many pages of handwritten logs to LoTW."

QSL ZA0IS (and ZA0/IK7JWX) for the December 18-23rd (2002) and 2008
activities only via the QSL Manager IK7JWX. DON'T SEND E-QSL CARDS!
Alfredo, IK7JWX, states that if you didn't receive a QSL to please
E-mail him at: ik7jwx2003@yahoo.it
He will send you a QSL card again. SAZAN Island QSOs are valid for:
A)IOTA award; reference number EU-169

B)Lighthouse award ARLHS; reference number ALB-004
C)Lighthouse WLH award; new reference number LH-0028

VK6IOA (OC-211) QSL STATUS. Alan, VK4AAR, reports to "Please advise your readers that the cards (for the recent operation) have just arrived from the printer and processing has started." Alan hopes that the BACKLOG will be caught up by this past weekend and any arrival of QSLs after this will be attended to within 24 hours, as per his standard policy.

QSLS VIA LoTW: ED7AJR, EF7R, G6PZ, IV3TMV, JA2FJP, OK3R, P49X, PI4COM, PJ2X, PZ5RA, S56A, SN2K, TM6M, VO2RAC, YS1JC, and ZM4G

QSLS RECEIVED VIA MAIL: 3D20CR, 4U64UN, 5T5BV, 9G5TT, 9G5XX, 9J3A, CO7PH/P, DL3KNA, E71A, EY7AF, FK8HN, FT5GA, GW3YDX, IS0GQX, J5V, LU1ZA, LU1ZV, LU2XX/p, P29VLR, PW6C, TY1MS, TY5WP, UA2FW, UK8AR, V73NF, VP2MUM, XV2JR, XV2RZ, XV3RRC, XV7RRC, ZD7FT, ZK1CG, ZS2CR and ZS9Z

QSLS RECEIVED VIA THE BUREAU: LY98FW, OX3KQ, US0KW, V60DU and VK9LA

SI9, SWEDEN (Special Event). Special event station SI9AM from the King Chulalongkorn Memorial in Utanede, Sweden, the largest Thai Pavilion in the world outside Thailand, will be active between February 5-6th, (from 1700-1400z). Operators will be Jan/SM3CER and Jorgen/SM3FJF. The activity is to celebrate the 10th anniversary of SI9AM. They plan to operate on 80-17 meters using CW and SSB. QSL via SM3CVM, direct or by the Bureau. For more information, visit the SI9AM Web page at: http://www.si9am.se

SILENT KEY. Rich, W2VU, from CQ Magazine, reports: "It is with great sadness that we report that our friend and longtime colleague, Dave Ingram, K4TWJ, became a Silent Key this morning (Jan. 20), as a result of complications from a massive heart attack he suffered on New Year's Eve. Dave has been writing for CQ at least since 1981 and has been a CQ columnist since 1982, starting with an amateur television column called World of Video. That column eventually broadened its outlook and became World of Ideas, Dave's signature monthly column in CQ. Regular topics included code keys, stealth antennas, building 'new vintage' tube gear and mobiling. In addition, for the past decade, Dave has been CQ's QRP (low power) Editor and 'How it Works' columnist. His enthusiasm for whatever caught his interest was contagious and spread widely through his informal yet educational writing style. Funeral arrangements are not complete as of this writing. We will post additional information on the CQ website news page when it becomes available. Condolence cards may be sent to Dave's wife, Sandy, WB4OEE, at their Callbook address."

TF, ICELAND. Yuri, K3BU, will activate the TF4M club station in Otradalur, using the callsign TF4X during the CQ 160-Meter CW Contest (January 29-31st) as a Single-Op/High-Power entry. QSL via G3SWH.

TM7, FRANCE (Special Event). Francois, F8DVD, will be active using the special callsign TM7AAW between February 13-28th. Activity is for the 7th Antarctic Activity Week (February 22-28th). His WAP reference number is WAP-185. Operations will be from his home QTH in Macon, the eastern

part of France. A special color QSL card showing a view of Antarctica will be issued. QSL via F8DVD, by the Bureau or direct (SAE with 1 IRC or 2 USDs) to: Francois Bergez, 6, Rue Liberte, F-71000 MACON, FRANCE. For more details, please visit his Web page at: http://tm7aaw.monsite.orange.fr
Or send an E-mail to him at: a.pole@laposte.net

V3, BELIZE. Robert, N7MSU, will be active as V31SU from various locations in Belize (NA-123) between February 4-23rd. Activity will be mainly 40 and 20 meters using CW and SSB. QSL via his home callsign, direct (see QRZ.com) or by the Bureau.

V3, BELIZE (Update). Art, NN7A, will be active as V31JZ/p from Turneffe Islands (NA-123) between February 24th and March 3rd. Activity will be holiday style from a cottage on the beach using generator power. Art states, "This coral atoll is located in the Caribbean Sea about 25 miles (40 km) east of Belize City. It is shaded by coconut palms and mellowed by soft tropical breezes." His operation will be mostly CW on 40-17 meters (including 30/17/12m), with some 160/80 meters and some ssb on 20/15 meters on the usual IOTA frequencies if possible, conditions permitting. Equipment will be a 100 watt transceiver with vertical and wire antennas. There will be NO skeds and NO online logs. QSL via his home callsign, by the Bureau or direct to: Art Phillips, P.O. Box 73, Eckert, CO 81418 USA.

VK9C, LORD HOWE ISLAND. Tomas, VK2CCC (aka LY1F), will be active as VK9CLH between May 24ï¿½31st. Activity will be limited to his spare time on 160/80 meters, and he plans to participate in CQ WPX CW Contest (May 29-30th). QSL cards will be available via an "Online QSL Request System" at the following Web page. QSL by other methods such as LoTW and by the Bureau or direct are via VK2CCC. For updates and possibly more details, visit: http://www.qrz.lt/ly1df/vk9clh.htm

VK9N, NORFOLK ISLAND (OC-005). Andrew, VK2ACC, will be active as VK2ACC/9 between February 4ï¿½9th. Activity will be holiday style on 40ï¿½6 meters using SSB and possibly PSK. He will operate with only 100 watts into a Buddipole and end-fed wire. QSL via his home callsign, by the Bureau or direct.

VP2, MONTSERRAT (NA-103). Nick, G4FAL, will be active as VP2MCC between March 10-17th. Activity will be on 80-10 meters using CW and possibly on 160m (grayline to EU on March 15th or 16th). He will also be in the RSGB Commonwealth Contest (March 13-14th). QSL via LoTW or via G4FAL, direct or by the Bureau.

VP5/VQ5, TURKS AND CAICOS ISLANDS. Operators Jim/WB2REM and Glenn/KD2JA will be operating with the special callsign VQ5M during the ARRL June VHF Contest (June 11-13th). This operation will be from Providenciales Island (Grid FL31VS, IOTA NA-002). Operation for the contest will be on 6 meters SSB and CW only. Outside contest operations between June 10-17th, look for Jim and Glenn to operate on 160-6 meters using CW and SSB with their respective callsigns VP5/WB2REM and VP5/KD2JA. QSL via KD2JA.

VP9, BERMUDA (NA-005). Seppo, OH1VR, will once again be active as VP9/OH1VR between January 28th and February 2nd. Activity will be mainly on CW. He will also be an entry in the CQ 160 Meter CW Contest (January 29-31st) as a Single-Op entry. QSL via OH1VR, by his CBA.

VU, INDIA. Norbert, DJ9RB, is active as VU2RBQ until February 2nd. His activity has been mainly CW on 160/40/30/20/17/15 meters. Look for him to be in CQ 160M CW Contest (January 29-31st) as a Single-Op entry. QSL via his home callsign.

YP1, ROMANIA (WFF Op!). Look for the special WFF callsign YP1WFF to be on the air. Operators Ghita/YO2LDC, Orza/YO2DFA and Pisti/YO2LYN will activate "Parcul Natural Portile de Fier" (YOFF-014) on HF using CW and SSB between January 29-31st. Also, look for activity in the CQ 160m CW Contest. QSL via YO3JW.

RAC Bulletin 2010-003E - Haiti Earthquake Traffic - 2010-01-24
2010-01-24

Haiti Earthquake Traffic - 2010-01-24

As the recovery in Haiti continues, the IARU would like to thank Hams
of the world for being there for the people of Haiti. Many messages
have been successfully passed over the airwaves. Effective immediately
the frequencies 7.045MHz and 3.720MHz are released with gratitude to
all who have kept them clear in the last days.

DXNL 1660 - Jan 27, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

E5 - NORTH COOK ISLANDS, OC-013 / E5 - NORTH COOK ISLANDS, OC-014
Dick,AD7AF, became active from Rarotonga (OC-013, South Cook Islands)
on schedule.He even made some QSOs with Southern Europe on 80m already.
He has good openings to Europe on 30m from 0515-0600 UTC and on 40m
from 0530-0700 UTC. He hopes this will be the same from Manihiki in the
North Cook Islands where he will stay from Feb 3-15. His callsign from
Manihiki (OC-014) will be E51WWB. QSL cards via AD7AF or via LoTW.

E7 - BOSNIA AND HERCEGOVINA
Mario,DJ2MX, will stay in Bosnia from Jan 29 until Feb 1 and intends to
join the team of E7DX in the CQWW 160m CW Contest. He will be active as
E73DX in CW and SSB on 160m-10m before and after the contest.
QSL for E73DX via DJ2MX (bureau or direct). His new postal address is:
Mario Lovric, PO Box 801143, 81611 Munich, Germany.
QSLs for E7DX should be sent via bureau or direct to E77E.

EA8 - CANARY ISLANDS, AF-004
Klaus,EA8/DK1AX, will be active holiday style from Teneriffa (AF-004)
from Feb 2-14. He plans to work only in CW on 15m, 20m, 30m and 40m
using a K1 radio with 5 watts and a Kelemen dipole. He will call on
the usual QRP frequencies (+/- QRM). Spots are welcome!
QSLs via bureau to his homecall, direct with SASE or SAE plus return
postage. His address can be found at QRZ.com.

FO/A - AUSTRAL ISLANDS, OC-114
DL1AWI, DL3APO And DL5XU lost some baggage on their way to Raivavae
including one amplifier, a mast and all antennas. So they showed up
with weaker signals during the first days until their baggage was
delivered. The team got a special callsign with TX3D which was spotted
on Jan 23 first. QSLs for FO/DL3APO via homecall, TX3D via DL1AWI.
Daily updates of their online logs can be found on the DXpedition
website: http://dl9awi.de/FO.htm

J5 - GUINEA-BISSAU / 6W - SENEGAL
OM Laci,HA0NAR, wants to activate Guinea-Bissau as J5NAR between Jan 27 and Feb 10. His next stop will be Senegal from where he will show up as 6W/HA0NAR from Feb 11-21. He also plans to activate the IOTA groups AF-078 (Senegal South Group) and AF-093 (Guinea-Bissau Coastal Region Group).

J6 - ST LUCIA, NA-108
Budd,J6/W3FF, Chris,J6/W6HFP, Scott,J6/NE1RD, Dan,J6/WZ1P, Guy,J6/N7UN, Steve,J6/WG0AT, Mike,J6/KC4VG, Paul,J6/KB9AVO, and Wey,J6/K8EAB, are all members of the DX association "Buddies in the Caribbean" which specialized in "ultralite" DXpeditions with 100 watts or less power. The team is going to become active from St. Lucia from Feb 2-11. They will use three radios powered from batteries and Buddipole portable antennas. Activities will take place in SSB, CW and digital modes mostly on 160m-15m and if conditions allow also on 10m and 6m.
QSLs direct, via bureau, LoTW or eQSL via the operator's homecalls.
More Information is available at: http://caribbeanbuddies.blogspot.com and http://sites.google.com/site/caribbeanbuddies/home

VP8/ANT - ANTARCTICA, AN-016
Karel,OR4TN (ON5TN), is staying on the "Princess Elisabeth Station" longer than planned. Karel will not leave by the end of January but decided to stay there until Feb 25. QSL via ON5TN.
Updates about his activity can be found at: http://www.qrz.com/db/or4tn and information about the base at: http://www.antarcticstation.org

VP8/SS - SOUTH SHETLAND ISLANDS, AN-010
XR9JA will be the callsign of Luis,XQ5CIE, Carlos,CE6UFF, Didier,F6DXE, and Dagoberto,CE5COX, from Feb 1-28. This operation was originally planned for January but has been re-scheduled. Their QTH will be the Chilean naval base "Arturo Prat" on Greenwich Island belonging to the South Shetland archipelago (AN-010). Amateur radio operation is planned in CW, SSB, PSK-31 on 160m-6m and via the satellite AO-51.
Their QSL manager is CE5JA (via bureau or direct) and more information can be found on their website: http://www.ce5ja.cl

VP9 - BERMUDA ISLANDS, NA-005
Seppo,VP9/OH1VR, will be active mostly in CW from Jan 28 until Feb 2. QSL cards should be sent directly via OH1VR.

VU - INDIA
Norbert,DJ9RB, is hitting the airwaves as VU2RBQ mostly in CW on 160m, 40m, 30m, 20m, 17m and 15m until Feb 2. He also plans to join the upcoming CQ 160m Contest. QSL via his homecall.

5H - TANZANIA
Igor,UA3DJY, is back again in Dar-es-Salaam and working on all bands from the clubstation 5I3A until Mar 1. He has been spotted in CW on 40m, 20m and 15m and in SSB on 17m and 15m during the last weekend. QSL via RK3AOL.
Bert,CX3AN, and Paul,5H3PF, will visit him during the first two weeks of February and will be QRV mainly in SSB.

7Q - MALAWI
Harry,7Q7HB (G0JMU), has returned to Malawi and will be active from
there for the next three months. Harry prefers CW and digital modes.
As usual QSLs only direct via his QSL manager G0IAS.

GERMANY, SPECIAL EVENT STATIONS
Essen is the European Capital of Culture 2010 and therefore the three
special event stations DR2010L, DR2010O and DR2010N will be active
throughout the year. More information about these activities and the
Ruhr.2010 award can be found online at: http://www.dr2010o.de

ROMANIA, SPECIAL EVENT STATION
YR5EPC is another new special event station of the European PSK Club
(http://eu.srars.org) from Transylvania. YR5EPC is working in PSK on
all bands until the end of the year. QSOs are also valid for the
ECSA awards. The QSL manager is YO6AJI.

THE NETHERLANDS, SPECIAL EVENT STATIONS
The special call PA30EPC is active in PSK until Jan 30. QSL via PA4JB.

The VERON Rotterdam is existing for 65 years now. PI65RTD and 17 more
special calls (PA65, PD65 and PH65) are celebrating the event until
Apr 30. A special award is available as well.
More information is available online at: http://www.65years.webklik.nl

PIRATE: ZF2AS who was active on 160m in December 2009 and asked for QSL via
W1UA was a pirate.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jan 29-31: CQ 160m Contest, CW
Jan 30/31: UBA DX Contest
Jan 30/31: REF Contest

CQWW 160m Contest (CW) - Further announcements

The CQWW 160m Contest in CW will take place from Jan 29-31, 2010.
The activities should be listed here if not announced elsewhere:

DX Magazine Most Wanted 2009

The DX Magazine is considered the originator of the Most Wanted DXCC Lists.
The survey for 2009 has been completed now and the detailed lists will be
published in the printed edition of January/February 2010.
The Top 100 worldwide can be found online at: http://dxpub.com/dx_news.html
These are the Top 5 ranks:
2009 Prefix / DXCC entity Rank 2008
1 P5 North Korea 1
2 KP1 Navassa 3
3 ZS8 Marion Island 5
4 3Y/B Bouvet 7
5 7O Yemen 2

Contest University during the HAMRADIO 2010?

The DARC committee for DX and HF Contesting in co-operation with the BCC and
the RRDXA are considering to organize a so-called Contest University during
the HAMRADIO 2010 in Friedrichshafen. We are interested to know the opinion
of all contesters who plan to attend this fair in 2010. Participation in the
poll is possible until Jan 31, 2010, so please take a few minutes to visit:
http://www.bavarian-contest-club.de/1204

GACW makes Fabian Kurz, DJ1YFK, DX Contester of the year 2009

The CW Group of Argentina (GACW) gives a Certificate of Excellence to
Fabian Kurz, DJ1YFK. DJ1YFK was very grateful for this award and wants to
coninue his amateur radio career. OM Fabian was born in 1983 and received
his first amateur radio licence as DG9YFK in 1997 at the age of 14 years.
Later he upgraded his licence and received the callsign DJ1YFK. His first
CW QSOs took place in March 1998.

Many thanks for contributing to this issue of the DXNL are going to:
Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, DF6EX (WIN QSL), DH4PSG,
DH5NBK, DJ2MX, DJ5AV, DJ6VM, DJ6XV, DK8JB, DL1SBF, DL2MDZ, DL7VOA, DL8LAS,
DM1TT, DM3VL, E51WWA, F5NQL, FO8RZ, MM0DFV, N7UN, NG3K, W1AW, W6NV,
SWL Norbert Maibaum and others.

The German PDF version can be found on the DARC homepage at:

IRTS Annual Dinner AV Presentations

One of the audio visual presentations being prepared for the Annual Dinner in Dundalk in April will feature the Islands on the Air Contest. Individuals or Groups who have still photos or video of last years contest and who would like them to be considered for inclusion should forward them to Seamus EI8BP. In particular, Seamus is anxious to feature all the Island expeditions.

****

Engineers Week

Last year the Society hosted a presentation entitled "Decoding the Code - from Samuel Morse to SMS" at seven centres throughout the country. The presentation introduced over four hundred school children to radio and electronics and allowed them to have hands-on experience of building a simple transistor circuit.

This year the Society is taking part with an expanded list of venues. We are currently looking for volunteers to help in the Cavan / Monaghan area. A knowledge of Morse is not necessary and a pre-prepared package is available to those who volunteer. If you are interested please contact S&#65533;amus McCague EI8BP on 087 259 0691. His Email address is on the IRTS website, www.irts.ie

Engineer's week runs from 8 - 13 February this year.

****

IRTS 80m Counties Contest

The closing date for the submission of logs is the 31st of January Please send in your logs even if only a few QSO's to contestmanager /at/ irts.ie

****

Dundalk Amateur Radio Society

This year during the SOS Radio Week 23-27 January Members of the Dundalk Society will be operating a special event station from the QTH of the Clubs Chairman, Thos EI2JD in Clogherhead

SOS Radio week is awareness and support of the RNLI, There is a list available of participating stations and also more information can be found at http://www.sosradioweek.org.uk/participants.html

****

Nomination of Awards for IRTS Trophies.

The time is here again for nominations for the several awards for IRTS trophies that are required from within the membership, this includes the awards for

1)Service to the Society, or to amateur radio.

Awards in this section may be to members or non-members.

2)Awards for other achievements, awards in this section include, the 70 cms trophy, the 4 and 6 Metre shields, the SWL award, and the awards for quality construction projects. These are confined to members only.

When considering your nominations please refer to previous successful nominees as included in

www.irts.ie/cgi/awards.cgi

Nominations may be from Clubs or individuals, must be in writing, and can be forwarded to the awards committee by regular post addressed to Peter Grant EI4HX, QTHR or by email to ei4hxperimental@eircom.net Chair of awards committee or any other member of the awards committee. Pat EI2HX or Pat EI9HX.

Closing date for nominations is April 2nd 2010

****

Request for Return of Trophies presented in 2009

It is time once again to recall all trophies presented at the 2009 AGM in Athlone.

Trophies and cups can be returned to the IRTS stand at the Phoenix Radio Rally, or to any IRTS Committee Member to arrive to me on or before the IRTS committee meeting in early March 2010.

This will allow time for engraving to be done, and also any small repairs.

****

AREN Meeting

There will be an AREN Meeting in the Park Hotel in Clonmel on 6th February; all AREN members are requested to attend.

Anyone interested in AREN activities or ware thinking of joining AREN should contact John Ronan on 086-8167310 then can arrive on the day.

****

Calling All Radio Theory Experts

A new website is under construction to offer radio theory classes in an online environment. The project has been set up by Martin EI-8-FFB. The website will consist of an online learning environment where the various radio theory sections will be broken down into modules.

The motive for the website is to allow people who may be constrained by time and distance to participate in a radio theory course at their own pace and in their own time. Once the website is completed later in the year, It will be available online free of charge to all prospective radio amateurs.

The project currently requires volunteers that are interested in compiling theory notes and documents for use on the website.

If anyone has any course notes of their own that they wish to submit, it is welcome also.

All interested parties can contact Martin by email at "martinevans at gmail dot com"

****

The Shannon Basin Radio Club

The Shannon Basin Radio Club recently held its AGM in Roscommon. The following Committee was selected. Chairman Pat EI9HX, Secretary Brian EI8IU, Treasurers Fergus EI6IB and Brian EI8IU, QSL manager Mickey EI5EAB.

Thanks are extended to the outgoing committee. Anybody interested in joining the club can contact any of the above members, all info on qrz.com.

****

Space shuttles for sale

The New York Times reports that NASA has slashed the price of its shuttles to just 20.3m Euro. There are only five remaining shuttle missions during 2010 and NASA is looking to dispose of the spacecraft.

Discovery is going to the Smithsonian National Air and Space Museum while Atlantis and the Endeavour are up for sale. The delivery date is given as the second half of 2011 and shuttle main engines are said to be available for the cost of transportation and handling.

****

Galway VHF Group.

The Galway VHF Group's APRS Digipeater, EI2GCP, has now been fully functional since before Christmas. Initial problems occurred when the power supply failed and put the equipment off air. The power supply was replaced and there have been no problems in the last 6 weeks despite the adverse weather conditions. EI2GCP even "twitters" at intervals to indicate that all is well voltage and temperature wise.

Steve, EI5DD, is running classes for the Radio Theory examination and anyone interested should contact Steve at the following E-mail address ei5dd.steve@gmail.com. The course will run until the next scheduled exam in June or July. There will be lectures with overhead projections, handouts and also a CD Rom for home study and revision.

****

SOUNDS OF SPACE WEBSITE

Matthias DD1US has an extensive collection of sounds from manned and unmanned space exploration including amateur radio operations on his website.

This includes historic recordings like Sputnik 1 and Apollo 11. There is even a page devoted to clips of Amateur Radio satellites from Oscar 1 to Oscar 68. The sounds of space website is located at www.dd1us.de

WIANEWS FOR WEEK COMMENCING JAN 31 2010.

Is your amateur radio station eme compliant?

SPACE SHUTTLES FOR SALE

100 years of the wia/ham heaven official open day march six

ARRL ELECTS KAY CRAIGIE, N3KN AS ITS NEW PRESIDENT

can you drive and talk on the radio at the same time?

REMEMBERING THE UNIT MEN - HENRRRRY

serialised history by wia centenary committee member peter vk3rv

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING JAN 31 2010

DO WE HAVE A DEAL FOR YOU!!

OK I fully understand the ACMA frown upon "for sale" items during even local
broadcasts be they ham to ham or factory to ham but what we have today is
just to good to be true, though we cant throw in Tassie or a set of
steak knives

If you are a ham who gets offended with sale items... this is just fair warning that we WILL be advertising "A DEAL OR NO DEAL" today!

Ging Gang Goolie Goolie Gotcha

Some people never learn. Some people possibly have the idea that being in VK6 means they can get away with foolery on the air. Not so!

One bloke over here has been convicted of making a false distress call, which caused the Volunteer sea rescue and others to waste valuable time.

Previously, the same bloke (not a ham) was convicted of interfering with Airways Frequencies in the Perth area.

He is now spending a few months as a guest of Her Majesty. In addition to financial penalties..

How does it go again? Oh Yes: Ging Gang Goolie Goolie Gotcha!

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Ewan McLeod VK4ERM vk4erm@wia.org.au
Secretary Geoff Atkinson VK3AFA secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Is your amateur radio station EME compliant?

The operation of all amateur stations must comply with Electromagnetic Emission or EME limits.

An important part of this compliance is an annual Australia-wide audit of amateur licensees.

The ACMA writes to randomly selected amateur stations. The average amateur station will easily comply and requires only a self-assessment of compliance.

It becomes more complicated if you use high power and gain antennas on the VHF/UHF or microwave bands.

All radio amateurs are expected to be aware of these requirements and apply them as responsible users of the radio spectrum.

OK WE MENTIONED THE DEAL... so gold chain on and white shoes polished here we go.

Space shuttles for sale

YES SPACE SHUTTLES THE "GENUINE ARTICLE".

Our friends in the... OK so it's the IRISH society, well the IRTS are reporting that there are only five remaining shuttle missions during 2010 and NASA is looking to dispose of the spacecraft.

BUT WAIT FOR IT..

NASA has slashed the price of its shuttles to just 20.3m Euro.

Discovery is going to the Smithsonian National Air and Space Museum while Atlantis and the Endeavour are up for sale.

The delivery date is given as the second half of 2011 and shuttle main engines are said to be available for the cost of transportation and handling.

NOW WE CAN TRULY SAY "WATCH THIS SPACE".

HAMS ACROSS AUSTRALIA.

VKR Roundup
http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNEWS from VK4WIA. I'm Geoff Emery, VK4ZPP with an explanation...

It has been asked whether I have the answers to all the questions that I raise? Simply, no but the purpose of this segment is to try and stimulate thought about things that can make a difference to our hobby.

One of the fascinations of recreational pursuits is that enthusiasts like to learn and share their interest. That has been a strong feature of Amateur Radio for as long as I can remember. I don't know how something should go together but I bet there is some-one who can explain it. I don't have a component for a project and how many times does the part arrive in the letter box or is located from a fellow amateur's junk box and handed over? This happens more than we ever hear on broadcasts such as this!

In the same spirit being able to share the experience's gained in other

pursuits on how to grow this hobby is part of the growing process AR depends on. At times having the memory jogged can draw out solutions for us and our clubs and the wider hobby.

AR has a reputation for being hands-on in its approach. Sometimes we have to be able to get past the blasts of hot air that some our self promoters surround themselves in. At times we have to ask the questions

of the people who know, who are involved rather than the blowhards who just spread rumours. This is where grounding ourselves in the Amateurs Code provides the static relief that is sometimes necessary.

This is another reason for getting the news from those who write the stories you hear on QNEWS. It's your choice as to whether you ask the organ grinder or his monkey, its your choice whether you get the facts from the source or are prepared to have it from the rumour mill.

For QNEWS, this is Geoff, VK4ZPP and I know which I prefer!

MARYBOROUGH RADIO AND ELECTRONICS CLUB
For more info, call Secretary Kathy Johns 040-939-8853
Email: kathy.johns@bigpond.com
Channel 14 UHF CB call "CQ MERG"

Hi, this is Dawn, VK4FTBA for the Maryborough Electronics and Radio Group.

Last Saturday a dozen club members met with 4 peer learning facilitators from the Queensland Ambulance Service. The morning's agenda was to bring people up to date on current CPR practice and this is a program that QAS has available throughout the community from schools to, even, radio clubs.

This was a relaxed and informal time with the participants proving their skills on the practice manikins to finish the training.

MERG feels that having members skilled in basic safety and survival skills complements our radio activities. Can we issue a challenge to the other VK4 clubs to skill up, too?

>From MERG, Inc, I'm Dawn, VK4FTBA reporting for QNEWS

Redcliffe and District Radio Club
www.redclifferadioclub.org.au

"I'm Ray VK4CF back with news from the Redcliffe AR Club".

Just when you thought it was safe to get back on the airwaves after a relaxing holiday, the weather man John, VK4WX, is off to New Zealand on a ship leaving Sydney next week. The boat will be carrying John and XYL, Beryl to the land of the long white cloud and there is a rumor that John will operate VHF maritime mobile whilst in New Zealand.

A week later Ken, VK4FKEN, and XYL Wendy, VK4FWEN, will also be off to New Zealand on another cruise liner and will also be operating VHF maritime mobile as well. Both John and Ken have the NZ repeaters programmed into the handhelds and are ready to terrorize the NZ airways. Alas they will not be able to work each other during the voyage.

Redcliffe conducts a trivia night on the 70 cm band repeater each Wednesday night and after the Christmas recess its now back. When, WEDNESDAY nights at 7.30 pm local time. Where, the Redcliffe 70 cm repeater on 438.325 mHz with a tone of 91.5 hertz needed to access the repeater. How long? about an hour.

Don't forget if you wish to upgrade your licence or you know someone that needs to study for a foundation licence, call Alan VK4KZ the Redcliffe's Education manager.
Please contact alan.jenner@bigpond.com
or by phone contact 5497 4634 and if there is no answer please leave a message.

Last Monday night the club was the first fox hunt for 2010 with some 5 teams taking part. It was also pleasing to see Shaun, VK4FY his wife Janette, VK4FWWW, son Nicholas, VK4FNIC and his daughter who is still studying for her licence joining in and doing well. It just goes to prove the old saying, "A family that fox hunts together, enjoys the chase", or something like that.

The xyl of Jeff, VK4FNRS is in hospital with a severe back injury and all club members wish her a speedy recovery.

There is a last reminder of the first working bee for 2010. This will be held on Saturday 13 February at the home of Charles, VK4BTC at 7 Kelly Court, Redcliffe and it is to start about 8.30 am. So come with your power tools and assist for a few hours to get the caravan ready for the John Moyle weekend.

So until next week, for Redcliffe club I'm Ray VK4CF and you've been listening to QNEWS from VK4WIA.

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au
Secretary Clive 4928 1173

This is Doug VK4DUG with news of some happenings in Rockhampton.

Once again, Mike VK4LMB rebroadcast last week's version of the WIA News from The Heritage Village in Rockhampton.

The Village is, if you like, a second home for the Rockhampton and District Amateur Radio Club, more generally known as the RADAR Club.

The previous broadcast from the village, was a somewhat historic 'first' for the club, and the village, in as much that it was the clubs first broadcast from this location. The RADAR Club has been given the use of a building in the complex and members are in the process of building a secure operating shack in a section of this building.

It is expected that a display of past and vintage radio equipment in the remaining area will revive some of the history of, not only radio in general, but amateur radio in particular, and generate some interest by the general public in our favorite pastime.

If you are in Rocky or just passing through, be sure to call in and say G'day and if you have any radio or associated pre-loved items that you think should be shown to others, then we would like to display them for you. You will find the Rockhampton Regional Heritage Village, conveniently, on the main highway, on the northern outskirts of the city.

73 From Rockhampton

GREAT HAPPENING ON THE NIGHT!
A VISIT TO THE QUEENSLAND AMBULANCE SERVICE
TOWNSVILLE COMMUNICATIONS CENTRE IN HUGH
STREET CURRAJONG HAS BEEN ARRANGED FOR
MEMBERS BY PAUL VK4FOTO.

THERE WILL BE A LOT TO SEE AND THANKS TO POPULAR
DEMAND ADDITIONAL TOUR POSITIONS HAVE BEEN
ADDED FOR THE VISIT - HOWEVER THESE POSITIONS
ARE GOING FAST !
THOSE LUCKY ENOUGH TO GET ON THE TOUR WILL
NEED TO BE AT THE HUGH STREET COMPLEX GATHERED
AT THE CONCRETED CAR PARK FROM 1915 HOURS FOR
TOUR COMMENCEMENT WITH PAUL VK4FOTO BY 1930
HOURS TUESDAY FEBRUARY 9TH.
SHOULD YOU FIND THAT ALL THE PARKING SPACES
ARE TAKEN THEN STREET PARKING IS AVAILABLE IN
NEARBY MCLACHLAN STREET.

TO MAKE A DEFINITE BOOKING TO BE ON THE TOUR -
CONTACT PAUL VK4FOTO USING ANY OF THE
FOLLOWING METHODS -
BY ELECTRONIC MAIL TO VK4FOTO AT WESTNET DOT
COM DOT AU, OR PHONE 47731196 LEAVING A
MESSAGE ON THE ROBOT IF NECESSARY, OR
RESPOND TO THE TARC FACEBOOK INVITATION TO ATTEND.

PAUL WILL ADVISE YOU IF YOU WERE FAST
ENOUGH TO GET ON THE TOUR LIST.

AS I SUGGESTED LAST SUNDAY "DONT DELAY,
DO IT TODAY, ELSE YOU WILL MISS OUT !"

FOR OUR SECOND ITEM OF THE WEEK,
ITS NOW TIME TO TELL YOU THAT THE FIRST
MANAGEMENT MEETING FOR TWO THOUSAND AND
TEN OF THE TOWNSVILLE AMATEUR RADIO CLUB
INC HAPPENS THIS TUESDAY, SECOND OF FEBRUARY
FROM SEVEN THIRTY PM AT THE CLUB ROOMS,
PERCHED ATOP THE SES HEADQUARTERS IN GREEN
STREET WEST END.MAKE SURE YOU BRING ALONG
SOMETHING FOR THE SHOW AND TELL SESSION. ALL WELCOME !

OUR FINAL ITEM THIS WEEK CONCERNS A NEW
HF RADIO NET THAT HAS COMMENCED ON THE
FORTY METRE BAND AND ITS PROVING EXTREMELY
POPULAR.
THE AFTERNOON NET HAPPENS EVERY AFTERNOON
AT 0600 HOURS UTC OR FOUR PM TOWNSVILLE TIME
ON 7093 KILOHERTZ. ANY SUBJECT IS TALKED
ABOUT AS LONG AS IT IS DECENT AND NOT
DEPRESSING AND SELFISH CONDUCT ON NET IS
NOT TOLERATED, MAKING IT FAIR FOR ALL PARTICIPANTS.

THE NET IS CURRENTLY ATTRACTING STATIONS
FROM FAR NORTH, NORTH AND CENTRAL QUEENSLAND.

JOIN IN ON THE AFTERNOON NET AND MAKE
YOUR RADIO SHACK A HAPPY FACE PLACE.

WELL THATS ALL FOR THIS WEEK FROM TROPICAL PARADISE.
THIS IS DON VK4FNQA FOR THE TOWNSVILLE AMATEUR RADIO CLUB INC.
AND YOU HAVE BEEN LISTENING TO QNEWS FROM VK4WIA.

(Don, VK7AY for the Tasmanian Sewing Circle Net)

Club Archive Proposals

It has been proposed to build an archive of NWT-ATV Group history, activity and involvement over the last 35 or so years since the North West ATV Group first became active early in the 1970's.

Some of the activities were installation of the Solar Powered ATV Repeater on Mt. Duncan, The 1990 World Rowing championships and 2 subsequent National Rowing Championships, ATV at HamFests, through to some recent events such as The Marconi Centenary and the International Space Station communications with the Devonport High Schools in 2007.

(Tony VK7AX, News Officer NWT-ATV Group)

Irish Engineers Week

Last year the Society hosted a presentation entitled "Decoding the Code - from Samuel Morse to SMS" at seven centres throughout Ireland. The presentation introduced over four hundred school children to radio and electronics and allowed them to have hands-on experience of building a simple transistor circuit.

This year the Society is taking part with an expanded list of venues.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

MP3 pioneers launch 'deluxe' file

MusicDNA will be widely available by Mid Year, creators say.

A new music file format has been unveiled by some of the key figures behind the development of the MP3.

The new file, MusicDNA, can include things like lyrics, videos, artwork and blog posts, which will continually be updated, as well as the music.

MusicDNA files are likely to be more expensive than current music downloads.

It will be in competition with Apple's iTunes LP, which gives users added content including bonus tracks, lyrics and video interviews.

FELIX BAUMGARTNER TO UNVEIL MISSION TO THE EDGE OF SPACE

Aerospace legend Colonel Joseph Kittinger to Introduce Red Bull Stratos research effort to capture data from Mach 1 freefall

Pilot Felix Baumgartner has announced his intent to expand the boundaries of aerospace exploration by attempting to become the first person ever to break the speed of sound with the human body. Baumgartner hopes to ascend in a capsule lifted by a helium balloon to the upper reaches of the stratosphere to at least 120,000 feet and, protected by a full-pressure

"space suit," launch a freefall jump that could exceed Mach 1.0 - more than 690 miles per hour - before parachuting to Earth.

If successful, the Red Bull Stratos mission hopes to establish four world records; the data captured by the mission's world-leading scientists could

promise new standards in aerospace safety and enhanced possibilities for human flight.

Red Bull Stratos has secured specialized technical communications that will facilitate the coverage of the mission with a live TV broadcast and live web cast.

In parallel the mission will also be streamed on mobile platforms through a mobile application by Nokia.

(RB press statements)

==========

NEWS FROM ARNEWSLINE

HAM RADIO POLITICS: ARRL ELECTS KAY CRAIGIE, N3KN AS ITS NEW PRESIDENT

A historic day in the history of the American Radio Relay League. This as the Board of Directors elects First Vice President Kay Craigie, N3KN, of Blacksburg, Virginia, as the organization's first ever female president. Amateur Radio Newsline's Mark Abramowicz, NT3V, is at our East Coast Bureau with the details:

Kay Cragie says she is humbled to have been elevated to such an honour and is pleased the ARRL board had the confidence to entrust her with such an awesome responsibility.

Craigie, who began her service to the ARRL and its membership in 1986 as the Eastern Pennsylvania section manager, says she also recognizes the legacy of her predecessors.

"If you stand in the lobby at ARRL headquarters, you see photographs of all the presidents of ARRL going all the way back to Hiram Percy Maxim, W1AW," Craigie says. "I'm here to tell you when you think about joining that list of amazing, outstanding radio amateurs, if it doesn't throw you for just a little bit of a loop there's something wrong with you.

"Because these are people who had a tremendous contribution to amateur radio and I am just unbelievably honoured to be joining that group."

Craigie moved up the ARRL ladder pretty quickly, becoming the Atlantic Division vice director in 1990 and then director in 1996.

N3KN was elected a vice president in 2000, and moved up to first vice president in 2006.

Craigie says during that time, she got the chance to work on many of the challenges facing the amateur radio service.

"We were believing that Part 15 devices were going to be a challenge for amateur radio," Craigie recalls. "Boy were we right. The whole issue of broadband over powerlines - not so much BPL but the interference that BPL can create - has been a real issue for us over the last several years. We're still working on that one."

"Another challenge that we're now seeing is the increasing demand for spectrum for mobile broad-band," she continues. "I have a Smartphone, lots of radio amateurs have Smartphones. We're using them. They gobble up a great deal of spectrum to serve us the way we want them to.

"And, the ARRL's job is to make sure that meeting the needs of that industry doesn't cut into the spectrum that amateur radio operators have to use and to experiment with."

Craigie says one of the big efforts she is committed to is attracting more qualified and dedicated people into the amateur radio service.

"We're making good strides on that, thanks to the efforts at the grass roots by individual instructors and radio clubs and groups who are getting out the word about amateur radio and helping people become licensed," Craigie says.

"Of course, we'd like to have more younger people involved in amateur radio. Amateur radio is a fellowship based on achievement. Everything else is just a demographic factoid, really.

"Achievement is the key and that's why amateur radio is so good for young people in that it stimulates them to achievement of a very positive and constructive kind and the League wants to do what we can do in cooperation with local hams to promote more young people getting involved in amateur radio."

Craigie - now a retired educator - was tasked to develop what became the league's Education and Technology program. She says it continues to work on a number of levels.

"This project is ongoing, it's successful, it has achieved things beyond my wildest dreams," Craigie says.

"And the League is very pleased to continue to offer school teachers the skills and the knowledge that they need to bring amateur radio into the classroom and help kids get excited about education, excited about science, about technology about social studies, about languages - all the different things that you can use amateur radio to support in the classroom."

Finally, Craigie says, one of her top priorities is to continue to promote the valuable public service role of amateur radio.

"When you have situations where infrastructure is crippled, overloaded, amateur radio, as we say, is what works when all else fails," Craigie says. "And, in the circumstances like what we have in Haiti right now, of course, it's tremendously dangerous.

"We've seen news stories about amateurs who have attempted to help and then had to fall back to safer positions. But, amateur radio for the foreseeable future will be in a position to assist the authorities and to assist charitable relief agencies to help the public.

"Whether it's helping the public in our own communities, elsewhere in our country or in some cases, around the world. And we certainly commend the hams who have the dedication and courage to do that.
"And, of course we also encourage them to take some note for their own personal safety in those circumstances where that's a real issue."

You can download my entire interview with Kay Craigie from our website at www.arnewsline.org. Just scroll down to the words "Kay Craigie interview" and right click on the word "here" to save the file to your computer."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

Kay Craigie, N3KN, assumed the reins ARRL from outgoing President Joel Harrison, W5ZN, at the close of the Annual Meeting. In October, Harrison had advised the Board that he would not seek re-election.

(ARNewsline(tm) with biographic information from ARRL)

LORAN-C NAVIGATION SYSYEM GOING QRT

It's time to say goodbye to the old LORAN-C radio navigation system it is soon going QRT. Frank Haas, KB4T, is here with the story of a long-time friend to sailors world-wide:

LORAN is an acronym for the words long-range navigation. It's a radio navigation system that was developed during World War II for military ships and aircraft. It then was then perfected for civilian use and entered full time service in 1957.

LORAN-C operates in the low frequency portion of the electromagnetic spectrum from 90 to 110 kHz.. It has transmitted the past 52 years from 24 stations operated by the Coast Guard to determine positions at sea or in the air.

For decades, LORAN-C was the standard navigation system for ships, fishing boats, and other vessels. It also served as a supplemental navigation aid on many small to medium sized aircraft. And at its peak popularity, an estimated one and a half million LORAN-C receivers were in use.

But in the mid-1990's mariners and pilots began turning to global positioning systems for its almost pinpoint accuracy. Gradually, use of LORAN-C fell away. Now the Department of Homeland Security says that LORAN-C has become obsolete and is no longer needed for navigation or safety.

Most of the nation's LORAN-C transmission stations will be turned off on February 8th with the remainder being powered down by October 1st. This termination of service does not affect U.S. participation in the Russian American or Canadian LORAN-C chains. U.S. participation in these operations will continue at least temporarily in accordance with international agreements.

>From Holly Hill Florida, I'm Frank Haas, KB4T, reporting for the Amateur Radio Newsline.

Some had thought that the government might keep LORAN-C as a terrestrial back-up system for the satellite based Global Positioning System but the Department of Homeland Security seems to believe that doing so is not a necessity.

==========

WEIRD AND WONDERFUL

Can you drive and talk on the radio at the same time?

Largely, in Australia the law says you can. But, it might be worth checking and knowing the rule number by heart if stopped by police. "SHOULD you drive and talk on the radio?" might be a better question.

Last year, a psychology professor at Western Washington University situated at Bellingham, between Seattle and Vancouver, wanted to test whether talking on a mobile phone affected situational awareness. Professor Ira Hyman owns a clown suit. He organised for his researchers to video a square on the campus for an hour, and to interview people as they came out of the square. He enlisted the help of a student who can ride a unicycle. You heard right; a clown on a unicycle.

Asked a plain question, "Did you see anything unusual?", 60% of people walking with friends remembered the clown, 33% of people plugged into music, but only 8% of mobile phone users. When prompted with "Did you see the unicycling clown?" the recall was better: 71 percent of the people walking with a friend remembered the clown, a more creditable 61% of those listening to music, 51% of those walking alone, but still a miserable 25% of mobile phone users.

It turns out that splitting our attention does affect perception.

No wonder using a mobile phone while driving is banned by law.

Remembering the unit men - Henry

Hello I'm Jim Linton VK3PC with another in a series of brief looks at those who made discoveries and have their names as units of measurement.

Joseph Henry born in 1797 made major contributions in the field of electromagnetism. These include the discovery self-inductance, he was the first to create powerful electromagnets, the electric motor, and he also provided help to Samuel Morse in the development of the telegraph.

Henry was of Scottish heritage, became an apprentice watchmaker at the age of 13, then attended the Albany Academy in New York for more study but was mostly self-taught.

By chance he read a popular scientific book which greatly aroused a pre-existing interest in science.

He became a district teacher but ultimately appointed Professor of Mathematics and Natural Philosophy at the Academy, allowing him to continue his scientific experiments after teaching hours.

While working at the Princeton College he was given study leave on full pay enabling him to travel and meet Faraday, Wheatstone, and other British scientists.

When the Smithsonian Institute began in 1846 he led it with distinction including the establishment of the first corp of volunteer weather observers.

Deservedly so, in 1893 the international unit of inductance was named the Henry.

GB2EI, Great Britain to Ireland Ferry Celebrations ends March 31 2010

VI3KIAH acknowledging Black Saturday Bush Fires 2pm to 8pm local Feb 7 2010

Where in the world is 4UIWB

ARRL News Editor K1SFA said that most logging programs showed it as mainland USA.

We all know that AA-AL, K, N and W are all US prefixes.

Then why was 4U1WB showing up as being located in the US, too?

Well 4U1WB is a United Nations call sign assigned to the World Bank Amateur Radio Club at the World Bank in Washington, DC.

There are four 4U1 call signs around the globe:

4U1UN assigned to the United Nations;

4U1ITU assigned to the International Amateur Radio Club at the International Telecommunication Union

4U1VIC the Vienna International Radio Club at the Vienna International Centre.

In the past, the United Nations has issued 4U call signs to various entities, allowing its use in areas where the UN has had peacekeeping forces. In 1995, an operation from Western Sahara used 4U/KC0PA, while Burundi used 4U9U in 1994.

While 4U1UN and 4U1ITU count for credit toward the ARRL's DXCC award,
4U1WB and 4U1VIC do not.

The DXCC rules define 4U1WB and 4U1VIC are considered part of their
"host entity" for DXCC purposes.

This makes 4U1WB part of the US and 4U1VIC part of Austria for DXCC purposes.

NEW PRODUCTS: OH THOSE BUDTRAPS

And here is a neat and cheap product that you can use to keep those very
popular ear-bud type earphones from becoming a tangled mess. BudTrap
International has introduced its new BudTrap new cable management
device engineered to trap ear-buds and avoid headphone tangles in your

Apple iPod, Microsoft Zune or maybe your HT.

BudTrap stays attached to your earphone jack and helps you secure your
ear-buds the way you want quickly. The device works with either straight
or curved device jacks. The small form factor offers portable users the

convenience of headphone cable management, without adding bulk to the
device. This makes BudTraps a natural for hams to experiment with and find
new ways to use that the manufacturer likely never dreamed of.

The new Bud-Traps are available online for less than three dollars. More
information is at www.budtrap.com/

RECOMMENDED READING: "THUNDERSTRUCK BY ERIK LARSON

"Thunderstruck" is a book by Erik Larson that is a true story that
interweaves notable researchers and inventors like Guglielmo Marconi, John
Fleming, Heinrich Hertz, and Nikola Tesla with that of Dr. Hawley Crippen,
a famous murderer.

Crippen, was an American physician hanged in Pentonville Prison, London, England, on November 23, 1910, for the murder of his wife, Cora Henrietta Crippen. He holds the unenviable distinction of being the first criminal ever to be captured with the aid of wireless communication.

As you might surmise, the story takes place between the late 1800's and the early 1900's and is historically accurate . This is especially true in its treatment of how Marconi became a major "mover and shaker" of his day accompanied by the obstacles that go with success.

Any ham that is a reader should enjoy this book. According to the QCWA's Val Erwin, W5PUT, once he started reading, he could not put it down.

"Thunderstruck" is available either in hardback or paperback at all normal book outlets and from on-line booksellers like Amazon dot com.

The United States of America's Department of Defence (DoD) issued an Instruction concerning MARS, effective immediately. This Instruction gives the three MARS services -- Army, Air Force and Navy/Marine Corps a new focus on homeland security and a new name:

Military Auxiliary Radio System.

The DoD defines a "military auxiliary" as "an organized body of volunteers prepared to supplement the uniformed services or any designated civilian authorities by provision of specialized autonomous services when called upon or when situations warrant."

(sourced to http://mt-milcom.blogspot.com/)

REWIND - A LOOK BACK IN HISTORY

Rewind. a look back at our history through the serialised written history by WIA Centenary Committee member Peter Wolfenden VK3RV with assistance of others, that is being published in the WIA journal Amateur Radio magazine.

The Earliest Days. When Marconi demonstrated his wireless system in 1895 he did so at a time that the predominate communication means globally was the wired telegraph.

Indeed all six British colonies in Australia were cable-linked by 1880. With Australia becoming a Federation and the Commonwealth of Australia in 1901 the individual colonial telegraph departments united.

Before 1905, the radio spectrum in Australia was effectively under the control of the British Royal Navy as it was responsible for the defence of Australia.

A number of "wireless" demonstrations were given to interested parties in most Australian States during 1897 to 1900.

For example, Professor Threfall at Sydney University, repeated demonstrations of German physicist Heinrich Hertz early as 1888.

Professor William Bragg gave the first recorded public demonstration of "Telegraphy" without wires at the University of Adelaide during September 1897. That led to lectures about wireless being held.

In the early 1900s the new Secretary of the Post Office looked with disfavour on everything that was not producing revenue and for the time

that included wireless.

Contrasting with that approach, was the one taken in 1901 by H.W. Jenvey, Chief Postal Electrical Engineer for Victoria, who had been experimenting privately from 1899.

At his own suggestion and with ?governmental blessing?, on 6th of May 1901 his amateur wireless station officially communicated with the escort ship, HMS St.George which was in Victorian waters accompanying the Duke of York, the future King.

This was not only the first ship-to-shore wireless communication in Australia, but used home-made equipment. Other experimenters subsequently made contact with that ship during its visit.

Arguably the communication acted as a two pronged catalyst for "wireless": first, it raised interest in the worth of the new communications medium, and second, it contributed to the debate about establishing a coastal wireless telegraphy network.

SB QNEWS @ WW $QNEWS100131
QNEWS - Jan 31 - VK4 ON AIR

DID YOU TELL ANYONE ABOUT AMATEUR RADIO THIS WEEK?

QNEWS BROADCAST JANUARY 31 2010

Welcome to QNEWS from VK4WIA. I'm Geoff Emery, VK4ZPP with an explanation.....

It has been asked whether I have the answers to all the questions that I raise? Simply, no but the purpose of this segment is to try and stimulate thought about things that can make a difference to our hobby.

One of the fascinations of recreational pursuits is that enthusiasts like to learn and share their interest. That has been a strong feature of Amateur Radio for as long as I can remember. I don't know how something should go together but I bet there is some-one who can explain it. I don't have a component for a project and how many times does the part arrive in the letter box or is located from a fellow amateur's junk box and handed over? This happens more than we ever hear on broadcasts such as this!

In the same spirit being able to share the experience's gained in other

pursuits on how to grow this hobby is part of the growing process AR depends on. At times having the memory jogged can draw out solutions for us and our clubs and the wider hobby.

AR has a reputation for being hands-on in its approach. Sometimes we have to be able to get past the blasts of hot air that some our self promoters surround themselves in. At times we have to ask the questions

of the people who know, who are involved rather than the blowhards who just spread rumours. This is where grounding ourselves in the Amateurs Code provides the static relief that is sometimes necessary.

This is another reason for getting the news from those who write the stories you hear on QNEWS. It's your choice as to whether you ask the organ grinder or his monkey, its your choice whether you get the facts from the source or are prepared to have it from the rumour mill.

For QNEWS, this is Geoff, VK4ZPP and I know which I prefer!

MARYBOROUGH RADIO AND ELECTRONICS CLUB
For more info, call Secretary Kathy Johns 040-939-8853
Email: kathy.johns@bigpond.com
Channel 14 UHF CB call "CQ MERG"

Hi, this is Dawn, VK4FTBA for the Maryborough Electronics and Radio Group.

Last Saturday a dozen club members met with 4 peer learning facilitators from the Queensland Ambulance Service. The morning's agenda was to bring people up to date on current CPR practice and this is a program that QAS has available throughout the community from schools to, even, radio clubs.

This was a relaxed and informal time with the participants proving their skills on the practice manikins to finish the training.

MERG feels that having members skilled in basic safety and survival skills complements our radio activities. Can we issue a challenge to the other VK4 clubs to skill up, too?

>From MERG, Inc, I'm Dawn, VK4FTBA reporting for QNEWS

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

"I'm Ray VK4CF back with news from the Redcliffe AR Club".

Just when you thought it was safe to get back on the airwaves after a relaxing holiday, the weather man John, VK4WX, is off to New Zealand on a ship leaving Sydney next week. The boat will be carrying John and XYL, Beryl to the land of the long white cloud and there is a rumor that John will operate VHF maritime mobile whilst in New Zealand.

A week later Ken, VK4FKEN, and XYL Wendy, VK4FWEN, will also be off to New Zealand on another cruise liner and will also be operating VHF maritime mobile as well. Both John and Ken have the NZ repeaters programmed into the handhelds and are ready to terrorize the NZ airways. Alas they will not be able to work each other during the voyage.

Redcliffe conducts a trivia night on the 70 cm band repeater each Wednesday night and after the Christmas recess its now back. When, WEDNESDAY nights at 7.30 pm local time. Where, the Redcliffe 70 cm repeater on 438.325 mHz with a tone of 91.5 hertz needed to access the repeater. How long? about an hour.

Don't forget if you wish to upgrade your licence or you know someone that needs to study for a foundation licence, call Alan VK4KZ the Redcliffe's Education manager.
Please contact alan.jenner@bigpond.com
or by phone contact 5497 4634 and if there is no answer please leave a message.

Last Monday night the club was the first fox hunt for 2010 with some 5 teams taking part. It was also pleasing to see Shaun, VK4FY his wife Janette, VK4FWWW, son Nicholas, VK4FNIC and his daughter who is still studying for her licence joining in and doing well. It just goes to prove the old saying, "A family that fox hunts together, enjoys the chase", or something like that.

The xyl of Jeff, VK4FNRS is in hospital with a severe back injury and all club members wish her a speedy recovery.

There is a last reminder of the first working bee for 2010. This will be held on Saturday 13 February at the home of Charles, VK4BTC at 7 Kelly Court, Redcliffe and it is to start about 8.30 am. So come with your power tools and assist for a few hours to get the caravan ready for the John Moyle weekend.

So until next week, for Redcliffe club I'm Ray VK4CF and you've been listening to QNEWS from VK4WIA.

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au
Secretary Clive 4928 1173
http://www.radarc.cjb.net/

This is Doug VK4DUG with news of some happenings in Rockhampton.

Once again, Mike VK4LMB rebroadcast last week's version of the WIA News from The Heritage Village in Rockhampton.

The Village is, if you like, a second home for the Rockhampton and District Amateur Radio Club, more generally known as the RADAR Club.

The previous broadcast from the village, was a somewhat historic 'first' for the club, and the village, in as much that it was the clubs first broadcast from this location. The RADAR Club has been given the use of a building in the complex and members are in the process of building a secure operating shack in a section of this building.

It is expected that a display of past and vintage radio equipment in the remaining area will revive some of the history of, not only radio in general, but amateur radio in particular, and generate some interest by the general public in our favorite pastime.

If you are in Rocky or just passing through, be sure to call in and say G'day and if you have any radio or associated pre-loved items that you think should be shown to others, then we would like to display them for you. You will find the Rockhampton Regional Heritage Village, conveniently, on the main highway, on the northern outskirts of the city.

73 From Rockhampton

GREETINGS !

THIS IS DON VK4FNQA, WITH NEWS FROM NORTH QUEENSLAND.

THE FEBRUARY TARC PROJECT NIGHT HAS SOMETHING
GREAT HAPPENING ON THE NIGHT!
A VISIT TO THE QUEENSLAND AMBULANCE SERVICE

TOWNSVILLE COMMUNICATIONS CENTRE IN HUGH
STREET CURRAJONG HAS BEEN ARRANGED FOR
MEMBERS BY PAUL VK4FOTO.

THERE WILL BE A LOT TO SEE AND THANKS TO POPULAR
DEMAND ADDITIONAL TOUR POSITIONS HAVE BEEN
ADDED FOR THE VISIT - HOWEVER THESE POSITIONS
ARE GOING FAST !
THOSE LUCKY ENOUGH TO GET ON THE TOUR WILL
NEED TO BE AT THE HUGH STREET COMPLEX GATHERED
AT THE CONCRETED CAR PARK FROM 1915 HOURS FOR
TOUR COMMENCEMENT WITH PAUL VK4FOTO BY 1930
HOURS TUESDAY FEBRUARY 9TH.
SHOULD YOU FIND THAT ALL THE PARKING SPACES
ARE TAKEN THEN STREET PARKING IS AVAILABLE IN
NEARBY MCLACHLAN STREET.

TO MAKE A DEFINITE BOOKING TO BE ON THE TOUR -
CONTACT PAUL VK4FOTO USING ANY OF THE
FOLLOWING METHODS -
BY ELECTRONIC MAIL TO VK4FOTO AT WESTNET DOT
COM DOT AU, OR PHONE 47731196 LEAVING A
MESSAGE ON THE ROBOT IF NECESSARY, OR
RESPOND TO THE TARC FACEBOOK INVITATION TO ATTEND.

PAUL WILL ADVISE YOU IF YOU WERE FAST
ENOUGH TO GET ON THE TOUR LIST.

AS I SUGGESTED LAST SUNDAY "DONT DELAY,
DO IT TODAY, ELSE YOU WILL MISS OUT !"

FOR OUR SECOND ITEM OF THE WEEK,
ITS NOW TIME TO TELL YOU THAT THE FIRST
MANAGEMENT MEETING FOR TWO THOUSAND AND
TEN OF THE TOWNSVILLE AMATEUR RADIO CLUB
INC HAPPENS THIS TUESDAY, SECOND OF FEBRUARY
FROM SEVEN THIRTY PM AT THE CLUB ROOMS,
PERCHED ATOP THE SES HEADQUARTERS IN GREEN
STREET WEST END.MAKE SURE YOU BRING ALONG
SOMETHING FOR THE SHOW AND TELL SESSION. ALL WELCOME !

OUR FINAL ITEM THIS WEEK CONCERNS A NEW
HF RADIO NET THAT HAS COMMENCED ON THE
FORTY METRE BAND AND ITS PROVING EXTREMELY
POPULAR.
THE AFTERNOON NET HAPPENS EVERY AFTERNOON
AT 0600 HOURS UTC OR FOUR PM TOWNSVILLE TIME
ON 7093 KILOHERTZ. ANY SUBJECT IS TALKED
ABOUT AS LONG AS IT IS DECENT AND NOT
DEPRESSING AND SELFISH CONDUCT ON NET IS
NOT TOLERATED, MAKING IT FAIR FOR ALL PARTICIPANTS.

THE NET IS CURRENTLY ATTRACTING STATIONS
FROM FAR NORTH, NORTH AND CENTRAL QUEENSLAND.

JOIN IN ON THE AFTERNOON NET AND MAKE
YOUR RADIO SHACK A HAPPY FACE PLACE.

WELL THATS ALL FOR THIS WEEK FROM TROPICAL PARADISE.
THIS IS DON VK4FNQA FOR THE TOWNSVILLE AMATEUR RADIO CLUB INC.
AND YOU HAVE BEEN LISTENING TO QNEWS FROM VK4WIA.

==> + PUBLIC SERVICE: HAITIAN AGENCY ANNOUNCES CONTACT INFORMATION FOR
AMATEURS GOING TO HAITI TO PROVIDE DISASTER RELIEF

The offices of CONATEL -- Haiti's national telecommunications
regulator -- were destroyed in the January 12 earthquake that
devastated the island nation. This office, like the FCC in the US,
administers the Amateur Radio Service in Haiti. Hams interested in
traveling to Haiti to help provide communications support have been at
a loss as to whom to contact. CONATEL has set up temporary offices in a
Port-au-Prince suburb and has indicated that those volunteers who wish
to operate in Haiti to assist with disaster relief need to contact the
agency to get formal reciprocal operating clearance. Read more here
<http://www.arrl.org/news/stories/2010/01/26/11310/?nc=1>.

==> + PUBLIC SERVICE: ARRL SENDS HAM AID EQUIPMENT TO HAITI
```

While the communications infrastructure in earthquake-ravaged Haiti is being rebuilt, there is need for Amateur Radio communications. To assist in this effort, the ARRL's Ham Aid program is providing equipment for local amateurs to use. On Friday, January 22, the League sent a programmed Yaesu VHF repeater with a microphone, as well as ICOM handheld transceivers, Yaesu mobile 2 meter rigs with power supplies and Kenwood mobile 2 meter rigs. Comet antennas, Larsen mobile antennas with magnet mounts, coax and batteries were also included in the package. Most items were donated by their manufacturers; the repeater and power supplies were purchased by the ARRL several years ago using post-Hurricane Katrina grant funds.

On January 25, Doug Lapin, K1OY, the Dominican Republic's Ambassador Accredited to the Secretary of State of Foreign Relations, stopped by ARRL Headquarters on his way back home. When he left, he carried with him 10 Kenwood handheld receivers, courtesy of the League's Ham Aid program. "We're making progress," Lapin told the ARRL on January 27. "The [Ham Aid package you sent] is stuck in customs. I'm working on getting it out. Members of the Radio Club Dominicano were much appreciative of the radios I brought and found it funny that my hand-carried radios arrived before the package. If we get it out, we will go back to Haiti tomorrow with the equipment."

Read more here <http://www.arrl.org/news/stories/2010/01/22/11304/?nc=1>, including information on how you can help the Ham Aid program in Haiti.

==> + ARRL LEADERSHIP: KENT OLSON, KA0LDG, APPOINTED DAKOTA DIVISION VICE DIRECTOR

In one of her first actions as ARRL President, Kay Craigie, N3KN, has appointed Dakota Division Assistant Director and former North Dakota Section Manager Kent Olson, KA0LDG, as the new Dakota Division Vice Director. The position became vacant when Dakota Division Director Jay Bellows, K0QB, was elected International Affairs Vice President at the 2010 ARRL Board of Directors Annual Meeting and Vice Director Greg Widin, K0GW, moved into the Director position. Read more here <http://www.arrl.org/news/stories/2010/01/25/11307/?nc=1>.

==> FCC NOTICE OF PROPOSED RULE MAKING TO REVISE AND CLARIFY VANITY CALL SIGN RULES OPEN FOR COMMENTS

Late last year, the FCC issued a Notice of Proposed Rule Making <http://www.arrl.org/news/stories/2009/11/25/11220/?nc=1> (NPRM) -- WT Docket 09-209 <http://edocket.access.gpo.gov/2010/pdf/2010-1262.pdf> -- seeking to amend the Commission's Amateur Radio Service rules to clarify certain rules and codify existing procedures governing the vanity call sign system, as well as revise certain rules applicable to club stations. Interested parties may make comments on the NPRM in the following ways: via the Federal eRulemaking Portal <http://www.regulations.gov> or via the FCC's Web site <http://www.fcc.gov/cgb/ecfs/>. Comments must be submitted by March 26, 2010; reply comments are due no later than April 12, 2010.

==> + THE DOCTOR IS IN: TUBES AND TUBE REPLACEMENTS

Rick Richardson, VE7WF, of New Westminster, British Columbia, recently has acquired some vintage vacuum tube-based equipment. He recalled that years ago, there was a product on the market -- Tubesters -- solid state replacements for vacuum tubes. He asked the ARRL's Doctor if anyone still manufactures such devices.

Here's what the Doctor had to say:

I do remember them, as well. If I recall, these were popular in the 1970s. To my knowledge, they are no longer available. You may find some on Internet auction sites from time to time. But before you go too far in that direction, I would think about what problem you are trying to solve. Old tube gear works very well with tubes, probably with better performance than "force fit" solid state replacements. In those days, many solid state receivers were quite vulnerable to overload and other problems, for example.

The nice thing is that most tubes are still available, often unused in original boxes and generally at similar prices to what they cost 50 years ago. An Internet search will turn up a number of places that sell tubes. I've always had good luck with Antique Electronic Supply <http://www.tubesandmore.com/>. If used within their ratings, tubes can last many years. I have WW2 vintage equipment that still works with some original tubes. I also have Drake tube based equipment from the period still going strong.

ARRL Lab Engineer Bob Allison, WB1GCM -- an amateur with years of dedicated experience with vintage gear -- notes that if the equipment has sat around for many years, the chances are the tubes are gassy. The glass part of a tube is not a perfect envelope. One molecule of air at a time leaks into the tube and after a few years, the performance degrades. If a tube hasn't been used in 20 or 30 years, it can appear to be totally dead. The trick to solve this to let the radio run for a day or two. The filaments in the tubes will eventually burn away whatever air is inside and the tubes will often be back in good shape.

The only exception that I often make is to replace power rectifiers with plug-in solid state equivalents. I usually make my own, but they are also commercially available. My rationale is that rectifier tubes generate a lot of heat the old gear doesn't need. In addition, the filaments can draw 15 to 20 W and by removing that load from the power transformer it should stay cool and last longer. Unlike tubes, power transformers are not so easy to find. If needed, the original condition can be restored by unplugging the solid state unit and putting the tube back.

Thanks Doctor! Do you have a question or a problem? Send your questions via e-mail <doctor@arrl.org> or to "The Doctor," ARRL, 225 Main St, Newington, CT 06111 (no phone calls, please). Look for "The Doctor Is IN" every month in QST <http://www.arrl.org/qst> , the official journal of the ARRL.

==> + ARRL AUDIO NEWS TEMPORARILY SUSPENDED

With the coming of the new ARRL Web site, we are looking at ways to better bring you Amateur Radio news. In order to do this properly, we will be temporarily suspending the ARRL Audio News while we look for solutions that will enable us to provide the technical quality and distribution channels that you expect from the ARRL. The last edition of the ARRL Audio News (for now) will be produced on Thursday, January 28.

==> + NOW YOU KNOW!: PHIL "GIL" GILDERSLEEVE, W1CJD

By ARRL News Editor S. Khrystyne Keane, K1SFA

Longtime readers of QST will certainly remember the cartoons of Phil Gildersleeve, W1CJD (ex-1ANE). Known affectionately as "Gil," he drew more than 1500 cartoons for the ARRL, many of them appearing on the pages of QST.

Gil started cartooning for the ARRL back in June 1927. His characters -- such as Jeeves the Butler and the gang at the Podunk Hollow Radio Club -- became old friends to readers of QST. Gil's first Jeeves cartoon was published in February 1940: From the other room comes his master's voice, saying, "Jeeves, come here and help me look for DX!" Jeeves, not really sure what exactly DX is, comes on the run with a road map, a telescope, binoculars, a lantern, a compass and a butterfly net in hand! As a native of the great state of Texas, my favorite Jeeves cartoon shows him trying to push a giant QSL card (from Texas, of course!) through the door -- the card can barely get through. Of course, things are bigger in Texas! If you ever tour ARRL Headquarters, you can see a large version of this cartoon in the second floor hallway.

The mythical Podunk Hollow Radio Club depicted the idiosyncrasies of a group of radio enthusiasts getting together. The cover for the June 1964 issue of QST shows the Podunkers -- hundreds of them -- happily camped out in a forest setting. In the large tent in the rear, several hams are operating their radios. In the foreground, several more are chatting up a couple of attractive girls in a convertible, little cartoon hearts fluttering over one ham's head. And off to the far right, the Department of Conservation is beginning to set up their blasting apparatus with its accompanying signs of "Turn off all two-way radios!"

But Gil also used his cartoons to teach proper on-the-air behavior. In March 1938, he drew an eight panel cartoon of a man calling CQ on CW. Each panel had the man getting older, where by the seventh panel, he was old, bald and with a long beard, spider webs all around. The last panel showed a tombstone that read "Here lies C. Q. McGall. He died without even signing his call." The next month, Gil drew a single panel cartoon with a line separating the panel into two parts. In the first part, he showed a radio amateur "all worn to a frazzle" from handling so much traffic, as well as dealing with QRM. The second half

showed two amateurs handling traffic as a team, "all full of vim and vigor." Gil's point was spot-on: "Cooperative operating does a better job with greater efficiency all around. Instead of harassed, inefficient, overworked operators, put key stations on a 6 or 8 hour basis, with relief and second operators for efficiency during intensive operation."

Gil's interests were not limited to ham radio. A native of Portland, Connecticut, he began working for the Middletown (CT) Press as the Portland correspondent in 1940, became county editor in 1943 then city editor in 1945. Sometime later, he was named news editor. His cartoons also decorated the Press and various trade journals. He served in the volunteer fire company and was captain of Fire Company No 2 for nine years, as a member of the Portland Board of Education for eight years, and as a vestryman in his local church.

In 1966, he was chairman of Portland's 125th anniversary celebration. As part of the celebration, he drew the town seal, depicting a number of elements of historical Portland. Foremost is an old-time oxen driver with his team, pulling a large brownstone sling; the greater part of Portland's 19th century wealth came from the brownstone industry. To the left of the oxen is a small building like those visible in old pictures of the quarries. Its tall chimney is smoking, connoting industry. To the right is another such building atop the quarry wall with a pulley for lowering things into the quarry.

<http://www.arrl.org/catalog/?item=0364> Gil passed away on November 4, 1966. "His work became a tradition," wrote former QST Managing Editor Laird Campbell, W1CUT (SK) in the foreword of Gil: A Collection of Classic Cartoons from QST <http://www.arrl.org/catalog/?item=0364>. "His knack for expressing ideas, feelings or situations unique to Amateur Radio was, and still is, unexcelled. [He] could take a rudimentary idea and turn it into a final masterpiece through the uncanny strokes of his pen. Gil's creations will never be forgotten...his conceptions remain alive in the minds of both old-timers and newcomers to Amateur Radio." Now you know!

==> SOLAR UPDATE

Tad "Who countest the steps of the Sun <http://www.poetryfoundation.org/archive/poem.html?id=172905>" Cook, K7RA, reports: We've seen average daily sunspot numbers for this reporting week. Since last Thursday through yesterday, the numbers rose more than 9 points to 28; the average solar flux slipped more than 2 points to 81.9. Geomagnetic indices were a tiny bit lower. We should be seeing sunspot numbers decline over the next five days. The predicted solar flux for January 28-31 is 78, 80 on February 1-2, 82 on February 3-4 and 88-89 for the following six days. We don't see any geomagnetic upset predicted until February 16, with the planetary A index only rising to 10. On the STEREO image <http://stereo.gsfc.nasa.gov/>, we can see sunspot 1041 in the Sun's southern hemisphere, past the central meridian. We also see a sunspot emerging from the unseen area of the

sun (currently around 12.5 percent, not visible yet to the STEREO mission) that is perhaps five days from emerging over the Sun's eastern limb. Look for more information in the Solar Update -- including some clarification, correction and expansion of the info in last week's bulletin <http://www.arrl.org/news/stories/2010/01/22/11302/?nc=1> concerning SID (Sudden Ionospheric Disturbance) events from Dick Grubb, W0QM of the Space Weather Prediction Center in Boulder, Colorado -- available on the ARRL Web site on Friday, January 29. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by William Blake's Ah! Sunflower <http://www.poetryfoundation.org/archive/poem.html?id=172905>.

==> THIS WEEK ON THE RADIO

This week, there is a running of the NCCC Sprint on January 29. The CQ 160 Meter Contest (CW) is January 29-31. The REF Contest (CW), the UBA DX Contest (SSB) and the SPAR Winter Field Day are January 30-31. The Classic Exchange (CW) is January 31-February 1. Next week, there is another running of the NCCC Sprint Ladder on February 5. Look for the FYBO Winter QRP Sprint, the Minnesota QSO Party and the AGCW Straight Key Party on February 6. The Vermont QSO Party, the YL-ISSB QSO Party (CW), the 10-10 International Winter Contest (SSB), the British Columbia QSO Party, the Delaware QSO Party and the Mexico RTTY International Contest are February 6-7. On February 7, check out the North American Sprint (CW) and the ARCI Fireside SSB Sprint. The New Mexico QSO Party is February 8. The ARRL School Club Roundup <http://www.arrl.org/SCR/> is February 8-12. The NAQCC Straight Key/Bug Sprint is February 10 and the CWops Mini-CWT Test is February 10-11. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, February 21, 2010, for these online course sessions <http://www.arrl.org/cep/student/> beginning on Friday, March 5, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member

Amateur Radio Newsline(tm) Report 1694 - January 29, 2010

Amateur Radio Newsline report number 1694 with a release date of
Friday, January 29, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams in Hawaii gear up to back a law that
will insure their right to operate mobile, earthquake relief efforts in
Haiti switch from HF to VHF, the ARRL Board discuses a lot of rescue
radio and accolades from the QCWA to a ham who has given his entire
life to the hobby, His name is Harry Dannals, his call is W2HD, and
you can find out the details on Amateur Radio Newsline(tm) report
number 1694 coming your wayright now.

(Billboard Cart Here)

**

RADIO LAW: HAWAII HAMS ASKED TO SUPPORT MOBILE CELL LAW THAT EXEMPTS
AMATEUR RADIO

Hams in Hawaii are being urged to support a state measure that while
banning the use of hand held cellular phones does exempt hams and other
users of mobile two-way radios. This, according to Ron Hashiro, AH6RH,
who tells Newsline that support from the ham in the street is crucial
to its passage:

--

AH6RH: The State Legislature in Hawaii has submitted House Bill Number
2225 that mirrors the cellphone bill that is active in Oahu. It is vital
that all hams in Hawaii take the time now to write or e-mail their state
representatives to support amateur radio in this bill.

"Also, they should take the time to submit testimony to the House Committee
on Transportation. As of yet there is no hearing date set, but as soon as
that takes place I'm sure that the amateurs will make support their right
to operate their radios while mobile."

--

Hashiro says that with a strong showing of support from the Hawaiian ham
radio community that this bill has a good chance to become law:

--

AH6RH: "I'm pretty sure that we can continue the exemption for amateur
radio because of the hard work that was done on Oahu and (both) the

testimony and the impact of amateur radio during Hurricane Iniki, during the earthquake of 2006 and even during a recent island-wide generator power outage. Once again the community has seen the value of amateur radio and this is something that the council members have recognized."

--

According to AH6RH, this bill, if passed into State law, will override the ordinances and bills at county levels. Hams in Hawaii and those around the world interested in keeping track of this pending legislation can follow at http://www.capitol. hawaii.gov/ session2010/ gethearing. asp?query= HB2225 (AH6RH, KH6QX)

**

RESCUE RADIO: HAITI HF EMCOMMS WINDING DOWN

Long distance amateur radio communications into and out of quake-ravaged Haiti is quickly disappearing as we hear from Amateur Radio Newsline's Bruce Tennant, K6PZW:

--

As the recovery in Haiti continues, the need for international ham radio communications on the High Frequency bands is winding down. In the weeks since the quake, Haitian telecommunications personnel and international relief workers have been doing all they can to rebuild communications into and out of that nation.

International telecommunications companies have brought in portable cellular telephone nodes and numerous transportable satellite ground stations. And according to news reports here in the United States, at least one geosynchronous communications satellite has been repositioned as a dedicated international communications link to and from Haiti to carry telephone, data and video. Because of this an all clear has been issued for almost all the frequencies on 75, 40 and 20 meters that had been in use during the initial phase of the post earthquake recovery effort.

According to a news release from the International Amateur Radio Union Region 1, as of 1800 UTC on January 22nd, the frequencies of 14.300, 14.265, 7.045, 7.065, 7.265, 3.720 and 3.977MHz were returned to normal use. Also, and the groups who have been passing messages on those frequencies were to revert to monitoring mode or to their normal operations.

And a similar release comes from Dr. Cesar Pio Santos, HR2P. Santos is the IARU Region 2 Emergency Coordinator and his statement announced the release of several H-F frequencies including 7.045 and 3.720 MHz for normal use.

That said, the IARU wants to remind hams worldwide that there are still a number of radio amateurs in the Haiti who are attached to various relief groups. These hams may still be heard on the amateur bands on a number of frequencies according to their particular needs and to maintain contact with their home countries. The IARU asks that you listen before transmitting on frequencies known to handle Haiti relief traffic.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Giving priority to earthquake relief communications is expected of all of us. (ARNewsline(tm), ARRL, Others)

**

RESCUE RADIO: HAITI HAM RADIO EMCOMM EMPHASIS NOW GOES VHF

While the requirement for log distance high frequency ham radio communications to and from Haiti is quickly coming to an end, the need to expand lines of communications within that nation are ever increasing. Bill Pasternak, WA6ITF, is in the newsroom with this part of the story:

--

While both cellphones and text messaging nodes are being installed in Haiti as fast as humanly possible, these are primarily being used for international communications by aid workers. And with Haiti's in country communications infrastructure years from full reconstruction, ham radio on 2 meter FM is quickly becoming a primary communications lifeline for relief operations.

As reported last week, hams from the Dominican Republic risked their lives trying to restore ham radio communications in Port au Prince. They had to retreat but were able to set up several repeaters near the Dominican Republic's border with Haiti that when linked give coverage of the entire Haitian nation. These machines were quickly pressed into service by the Red Cross and likely other relief agencies.

Also, a D-Star repeater was supposed to be on its way to Port Au Prince, but at airtime its not known if the group that was supposed to deliver and install it has yet arrived.

But more communications channels across Haiti are still needed. To help in this area, on Friday, January 22, the American Radio Relay League sent a programmed Yaesu VHF repeater with a microphone, as well as ICOM handheld transceivers, Yaesu mobile 2 meter rigs with power supplies and Kenwood mobile 2 meter rigs down to Haiti via the Dominican Republic's national ham radio society. The supplies shipped also included Comet antennas, Larsen mobile antennas with magnet mounts, coax and batteries. All of these items were from the ARRL's Ham Aid program. This gear had been donated by their respective manufacturers out of concern for the situation in Haiti.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF.

--

The gear was sent to the Radio Club Dominicano via its president for distribution most likely because it is still impossible to know the level of survival of hams within Haiti or their ability to provide in country emergency communications services to that quake ravaged nation. One thing

that is desperately needed by the Radio Club Dominicano is funding to purchase a generator to power the repeaters. If you can help in this, please contact Allen Pitts, W1AGP, at ARRL Headquarters. The phone number is 860-594-0200 and his e-mail is W1AGP at ARRL dot org. (ARNewsline(tm), ARRL, Others)

**

RESCUE RADIO: OBTAINING PERMISSION TO OPERATE IN HAITI

And be it on H-F or VHF, amateurs wishing to operate in Haiti to assist with disaster relief will need to contact that nations telecommunications regulator to get formal reciprocal operating clearance. Don Wilbanks, AE5DW, reports:

--

If you are a ham who has been asked to come to Haiti to operate on behalf of earthquake relief operations, you will need to get a temporary reciprocal operating permit from the Haitian government. To accomplish this, CONATEL which is an acronym for Haiti's National Council of Telecommunications has set up temporary offices and now has phone and e-mail service available. This, to clear those who may respond to the need for communications volunteers.

In a press release, CONATEL says that it has set up a satellite office of at Number 97 of the Avenue Panamï¿½ricaine in Pï¿½tion-Ville with the goal of
assuring the continuity of its work. This arrangement says the agency will allow, among other things, better coordination for establishing a temporary emergency telecommunications network in Haiti.

Anyone who needs to operate radio equipment in Haiti is asked to contact CONATEL at its temporary address or by phone throughout the day. This by dialing international calling code 011, then the Haitian country code 509 followed either by 3454-0541, 2516-0000 or 3702-1414. CONATEL can also be reached by e-mail to techommunication@yahoo.fr or info@conatel.gouv.ht.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW, near New Orleans.

--

No matter how you contact CONATEL it is imperative to do so before any use of telecommunications equipment or the spectrum resources in Haiti. This, the agency says is to avoid interference problems and possible conflicts between the incumbent operators established in Haiti and those who are newly operating in what CONATEL calls an unusual
circumstance. (ARNewsline(tm), ARRL, Others)

**

BREAK 1

From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the KB9FBI repeater serving Jacksonville Illinois.

HAM RADIO POLITICS: ARRL BOARD OF DIRECTORS LOOKS AT EMCOMM AND OTHER ISSUES

The ARRL Board of Directors held its 2010 Annual Meeting on January 15th and 16th in Windsor, Connecticut with emergency communications front and center on the agenda. Amateur Radio's Mark Abramowicz, NT3V, takes a look at what was accomplished:

--

Three major steps taken by the board on the topic surround the appointment of an advisory committee; signing a memorandum of understanding with the American Red Cross; and proposing a revision in the federal regulations related to amateurs and participation in emergency communications drills on behalf of an employer.

After rejecting the idea of an advisory board at it's meeting last July, the board did an about face and appointed just such a committee.

It's expected that the Emergency Communications Advisory Committee will play a large role in helping to shape ARRL board policy on a primary mission of the amateur radio service - being prepared to respond in times of emergency or disaster both here and abroad.

The second step, signing of a Memorandum of Understanding with the American Red Cross - appears to resolve the thorny issue of criminal background checks required by the organization for all volunteers.

Several amateur radio volunteers expressed concern that the contractor hired by the Red Cross to do such background checks had far too much latitude in the kind of information it could gather - including credit reports and other personal information.

The M-O-U now gives Amateur Radio Emergency Service volunteers permission to obtain and pay for their own criminal background check from a law enforcement agency rather than submitting to the scrutiny of the Red Cross' private contractor.

The agreement also requires the Red Cross to give ARRL members this information to give them an opportunity to make an informed decision as to whether they want to volunteer with the Red Cross.

Finally, the board directed ARRL staff to petition for a change in Section 97.113(a)(3) of the FCC rules related to amateurs taking part in emergency preparedness or disaster drills.

It wants to give radio amateurs the ability, on behalf of an employer, to take part in such activities.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

The complete Minutes of the 2010 Annual Meeting of the ARRL Board of Directors will be available soon on the ARRL Website. That's in cyberspace
at www.arrl.org. The next meeting of the ARRL Board of Directors is scheduled for July 16th and 17th. (ARNewsline(tm) from ARRL release)

**

RESCUE RADIO: FCC GRANTS ANOTHER 97:113 EMCOMM WAIVER REQUEST

The FCC has granted a yet another request for a waiver of Section 97.113 of its rules. This from the Grundy County Emergency Management Agency in Morris, Illinois to use the services of four ham radio operators in its employ to take an active part in several upcoming emergency preparedness drills.

In granting the waiver the FCC specifically stated that it would permit Jim Lutz, N9UCP; Joe Schroeder, KC9JYZ; Chris Kindelspire, KC9GCK; and John Watters, KC9KKO to take part in these exercises slated for March 24th and July 28th at various locations in Grundy County. In granting the request the FCC noted that while Section 97.113(a)(3) of its rules normally prohibit hams in an agency's employ to take part, it granting the waiver request as being appropriate under the circumstances presented in the Grundy County Emergency Management Agency's filing. You can read the entire text of the waiver grant at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-10-124A1.doc (FCC)

**

RESCUE RADIO: ALABAMA HAMS SAY THAT THEY SAVE THE COUNTY THOUSADS OF DOLLARS

According to a January 20th report in the Athens Alabama News Courier, ham radio operators have saved the county over a hundred thousand dollars. This, through their volunteer emergency communications expertise.

The article quotes Joe Ivey, W4JSI of the Limestone Amateur Radio Emergency Service as telling the County Commission that his organization contributed $136,625.47 in services to the community in the last calendar year. Ivey said that this tops the previous year donated service value by $8,000.

Ivey noted that what the club does is at no cost to anyone. He added that local hams perform communication for organizations from the Emergency Management Agency to the Christmas parade..

County Commission Chairman David Seibert thanked Ivey and the Limestone Amateur Radio Emergency Service for the valuable public service that they perform. (eHam)

RADIO LAW: FCC BANS 700 MHz WIRELESS MICS AS OF JUNE 12TH

The FCC has prohibited the further distribution and sale of devices that operate in the 700 MHz band. This, to clear this spectrum for public safety and 4th generation or 4 G consumer communications gear.

In its January 15th release, the FCC says that the spectrum in the 700 MHz band had already been auctioned to several wireless service providers following the June 12, 2009 Digital television transition. It also notes that its Order and Further Notice of Proposed Rulemaking primarily affects wireless microphones and those who operate them.

The FCC says that a sunset period running through mid-June of this is being provided for those currently using 700 MHz wireless mics. As of June 12, 2010 use of those devices will be prohibited. More on this story is on line at www.fcc.gov/cgb/wirelessmicrophones. (FCC)

**

RADIO LAW: FCC ASKS CONGRESS FOR ADDITIONAL MONTH ON BROADBAND PLAN

The chairman of the Federal Communications Commission is asking for a one month extension on the mandate that his agency has develop a national broadband plan that it is required to submit to Congress.

The creation of such a blueprint was mandated by last year's economic stimulus bill. It was due to lawmakers by Sunday, February 17th. But the FCC is now asking for an extra month to finish digging through the massive volume of public comments that it has received over the past 11 months on how to make universal broadband a reality. The staff involved in preparing the plan also wants more time to brief the FCC's five commissioners and members of Congress.

The request for an extension needs to be approved by the Senate and House Commerce Committees. They are the bodies in Congress which have jurisdiction over the FCC. (Published news reports)

ENFORCEMENT: $51 MILLION JUDGEMENT IN SAT-TV SOFTWARE CASE

It's the biggest judgement ever issued against an individual for helping others to obtain pay television without paying the monthly fee. Amateur Radio Newsline's Don Carlson, KQ6FM, is in Reno, with the rest of the story:

--

The Dish Network, EchoStar and NagraStar satellite services have won a $51 million dollar judgement against one Robert Ward. This, after a federal judge in Tampa, Florida, found that Ward had posted software on the Internet that would permit people to receive subscription satellite TV without paying a fee.

The three plaintiffs said the summary judgment ruling made two significant findings that will strengthen their companies' ability to pursue cases like this in the future. First the court held that the posting of illegal software constitutes a violation of the Communications Act. Second that

the statutory damages in the case should be calculated based on how many individuals downloaded the illegal software.

There is a reality side to this matter. That being weather or not any of the plaintiffs will be able to collect any or all of the $51 million dollar judgement against Ward remains to be seen.

I'm Don Carlson, KQ6FM, in Reno.

--

Collect it or not, the amount of the judgement and its implications to future cases of this type has send what can best be called shockwaves through the on-line communities that believe that they have a legal right to decode and watch pay television stations free of charge. More on this matter is on-line at http://www.rbr.com/tv-cable/19881.html (RBR)

CHANGING OF THE GUARD: FORMER FCC COMMISSUIONER JAMES QUELLO - S.K.

Former FCC Commissioner and Interim FCC Chairman of the Federal Communications Commission, James H. Quello died Jan. 25 of heart and kidney failure at his home in Alexandria, Virginia.

Quello, who was often called the informal dean of the commission, joined the body in 1974 and was named Interim Chairman in 1994. While a commissioner Quello was best known as a strong defender of free, over-the-air broadcasting . But while he exited the commission in 1997 Quello kept his hand in the business and policy that had been his life. He had most recently been a public policy consultant for the law firm of Wiley Rein and Fielding working alongside former FCC Chairman Richard Wiley. He was also the founder and chairman of the board of the James H. and Mary B. Quello Center for Telecommunication Management and Law at his alma mater of Michigan State University.

James Quello is survived by his sons, James M. and Richard B. Quello, his wife, Kim, granddaughters Susan Butler Quello and Diane Watson, and a great granddaughter, Bethany Watson. Interment will be held at Arlington National Cemetery. He was 95. (B & C)

NAMES IN THE NEWS: HARRY DANNALS, W2HD, NAMED PRESIDENT EMERITUS OF THE QCWA

A name synonymous with ham radio for over seven decades has become only the third person ever elevated to the post of President Emeritus of the Quarter Century Wireless Association. This as the organization names Harry Dannals, W2HD, of Charlottesville, Virginia to this truly prestigious standing.

Perhaps best known for his decade from 1972 to 1982 as president of the American Radio Relay League, Harry also served as President of the QCWA from 1989 to 1994. As such he is the only person to have ever held this leadership position in both organizations.

In addition to his work with both the QCWA and ARRL where he also holds the status of President Emeritus, the former W2TUK is a Fellow in the Radio Club of America, a member of the Society of Wireless Pioneers, the Old Old Timers Club, and the Veteran Wireless Operators Association. In 2002 he was inducted into the CQ Magazine Amateur Radio Hall of Fame.

Harry Dannals elevation as President Emeritus of the Quarter Century Wireless Association was announced on January 22nd. The only other ever elected to this position within the QCWA were Leland W. Smith, W5KL, and Lewis 'Mac' McCoy, W1ICP, both of whom are now Silent Keys.

In making the announcement, QCWA President Bob Roske, N0UF, said that he had earlier in the day spoken with W2HD. He told Newsline that Harry was very happy to receive the honor. N0UF added that this is the first time in a long time he actually heard a smile! (QCWA)

**
NAMES IN THE NEWS: RICHARD FISHER KI6SN NAMED NEW EDITOR OF WORLDRADIO ONLINE

CQ Communications, Inc. has announced that veteran journalist and writer Richard Fisher, KI6SN, has been named the new Editor of WorldRadio Online, effective with the April issue.

The 59 year old Fisher recently completed a 35-year career in newspaper print and online journalism. This, in a variety of reporting, editing and management roles. He also has a 17-year association with WorldRadio, first joining the magazine in 1993 as its QRP columnist. This is a post he held until the magazine's transition from print to online in February 2009.

Fisher is currently a columnist for three magazines published by CQ Communications. In addition to his WorldRadio Online editing duties, he will continue to write the "Washington Beat" column for Popular Communications, the "Public Service" column for CQ Amateur Radio, and the "Trail-Friendly Radio" column for WorldRadio Online.

Fisher will succeed Nancy Kott, WZ8C, who has been Editor of WorldRadio and WorldRadio Online for the past eight years. After guiding Worldradio from print to electronic publication she announced her impending departure in the February issue of the on-line magazine. (CQ)

HAM RADIO IN SPACE: SUMBANDILLASAT TEMPORARILLY SUSPENDS OPERATIONS

The Amateur Radio FM transponder on the SO-67 SumbandilaSat ham radio satellite has been temporarily suspended. This, to permit completion of the satellite commissioning activities

According to Jan Albert writing on the On the AMSAT bulletin board, there is little more than 6 weeks left in which to complete the commissioning activities on SumbandilaSat before operations are planned to be handed over in middle-March to the Satellite Application Center. That's who will then continue to operate the satellite on behalf of the Department of Science and Technology which actually owns the satellite. Since progress is currently hampered by the various South Africa AMSAT payload activities,

Albert says that there is no choice but to temporarily suspend this service on SO-67. He adds that plans are to have SO 67 back on the air by the end of March or sometime in early April. So far SumbandilaSat has successfully executed more than 320 payload activation's since hams began using the ham radio payload at the end of 2009. (ANS)

**

HAM RADIO IN SPACE: NEW AO-7 AMERICAS QSO DISTANCE RECORD

A new distance record has been set within the Americas over an aging ham radio satellite. On Sunday January 24th at 22:52 UTC Joe Spandler, K3SZH in Harrisburg, Pennsylvania, held a short contact with Francisco Ramires, PY2OV in Sao Paulo, Brazil using the 70 cm to 2 meter transponder on the 35 year old AO-7 ham-sat. The distance between the two stations was 7738 km and is believed to be the furthest contact within the Americas, but falls just short of the ZS6BB to EA6SA international contact at a distance of 7766 km. ZS6BB to EA6SA stands as the record for the AO-7 bird which was launched on November 15, 1974 on board a Delta rocket from Vandenberg Air Force Base in California. (Southgate)

**

WORLDBEAT: SV2SAP SAYS RETURN SY TO MT ATHOS

Mount Athos resident radio amateur, Monk Apollo, SV2ASP/A is calling for the return of SY prefix to the monastery`.

For many years the prefix 'SY' was assigned exclusively to the DXCC entity Mount Athos in Greece. This was later changed to 'SV/A' but for many radio amateurs the SY prefix is still connected only to Mt Athos, although every Greek radio amateur may apply for a SY prefix.

According to the Southgate News, this is a thorn in the side of Monk Apollo. And now he is asking DXers from all over the world to send an e-mail to the Greek licensing authority at yme@otenet.gr that asks it to stop this practice.

At the moment Monk Apollo is active mainly on RTTY because this mode is silent and does not disturb the other monks. He prefers operating on 160 through 30 meters from 1700 to 2100 UTC. However be aware that his SV2ASP/A call was used by a pirate operator at least once this year on January 12th. (Southgate)

**

DX

In D-X, word that a group of radio amateurs across Spain will activate the special callsign AO1ANT between February 22nd and the 28th to celebrate the 'Seventh Antarctic Week' international event. Their reference number will be WAP-180 and their activity will be on SSB, CW, PSK31 and RTTY modes, using all the amateur bands from 160 through 10 meters. QSL via EA1GHT, either direct or by the Bureau.

And lastly, XR9JA will be the callsign of the upcoming Greenwich Island operation by XQ5CIE, CE6UFF, F6DXE and CE5COX. The operators will be there from February 1st to the 28th using CW, SSB, and PSK-31 on 160 through 6 meters. They also plan satellite operation using AO-51. QSL via CE5JA either direct or via the bureau.

(Above from various DX news sources)

**

THAT FINAL ITEM: A FINANCIAL HEALTH UPDATE ON NEWSLINE

And finally this week, we have a brief update on Amateur Radio Newsline's financial health. Here again is our President and Producer, Bill Pasternak, WA6ITF:

--

Before I go any further, I want to thank each of you who sent notes and e-mails of condolence on the passing of our Treasurer and Support Fund Administrator Andy Jarena, N6TCQ. It made us feel good to know that so many of you felt toward Andy the way that we did.

It has been a very busy several weeks for me after taking on the added role of interim treasurer after Andy left us. Nor was it a very happy time because Andy was one of my closest and dearest friends for over two decades. And I was honored to have been asked to represent his world of interest in amateur radio at a celebration of his life that his life partner Judy Hurst and his sister Ann Albertson held in his memory on Saturday January 23rd.

In keeping with Andy's desires, this was not a sad gathering. Rather it was a group of people whose lives had cross Andy's and who remembered him with sincere fondness, friendship and warmth. And in retrospect, for many of us it was that catharsis we needed to close this chapter of our lives by being able to publicly say goodbye to our friend who had been an inspiration to all of us.

On another topic, I and the entire Amateur Radio Newsline production team want to thank those of you who heard our emergency funding plea and made a contribution. Thanks to you caring and thanks to your coming to our financial rescue we have made it through January and have enough to hold us thorough at least the first few weeks of February. After that -- well -- it remains to be seen, but for the next few weeks we should be OK.

Last but by no means least, we wish we had the resources to send each of you a personal note or card to thank you. Unfortunately we do not have that luxury. So, from the collective hearts of all of us at Amateur Radio Newsline we send our "thank you" in this way. Over the Internet. Over the telephone and over the airwaves, It comes from our sincerest gratitude to which Ill add that having you as listeners and supporters makes us feel truly blessed.

I know that Andy said this many times in the past, but please permit me to say that you are not just an audience, You are in your own way, a vital part of what we like to the Amateur Radio Newsline family and we are truly fortunate to have you on our team.

Again, I say thank you -- and for this week -- 73.

I'm Bill Pasternak, WA6ITF.

--

Than you Bill. (ARNewsline(tm))

METEORSCATTER-News

In February and March, Sporadic Meteors reach their annual minimum
of activity; anyway, MS-DXing is still possible in 144 MHz,
especially in the morning (when Sporadics have their daily maximum)
and over distances close to optimal (around 1300 Km). Only minor
showers hit the Earthï¿½s atmosphere in February and March. The most
significant is Capricornids-Sagittariids, a daytime shower, capable
of providing fairly good meteor rates sometimes at the end of Jan.
ï¿½ early February, Have a look to shower predictions for February -
March 2010 at our MMM MS-Propagationpage:

Flights are booked and confirmed. So the time frame will be March
12nd until May 06th... More infos/details will follow here...
SOURCE: tnx to Karsten, DL2LAH/HS0ZIL, direct to MMMonVHF

*** F / JN24 ***

144 MHz Activity from one of the most wanted french Squares
(http://www.mmmonvhf.de/emws.php) JN24PE, by Steffen, F/DD0VF.
QTH is 1400m asl so some attempts >2000km might be possible from
QTF 310 to 060,but I don't know the exactly location (+/-500m) yet.
Rig: 100W + 7el 1.5wl or 9el 2.5wl - I need info or help about a
french SIM-card for my mobile phone for internet access. Any help?
Pse direct to Steffen or via MMMonVHF (www.mmmonvhf.de/kontact.php)
SOURCE: tnx to Steffen, DD0VF, direct to MMMonVHF

*** OH / KP31 and WET Squares ***

OH5SB/mm (Gerd DL2SB) will activate the wet squares at the Baltic
on 2m SSB in summer 2010 again. Trip from Germany to Finland on
4. July 2010, trip from Finland back to Germany on 29. July 2010.
Main frequency on 2m 144.288 (after the decimal double of number
before the decimal) or maybe sometimes 144.300. Always depending
on weather conditions because I am sitting on the outer deck.
If during the time of my ship travel there happens to be an opening
on 6m that I can work with a simple antenna, I can also go on 6m
and try to activate the wet squares there. In Finnish regulations,
mobile operation on 6m is allowed now. But I cannot use a
directional antenna for 6m on the ship. I am alone during the trip
and have to carry everything at one time in my both hands.
Between the two ship travels of course in the summer QTH KP31MC
again, mainly HF and 6m. All infos and details pse subscribe:
http://www.mmmonvhf.de/latest.php?id=3080
SOURCE: tnx to Gerd, DL2SB/OH5SB direct to MMMonVHF

GB2RS NEWS

Sunday 31st January 2010

The news headlines

PW Publishing joins the fight for the Spectrum

CQ magazine columnist becomes a silent key

New repeater keeper sought

PW Publishing, publishers of Practical Wireless and RadioUser, has joined the fight for the Spectrum as the first corporate donor to the RSGB Spectrum Defence Fund. They have also generously given the RSGB advertising space throughout the year to highlight the problems of PLA and PLT interference. Donations are still coming in for the fund, although more is needed to carry on the fight for a clean spectrum and the RSGB would like to thank those people who have already donated, including many members from the UKQRM group. If you are wondering what the QRM from these devices sounds like, visit the UKQRM website. You will also find the necessary information for reporting this QRM at www.mikeandsniffy.co.uk/UKQRM/.

Sad news now from the USA. CQ Magazine columnist David Ingram, K4TWJ passed away last week. He was 67. Dave had written for CQ magazine since 1981 and had also written for RadCom. Dave suffered from a major heart attack on New Year's Eve.

Len, GM0ONX is looking to stand down as repeater keeper for the GB3AY and GB3KA repeaters. If you think you can assist in this valuable role on behalf of the Central Scotland FM Group please contact Len on 01563 534383 or by e-mail at Len@gm0onx.co.uk.

To celebrate the Olympic Winter Games in Vancouver, Canada, from 1 February to 1 March, Canadian amateurs may change their prefix. VA stations can use the prefix VG, VE stations may use VX, callsigns starting VO may use XJ and VY stations may use XK.

Neil, G3RIR and Reg, G8VHI are in the early stages of arranging the VHF and Up stream for this year's RSGB Convention, which will be held over the weekend of 9 and 10 October. They would like to hear from the VHF, UHF and microwave communities what subjects should be covered this year and from those who would like the opportunity to present a paper at the Convention. Contact them via e-mail to g3rir@yahoo.com or regwoolley@

aol.com.

Wakefield & District RS are planning to start an Advanced course this month with a view to sitting the June/July exam. The course fee, including administration, light refreshments and the exam fee will be £80 and external candidates will be welcome. Any interested parties should register with Dave Lockwood, G4CLI by e-mail to G4ALI@wdrs.org.uk or telephone 07 748 221 855.

Mid Sussex ARS is about to hold its Foundation and Intermediate courses and are looking for candidates. Please contact Phil Brown, M5BTB by e-mail to m5btb@msars.org.uk for further information.

Bromley & District ARS will be holding a two day Foundation Course in Hayes, Bromley on Saturday 27 February and 13 March. Enquiries to Andy, G4WGZ on 01689 878089 or via the BDARS website at www.bdars.org/contact-us.shtml.

2

The Fareham & District Amateur Radio Club is running a Foundation course starting on 21 March. Anyone interested can contact Derek, G4JLP on 01329 823405 or visit the club meetings any Wednesday evening. The website for further information on the club is www.fareham-darc.co.uk.

And now for the details of rallies and events for the coming week

On 31 January, the Horncastle Winter Rally will take place at the Horncastle Youth Centre, Lincolnshire LN9 6DZ. Doors open at 10am for disabled visitors and 10.30am for other visitors, entry will be £1.50. More details from Tony, G3ZPU, on 01507 527835.

On 7 February the 25th Canvey Radio & Electronics rally takes place at The Paddocks, Long Road, Canvey Island, Essex SS8 0JA. Entry is £2 and there is free car parking. Opening time is 10.30 and you can get more information from Dave, G4UVJ, on 01268 697978, evenings only please.

Due to circumstances beyond their control, the organisers of the Hornsea Amateur Radio Rally have been forced to alter the date of their Rally from 19 September to 17 October 2010. The new date and all other details will appear in the March issue of RadCom.

Now for the news of special events

GB2EI will be on the air in conjunction with EI2GBW to celebrate the reintroduction of the Swansea to Cork Ferry Service due to commence on 1 March, the original service being established in 1896. The station will be on the air at various times until 31 March.

YR5EPC is a special event station from Transylvania, Romania. It will be active using PSK on all bands throughout the year. The QSL manager is YO6AJI.

To celebrate the Olympic Winter Games in Vancouver, Canada, from 1 February to 1 March, VG7G will be on the air. QSL via VE7OM.

UK special events stations to listen for on 1 February are GB0RDF for Radio Direction Finding in Daventry and GG100MHG for the Market Harborough Guides.

And now the HF DX news compiled from 425 DX News and other sources.

Nine operators of The Caribbean Buddies 2010 team go to St. Lucia, J6, from 2 to 10 February. Their QTH is a cliff-top villa and they will operate portable from various spots on the island too, on CW, SSB and digital. They are still working on their licensing but each operator expects to end up with his own call. QSLing will be by LoTW, eQSL or direct to the individual operators, with SASE required.

Gerd, DJ4KW, and YL Gisela, DK9GG/V31GW, will once again operate as V31YN from Belize, until 28 February. Gerd will then operate as V31YN/P from IOTA NA-180 at the Blue Marlin Lodge, 2 to 7 February.

Now the contest news

February contesting begins on 80m on Monday the 1st with the Club Championships. The sequence in which the modes are used is rotated every month, so this month it's SSB first. The timings are 2000 to 2130UTC and the exchange is signal report and serial number.

3

Tuesday 2 February bring the 144MHz UK Activity Contest and Club Championships between 2000 and 2230UTC. Using all modes the exchange is signal report, serial number and locator.

The Black Sea Cup International Contest 2010 takes place from 1200UTC on 6 February until 1159 on 7 February. Rules can be found, in English, at http://bscc.in.

On the morning of Sunday 7 February the 432MHz AFS contest takes place. This is a team event with a maximum of three members in each team, although clubs can enter more than one team. Clubs must be affiliated to RSGB to compete, but the members need not be RSGB members. However, if you want to submit an entry as a Single Operator, you do need to be an RSGB member. The activity takes place between 0900 and 1300UTC and the exchange is signal report, serial number and locator.

Now the solar factual data for the period from the 18th to the 24th of January, compiled by Neil Clarke, G0CAS on the 25th of January.

As an active sunspot region approached the south-east limb it produced 6 M class and 21 C class solar flares taking solar activity to moderate levels. The last M class solar flare occurred in March 2008. Once the sunspot group became visible flare activity decreased to very low levels. Solar flux levels increase from 82 units on the 18th to 85 by the 23rd and the 24th. The average was 83. The 90 day solar flux average on the 24th was 77 units, that's the same level as last week.

X-ray flux levels averaged B1.1 units, a level not seen for a long time. Geomagnetic activity started at quiet levels but a new coronal hole had developed and rotated on the Sun to where it would affect the Earth's magnetic field and by the 20th the Ap index increased to 14 units. This is the highest daily figure since the 22nd of October last year. The average was Ap 5 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 320 kilometres per second on the 18th to 530 by the 20th. Particle densities were low except for a brief rise to 48 particles per cubic centimetre during afternoon of the 20th. During the disturbance the Bz fluctuated between minus 17 and plus 15 nanoTeslas. On the quieter days the Bz varied between minus 6 and plus 5 nanoTeslas.

During the afternoon of the 22nd a large sporadic-E opening took place covering most of Europe and lasted over two hours and saw activity on 50MHz. It's most unusual to see an opening of this size at this time of year. Other smaller opening also took place.

And finally the solar forecast. Since the 9th of December there as been two sunspot groups on the Sun spaced 180 degrees apart, so, as one group rotates out of sight the other group appears over the opposite limb. There as only been 3 days when no spots were visible. This situation will last till one or both groups decay and disappear. So for the coming week there remains a good chance that spots will be visible. Solar activity is expected to be very low to low. Solar flux levels could be in the 80's if spots appear or lower if not. Geomagnetic activity should be quiet everyday. MUFs during daylight hours at equal latitudes should be around 21MHz for the south and 18MHz for the north. Darkness hour lows should be about 7MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of about 28MHz. The optimum working frequency with a 90 per cent success rate will be around 22MHz. The best time to try the path will be between 1000 and 1500UTC.

And that's all for this week from the propagation team.

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA On Monday 1 February Basingstoke Amateur Radio Club is holding a junk sale. Details from Clive, G4ODM, on 01256 326050. On Monday 1 February Braintree & District Amateur Radio Society is having a construction evening, and possibly operating on 80m. For more information contact John, M5AJB, on 01787 460 947. On Monday 1 February Burnham Beeches Radio Club is having a talk on SDR by M1FHU. Contact Dave, G4XDU, on 01628 625 720. On Monday 1 February Milton Keynes Amateur Radio Society is having a shack open night. For more information go to www.mkars.org.uk. On Monday 1 February Southdown Amateur Radio Society is having a practical demonstration of magnetism by Steve, M3EVM and Tony, G0EYE. Details from John, G3DQY, on 01424 424 319. On Monday 1 February Surrey Radio Contact Club is having the Sid Morley Memorial Lecture. For more information contact Ray, G4FFY, on 020 8644 7589. On Monday 1 February Waterlooville Amateur Radio Club is holding its exam course. Details from Rich, G4IBW, on 02392 680852. On Tuesday 2 February Andover Radio Amateurs Club is having a demonstration of commercial SDR radios. Details from Martin, M0MWS, on 07776 181646. On Tuesday 2 February Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815. On Tuesday 2 February Cambridge & District Amateur Radio Club is having its Advanced License Exam at Radegund Road. Details from Lawrence Micallef, M0LCM, on 07941 972724. On Tuesday 2 February Chelmsford Amateur Radio Society is having a talk on the loop fed array Yagi by Justin Johnson, G0KSC. Contact Martyn, G1EFL, on 01245 469 008. On Tuesday 2 February Horndean & District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 023 9247 2846. On Wednesday 3 February Dover Radio Club is having a natter and operating night. For more information contact Brian, G4SAU, by email to g4sau@darc.org.uk. On Wednesday 3 February Hastings Electronics and Radio Club is having an auction in aid of Hastings Repeater Group. Details from Gordon, on 01424 431 909. On Wednesday 3 February Southdown Amateur Radio Society is operating at the Hailsham shack. Details from John, G3DQY, on 01424 424 319. On Wednesday 3 February Worthing & District Amateur Radio Club is watching a collection of vintage radio films from the British Vintage Wireless Society. For more information contact Roy, G4GPX, on 01903 753 893.

5 On Thursday 4 February Cambridge University Wireless Society is having a talk on sunspots and solar physics by Dr Michael Proctor. Visitors are welcome. Details from Martin Atherton, G3ZAY, by email to g3zay@btinternet.com. On Thursday 4 February Cray Valley Radio Society is having a talk by Paul, G3SXE about his recent trip to Jamaica where he helped to set up the university club station in Kingston. Details from Bob, 2E0RCV, on 020 8265 7735 after 8pm. On Thursday 4 February Horsham Amateur Radio Club is having part 4 of the talk by Ron Polley, G3PYC, entitled The History of Mr Polley. Details are on the web at www.harc.org.uk. On Thursday 4 February King's Lynn Amateur Radio Club is holding its AGM. Contact Ray, G3RSV, by email to ral-g3rsv@supanet.com. On Thursday 4 February Norfolk Amateur Radio Club is having a talk on codes and ciphers by Ed Erves. Details from Chris Danby, G0DWV, on 01603 419204. On Thursday 4 February Shefford &

District Amateur Radio Society invites members to bring their best QSL card. Details from David, G8UOD, on 01234 742 757. On Friday 5 February Cambridge & District Amateur Radio Club is holding its constructors contest. Details from Lawrence Micallef, M0LCM, on 07941 972724. On Friday 5 February Lymington Amateur Radio Society is having a talk on disguised antennas. More information from Keith, M0LCC, by email to M0LCCANDG8MZF@googlemail.com. On Friday 5 February Mid-Sussex Amateur Radio Society is having a radio night. Contact Peter, G4AKG, on 01444 239371. On Friday 5 February Wey Valley Amateur Radio Group is having a talk by Olof Lundberg, G0CKV on a personal history of maritime radio. Details on the web at www.weyvalleyarg.org.uk. On Saturday 6 February Brede Steam Amateur Radio Society is holding its AGM at the shack. For more information contact Steve, on 01424 720815. On Saturday 6 February Crystal Palace Radio and Electronics Club is holding its AGM. Contact Bob, G3OOU, on 01737 552 170. On Sunday 7 February Chelmsford Amateur Radio Society is at the Canvey Island Rally from 10am to 4pm. Contact Martyn, G1EFL, on 01245 469 008. On Sunday 7 February South Essex Amateur Radio Society is running the 25th Canvey Radio & Electronics Rally at The Paddocks, Canvey Island. Contact Norman, M0FZW, on 01268 692776. On Sunday 7 February Waterlooville Amateur Radio Club continues its exam course. Details from Rich, G4IBW, on 02392 680852.

NEWS FOR THE SOUTH-WEST On Tuesday 2 February Blackmoor Vale Amateur Radio Society is on the air on VHF and testing the 4m set. Contact Tony, G0GFL, on 01258 860741. On Tuesday 2 February West Devon Radio Club is having a bring and buy sale plus the usual natter with tea and biscuits. Further information from Jules Cuddy, M1AGY, on 01752 291588. On Wednesday 3 February Cornish Amateur Radio Club is having a talk by Russell, M1AVW, on the Lizard Wireless Station at Bass Point. Details from Steve, G7VOH, on 01209 844939. On Wednesday 3 February Taunton & District Amateur Radio Club is having a discussion on WISPER Mode with Dave, M0CIF. Contact William, G3WNI, on 01823 666 234 for more information. On Wednesday 3 February Thornbury & South Gloucestershire Amateur Radio Club is having a talk by Peter, G4OST, sharing his underwater experiences. Contact Tony, G0WMB, on 01454 417048.

6 On Thursday 4 February South Bristol Amateur Radio Club is operating the club station on 2m & 70cm. Contact Len, G4RZY, on 01275 834 282. On Thursday 4 February Swindon & District Amateur Radio Club is having a members' equipment sale. Contact Den, M0ACM, on 07810 317750. On Thursday 4 February Yeovil Amateur Radio Club is holding an EGM. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk. On Friday 5 February Torbay Amateur Radio Society is having an operating night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR THE MIDLANDS On Monday 1 February Gloucester Amateur Radio & Electronics Society is working on the club construction project with Cliff. Contact Anne, 2E1GKY, on 01452 548478, daytime. On Monday 1 February Leicester Radio Society is having a lecture. Contact the duty committee member on 07804 595749. On Monday 1 February South Birmingham Radio Society is having a contest review meeting. Contact Don, on 0121

458 1603. On Monday 1 February Telford & District Amateur Radio Society is having an open house HF on the air evening and a committee meeting. Contact Mike, G3JKX, on 01952 299 677. On Tuesday 2 February Loughborough & District Amateur Radio Club invites members to bring a Morse key. More information from Chris, G1ETZ, on 01509 504 319. On Tuesday 2 February South Notts Amateur Radio Club is taking part in the 2m Contest. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc. On Tuesday 2 February Spalding & District Amateur Radio Society is taking part in the 144MHz UK Activity Contest at the Portakabin. Contact Graham Boor, G8NWC, on 07947 76448. On Wednesday 3 February Bolsover Amateur Radio Society is having a shack night. For details, send an email to postmaster@g4rsb.org.uk. On Wednesday 3 February Hinkley Amateur Radio Society is having a social evening. Details from John, M0JAV, on 07836 731544. On Wednesday 3 February Lincoln Short-Wave Club is having a shack activity and natter night. For more information contact Pam Rose, G4STO, on 01427 788356. On Wednesday 3 February Midland Amateur Radio Society is having a general meeting and holding training classes. Details from Norman, G8BHE, on 01214 229 787. On Wednesday 3 February South Birmingham Radio Society is having a lecture in the main hall. Contact Don, on 0121 458 1603. On Wednesday 3 February South Notts Amateur Radio Club is working on its construction project and having a talk on receiver calibration by G4EDX. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc. On Thursday 4 February Brigg & District Amateur Radio Club is having a general knowledge and radio quiz night with Fred, G0AOJ. Contact Fred, G0AOJ on 01652 618213. On Friday 5 February Coventry Amateur Radio Society has no meeting. Contact John, G8SEQ, on 07958 777363. On Friday 5 February South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

7

NEWS FOR THE NORTH OF ENGLAND On Monday 1 February Angel of the North Amateur Radio Club takes to the air and continues its Advanced Licence course. Contact Nancy Bone, G7UUR, on 0191 477 0036. SARL NEWS - SUNDAY 31 JANUARY 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web-stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for detail. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325; 14,235; 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750; 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit.)

In the news today:

TWO BROTHERS CHASE RECORDS VIA AO-7

MAKE YOUR INPUT TO FUTURE STRATEGY

ENTER THE TINUS LANGE AWARD

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

The President, Council and members of the SARL wish Janse van der Merwe, ZS4IQ, a very happy 90th birthday, which he celebrated on Friday 29 January.

TWO BROTHERS CHASE RECORDS VIA AO-7

Eddie, ZS6BNE, has provided SARL News with information about some record-breaking achievements via the AO-7 satellite. Eddie says, "After an odd 35 years orbiting the earth, AO-7 is still functioning well and recent world records were improved via this satellite. Firstly, Pierre, ZS6BB, broke his brother's long-standing record with a distance of 7 630 km working Luciano, PY5LF, on 2 January 2001. It was not long thereafter when Andr&#65533;, ZS2BK, reclaimed his long-standing record with a world record distance of 7 694 kilometres!

On 8 January at 19:50 UTC, Andr&#65533;, ZS2BK, made a historical, record-breaking contact with Piraja, PS8RF, via the AO-7 Satellite on Mode B. They made the contact using SSB, which is an exceptional achievement!

Not to be outdone, Pierre, ZS6BB, soon claimed the record back. On Monday evening 18 January during the 17:00 UTC pass of AO-7, Pierre made a SSB contact with Josep, EA6SA, in grid JM19lo with a distance of 7 766 km."

The full report will be published in the January/February 2010 issue of Radio ZS.

Congratulations to Pierre, ZS6BB, and Andr&#65533;, ZS2BK, with their excellent records!

LAST CHANCE FOR NOMINATIONS FOR AN AWARD AND SUBMISSION OF AGM MOTIONS

Today is the last chance to nominate a person for one of the many SARL awards that will be presented at the National Convention Dinner in Port Elizabeth on 24 April. Get the detail on www.sarl.org.za, go to 'News' and select 'Clubtalk'. Today is also the last chance to submit motions for discussion at the AGM.

MAKE YOUR INPUT TO STRATEGY

The President's Net, on the air this evening, invites you to make an input to for Council's Strategic Indaba to be held in early March. Share your ideas on the various aspects of amateur radio and what you would like to see in the future.

The Net is on the air on Sunday, 31 January at 19:30. Clubs wishing to connect their repeater to the teleconference bridge are invited to send an e-mail to armi@sarl.org.za before 11:00 today.

ENTER THE TINUS LANGE AWARD

The SARL Tinus Lange 7066 Technical Excellence Award and Tinus Lange 7066 Junior Technical Excellence Award is bestowed annually on the persons who submit a technical project in any of the following categories:

Design and/or construction of projects such as a pre-amp, SWR bridge, patching unit, automatic ID-er, practical antenna ideas, masts, portable gear, power supplies etc. The project that you may have built for your own shack may be a good entry;

OR

any software for use in amateur radio.

The submission must include the following: The actual items (if size and mass allow it) or photographs (particularly in the case of antennas/masts, etc) and a complete write-up in an article with illustrations/pictures ready for publication in Radio ZS. Entries must be in MS Word.

The actual entry and the supporting documentation - i.e. a press-ready article for Radio ZS, plus any other documents must be delivered and mailed to the NARC to arrive not later than Friday 5 March. Judging will take place on the morning of 6 March.

All entries will be displayed (where practical, otherwise photographs) at the AGM and the awards will be presented at the annual dinner to be held in Port Elizabeth on Saturday 24 April.

The two awards are the Junior Technical Achievement Award (under 25 years of age), a framed certificate and a cash award of R500, and the Technical Achievement Award, a framed certificate and a cash award of R500. In addition, the winners will each receive an ARRL Logbook valued at R75 sponsored by the SA Amateur Radio Development Trust and a complimentary invitation for one person to attend the awards dinner (transport not included.)

The award is presented by the Tinus Lange Trust, which was started with a donation from the Lange family after his unexpected death in a gas explosion in Zimbabwe some years ago. The 7066 name signifies the frequency that Tinus used on all his travels and Hamnet operations.

HOME CONSTRUCTION COURSE GETS A STANDING OVATION

Last week delegates attending the SARL Home Construction Course gave presenter John Willescroft a standing ovation. Good feedback was also been received.

In an e-mail Colin Porter, who attended the course, wrote "I must congratulate the guys for all the efforts that was put into the home construction course. It was well-presented and kept all on their toes with anticipation. From the questions that were raised, it is apparent that all in attendance seemed to enjoy the lecture and the processes that were shown to us.

I have made a few PC boards, none of which came out well, and always taken days to assemble. The method presented made the whole task a lot simpler and with equipment most of us already use on a daily basis. It is really amazing how we complicate our projects rather than simplifying it when we will build equipment for the shack. Even the finishing touches were simplified."

The next course will be on Saturday 6 February at the University of KwaZulu-Natal. There are still a few seats left. To book, get the details on www.sarl.org.za and click on 'RTA'. Bookings for Durban close on Tuesday to allow for the CD and handouts to be made up.

The course in PE is on 20 February and there are some seats available.

Do not postpone it to the last minute - you will be disappointed. Please follow the booking instructions on the Web.

ZS WAGS AWARD NEWS

Competition for the top scores in the ZS WAGS award is hotting up. The top-scoring competitor currently is Pieter, ZS6XT, with 71 grids out of a possible 83. Just behind are Jan, ZS4JAN, and Pierre, ZS6BB, both with 70 grids. There have been some interesting developments with additional endorsements. Hal, ZS6WB, has submitted 33 grids on 2 m, and

30 grids on satellite, trailed by Pierre, ZS6BB, and Andr&#65533;, ZS2BK, both with 25 grids on satellite. Some participants have been accumulating grid squares using QRP and we look forward to receiving the first applications.

On the activator's side, Sian, ZS3SVD, made a sterling effort last September, making 10 or more contacts from no less than 9 rare grids! Well done Sian. In December Andre, ZS2ACP, activated KF25 on satellite with 11 contacts.

The Sandton Club sponsors the ZS WAGS award. For more information and full rankings go to the ZS WAGS website at http://www.zs6stn.org.za/zswags. The ZS WAGS e-mail list has news of upcoming activities. You can join this list by simply sending a blank e-mail to zswags-subscribe@googlegroups.com, and then reply to the confirmation e-mail, which you will receive.

CONTEST NEWS

The Antique Wireless Association CW Activity Day will be run from 10:00 UTC on Saturday 6 February to 10:00 UTC on Sunday 7 February with activity on 14- to 14,06 MHz; 7- to 7,035 MHz and 3,5- to 3,58 MHz. Participation may be as a single operator, all bands - low power (maximum 100 W), a single operator, all bands - QRP (maximum 5 W), a single operator single band - low power, or a single operator, single band - QRP. The exchange is a RST report, the operator's name and grid square locator.

Logs must be sent to the Southern African Antique Wireless Association, PO Box 12320, Benoryn, 1504, or by e-mail to andy.cairns@xsinet.co.za. The closing date for log submissions is on Monday 22 February.

The first leg of the SARL National Field Day will be run from 10:00 UTC on Saturday 13 February to 10:00 UTC on Sunday 14 February. CW and phone may be used on the contest-preferred segments of 10-, 15-, 20-, 40-, 80-, or 160 m. Stations may take part as a single operator field station - QRP, low- or high power, a multi-operator field station - QRP, low- or high power or a general station - QRP, low- or high power. General stations are single or multi-operator stations that do not conform to field-station requirements. The exchange is a RS(T) report and either S for single operator field station; M for multi-operator field station or G for general station. The closing date for log submissions is 1 March.

The complete rules for both contests can be found in the 2010 SARL Contest Manual.

CLUB NEWS

The Sasolburg Radio Club, ZS4SRK, will be presenting RAE classes starting on Thursday 4 February. Classes run from 18:30 until 20:00 in room S317, Vaal University of Technology, Vanderbijlpark. Enquiries to Riaan, ZS4PR, at 083 581 8569 or riaanzs4pr@gmail.com.

PROPAGATION

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Sunspot 1 041 is currently still the only active region on the visible surface of the sun. The effective sunspot number is expected to be between 10 and 20 for the coming week.

15 and 20 m will provide the best opportunities for DX. Conditions to India will be good from the afternoon onwards. During the late afternoon and early evenings, it will be moderate towards Europe. In the afternoons there are good possibilities for contacts with the USA on 15 m. Contacts with New Zealand will be possible for a short while on 15 m during the mornings. Contacts with Australia will be possible on 20 m for a short while during the mornings. During the afternoons and evenings, 15 and 20 m contacts may also be possible with Brazil.

Local conditions will be good on 40 m during the daytime. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the middle of the day. With summer here, 20 m is once again very useful for contacts over the longer distances, especially up to two o'clock in the afternoons. 80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

Today - President's Net at 19:30; Closing date for AGM motions and SARL Awards as well as closing date for Contest Committee nominations; 6 and 7 February - AWA CW Activity Day; 6 February - Home Construction course in Durban; 13 and 14 February - SARL National Field Day; 20 February - Home Construction course in Port Elizabeth; 28 February - New closing date for the SumbandilaSat essay competition; 28 February - Final date for entries in the ARRISS-SAT project to be submitted to youth@sarl.org.za; 5 March - Closing date for the Tinus Lange Awards, and 27 March - 2010 SA AMSAT Space Symposium.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz.

Sentech sponsors the ARMI transmissions on the non-amateur frequencies. You have listened to a bulletin of the South African Radio League compiled by Dennis, ZS4BS. The bulletin editor was Jannie, ZR6PHD.

Thank you for listening, 73.
/EX

Turd? A turd?
Is that the best you can do?

The guy is a walking pile of fecal matter...and that is putting it mildly.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 31st January 2010

IRTS Contribution to RCD

The Committee at its recent meeting agreed to support Radio Club Dominicano, RCD, the IARU national society who have been co-ordination amateur emergency communications in Haiti. RCD have personnel on site and have set up a number of emergency portable repeaters on the border with Haiti. They are not a wealthy society and expect that their operations will be ongoing for
the foreseeable future.

IRTS have sent RCD a contribution of $500 US dollars to cover some of their expenses. Any individual operators who would also like to help can forward contributions to Paul EI2CA or Sean EI4GK who will ensure that they
are passed on to RCD.

One Ham and His Dog

Brendan Nutley EI1429, had the privilege to have an interview with HH2JR Jean-Robert Gaillard. Jean-Robert was the first Amateur in Haiti who made contact with the Outside world after the horrific Earthquake ripped
his region apart.

During Brendan's limited time speaking to Jean (HH2JR), he explained in graphic and bone chilling detail Jean's accounts with the Haiti Quake which shook his home town to shreds. He later went on to explain about his, what was called by some people "Low-Tech-Radio" which was an Icom 706, and how he got connected to power and to the
emergency net frequency.

Brendan is pleased to let everyone know that Jean is in good health and Jean said his pet German Sheppard Blackie was amazing. He was the one helping everyone and he did so much for Jean and the people around him. What started out as an interview for a radio club and Brendan's daughter's school who were also following the Haiti Quake turned into a casual conversation between
two friends.

Videos of the Interview are expected to be posted on the Dundalk Amateur Radio Society website at www.ei7dar.com

There are also recordings of HH2JR's Phone patch comms on www.youtube.com and can be found with a callsign search.

Amateur Radio Licence Examination

The society's notes for the amateur radio licence examination have been revised, and a new document "Studying for the Amateur Radio Licence Examination" is now available for download on the downloads page www.irts.ie/downloads of the IRTS web site.

While the Syllabus in Appendix A and the Sample Paper in Appendix B of this document are unchanged, the covering note has been revised and extended. A new section in the covering note outlines why an examination is needed for an amateur radio licence. In this latest note we have also emphasised the benefit of obtaining practical experience at setting up and operating radio equipment alongside existing licensed radio amateurs either in a club or home environment.

Anyone interested in becoming a radio amateur, and in particular those studying for the radio amateur examination are advised to have a look at this new document.

Nomination of Awards for IRTS Trophies.

The time is here again for nominations for the several awards for IRTS trophies that are required from within the membership, this includes the awards for

1) Service to the Society, or to amateur radio.

Awards in this section may be to members or non-members.

2) Awards for other achievements, awards in this section include, the 70 cms trophy, the 4 and 6 Metre shields, the SWL award, and the awards for quality construction projects. These are confined to members only.

When considering your nominations please refer to previous successful nominees as included in

www.irts.ie/cgi/awards.cgi

Nominations may be from Clubs or individuals, must be in writing, and can be forwarded to the awards committee by regular post addressed to Peter Grant EI4HX, QTHR or by email to ei4hxperimental /at/ eircom.net Chair of awards committee or any other member of the awards committee.

Pat EI2HX or Pat EI9HX.

Closing date for nominations is April 2nd 2010

Request for Return of Trophies presented in 2009

It is time once again to recall all trophies presented
at the 2009 AGM in Athlone.

Trophies and cups can be returned to the IRTS stand at the Phoenix
Radio Rally, or to any IRTS Committee Member to arrive to me on or
before the IRTS committee
meeting in early March 2010.

This will allow time for engraving to be done, and also
any small repairs.

AREN AGM.

On Saturday February 6th all AREN members are requested to attend a
meeting being held in the Park Hotel, Clonmel County Tipperary,
commencing at 10am. Anyone with an interest in emergency communications
should feel free to come along as well. Please contact John Ronan,
EI7IG, beforehand, and let him
know at 086 8167310

REPEATER MEETING 10 FEBRUARY

The Keepers of Sligo, West Tyrone and Fermanagh Repeaters are among an
expected strong attendance for talks and an equipment demonstration led
off by John McCullough GI4BWM, Chairman of the RSGB Emerging Technology
Coordinating Committee.

The meeting is hosted by Lough Erne ARC at 7.00 pm on Wednesday 10
February in SHARE, also venue for the Club's traditional April Rally -
this year on
Sunday 11 April.

There are two positive agenda. First to give those who use Repeaters an
opportunity to thank those who do all the hard work of providing
Repeaters.Second is to encourage more use and variety of enjoyment of
Repeaters, and to explore ways and means of doing this.

It starts sharp at 7.00 sharp to finish in time to let away those with
a distance to drive home. All radio amateurs and experimenters are
welcome, as are the 18 students on the Club's Foundation course.

Likewise are questions and suggestions before, at and after the event
can be brought to the attention of Michael Clarke Mi5mtc, Chairman
Lough Erne ARC email mi5mtc at learc.eu website www.learc.eu Tel
028/048- 6862-1436

GB10GKA Special Event Station

To mark the 10th Anniversary of the closure of the World's largest
Maritime Radio Station Portishead Radio / GKA, a special callsign
GB10GKA has been granted. GB10GKA is being activated for a period of
one month 30th April 2010 through 27 May 2010.

Hours of operation will be dependent on individual operator's free time
however, it is intended that the callsign will be active extensively
throughout the licenced period. Operation will be primarily on CW.

More detail of this Special Event will be available in
the next Bulletin.

Rallies

The Mid Ulster Amatuer Radio Club's January Radio Sale will be held on
Saturday the 30th January 2010 from 11am at Brownlow Resource Centre,
Brownlow Road, Craigavon. Entrance fee is a £1 with a free tea/coffee
to warm up with. This is a Radio Sale the actual Club
Rally is being Held in May.

Phoenix A.R.C Rally 14th February

The Rally will be held as usual at Coolmine Community School near
Blanchardstown on Sunday 14th February 2010.Doors open from 9am to
2.30pm. Usual traders will be present and to encourage a real Amateur
Radio orientated Rally bring and buy tables
will be free of charge.

For tables contact Tony at 087-2349997 or Tom at 01-8211043 this is the
first rally of the New Year and usually a very enjoyable occasion.
Refreshments and plenty of car parking are available

Limerick Radio Club

Radio, Electronics & Hobbies Fair

The Radio, Electronics & Hobbies Fair takes place on Sunday 7th
March 2010 at the Radisson SAS Hotel, Ennis
Road, Limerick.

Doors Open at 11:00 AM. Admission is 5 Euro. No charge for children
when accompanied by an adult. There will be the usual traders attending
the Fair. A Bring & Buy
Sale will also take place.

Lough Erne Rally 11th April

Lough Erne Amateur Radio Club Annual Rally - The Share Holiday Village,
Lisnaskea, Co. Fermanagh BT92 0EQ N. Ireland. Access from Erne/Shannon
Waterway. 11.30 am Details Iain 028 66326693, Email gibbjgbb /at/

aol.com
(www.learc.eu)

Dundalk Rally 25th April The Rally will commence at 11.00am, followed by the IRTS AGM at 2.00pm.

Further details for booking, traders tables or any other info please e-mail the following, Thos EI2JD chairman /at/ ei7dar.com or Peter EI4HX secretary /at/ ei7dar.com

Lagan Valley ARS Rally 20th March

The Lagan Valley ARS Rally will be held at 11.30am in
The Village Centre, Hillsborough

Contact: Jim Henry, GI0DVU on 048 9266 2270

Mid Ulster Radio Club Rally 29th May

This year the Rally will be held at Drumgor Youth Centre, Drumgor heights, Craigavon. More details will be available closer to the time. If interested in booking a table for the event or for more information, please go to www.muarc.com or contact
0044(0)2838348451.

For more information on Rallies please check the
IRTS Website.

This week in History

1907 29/1 Lee De Forest patents the triode valve.

1910 27/1 First radio message is sent from an aircraft
in flight, NY.

1915 25/1 Bell opens the first US transcontinental
telephone service.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following
Sunday's bulletin.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2010 VISALIA IDXC. The 61st Annual International DX Convention sponsored by the Southern California DX Club will be held at The Holiday Inn Hotel & Conference Center, in Visalia, CA, April 16, 17, 18, 2010. Preregistration began December 1st, 2009. The International DX Convention is the world's foremost DX convention. If you are a DXer or interested in any aspect of ham radio you need to be at Visalia. Top DX operators from around the

world will be there. Meet the big guns from the US, Asia, Europe, Africa and Oceania. Meet the people on the other side of the mic or key. Shake hands with the person you have had that sked with for the past 10 years Renew friendships. Don't forget your YL! We will have something special for them as well.
Top DXpeditioners from every continent tell you how they did it. Learn the secrets for big signals on the top band, how to have fun and adventures chasing IOTA, contest forum, antenna forum, DX forum, seminars for everyone from the seasoned pro to the beginning DXer. Attend the traditional Saturday night banquet where great friends and good food are met with lively presentations. The Sunday breakfast buffet has terrific selection and variety. Enjoy more presentations and the parody, "Are You Smarter Than a DXer." This year there is a twist! Visit the manufacturers' midway where you can talk to the people who design and use the latest and best equipment. Don't forget the raffle prizes which top even the famed Dayton Hamvention! For the early arrivers NCCC will be hosting the Contest Academy on Friday! Stop by their Web site for more details at:
http://www.dxconvention.org
For questions regarding registration or DX stations who need lodging assistance please email Cathy Gardenias, K6VC, at the address located on the Web site under registration.

2010 VISALIA TOP BAND DINNER AT IDXC. The Top Band Dinner at the 2010 Visalia DX Convention will be held Friday, April 16th, at the Convention Hotel - Holiday Inn Visalia CA - Birch Room. Bruce Butler, W6OSP, will present "The Low Bands from K4M, Midway." Miner 49er BBQ buffet dinner at 36 USDs/person, Door Prize eligibility included.
To check on availability, send an email to Steve, WB6RSE, at his QRZ.com address with the number of reservations you wish along with CALL, FIRST & LAST NAME, and contact EMAIL address for each person.You will receive a return email confirming availability along with payment information. Advance paid reservations are absolutely required! Another sell out is anticipated. First come, first served.

3C0, ANNOBON ISLAND. Operators Elmo/EA5BYP and Javier/EA5KM will be active as 3C0C from Annobon Island (AF-039) for 15 days in April (the specific dates will be forthcoming). Activity will be on 160-10 meters using CW, SSB and RTTY with an emphasis on the lower bands and CW. They will try to have two stations active (on the outskirts of the city), but remember that they are only two operators, so please be patient. During their operation, they will not have an InterNet connection, so the logs will not be available until after their DXpedition. QSL Manager for 3C0C is EA7FTR: Francisco Lianez Suero, Asturias #23, 21110 Aljaraque, HUELVA, SPAIN. For all direct requests, please send a self addressed envelope (SAE) with: 1 IRC or 2 USDs or 1 Euro for European Union
1 IRC or 2 USDs for other destinations
All direct requests that do not have a SAE and/or sufficient IRC/USDs required to cover postal fee will be returned via the Bureau. All requests received via Bureau will be answered after one year. A survey for "Wanted Bands and Modes" is available on the 3C0C Web page at:
http://www.3c0c-annobon.com

6V7, SENEGAL (Correction). Luc, F5RAV, will be active from La Somone between February 18th and March 1st. He will operate from Jean-Francois, 6W7RV, QTH as 6V7T (not 6W7RV as mentioned last week). QSL via only direct to his home callsign.

8Q, MALDIVES. Joerg, OE6VHF, will be active as 8Q7JK from Thulhagiri Island (AS-013), North Male Atoll, Maldives, between February 23rd and March 5th. Activity will be on 40-10 meters using mostly SSB (on 40/17m) since previous DXpeditions have been on CW. He will be using dipoles for antennas. QSL via his home callsign. QSLs will be sent out via GlobalQSL.

9U, BURUNDI. Operators Helmut/DL3KBQ (9UXEV), Henry/DL2RSI (9U1RSI), Peter/DH2KI (9U1KI) and Jurgen/DJ2VO (9U1VO) will be active between February 22nd and March 6th. Activity will be on CW, SSB and the Digital modes using only 100 watts into vertical antennas. QSL via their home callsign, by the DARC Bureau or direct.

BX5, TAIWAN. Jimmy, BX5AA, will be active during the ARRL DX SSB Contest (March 6-7th) as a Single-Op/Single-Band (20m)/High-Power entry. He will also be active in the CQWW WPX SSB Contest (March 27-28th) as a Single-Op/All-Band/High-Power entry. Jimmy states that BX5 is a rare prefix for Taiwan (CQ 24). QSL via BX5AA. Visit his Web page at: http://blog.yam.com/bx5aa

C6, THE BAHAMAS. Randy, W6SJ, will once again head to Grand Bahama Island in February. He expects to be on the air as C6AWS between February 5-10th. Activity will be holiday style CW only. QSL via LoTW or to W6SJ, direct or by the Bureau.

HC, ECUADOR. Dr. Rick, NE8Z, tells OPDX that he will once again be heading south to Ecuador and plans to be active between February 8-24th, with the following callsigns from various locations as follows:
HC1MD - Tumbaco, Pichincha Province
HC1MD/HC1 - Mt. Pichincha
HC1MD/HC4 - Punta Blanca, Manabi Province
Activity will be on 80-10 meters using CW, SSB, RTTY and PSK31. QSL via K8LJG.

IOTA NEWS.....
AS-133. See XU7 below.

NA-167. Yahir, XE2JA, and possibly others will activate Alcatraz Island in the Sonora State North Group between February 11-14th. The planned callsign will be XE2JA/XF1. Activity will be on 80-15 meters using SSB, RTTY and the Satellites.
Suggested frequencies are:
RTTY - 3790, 7060, 10104, 14260, 18140 and 21260
SSB - 3585, 7044, 14085, 18104 and 21085 kHz
Satellites: AO 51 AO 27 SO 50
------- ------- --------------
UP 145.300 145.850 145.850 (PL 67)
DOWN 435.300 +/- 436.795 +/- 436.795 +/-
QSL Manager (World-Wide) via EA5XC (direct w/SASE 2 USDs

or new IRCs 2010, please). QSL Manager (Only Mexican stations)
via XE2IVY (SASE not necessary). QSL via Bureau is "OK",
if youï¿½re a member of any IARU club (this method is not
preferred -- may take months, years.... for cards). The
Web pages for this DXpedition are:
http://www.dxciting.com --or-- http://xe2ja-xf1.blogspot.com

SA-041. (Update) Members of the Araucaria DX Group will activate the
2nd most wanted IOTA group (Maranhao State West Group) in South
America as PW8J between June 9-15th (See OPDX.943). Permission
to operate from Lencois Island has been granted by the Environ-
ment Ministry to the PW8J team. Transportation services for
operators, luggage and equipment from Sao Luis to Lencois Island
have also been hired. Operators have also purchased their air
ticket from their QTH to Sao Luiz. For more details, visit their
Web page at: http://www.pw8j.com

J3, GRENADA. Harry, AC8G, will once again be active as J37K in March.
Activity will include the ARRL DX SSB Contest (March 6-7th) as a Single-
Op/High-Power entry. QSL to AC8G, Stateside direct with SASE. For others
sending by the bureau, please clearly mark for QSLs to go to AC8G.

J6, ST. LUCIA (NA-108). Just a reminder that 9 operators from the "Buddies
in the Caribbean" DX association which specialized in "ultralite" DX-
peditions with 100 watts or less power, will be active as J6/homecall
between February 2-11th. Operators mentioned are: Budd/W3FF, Chris/W6HFP,
Scott/NE1RD, Dan/WZ1P, Guy/N7UN, Steve/WG0AT, Mike/KC4VG, Paul/KB9AVO
and Wey/K8EAB. The operators will use three radios powered from batteries
and Buddipole portable antennas. Activity will be mostly on 160-15 meters
using CW, SSB and the Digital modes. If conditions allow, they may also
be on 10 and 6 meters. QSL via LoTW or eQSL. Also QSL direct or by the
Bureau via the operator's home callsign. For more information, visit the
following Web pages: http://caribbeanbuddies.blogspot.com
http://sites.google.com/site/caribbeanbuddies/home

J7, DOMINICA (NA-101). John, K3TEJ, will once again be active as J7N
between February 24th and March 11th. Activity will be on all bands
mainly using CW and RTTY. He plans to participate in the CQ 160m SSB
Contest (February 26-28th) and also the ARRL International DX SSB Contest
(March 6-7th) as a Single-Op/All-Band entry. QSL via his home callsign.

JT, MONGOLIA. OPDX was informed that YL Munkhmend "Mend", JT1JC, is
active on RTTY and PSK31. She is the XYL of Gankhuyag, JT1CJ. Watch
20 meters on PSK between 2245-0030z or RTTY between 0700-0800z QSL via:
P.O.Box 73, Ulaanbaatar-35, Mongolia.

KH6BZF PROPAGATION FORECAST/REPORT (For February 1-7th)....
Feb 1 AN SOLAR REFERENCE
Feb 2 AN ---------------
Feb 3 AN AN - Above Normal/Geomagnetic Level is QUIET
Feb 4 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Feb 5 AN LN - Low Normal

Feb 6 AN
Feb 7 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KP2, U.S. VIRGIN ISLANDS. Art, KZ5D, will be active as KP2/KZ5D between February 2-9th. His activity will be focused on the lower bands. QSL route TBA.

LX, LUXEMBOURG. Operators Joel/LX1ER, Filip/ON4AEO, Kath/ON7BK, Jose/ON4CJK, Ronny/ON4RK, Gert/ZS6GC, Lucas/ZS6ACT, Sid/ZS6AYC, Adele/ZR6APT and Dennis (callsign not provided) will be active as LX9FC from Luxembourg in early April (starting on the 5th). Activity will be on 80-10 meters using CW, SSB, RTTY and PSK. QSL via ON4CJK. The LX9FC Web page is available at: http://www.filipstattooshop.be/luxemburg/expeditie%202010/nieuw/index.html

MDF IN NOVA SCOTIA. The Halifax Amateur Radio Club (HARC) is pleased to invite all DXers, contesters and HF enthusiasts to the 2010 MDF. This year the Radio Amateurs of Canada (RAC) also will hold its AGM on Friday, August 6th, at 2:30 pm as part of the MDF weekend. Following the AGM, there will be a reception, BBQ dinner and bluegrass concert beginning at 5:30 pm. The MDF program on Saturday, August 7th, will run from 8:30 am - 4:45 pm, it will be followed by a reception and the MDF banquet.
The speakers (active and outstanding members of our ham radio community) will include:
* MARTTI LAINE, OH2BH: Turning New Stones - Building Passion for Amateur Radio
* TIM DUFFY, K3LR : How World Class Contesting Advances Amateur Radio
* DICK FREY, K4XU : What You Need to Know About Solid State Amplifiers
* TIM ELLAM, VE6SH : Governance of Amateur Radio ï¿½ the Role of the IARU
* A MEMBER OF A MAJOR, RECENT DXPEDITION (TBA)

The MDF will be held in the Rosaria Centre of Mount St. Vincent University in Halifax, Nova Scotia. Inexpensive accommodations are available at the University. This is a great opportunity to combine a top-notch ham radio event with a tourist visit to Canadaï¿½s Maritime Provinces.
The costs of the various events are: BBQ and bluegrass social - $25; Maritime DX Forum - $60; and the MDF banquet - $35. Registration materials can be downloaded from the HARC website (www.harc-arc.org), or requested directly from the MDF Chair, K. Scott Wood ,VE1QD, who also will gladly answer any questions. He can be contacted via E-mail at <ve1qd@rac.ca> or by phone at (902) 823-2761.

OA4, PERU. Fred, DL1NL, currently active as OA4/DL1NL from Lima, will be leaving Peru in the middle of February. Activity is mostly CW and Fred operates from Radio Club Peruano (OA4O) when time permits. His recent activity shows he can be found on 20/17/15 meters between 1530-1730z. QSL via his home callsign.

OX, GREENLAND. Reid, N0RC, will be active as OX3/K0KU from Thule, Greenland (NA-018), between March 22nd and April 8th. Activity will be limited as work permits, but Reid plans to be on every other day and try to get on the air for contest weekends, but he cannot guarantee this. Look for the log to be uploaded to LoTW and EQSL. QSL direct to N0RC or by the Bureau.

P4, ARUBA. John, KK9A, will be active as P40A during the ARRL DX SSB Contest (March 6-7th) as a Single-Op/All-Band entry. QSL via WD9DZV.

PA75, THE NETHERLANDS (Special Event). Fred, PA0FAW (PA-11092), will activate special event station PA75HV between February 1-28th. Activity is to celebrate the 75th anniversary of the National Park "De Hoge Veluwe". He states that he will not actually transmit from the park but will activate this callsign probably 3 times this year from his QTH. QSLs are "OK" direct, by the Bureau and E-qsl; NO LoTW.

PJ4, NETHERLANDS ANTILLES. Roger, N4RR, will be in Bonaire (SA-006, WLOTA LH-1279) between February 10-15th. He plans to operate in the CQWW WPX RTTY Contest (February 13-14th) as a Single-Op/All-Band/Low-Power entry. He will be signing PJ4R during the contest and PJ4/N4RR before the contest operating on all bands on RTTY and CW. QSL to his home callsign N4RR.

QSL INFO AND NEWS.....
PIRATE ALERT (Update). Last week we reported that a station signing ZF2AS during the December 2009 160 meter contest was apparently PIRATE. Well, it seems this was not a PIRATE per-se, but a busted callsign of ZF2AH who was active in the contest. Operator was Joe, W6VNR.

QSL CARDS STATUS BY F5OGL. Didier, F5OGL, reports the following:
FT5GA - All the direct and bureau requests have been answered and mailed. Only 500 envelopes were expected to be sent out this past Friday to European Union countries.
T6YA - All the direct and bureau requests have been answered and mailed.
OD5/F5PTM - All the direct and bureau requests have been answered and mailed.
Please avoid renewing your requests for these callsigns if you have already sent them.

QSL XU7ACY via W2EN. Activity was in last weekend's CQ 160-Meter CW Contest.

QSL YE1C to: West Java DX Association, PO. Box 1042, Bandung, 40010 Indonesia. Activity was in last weekend's CQ 160-Meter CW Contest. Operators were: YB1ALL, YB1CCF, YB1KAR, YB1NWP, YC1KAF, YC1BTV, YC1HQQ, YD1GCL, YD1JZ and YD1ORZ.

QSLS VIA LoTW: DG6MM, DL0XM, HV50VR, J39BS, ON5PO, VK6HZ, VP8DMN, YV5ANF and ZS2EZ

QSLS RECEIVED VIA MAIL: 3D2KJ, 4W6AL, 5N0OCH, 5Z4/RW1AU, 8R1PY, 9L7NS, CT9L, EA7FTR, ET3JA, ET3SID, FH/DJ7RJ, FJ/WQ2N, FK/NA8O, FM/JE1JKL/P, FT5WO, J79WE, JD1BMH, KH7XS, ON7CD, PW2IO, PX8W, SV2ASP/A, T6YA, T88DX, TF4M, TO5T, TO7RJ, V73NF, VK6IOA, XV3RRC, XV7RRC and YJ0NA

QSLS RECEIVED VIA THE BUREAU: 3D20CR, 4O3DX, 5Z4/9A3A, EA4EER, EA8BMG, IK3JBP, IW0BCF, LA7G/P, NN5J, OH/DF9TM, R300SM, RU1A, SX2A, SX2004PA, SX3A, SX7A, SX9A, TX5SPA, TX5SPM and ZB3F

TF, ICELAND. Dervin, PD9DX, will once again be active as TF/PD9DX from April 8ï¿½17th. Activity will be on 80-10 meters using SSB. QSL via his home callsign.

V2, ANTIGUA. Operators Babs/DL7AFS and Lot/DJ7ZG will be going on another DXpedition, but this time to the Caribbean region. Look for them to be active as V21ZG from Antigua (NA-100) between March 16th and April 4th. Activity will be on 80-6 meters with operations mainly on RTTY, PSK and SSB. They plan to look for JA stations and QRP stations. QSL via DL7AFS.

VP5, TURKS & CAUCOS ISLANDS. Operator Alex/PY2WAS (and possibly Ivan/PY1YB) will be active as VP5/PY2WAS from the Hamlet on Providenciales Island (NA-002)between May 20ï¿½23rd. Activity will be on 80-10 meters using CW and SSB. QSL via PY2WAS, by the PY2 Bureau or direct.

XU7, CAMBODIA. John, 9M6XRO, informs OPDX that he will once again be active as XU7XRO from Sihanouk Ville (Kompong Som) between February 3-9th. Activity will be on 160-10 meters using CW, RTTY and SSB, with a beam at 22m for HF and Inverted-Vees on the same tower for the lower bands. QSL "ONLY" via M0URX, please. Bureau cards may be requested from M0URX via E-mail. For complete details, please see the info on: http://www.m0urx.com
QSOs will be uploaded to the LoTW after the operation. NO eQSL.

XU7, CAMBODIA (IOTA Op). Look for XU7KOH activity from Koh Russei Island (AS-133) during the following date and operators:
February 12-16th - Operators Wim/ON6NP, Wim/ON6TZ and Peter/XU7ACY (NO2R)
February 19-23rd - Operators Wim/ON6NP, Wim/ON6TZ, Peter/XU7ACY(NO2R) and Joel/F5PAC.
QSL via ON7PP. More details are forthcoming. Logs will be posted after the operation (ASAP) on the following Web page: http://www.xu7tzg.be

YOUTH DX ADVENTURE (Written By Don, N6JRL). In October 2009 team TI5N came up with the idea of a youth DX adventure. The purpose being to foster an interest in Ham radio for deserving youth interested in the hobby. The plan is to take 6 youth operators age 11 to 17 from the ham community to TI5N in Costa Rica in July 2010 for a DX adventure for 5 days of partici-pating and learning DX operations. The team and leaders plan to travel in a group from Dayton, Ohio, to Costa Rica to the contest superstation TI5N owned by Carlos Diez, TI5KD/K2CE. During their stay the youth operators and their parents (also Hams) will participate in learning about pro-pagation, antenna's, tuning amplifiers, controlling pile ups and all the finer points of being DX and working DX.
While in Costa Rica the team will also experience traditional Costa Rican foods prepared by the lovely Sophia Diez XYL of Carlos and TI2IY. The team will have an opportunity to go on a sightseeing trip and experience some of the culture of the country and its people. A shopping trip for souvenirs is also in the schedule.
The 2 team leaders for this first of we hope many trips will be Don

DuBon, N6JRL, and Dave Kalter, KB8OCP, both of who have been to TI5N for contesting in the CQWW contests. Don has also been on DX Peditions to Saint Lucia, Anguilla, and most notably Peter 1 Island in 2006 as well as operating from many countries during his military career in the Marine Corps. Dave is an avid DX'er and contester and is currently the chairman for the 2010 Hamvention Forums; Dave is also setting up a schedule with the International space station for school age kids with the Boonshoft Museum in Dayton. Both Don and Dave are members of DARA and SWODXA and the ARRL, QCWA and FISTS.
The youth team members will be accompanied by 1 parent each; this will eliminate the need for any legal releases. The youth operators will have fund raisers, and have a booth space at the 2011 Dayton Hamvention to display photo's, videos and speak with other youth interested in Ham radio. There are plans to have the theme of Hamvention 2011 geared toward "youth DXï¿½ers". Story and photos will be submitted (as written by the youth operators) to popular monthly magazines.
We are hoping to have this first of many annual trips for youth to be a success. Each year a different set of team leaders will assume the organization of the youth operators and provide the leadership and guidance for a team of 12 to make the trip. Our hopes are to reach out and create interest and have youth from all over the country have a chance to participate each year.
We need assistance in making this happen. The Dayton Amateur Radio Association has provided a sizeable contribution to get things started and we are relying on the generosity of Clubs, organizations and individual Hams to make this happen. We have generated about 1/3 of our total $12,000 budget. Should we be able to generate more than needed it will be held for the following year's team. Should we fall short or have to cancel for any reason, all funds will be returned. We do have the assistance of the Dayton Amateur Radio Association as a 501C-3 organization, so donations may be tax deductable. Contributing donors may have their logo and or name/call on the QSL card.
We are trying to develop a website but until then more info may be obtained from the team leaders at the following e-mail addresses and phones. Thank you and we hope we can count on your support.

Don DuBon, N6JRL - n6jrl@aol.com 937-298-9052
Dave Kalter, KB8OCP - Kb8ocp@yahoo.com 937-603-9707

Z2, ZIMBABWE. Mirek, VK6DXI, will be active as Z21DXI between February 5ï¿½13th. He is in Bulawayo on a business trip, so activity will be limited to possibly his night time hours. QSL via SP5UAF.

ZA, ALBANIA. Franck, F4DTO, announced that he and one other newly licensed operator named Patrick (callsign pending) will be active as ZA/homecall from Elbasan between April 15ï¿½24th. Activity will be on 40ï¿½10m, mostly SSB with some CW, using 100 watts and monobander antennas. They also plan to be active from other locations and several summits using the the callsigns ZA/homecall/p. QSL via their home callsign, direct or by the French Bureau. For updates, watch QRZ.com (F4DTO) or Franck's Web page at: http://monsite.orange.fr/f4dto

67. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.misc
Date: 2010-02-01 07:00:02 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1265007601@panix.com>
Source record: 6186
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

C2 - NAURU, OC-031
Dieter,DJ2EH, and his XYL Anneli,DL8NBH, became active as C21DL and
C21YL from Nauru (OC-031) by the end of January and will stay there
until Feb 14. If all goes well, expect them to work in CW, SSB and RTTY
on the usual DX frequencies on 160m-6m. RTTY operation take place using
the call C21YL. Their station includes: K3, amplifier with 800 watts,
a wirebeam in 15m height, 20.5m vertical for 80m/160m, a 2 ele vertical
dipole for 30m/40m, switchable LP/SP. Due to the severe QRN they are
trying to build a beverage towards EU in order to work effectively also
on the lowbands. QSLs also via bureau to their homecalls.

FO - FRENCH POLYNESIA, OC-046
TX4T is the callsign of Jacques,F6BEE, Phil,FO8RZ, Nigel,G3TXF, and
Gilles,VE2TZT. They will activate Tahiti (OC-046) on 160m-10m with
focus on 80m/160m from Feb 9-24. They want to take part also in the
CQ WPX RTTY Contest (Feb 13/14) and the ARRL DX CW Contest (Feb 20/21).
QSL cards also via bureau to G3TXF.
You can find more information online at: http://www.fo2010.org

DU - PHILIPPINES
Gerard,F2JD, who made about 300 QSOs as DU1/G0SHN from Manila at the
end of last year wanted to return to the Philippines with a new, better
antenna in February. Gerard also wants to activate several islands.
You can find an online log at: http://LesNouvellesDX.fr/voirlogs.php

H40 - TEMOTU ISLANDS, OC-065
After the great success of his last H40FN DXpedition to Temotu
OM Siegfried,DK9FN, decided to make another DXpedition there this year.
He will be accompanied by Hans-Peter,DG1FK (H40FK), and Bernhard,DL2GAC
(H40MS), who is staying in the Solomon Islands since Jan 21 and will be
QRV again as H44MS after Temotu until Apr 19. The trio will show up
from Ngarando Reef (Swallow Island, OC-065) from Feb 6-19. H40MS will

be active in SSB, H40FN in CW and H40FK in digital modes. Their antenna
is a multiband 2 ele vertical "LOBSTER" for 160m-6m. The antenna was
described in the German magazine CQDL 12/2009.
QSL cards for H40MS and H40FK should be sent via their homecalls.
The QSL manager for H40FN is HA8FW. Updates can be found online at:
http://www.hari-ham.com/seiten/h40fn_2010/index.php

HC - ECUADOR
Rick,NE8Z, will be active in CW, SSB, RTTY and PSK31 on 80m-10m from
several provinces from Feb 8-24:
HC1MD - Tumbaco, Pichincha province
HC1MD/HC1 - Mt. Pichincha
HC1MD/HC4 - Punta Blanca, Manabi province
QSL via K8LJG.

JD1/OG - OGASAWARA ISLAND, AS-031
JM1YGG/JD1, JA2ZL/JD1, JD1BMV and JD1BNB announced to be QRV in CW,
SSB and RTTY on 80m-12m from Chichijima (AS-031) from Feb 6-14.
QSLs for JM1YGG/JD1 and JA2ZL/JD1 via their homecalls,
JD1BMV via JK1EBA and JD1BNB via JA3MCA.
The QSL cards can be sent also via the JARL bureau to all operators.

KH6 - HAWAII, OC-019
Claire,WL7MY, and John,KL7JR, will use the special callsign N7I from
Honolulu (OC-019, HI-008S) from Feb 4-10. The special call remembers
the birth of the US Islands Award Program 16 years ago. Preferred QRGs
are 14260 and 28460 kHz. Claire and John are going to use a TS-50 and
a vertical antenna. QSL cards should be sent to KL7JR.
More information can be found online at: http://www.usislands.org

KH0 - NORTHERN MARIANA ISLANDS, OC-086
Mega,KH0/JA3EGZ, is QRV from Saipan (OC-086, USI NI002S) from Feb 3-8.
He will be active mainly on 40m and 80m.
QSLs direct or via bureau via his homecall.

KP2 - US VIRGIN ISLANDS, NA-106
Art,KP2/KZ5D, will show up from Feb 2-9. Art will focus mainly on the
lowbands. A QSL route will be published later.

PJ2 - NETHERLAND ANTILLES - CURACAO, SA-006
Goose,PJ2/W8AV, will be on Curacao (SA-006/LH-0942) from Feb 9-22.
He will work from the Signal Point Station (PJ2T) in CW and RTTY on
160m-10m. Goose is also one of the OPs who will be active as PJ2T in
the upcoming ARRL International CW Contest (Feb 20/21) and maybe he
will also join the WPX RTTY Contest on Feb 13/14.

V3 - BELIZE
Robert,N7MSU, will stay in Belize from Feb 4-24. He will work in
CW/SSB mainly on 40m and 20m signing V31SU from different QTHs.
QSLs should be sent direct or via bureau to his homecall.

V8 - BRUNEI, OC-088
From Feb 5-8 Kanzi,JA4ENL, will be active from the rental QTH of V85SS

(Tungku Lodge, http://www.tungkulodge.blogspot.com). He will work as V85NL on several bands, including 160m.

XU - CAMBODIA
John,9M6XRO, will be QRV as XU7XRO in CW/RTTY/SSB on 160m-10m from Feb 3-9. He has an HF beam on a 22m mast and Inverted Vees on the same tower for the lowbands. QSLs via M0URX. Bureau QSLs can be requested at http://www.m0urx.com. QSL via LoTW is possible as well.

Z2 - ZIMBABWE
Mirek,VK6DXI, will stay in Bulawayo from Feb 5-13. He will not have much time for amateur radio but still hopes to make some QSOs as Z21DXI QSL via SP5UAF.

VP8/A, VP8/G, VP8/H, VP8/O - ANTARCTICA TOUR
Thair,W2APF, traveling aboard the ship National Geographic Explorer is visiting the Antarctic region from Feb 8 until Mar 5. He will sign W2APF/C6A/mm from onboard the ship and W2APF/KC4 from the Antarctic mainland. He plans shore excursions on the Falklands, South Orkneys, South Shetlands and South Georgia Islands and will use the call VP8DML from there. An exact timetable is not known in advance.
Learn more at: http://www.expeditions.com/Ship_Detail92.asp?Ship=20
QSL cards for all callsigns should be sent via W2APF.

CANADA, SPECIAL EVENT STATIONS
The Olympic Winter Games 2010 in Vancouver cast their shadows. Besides of the already announced special calls (see VG7G in the calendar) all Canadian amateurs may use following prefixes from Feb 1 until Mar 31:
VG instead of VA
XK instead of VY
XJ instead of VO
VX instead of VE

LINKS: Current SOTA activities (mountain summits) are announced at: http://www.sotawatch.org
---
Detailed information about current VHF activities can be found on the VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
The 61st International DX Convention is going to take place in Visalia/California on Apr 16-18. Reservations are welcome online at: http://www.dxconvention.org
---
If you are looking not only for a nice piece of land with a house on it but also want to buy the extraordinary DX and contest station KH7XS you can inform yourself at: http://kh7xs.qth.com

UPCOMING CONTESTS

Feb 6/7: Black Sea Cup International Contest
Feb 13/14: WPX RTTY Contest
Feb 20/21: ARRL International CW Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
NA-080, C6, Little Bahama Bank Group: Randy,C6A/W6SJ, plans an activity from
Grand Bahama Island from Feb 5-10. QSL via homecall (direct/bureau).

NA-106, KP2, US Virgin Islands: Jeff,KP2/VA3QSL, will be QRV in CW, SSB and
PSK on 40m-15m from St. Thomas (USI VI004S) and St. Croix (USI VI002S)
from Feb 6-14. QSL via homecall (direct/bureau).

OC-005, VK9, Norfolk Island: Andrew,VK2ACC, will sign VK2ACC/9 from Norfolk
from Feb 4-9. He is going to work in SSB and PSK on 40m-6m.
QSL via homecall (direct/bureau).

OC-212, VK, NSW State Centre Group: Members of the Hellenic A.R. Association
of Australia will show up as VI2BI from Broughton Island from Feb 5-7.
QSL direct via VK2IR (see QRZ.com).

Lighthouse activities (WLOTA/ARLHS/ILLW)

C6A/W6SJ LH 0527 Gr.Bahama Feb 5-10
IC8AMR LH 0689 Ischia resident
IH9WKH LH 0041 Pantelleria resident

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

February 3, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Fast and Furious - CQ WPX RTTY and North American Sprints, CW and SSB
- QSO Party Town - VT, MN, BC, DE, NM, NH, LA
- ARRL School Club Roundup and Rookie Roundup
- RTTY and Sprint How-To Webinars
- Photos from Siberia
- November Sweepstakes - Initial Results Online
- Double Half Delta Loop
- Ferreting Out Ferrites
- Siren Songs

NEW HF OPERATORS - THINGS TO DO

February is one of the busiest contest months, next to October, so you
have lots to choose from! If you like fast-paced contests, try the
North American Sprints. Digital enthusiasts can look forward to the CQ
WPX RTTY - take a look at the NCCC Webinar on RTTY contesting and have
at it. Or keep busy with any of the seven state or province QSO
parties!

BULLETINS

While the new ARRL Web site is being prepared for release, online
<http://aptos.arrl.org/contests/> writeups for ARRL contests are being
hosted off-site, thanks to the efforts of George K5TR and Trey N5KO.
See the "Results and Records" section for details!

BUSTED QSOS

A golden issue last time!

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

February 6-7
```

- Vermont QSO Party
- YLISSB QSO Party--CW
- Ten-Ten Winter Phone QSO Party
- Black Sea Cup International
- Minnesota QSO Party
- FYBO Winter QRP Field Day
- Straight Key Party
- British Columbia QSO Party
- Delaware QSO Party
- XE Int'l RTTY Contest,
- North American Sprint--CW
- New Mexico QSO Party
- QRP Winter Fireside SSB Sprint

February 13-14

- School Club Roundup
- Valentine Sprint-- Digital
- YL-OM Contest
- CQ WW RTTY WPX
- New Hampshire QSO Party
- Asia-Pacific Sprint--CW
- Worldwide Peace Messenger Cities
- Dutch PACC Contest
- Louisiana QSO Party
- OMISS QSO Party--Phone
- FISTS CW Winter Sprint
- RSGB 1.8 MHz Contest--CW
- North American Sprint--Phone
- Classic Exchange--Phone

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Next week is the February version of the School Club Roundup <http://www.arrl.org/SCR>, running Monday through Friday, Feb 8th through the 12th. This is a great opportunity to spin the dial and hand out some contacts to beginning contesters. Speaking of spinning the dial, the Rookie Roundup - a brand-new ARRL contest aimed at newcomers - will be hitting the airwaves on April 18th from 1800 - 2359 UTC. (This is the SSB event - there will be a RTTY and CW version in August and December.) Like the Novice Roundup of old, experienced contesters are encouraged to get on and make operating fun for everybody. Unlike the old days, there's a new twist - this contest will be logged and scored entirely on-line! That's right - no waiting for results - and the results and certificates will be generated automatically. Stay tuned for further details and watch for March QST's "This Month In Contesting" by Sean KX9X.

What of the new Xtreme category in the CQ World-Wide <http://cqww.com/>? First announced at the Dayton Hamvention Contest Forum in 2009, the category attracted about a dozen participants split between CW and SSB. More Xtreme-ist stations have announced plans to enter this category in 2010, needing some time to develop software and

hardware. This is in line with expectations of the CQ WW Committee for the first year. (Thanks, Doug K1DG)

The Florida Contest Group and Yaesu are pleased to present the very first Orlando Hamcation <http://hamcation.com/> Contest SuperSuite on Friday, February 12 at 6 PM at the American Legion Hall <http://tinyurl.com/FCGDirections> just five miles away. Refreshments will be on hand, including the SuperSuite Standard free pizza and a CW copying contest with prizes. The winner of the FCG raffle <ttp://tinyurl.com/FCGRaffle> will be announced and there will be a slide show on mobile operating in the Florida QSO Party, as well! (Thanks, Dan K1TO)

The latest edition of PileUP! Magazine <http://www.helsinki.fi/%7Ekorpela/jako/PU1_2010.pdf> is available in PDF, says editor Ilkka OH1WZ. Articles in English cover topics such as B7P in CQ WW CW 2009 (OH7WV), SAC Workshop (SM6LRR), tips for succeeding in the Russian DX Contest (SM6LRR), Hope for the CC&R-Challenged (K6VVA and OH7WV), Contesting from Lithuania (LY9Y), Noob Contesting with Old-Timers (OH6MW), Tower Width (G6GO), and an update on Arctic Arcala (OH6KN). There are a lot of pictures, too! (Be advised that the KH6CG QSL on display therein is, um, tropical in nature.)

The Northern California Contest Club presents "RTTY Contesting for Newbies <http://bit.ly/rtty-recording>", another of their fine Webinars, this one concentrating on the practical aspects of getting your station up and running on RTTY. CQWW WPX RTTY and NAQP RTTY are both coming up in February. Make 2010 the year you stopped making excuses about why you can't be active in RTTY contests, says the club! Topics include RTTY fundamentals and interfaces, common problems, and demos of setting up MMTTY, N1MM, and Writelog software. The Webinar is presented by Dean N6DE, Iain N6ML, John K6MM, and Fred K6DGW. It's nearly two hours long and the video file is 115 Mbytes. (Thanks, Dean N6DE)

Co-hosted by the Potomac Valley Radio Club and the Northern California Contest Club, Bob N6TV will be featured in a repeat viewing of the popular Webinar "How To Operate the CW Sprint <https://docs.google.com/present/edit?id=0Acwz3jYxWkIhZGczNnNnM2pfMzhjZnN2NXhjcA&hl=en>". This is very timely, since the North American CW Sprint is running on Saturday evening of this coming weekend.

Following a senatorial request to add more staff-level engineers, a new report from the General Accounting Office describes the "brain drain" at the FCC between 2003 and 2008. The report is discussed in a Slashdot news item <http://yro.slashdot.org/story/10/01/20/1551217/Brain-Drain-Admin-Failures-Threaten-the-FCCs-Role> for Jan 20. The FCC's public comment policy also comes in for some criticism. The background section of the report is also instructive as to the nature and structure of the FCC.

CQ ET DE EARTH - a history of messages intentionally beamed into space
<http://www.newscientist.com/article/dn18417-earth-calling-a-short-history-of-radio-messag
es-to-et.html?page=1>
is recounted in this item on the New Scientist Web site. You might be,
um, surprised at the nature of some of the messages, but given the
human preoccupation with bodily functions, perhaps not so surprised.
The first known such message was a 1679-bit burst blurted out by the
Arecibo facility in 1974 towards the galaxy known as Messier Object
<http://en.wikipedia.org/wiki/Messier_object> M13 and it will arrive in
the year 26,974. We'll leave the lights on.

How about CQ from within the Earth? QRZ.com carries this story
<http://forums.qrz.com/showthread.php?t=235207> about 16-year-old
Andrew Kendrick and his International Science Fair-winning VLF data
communications system. He uses it for communications from inside caves.
There's a photo <http://www.engadget.com/2010/02/01/t...d-communicati/>
of Andrew and his antenna and links to other stories on the subject in
the various comments.

In line with learning foreign ways to conduct our ham radio contacts,
the New York Times discusses PC-based and online methods of learning
languages
<http://www.nytimes.com/2010/01/28/technology/personaltech/28basics.html>.
There are lots of options for learning how to have a short
conversation! And even in a big pileup, a native "thank you" goes a
long way!

The latest in the Creative Compendium's challenge for consecutive dits
is contributed by Jeff VE3FRX with "RADISHES" (fifteen) and "FISH SHISH
KEBABS" by Greg KG6AZX with 26 consecutive dits! I suppose there are no
RADISH SHISH KEBABS or there would be a 27-ditter. Our original
provocateur, Jerry VE6CNU wonders what word has the longest string of
alternating dots and dashes, such as that in the middle of MARKET.

How about learning some Russian numbers
<http://www.enchantedlearning.com/language/russian/numbers/> this time?
zero -- nul
one -- odï¿½en
two -- dva
three -- tree
four -- chetiï¿½reh
five -- pyat
six -- shest
seven -- sem
eight -- viï¿½sem
nine -- dï¿½vyat
ten -- dï¿½syat
You are pyat-dï¿½vyat, spacibo!

Web Site of the Week - With the largest full Moon of the year just
past, here's link to free software for Moon observation: Virtual Moon
Atlas <http://www.astrosurf.com/avl>. This software is the result of a
collaboration between Christian Legrand, a passioned lunar observer,

and co-author of the guide "Discover the Moon" (Cambridge University Press) and Patrick Chevalley, author of the freeware "Cartes du Ciel / Sky Charts <http://www.stargazing.net/astropc>". EME and meteor scatter enthusiasts will find both of these useful.

WORD TO THE WISE

For ground-plane builders, Bill W6WRT contributes this issue's words of wisdom - "RF energy is expensive to generate. Do not waste it by running it through dirt. Keep it up in the air where it belongs."

==> SIGHTS AND SOUNDS

Here are some very interesting photos from Zone 18 during CQ WW in 1979. Many of you may remember working this loud multi-multi <http://www.csdx-club.ru/index.php?option=com_content&view=article&id=60> as U0Y, UK0AMM or RK0AXX over the past 30 years. They are still very active today as RW0A. Here are some more from 1981 <http://www.csdx-club.ru/index.php?option=com_content&view=article&id=69> and 1982 <http://www.csdx-club.ru/index.php?option=com_content&view=article&id=71>. The text is all in Cyrillic, but the photos speak a universal language. (Spacibo, James 9V1YC)

Here's a portable station idea - an inflatable satellite dish antenna <http://www.gatr.com/> currently being used by some of the relief agencies in Haiti. Contributor Dan AF7O wonders "what we could do with that for Field Day!"

Have fun building your code speed while listening to a classic work of fiction, "Alice in Wonderland <http://www.schlaupelz.de/Alice_in_Wonderland.html>" by Lewis Carroll. Just the ticket for those long drives, you can choose from 25 or 40 wpm. Feed your head, indeed! (Thanks, Glenn W0GJ)

With the improved and expanded graphics capabilities of the new ARRL Web site, Contest Branch Manager, Sean KX9X <kx9x@arrl.org>, would love to get more photos and graphics from contesters at all levels, HF, VHF, EME, anything! The more, the merrier! All he needs is a list of people in the photo, who took it, and your understanding that the ARRL may use it in various print and online publications.

==> RESULTS AND RECORDS

It seems that we just sent in the logs, but 2009 ARRL November Sweepstakes results <http://aptos.arrl.org/contests/> are already online, including the Club Competition! Click on "Initial Results" for a PDF of the final results and the line scores. The searchable database, Log-Checking Reports and in-depth writeup will still be published on the usual schedule in QST and in expanded form on the Web. The effort to turn the scores around quickly was a great success and a big thank you is extended to the log-checkers and paper log data entry volunteers. Due to an error in the Club database, the Northern Rockies

DX Association was mistakenly listed as the winner of the Local Club category in the 2009 ARRL November Sweepstakes. The correct Local Club winner is the Spokane DX Association. (Thanks, ARRL Contest Branch Manager, Sean KX9X)

Other contest results are online <http://aptos.arrl.org/contests/>, too - The 2009 ARRL September VHF QSO Party and 2009 ARRL 10 GHz & Up contest packages are available in PDF, too. Click "Results (QST)" to download the file, complete with sidebars, tables, and extensive commentary by the authors.

2009 ARRL January VHF Sweepstakes certificates have been mailed, somewhat late, but they are on their way. Reminder - this is the Last Call for 2009 Sweepstakes Clean Sweep mugs and pins from ARRL HQ. No orders will be accepted after Friday, Feb 5th.

Congratulations on a very nice switch-hitting job in the 2009 CQ WW by double-mode Top Ten operators W2SC (as 8P5A), OH2UA (as CR2X), and K9NW (as HT2N on SSB and A25NW on CW)!

CQ WPX Director, Randy K5ZD has led a volunteer team in the creation of an online database <http://www.cqwpx.com/score_db.htm> with all line scores for WPX SSB from 1985 to 2008 and for WPX CW from 1991 to 2008. He thanks the team of N7AZ, WP3C, SV1RP, AB7E, KA3DRR, N1NK, K4ZW, NN3W and KQ2M for their hard work in making this information for the rest of us.

OPERATING TIP

Know the codes - postal codes, that is! A lot of new contesters are dismayed to find big score reductions in domestic contest because they didn't use the right abbreviations for the states. You can find the codes for all fifty states and every US possession online from the USPS Web site <http://www.usps.com/ncsc/lookups/abbr_state.txt>. If you are an experienced operator hosting some new hams, be sure they know when to use which of ME-MD-MA-MI-MN-MS-MO-MT since it's not exactly obvious.

==> TECHNICAL TOPICS AND INFORMATION

The Double Half Delta Loop (DHD) receiving antenna used by the impressive TX3A expedition is described in an downloadable ZIP file of material <http://www.tx3a.com/equipment.html> and also on IV3PRK's Web site <http://www.iv3prk.it/> where Luis describes additional developments to this simple, yet effective low-band antenna. (Thanks, Neil G0JHC and Jacek SP5DRH)

Mentioned in the K9LA Webinar <http://www.pvrc.org/webinar/webinar0819.htm> hosted by the Potomac Valley Radio Club last August are a couple of interesting articles by on 160 meter propagation; "The 160-Meter Band: An Enigma Shrouded in Mystery" by Oler and Cohen (N4XX) and "Ducting and Spotlight Propagation on 160m" by K9LA. (Thanks, Tony NC4AS)

A nice pair of articles by K0FF appeared recently on the eham.net Web site. First is an article on building impedance transformers for Beverage antennas <http://www.eham.net/articles/23126> with lots of photos and detailed instructions. The second is a variation of the 5/8-wavelength 40 meter vertical design <http://www.eham.net/articles/23127> in ON4UN's "Low Band DXing" book. Good reading!

Dealing effectively with EMI and building transmission line components requires just the right type of ferrite. Once you know the manufacturer's part numbers you'll need to find a distributor, unless you want to order in large quantities. Mouser Electronics <http://www.mouser.com/> carries many of the Fair-Rite parts under "EMI/RFI Components". Ferroxcube is distributed by Elna Magnetics <http://www.elnamagnetics.com/> and that company also carries Fair-Rite. Kits and Parts <http://kitsandparts.com/index.php> by W8DIZ is a good source of both powdered-iron and ferrite cores with T- and FT- part numbers, as well as the vaunted W3NQN filters and other products. (Thanks, John K5PRO and Gary K4FMX)

The Ford EMC booklet being available on the Repeater-Builder <http://www.repeater-builder.com/rbtip/> Web site was mentioned in the Jan 20 issue of this newsletter. Mike WA6ILQ wrote to let you know that you can also find Chrysler and GM EMI information on the site.

When you need circuit design ideas it is usually time to hit the books, but if you don't have a huge library on hand, how about the Potluck Circuit Database <http://kitsandparts.com/potluck/view.php>? Another good on-line circuit resource is the CircuitsArchive Web site <http://www.circuitsarchive.org/index.php/Main_Page>. Don't forget to contribute your own favorite circuits, too!

I found a neat idea for the beginning and intermediate builder, Circuit Stickers that provide a circuit layout for prototyping PCBs and solderless breadboards. They are available from Indiana Kits <Indianakits.com> along with actual kits and other goodies.

Jim K9YC reminds us not to confuse phase shift with time delay. For example, a length of transmission line is often referred to as a phase-shifting element, but the line only provides a specific number of degrees of phase shift at one frequency. A length of line is more accurately viewed as providing time delay, instead.

As we convert to lead-free soldering, flux will become more important. Writing on the QRP-L reflector <http://mailman.qth.net/mailman/listinfo/qrp-l/>, veteran builder Chuck W5USJ recommends NoKorode Regular Paste Flux made by Rectorseal. It's designed for lead-free solder but he finds that it works well for lead-tin solders, too. It works particularly well on nickel-plated connectors such as RCA and other audio styles.

Resources for dealing with RFI to and from the dreaded touch-lamps are presented on a dedicated ARRL Technical Information Service page.

<http://www.arrl.org/tis/info/touchlamp.html> QST also ran several articles on the problem: May 1985, Jan 1986, Jan 1993, May 1993, Feb 1995, Apr 1995, and Jun 1997 - all are available through the online QST Archives for ARRL members. (Thanks, Gene AD3F)

You might want to bookmark the Web site that lists the numerous ways to use the Google search page <http://www.google.com/landing/searchtips/> for targeted searches. The list includes everything from package tracking to a "fill in the blank" page I occasionally find pretty handy. A great diversion is watching the earthquake locations - lots is shaking in West Yellowstone, lately!

Technical Web Site of the Week - If you need to link GPS data with field measurements such as noise levels, Pete N4ZR suggests trying the free GPS Visualizer <http://www.gpsvisualizer.com/> software. The list of example maps on the site should really pique your interest!

==> CONVERSATION

Siren Songs

In this issue, I attempt a duet with Kirk K4RO on the theme of logging accuracy and two common reasons for its downfall; reliance on databases and lack of sleep. Kirk will begin and then I'll chime in with refrains from "Can O' Bull Red", miscopied in its own right from the Peter Rowan classic "Panama Red". See you in the pileups!

(K4RO) For years now (a decade or more) I used a Super Check Partial database made up of only the call signs that I have worked from my station. I was aware of the publicly available databases, but I found that they contained call signs that I never heard or worked. So I stuck to my own self-generated SCP, hoping to keep the mistakes down.

Can o' Bull Red, can o' Bull Red
The mults will call from right inside your head!
Can o' Bull Red, can o' Bull Red
On his black horse, Dos Espresso
He'll take your golden log right down
Your relief op's still in bed
Needs a swig from a can o' Bull Red

Once the exchange look-up feature became available in TR-Log, I used it. I figured my competitors were, so I better get with it. Again, I only used data from my own contest activity. Since I was very active, my look-up databases were well populated. I was convinced that they were saving me considerable keystrokes.

Checkers know Bull Red's been downed
Calls get busted, NILs are found
But the ops have gone rate crazy
Taking guesses all around
My Elmer said, "Hey, Bozo,
Call CQ, don't search and pounce!"

Nobody sits still after
Can o' Bull Red gets passed around

However, I came to find over the years that those saved keystrokes came at a cost. I would get lazy or tired, and just accept what was already in the call sign window -- without really verifying what I had heard. This was especially true if QRM or the second radio was covering up the signal. My error rates did NOT improve as a result.

Can o' Bull Red, can o' Bull Red
The mults will call from right inside your head!
Can o' Bull Red, can o' Bull Red
On his black horse, Dos Espresso
He'll take your golden log right down
Your relief op's still in bed
Needs a swig from a can o' Bull Red

I also found that the pre-fill data distracted me from my main reason for being on the radio -- which was paying my attention to the audio stream in my ears, and not the visual input from the computer. It literally degraded my copying skills through distraction.

Everybody's looking out for him
'Cause they know Red opens eyes
Tired ops love to pull calls from
The noise and log sweet lies
But when the pileup gets confusing, buddy
You're better off in bed
Instead of searching in the fridge upstairs for
A can o' Bull Red

Since that time I've used the pre-fills less, and enjoyed operating more. It was kind of like learning to find DX again on my own, after falling into the seductive trap of having others do it for me during the early packet era. They don't allow pre-fill databases at WRTC, and I suspect some reasoned thought went into that decision.

Can o' Bull Red, can o' Bull Red
The mults will call from right inside your head!
Can o' Bull Red, can o' Bull Red
On his black horse, Dos Espresso
He'll take your golden log right down
Your relief op's still in bed
Needs a swig from a can o' Bull Red

Bottom line - copy the stuff yourself, and don't be fooled by the lure of the pre-fill database. It won't help you become a better operator, and it probably won't help your score either in the long run.

73, Ward N0AX and Kirk K4RO

==> CONTESTS

February 3 through February 16, 2010

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

Vermont QSO Party--Phone,CW,Digital, from Feb 6, 0000Z to Feb 7, 2400Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW band edge+40 kHz; SSB lowest 25 kHz Gen band; VHF SSB 50.200/144.200; FM 146.69, 146.55. Exchange: RS(T) and VT county or S/P/C. Logs due: Mar 7. Rules <http://vtqsoparty.westriverradio.org/>

YLISSB QSO Party--CW, from Feb 6, 0000Z to Feb 7, 0000Z. Bands (MHz): 1.8-28. Exchange: Call sign, RS(T), ISSB number. Logs due: Mar 19. Rules <http://www.ylsystem.org/>

Ten-Ten Winter Phone QSO Party--Phone, from Feb 6, 0001Z to Feb 7, 2359Z. Bands (MHz): 28. Exchange: Call sign, name, QTH, 10-10 number. Logs due: Feb 22. Rules <http://www.ten-ten.org/>

Black Sea Cup International--Phone,CW, from Feb 6, 1200Z to Feb 7, 1200Z. Bands (MHz): 1.8-28. Exchange: RS(T) and org'n ID, member nr or ITU zone. Logs due: 30 days. Rules <http://www.bscc.ucoz.ru/>

Minnesota QSO Party--Phone,CW,Digital, from Feb 6, 1400Z to Feb 6, 2359Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW 1.850, 3.550, 7.050, 14.050, 21.050, 28.050; SSB 1.870, 3.850, 7.250, 14.270, 21.350, 28.450. Exchange: Name and MN county or S/P/C. Logs due: Mar 15. Rules <http://www.w0aa.org/>

FYBO Winter QRP Field Day--Phone,CW, from Feb 6, 1400Z to Feb 6, 2400Z. Bands (MHz): 1.8-28. Exchange: RS(T), S/P/C, name, power, temp in deg F. Logs due: 30 days. Rules <http://www.azscqrpions.org/>

Straight Key Party--CW, from Feb 6, 1600Z to Feb 6, 1900Z. Bands (MHz): 3.5,7. Exchange: RST, serial, category, name, age. Logs due: Feb 28. Rules <http://www.agcw.org/>

British Columbia QSO Party--Phone,CW,Digital, from Feb 6, 1600Z to Feb 7, 0759Z. Bands (MHz): 1.8-28, 50, Frequencies: CW 1.85, 3.55, 7.045,14.05, 21.05 ,28.05, 50.095; SSB 1.85, 3.825, 7.26, 14.225, 21.38, 28.38, 50.13. Exchange: RST and BC district or S/P/C. Logs due: Mar 31. Rules <http://www.deltaamateurradio.com/>

Delaware QSO Party--Phone,CW,Digital, from Feb 6, 1700Z to Feb 7, 2359Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW 1.825, 3.55, 7.05, 14.05, 21.05 ,28.05, 50.95; SSB 1.86, 3.96, 7.26, 14.26, 21.36, 28.36, 50.135; Digital per band plan. Exchange: RS(T) and DE county or S/P/C. Logs due: 30 days. Rules <http://www.fsarc.org/>

XE Int'l RTTY Contest--Digital, from Feb 6, 1800Z to Feb 7, 1759Z. Bands (MHz): 3.5-28. Exchange: RST and XE state/district or serial.

Logs due: 30 days. Rules <http://www.fmre.org.mx/>

North American Sprint--CW, from Feb 7, 0000Z to Feb 7, 0400Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, name, and S/P/C. Logs due: 7 days. Rules <http://www.ncjweb.com/>

New Mexico QSO Party--Phone,CW,Digital, from Feb 7, 1500Z to Feb 8, 0300Z. Bands (MHz): 1.8-28, 50, Frequencies: CW-1.85, 3.55, 7.045, 14.05, 21.05, 28.05, 50.095; SSB-1.85, 3.925, 7.26, 14.28, 21.38, 28.38, 50.13.Exchange: Call sign, name, and NM county or S/P/C. Logs due: Mar 1. Rules <http://www.swcp.com/%7En5zgt>

QRP Winter Fireside SSB Sprint--Phone, from Feb 7, 2000Z to Feb 7, 2359Z. Bands (MHz): 3.5-28. Frequencies: 3.865, 7.285, 14.285, 21.385, 28.385. Exchange: RS, S/P/C, QRP ARCI number or power. Logs due: Mar 8. Rules <http://www.qrparci.org/>

School Club Roundup--Phone,CW,Digital, from Feb 8, 1300Z to Feb 12, 2400Z. Bands (MHz): 1.8-28, 50+. Exchange: RS(T), Class, S/P/C. Logs due: 30 days. Rules <http://www.arrl.org/scr>

Valentine Sprint--Digital, from Feb 12, 8 PM to Feb 13, 2 AM. Bands (MHz): 1.8-7. Frequencies: 1.807,3.580,7.070/7.035 EU/7.028 JA. Exchange: Name, OM or YL, S/P/C. Logs due: Mar 5. Rules <http://www.podxs070.com/>

YL-OM Contest--Phone,CW,Digital, from Feb 12, 1400Z to Feb 14, 0200Z. Bands (MHz): 1.8-28. Exchange: Call sign, RST, serial and S/P/C. Logs due: 30 days. Rules <http://www.ylrl.org/>

CQ WW RTTY WPX--Digital, from Feb 13, 0000Z to Feb 14, 2400Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: Mar 1. Rules <http://www.cqwpxrtty.com/>

New Hampshire QSO Party--Phone,CW,Digital, from Feb 13, 0001Z to Feb 14, 0001Z. Bands (MHz): 1.8-28, 50-1296, Frequencies: CW 1.81,band edge+35kHz;Phone 1.875,3.935-950, 7.235, 14.28, 21.38, 28.39, 50.115, 144.205,52.54,146.55,223.5,446,902.1,1296.1. Exchange: RS(T) and NH county or S/P/C. Logs due: Fol'g Wed. Rules <http://www.w1fz.org/>

Asia-Pacific Sprint--CW, from Feb 13, 1100Z to Feb 13, 1300Z. Bands (MHz): 7,14. Exchange: RST, serial. Logs due: 30 days. Rules <http://jsfc.org/apsprint/aprule.txt>

Worldwide Peace Messenger Cities--Phone,CW, from Feb 13, 1200Z to Feb 14, 1200Z. Bands (MHz): 1.8-28. Exchange: RS(T), serial, PMC ref number or CQ zone. Logs due: 30 days. Rules <http://www.s59dcd.si/>

Dutch PACC Contest--Phone,CW, from Feb 13, 1200Z to Feb 14, 1200Z. Bands (MHz): 1.8-28. Exchange: RS(T) and Dutch province or serial. Logs due: Mar 15. Rules <http://www.dutchpacc.com/>

Louisiana QSO Party--Phone,CW,Digital, from Feb 13, 1500Z to Feb 14, 0300Z. Bands (MHz): 3.5-28. Frequencies: CW 1.84, 3.54, 7.04, 14.04,

21.04, 28.04; Phone 1.865, 3.865, 7.255, 14.255, 21.365, 28.465; VHF 50.095, 50.135, 144.05, 144.21. Exchange: Call sign, RS(T), LA parish or S/P/C. Logs due: Mar 15. Rules <http://laqso.w5yl.org/>

OMISS QSO Party--Phone, from Feb 13, 1500Z to Feb 14, 1500Z. Bands (MHz): 3.5-28. Exchange: RS, S/P/C and OMISS nr or "DX". Logs due: Mar 30. Rules <http://www.omiss.info/>

FISTS CW Winter Sprint--CW, from Feb 13, 1700Z to Feb 13, 2100Z. Bands (MHz): 3.5-28. Exchange: RST, S/P/C, first name, FISTS nr or power. Logs due: 30 days. Rules <http://www.fists.org/>

RSGB 1.8 MHz Contest--CW, from Feb 13, 2100Z to Feb 14, 0100Z. Bands (MHz): 1.8. Exchange: RST, serial, UK district. Logs due: Dec 6. Rules <http://www.rsgbcc.org/>

North American Sprint--Phone, from Feb 14, 0000Z to Feb 14, 0400Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, name, and S/P/C. Logs due: 7 days. Rules <http://www.ncjweb.com/>

Classic Exchange--Phone, from Feb 14, 1400Z to Feb 15, 0800Z. Bands (MHz): 1.8-28, 50,144, Frequencies: AM--1.890,3.880,7.160,7.290,14.286,21.420,29.000,50.400,144.300; SSB--1.885,3.870,7.280,14.270,21.370,28.390,50.125,144.200. Exchange: RST, QTH, model of rcvr and xmtr. Logs due: 30 days. Rules <http://qsl.asti.com/CX>

VHF+ CONTESTS

Vermont QSO Party--Phone,CW,Digital, from Feb 6, 0000Z to Feb 7, 2400Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW band edge+40 kHz; SSB lowest 25 kHz Gen band; VHF SSB 50.200/144.200; FM 146.69, 146.55. Exchange: RS(T) and VT county or S/P/C. Logs due: Mar 7. Rules <http://vtqsoparty.westriverradio.org/>

Minnesota QSO Party--Phone,CW,Digital, from Feb 6, 1400Z to Feb 6, 2359Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW 1.850, 3.550, 7.050, 14.050, 21.050, 28.050; SSB 1.870, 3.850, 7.250, 14.270, 21.350, 28.450. Exchange: Name and MN county or S/P/C. Logs due: Mar 15. Rules <http://www.w0aa.org/>

British Columbia QSO Party--Phone,CW,Digital, from Feb 6, 1600Z to Feb 7, 0759Z. Bands (MHz): 1.8-28, 50, Frequencies: CW 1.85, 3.55, 7.045,14.05, 21.05 ,28.05, 50.095; SSB 1.85, 3.825, 7.26, 14.225, 21.38, 28.38, 50.13. Exchange: RST and BC district or S/P/C. Logs due: Mar 31. Rules <http://www.deltaamateurradio.com/>

Delaware QSO Party--Phone,CW,Digital, from Feb 6, 1700Z to Feb 7, 2359Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW 1.825, 3.55, 7.05, 14.05, 21.05 ,28.05, 50.95; SSB 1.86, 3.96, 7.26, 14.26, 21.36, 28.36, 50.135; Digital per band plan. Exchange: RS(T) and DE county or S/P/C. Logs due: 30 days. Rules <http://www.fsarc.org/>

New Mexico QSO Party--Phone,CW,Digital, from Feb 7, 1500Z to Feb 8, 0300Z. Bands (MHz): 1.8-28, 50, Frequencies: CW-1.85, 3.55, 7.045, 14.05, 21.05, 28.05, 50.095; SSB-1.85, 3.925, 7.26, 14.28, 21.38, 28.38, 50.13.Exchange: Call sign, name, and NM county or S/P/C. Logs due: Mar 1. Rules <http://www.swcp.com/%7En5zgt>

School Club Roundup--Phone,CW,Digital, from Feb 8, 1300Z to Feb 12, 2400Z. Bands (MHz): 1.8-28, 50+. Exchange: RS(T), Class, S/P/C. Logs due: 30 days. Rules <http://www.arrl.org/scr>

New Hampshire QSO Party--Phone,CW,Digital, from Feb 13, 0001Z to Feb 14, 0001Z. Bands (MHz): 1.8-28, 50-1296, Frequencies: CW 1.81,band edge+35kHz;Phone 1.875,3.935-950, 7.235, 14.28, 21.38, 28.39, 50.115, 144.205,52.54,146.55,223.5,446,902.1,1296.1. Exchange: RS(T) and NH county or S/P/C. Logs due: Fol'g Wed. Rules <http://www.w1fz.org/>

Classic Exchange--Phone, from Feb 14, 1400Z to Feb 15, 0800Z. Bands (MHz): 1.8-28, 50,144, Frequencies: AM--1.890,3.880,7.160,7.290,14.286,21.420,29.000,50.400,144.300; SSB--1.885,3.870,7.280,14.270,21.370,28.390,50.125,144.200. Exchange: RST, QTH, model of rcvr and xmtr. Logs due: 30 days. Rules <http://qsl.asti.com/CX>

==> LOG DUE DATES

February 3 through February 16, 2010

February 4 - ARS Spartan Sprint, email logs to: spartansprint@yahoo.com, paper logs and diskettes to: (none). Rules <http://adventure-radio.org/wiki/index.php?title=Spartan_Sprint_Rules>

February 5 - EUCW 160m Contest, email logs to: f6cel@wanadoo.fr, paper logs and diskettes to: Ghislain BARBASON, 5 rue de l'Ecluse, F-02190 PIGNICOURT, France. Rules <http://www.agcw.de/eucw/eu160.html>

February 8 - RSGB 80m Club Championship, SSB, email logs to: ccssb.logs@rsgbhfcc.org, upload log at: http://www.vhfcc.org/cgi-bin/hfenter.pl, paper logs and diskettes to: (none). Rules <http://www.rsgbcc.org/hf/rules/2010/r80mcc.shtml>

==> PUBLIC SERVICE : ILLINOIS TEAMS WITH AMATEUR RADIO OPERATORS TO
CREATE RACES PROGRAM

A newly forged partnership between Amateur Radio operators
throughout the state of Illinois and the Illinois Emergency Management
Agency (IEMA) will provide an additional layer of emergency
communications during disasters. The agreement creates the State Radio
Amateur Civil Emergency Services (RACES) program. Under the agreement,
IEMA Director Andrew Velasquez appointed ARRL Illinois Section
Emergency Coordinator Brad Pioveson, W9FX, of Benton as the volunteer
State RACES Officer. Pioveson will serve as the single point of contact
between IEMA and the Illinois Amateur Radio community. Read more here
<http://www.arrl.org/news/stories/2010/02/02/11321/?nc=1>.

==> PUBLIC SERVICE: MARS UNIFIES OPERATION IN SUPPORT OF HAITI RELIEF
EFFORT

To assist the MARS communications support effort in Haiti, the heads
of the Army, Air Force, and Navy-Marine Corps MARS programs have agreed
to divvy up responsibilities among the three Service MARS programs.
According to Air Force MARS Public Information Officer David
```

Trachtenberg, N4WWL/AFA3TR, this delegation of responsibility will facilitate more efficient utilization of MARS communications assets in the overall relief operation. On January 12, a 7.0 earthquake struck Haiti, killing thousands and wiped out the island nation's communication infrastructure. Read more here <http://www.arrl.org/news/stories/2010/02/03/11326/?nc=1>.

==> ARRL FIELD DAY : 2010 FIELD DAY PACKETS NOW AVAILABLE

It's that time of year again -- time to start gearing up for ARRL Field Day, June 26-27, 2010! ARRL's flagship operating event -- always held the fourth full weekend in June -- brings together new and experienced hams for 24 hours of operating fun. Field Day packets are now available for download <http://www.arrl.org/contests/forms/fd-2010-packet.pdf> and include the complete rules (including changes for 2010), as well as other reference items such as forms, ARRL Section abbreviation list, entry submission instructions, a Frequently Asked Questions section, guidelines for getting bonus points, instructions for GOTA stations, a kit to publicize your event with the local press and more.

==> COMING UP IN QST : LOOK FOR THE MARCH ISSUE OF QST TO ARRIVE SOON!

The March issue of QST -- our annual antenna issue -- is jam-packed with all sorts of things today's Amateur Radio operator needs. From product reviews to experiments to contesting to a plethora of antennas and antenna projects, the upcoming issue of QST has something for just about everyone. You'll find an abundance of technical and general interest articles -- including a new operating event for newly licensed hams -- as well as monthly columns such as Happenings, How's DX, Hamspeak, Vintage Radio and more. Click here <http://www.arrl.org/news/stories/2010/02/02/11324/?nc=1> to discover what's in store for you in the March issue of QST, the official journal of the ARRL .

==> LICENSING NEWS: NCVEC RELEASES REVISED TECHNICIAN QUESTION POOL

In January, the Question Pool Committee (QPC <http://www.ncvec.org/page.php?id=333>) of the National Conference of Volunteer Examiner Coordinators (NCVEC <http://www.ncvec.org/>) released <http://www.arrl.org/?artid=9368> the 2010 Technician (Element 2) Question Pool. Upon further review of the pool, members of the QPC found and corrected more than 50 minor typographical errors and clarified the questions and answers, making them easier to understand. These adopted changes are now incorporated in a revised question pool. Read more here <http://www.arrl.org/?artid=9415>.

==> ARRL IN ACTION : WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members, including planning for the League's future at the 2010 Annual Meeting of the ARRL Board of Directors, preparing for WRC-12, investigating interference, providing equipment for

communications support in Haiti through the ARRL's Ham Aid program and more. This installment covers the month of January. Read more here <http://www.arrl.org/news/features/2010/02/01/11320/?nc=1>.

==> ARRL RECOGNIZES: FORMER ARRL PRESIDENT NAMED QCWA PRESIDENT EMERITUS

Harry Dannals, W2HD -- who led the ARRL as President from 1972-1982 and was named ARRL President Emeritus in 1984 <http://www.arrl.org/honoraries.html> -- has been named President Emeritus of the Quarter Century Wireless Association (QCWA <http://www.qcwa.org/>). Dannals also served as President of QCWA from 1989-1994; he is the only person to ever serve as President to both organizations. In addition to his work with the QCWA and ARRL, Dannals is a Fellow in the Radio Club of America (RCA <http://www.radioclubofamerica.org/>), a member of the Society of Wireless Pioneers (SOWP <http://www.sowp.org/>), the Old Old Timers Club (OOTC <http://www.ootc.us/>) and the Veteran Wireless Operators Association (VWOA <http://www.vwoa.org/>). In 2002, he was inducted into the CQ Magazine Amateur Radio Hall of Fame <http://www.arrl.org/news/stories/2002/05/31/102/>. "I was pleased to learn that the QCWA's leadership has conferred upon Harry Dannals this very well-deserved accolade," said ARRL President Kay Craigie, N3KN. "As the only person to have served as President of the ARRL and the QCWA, he is unique among amateurs."

==> FCC NEWS : FCC NOTES AMATEUR RADIO RESPONSE TO HAITIAN EARTHQUAKE

In a posting on January 28 to the FCC's blog <http://reboot.fcc.gov/blog/>, Mindel DeLaTorre -- the Commission's International Bureau Chief -- noted how Amateur Radio operators are assisting with communications support in earthquake ravaged Haiti. "The amateur radio community is also contributing to the relief efforts," she wrote. "In the aftermath of the earthquake, the amateur radio community in Haiti, the Dominican Republic and elsewhere has dedicated equipment and spectrum resources to the relief efforts." DeLaTorre reiterated that those who want to assist in the relief effort must go through the proper channels <http://www.arrl.org/?artid=9397>: "For anyone wanting to help, to protect against harmful interference, it is important to go through the Haitian government before any radio equipment or spectrum resources are used in Haiti."

==> ARRL RECOGNIZES: PHIL SALAS, AD5X, WINS JANUARY QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for January is Phil Salas, AD5X, for his article "160 and 80 Meter Matching Network for Your 43 Foot Vertical -- Part 2." Congratulations Phil! The winner of the QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/members-only/QSTvote.html>. Cast a ballot for your

favorite article in the February issue by Sunday, February 28.
<http://www.arrl.org/members-only/QSTvote.html>

==> SOLAR UPDATE

Tad "Sun and moon but set to rise
<http://www.robertburns.org/works/483.shtml>" Cook, K7RA, reports: As soon as sunspot 1041 went over the horizon at the end of January, sunspot 1043 emerged, high in our Sun's northern hemisphere. The average daily sunspot number this week fell more than 13 points to 14.6; the average daily solar flux declined nearly 7 points to 75. Geomagnetic activity was up, and the average daily planetary A index rose 2 points to 5.1. The average daily sunspot number for January was 21.3, and the 3-month trailing average -- centered on December -- was approximately 15.2. Like last month, the average for the month greater than the 3-month average centered on the previous month is a good trend. The difference between the monthly average sunspot number and the trailing 3-month average has been positive since September. The difference for November, December and January was 0.6, 5.5 and 6.2. For 2009, the 3-month average centered on January through December (resolved to two digits beyond the decimal point) was 2.19, 2.02, 1.49, 2.01, 4.23, 5.2, 4, 4, 4.64, 7.1, 10.16 and 15.15. The predicted planetary A index for February 4-9 is 5, 5, 8, 10, 10 and 5. The predicted solar flux for those same days is 78, 80, 82, 85, 88 and 90. Look for more information in the Solar Update -- including news on 6 meter openings, and a piece from Carl Luetzelschwab, K9LA, about an auroral oval image -- on the ARRL Web site on Friday, February 5. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page
<http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by Robert Burns' Inconsistency in Love
<http://www.robertburns.org/works/483.shtml>.

==> THIS WEEK ON THE RADIO

<http://www.youtube.com/watch?v=K9Zev5gr9is> This week, there is a running of the NCCC Sprint Ladder on February 5. Look for the FYBO Winter QRP Sprint, the Minnesota QSO Party and the AGCW Straight Key Party on February 6. The Vermont QSO Party, the YL-ISSB QSO Party (CW), the 10-10 International Winter Contest (SSB), the British Columbia QSO Party, the Delaware QSO Party and the Mexico RTTY International Contest are February 6-7. On February 7, check out the North American Sprint (CW) and the ARCI Fireside SSB Sprint. The New Mexico QSO Party is February 8. The ARRL School Club Roundup <http://www.arrl.org/SCR/> is February 8-12. The NAQCC Straight Key/Bug Sprint is February 10 and the CWops Mini-CWT Test is February 10-11. Next week, the NCCC Sprint Ladder is February 12. The YLRL YL-OM Contest is February 12-14 and the FISTS Winter Sprint is February 13. On February 13-14, be sure to check out the CQWW RTTY WPX Contest, the KCJ Topband Contest, the Louisiana QSO Party and the OMISS QSO Party. The North American Sprint (SSB) and the SKCC Weekend Sprint are both February 14. The Classic Exchange

(Phone) is February 15 and the AGCW Semi-Automatic Key Evening is February 17. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, February 21, 2010, for these online course sessions <http://www.arrl.org/cep/student/> beginning on Friday, March 5, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1695 - February 5, 2010

Amateur Radio Newsline report number 1695 with a release date of
Friday, February 5th, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. CQ Magazine files a rule making request to
give hams more leeway under section 97.113 for rescue radio training, a
Texas ham asks the FCC to create a United States 4 meter band and the
National Conference of Volunteer Examination Coordinators again revises
the recently revised Technician Class question pool. Find out more on
Amateur Radio Newsline(tm) report number 1695 coming your way right
now.

RADIO LAW: CQ MAGAZINE FILES RULES CHANGE REQUST ON 97.113

One of the nations leading ham radio publications is joining the
movement to modify section 97.113 of the Amateur service rules. This,
to permit hams in the employ of government or relief agencies to take
part in disaster training drills. Amateur Radio Newsline's Mark
Abramowicz, NT3V, has the rest of the story:

--

To hear talk among some in the amateur radio community, the FCC's decision
to offer an interpretation of this rule more than a year ago without the
filing of a complaint or request for clarification still is puzzling and
even troubling.

The commission legal counsel/enforcement officer, read a posting by on a
bulletin board by a ham who helped his hospital put together and then
participated in a disaster drill.

That ham got a communication from the FCC saying he was in violation of the
provision of 97.113 regarding pecuniary interest and an employer benefiting
from amateur radio.

The perception by some of this heavy-handed approach by the new FCC
administration sent shockwaves among not only the amateur community but
those it serves.

The result: Some organizations backed away altogether from using the
services of amateur radio for fear they could come under FCC scrutiny.

Then, a clarification from the FCC that waivers could be granted.

What followed, a petition by a group of hams led by noted radio instructor Gordon West, WB6NOA, seeking to change the rule to allow hams to take part in disaster training exercises put on by their employers.

But CQ Magazine editor Rich Moseson, W2VU, says so much more is at stake and that's why he filed a more inclusive petition with the FCC.

"We realized in reading through all this that really this interpretation goes beyond disaster and emergency communication," Moseson explains. "A very strict reading of this rule means, for example, that I as an employee of CQ Communications, would not be able to do equipment reviews.

"Or, at least, not if involved transmitting. And, for decades, staff members of magazines have been doing equipment reviews. And, it's never been a problem. But if you read this closely, if I transmit for the purpose of doing an equipment review, then, I'm in violation of the rules."

But Moseson says the FCCs interpretation of this rule, goes even further, and could impact the Amateur Radio on the International Space Station Program.

"Everyone thinks it's (ARISS) a wonderful program," Moseson says. "It's good for NASA, it's good for ham radio, it's good for kids, it's good for the national interest in promoting young people's interest in science and technology by allowing them to communicate with astronauts on board the space station via amateur radio.

"No one questions the value of this program. But the astronauts are NASA employees and they are clearly communicating on behalf of their employer when they are operating in an ARISS contact."

And, Moseson says, even though they're making those contacts on their free time, if you look at the FCC interpretation, they, too, are in violation. So, Moseson says, it's time to act and he suspects the American Radio Relay League also will weigh in shortly.

"My understanding was that the ARRL board was going to consider at its meeting a couple of weeks ago, filing its own petition," Moseson says. "My guess is that the FCC will wait until the League files its petition and then group all three of them, or more if there have been others filed as well, into a single petition that is put out for initial public comment."

In the meantime, Moseson says the interpretation stands and waivers will have to be sought.

Moseson says it's clear this issue won't be decided quickly. In most cases, he says, it could take up to a year or more for the FCC to issue it's decision.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

You can read the entire story on the CQ petition to change section 97.113 of the Amateur service rules beginning on page 8 and continuing on page 114 of February 2010 issue of that magazine. Its also on-line at http://www.cq-amateur-radio.com/ZeroBiasFeb10.pdf (ARNewsline(tm))

RESTRUCTURING: PETITION FILED FOR CREATION OF U.S. 4 METER BAND

QRZ.com lead moderator Glen Zook, K9STH, of Richardson, Texas has filed a Petition for Rulemaking to the FCC. One aimed at creating a 70.000 MHz to 70.500 MHz amateur radio band in the United States. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--

In his January 27th filing, Glen Zook, K9STH, notes that the 4 meter band spectrum has been authorized in a growing number of European and African nations. He says that by establishing such privileges for amateur radio operators in the United States and other areas over which the Commission has jurisdiction that it would be of great benefit to those operators residing in such areas.

According to Zook, the recent migration of broadcast television stations to primarily the UHF frequencies has basically eliminated any probable interference to television channels 4 or 5 which otherwise might have occurred. This is because the 4-meter band is located on frequencies that were allocated to television channel 4. Since the 4-meter amateur radio band does not fall in the 72.0 MHz to 76.0 MHz segment which is allocated to Operational Fixed and various mobile services there would be no potential co-channel or adjacent channel interference.

In his proposal Zook suggests that the FCC allow all classes of amateur radio operators operating privileges on this new band. However, he also suggests that Novice Class licensees be restricted to a lower output level than those allowed for Technician, General, Advanced and Extra Class licensees. He says that if the present maximum power output limitation of 1500 watts P-E-P is granted to the higher class licensees then the Novice Class licensees should be restricted to no more than 200 watts power output as per most of the privileges granted those operators who hold a Novice Class license.

It should be noted that there are still a small number of low-band VHF television transmitters in operation and their owners will likely oppose the creation of a new ham band at 70 MHz. That said, the level of opposition from broadcasters will likely be far less than it would have been before the Digital Television transition of June 2009. Thats when most of the nations VHF low band stations on channels 2 through 7 migrated to channels in the U-H-F range.

If the FCC decides to issue it a Rule Making designation, Glen Zook's petition to create a ham radio allocation at 70 MHz is likely to garner a lot of support from within the ham radio community. Especially from those who operate in the world above 50 MHz.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

RESCUE RADIO: FCC TEAM ASSESSES HAITI'S COMMUNICATIONS NEEDS - PRAISES HAM
RADIO

An FCC led telecommunications assessment team is on-the-ground in Haiti evaluating the status of the country's communications infrastructure. This, following the devastating earthquake that struck that island nation on January 12th.

The communications experts were deployed in coordination with the United States Agency for International Development. They came in response to a request from the Director General of Haiti's Conatel which is the national telecommunications regulatory agency in that quake devastated nation

The FCC team was led by International Bureau Chief Mindel De La Torre. She and the others will continue to work with Conatel and local Haitian telecommunications providers to come up with practical options for restoring communications services to the people of Haiti.

Speaking from Port au Prince, De La Torre said that after seeing the destruction of the country, and particularly the telecommunications infrastructure, that she now has a much better understanding of the monumental task to keep communications up and running in such a difficult environment. She added that it is clear that the communications sector is making a huge difference on a day-to-day basis for Haitians struggling with tremendous personal and property losses.

Bureau Chief DeLaTorre has also taken note of the contributions to earthquake relief efforts of the words ham radio community. Writing in the FCC blog, DeLaTorre noted that in the aftermath of the earthquake, the amateur radio community in Haiti, the Dominican Republic and elsewhere has dedicated equipment and spectrum resources to the relief efforts. YHOTY: 2010 YOUNG HAM OF THE YEAR AWARD NOMINATING PERIOD NOW OPEN

The nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award is now open. Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear and CQ Magazine combine to honor a ham radio operator age 18 or younger. This, for his or her contributions to ham radio or to society itself through ham radio.

It is expected that Vertex-Standard will once again fly the winner to Huntsville, Alabama, where the award will be formally presented. Hotel accommodations as well as convention tickets are normally provided. CQ Magazine says that it will again treat the recipient to a week at Spacecamp-Huntsville as it has done in years past.

Please note that if the recipient is unable to travel to the convention, Amateur Radio Newsline will attempt to arrange a special award ceremony where he or she resides. This might be at his or her school, in front of his or her Amateur Radio club. In this case the trip to the convention will be forfeited by the recipient, but all other aspects of the award will remain.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both mail in and electronic submission are being accepted this year. Full rules and a downloadable nominating form are now on our website at www dot arnewsline dot org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the words "here" to download the directions and the form. We look forward to hearing from you. (ARNewsline(tm))

**

RADIO LAW: CODIFYING THE VANITY CALL SIGN RULES

The FCC is in the process of making permanent the rules governing the Vanity call sign program. As regular listeners are aware, late last year, the FCC issued a Notice of Proposed Rule Making titled WT Docket 09-209 that seeks to amend the Commission's Amateur Radio Service rules. This, to clarify certain rules and codify existing procedures governing the vanity call sign system, as well as revise certain rules applicable to club stations.

Now, interested parties may make comments on this Notice of Proposed Rule Making via the Federal Rulemaking portal or the FCC's own website. Comments must be submitted by March 26, 2010 with reply comments are due no later than April 12, 2010. The U-R-L's to use are http://www.regulations.gov/search/Regs/home.html#home, or via the FCC's Web site at http://fjallfoss.fcc.gov/ecfs/. (ARRL, FCC)

RADIO TESTING: NCVEC RELEASES REVISED ELEMENT 2 TECH QUESTION POOL

A revision to the new Element 2 Technician class ham radio testing question pool released this past January 4th. This, as the Question Pool

Committee of the National Conference of Volunteer Examiner Coordinators says that after further review that it found and corrected more than 50 minor typographical errors. Also that it clarified the questions and answers making them easier to understand.

These changes are now incorporated in a revised Element 2 question pool that contains some 400 questions. 35 are selected to make up any given Element 2 exam. And in a departure from past Element 2 question pools this one contains graphics and diagrams.

According to the NCVEC the errata list, as well as the revised Technician question pool, is available on the organizations website at www dot ncvec dot org. This new Element 2 question pool becomes effective for Technician class examinations administered on or after this coming July 1st and will remain valid until June 30, 2014. (NCVEC)

**

COMMUNICATIONS LAW: NEW GROUP FORMED TO FIGHT DISTRACTED DRIVING

A new group with government support is targeting all forms of distractions while driving. And while amateur radio is not yet in its gun-sights, hams will want to keep a close eye on this one as we hear from Frank Haas, KB4T, has the details:

--

The National Highway Traffic Safety Administration has teamed up with the National Safety Council for form a new organization to end distracted driving. This through the creation of a new organization called FocusDriven which is the first nonprofit organization devoted to combating distracted driving and supporting victims of distracted drivers.

The National Highway Traffic Safety Administration defines distracted driving as any non-driving activity a person engages in that has the potential to distract him or her from the primary task of driving and increase the risk of crashing. It notes that there are three major types of driving distraction that incude visual, manual and cognitive. In simple terms this means any activity that causes a driver to take one's eyes off the road, ones hands off the steering wheel, or one's mind off of driving.

While distracted driving has always been a safety issue. Now, with the advent of mobile communication devices and other mobile technologies, it has become what the FocusDriven calls a growing epidemic. The group considers cell phone texting the most alarming of newer distractions, because it involves all three types of distraction. Other forms of distracted driving includes driving while using a cell phone, changing a radio station, eating and drinking, talking to passengers, grooming, using a CD or Mp3 player, watching a video or reading, or using a PDA or navigation system or other portable electronic devices.

So far, a ban against texting while driving has been enacted in 19 states plus Washington D.C. and Guam. Six states plus Washington D.C. and the

Virgin Islands have banned the use of all hand-held devices for any reason while driving. Most but not all do have exclusions for users of two-way business communications and some have extended that exclusion to amateur radio.

For the Amateur Radio Newsline, I'm Frank Haas, KB4T, in Holly Hill, Florida.

RADIO LAW: DEPARTMENT OF TRANSPORTATION BANS TRUCKERS FROPM TEXTING

The Department of Transportation has announced an immediate ban on operators of trucks and buses on U.S. roadways text messaging will driving. Transportation Secretary Ray LaHood announced the ban on Tuesday, January 26th saying that this is an important safety step and we will be taking more of them to eliminate the threat of distracted driving.

Officials of the trucking and bus industries say they support the new ban on texting while driving buses and trucks. The president of the American Bus Association told the press that many bus companies already have similar policies in place. Drivers of interstate buses and large trucks who text while driving could face fines of up to $2,750.

Secretary LaHood has been campaigning against texting and cell phone use while driving for some time. He says enforcing restrictions on texting by long haul drivers will be difficult and he's calling on the wireless industry to work with public officials to come up with a solution. (Published reports)

RESCUE RADIO: PROPOSED EAS CHANGES COULD LEAD TO ANNUAL TESTS

Federal telecommunications officials are planning to hold the first nationwide test of the broadcast Emergency Alert System, but they have yet to set a specific date. And it will not happen until new regulations are in place.

FCC rules currently provide for voluntary testing at the state and the local level, but not nationally. The FCC has now issued a Second Further Notice of Proposed Rulemaking to change the rules governing the Emergency Alert System so as to conduct national testing at least once a year.

The FCC is also proposing requiring a more detailed form documentation from participating TV, radio and cable operations. The information would be due to the commission within 30 days after the test, and would be made available to the public. The agency is also asking for feedback on the

equipment used to retransmit the EAS codes, which the agency says differs depending on the manufacturer. (FCC, Broadcast &Technology)

**

HAM HAPPENINGS: ARRL AUDIO NEWS TEMPORARILY SUSPENDED

The American Radio Relay League has temporarily suspend its ARRL Audio News operation. According to the League, the suspension was brought about by the planned introduction of the ARRL's new and redesigned website. It said that in order to do this properly, the League was suspending the ARRL Audio News operations while it looks for solutions that will enable it to provide the technical quality and distribution channels expected of that organization. The last newscast in the current ARRL Audio News series was issued on Thursday, January 28th. At our airtime the League has not set a date for the return of its audio news service. (ARRL)

**

HAMVENTION HAPPENINGS: 25TH ANNUAL DAYTON DX DINNER ON MAY 14TH

The SouthWest Ohio DX Association will sponsor the 25th annual DX Dinner at the 2010 Dayton Hamvention on Friday, May 14th at 6 p.m. Eastern time. The venue is the Crowne Plaza Hotel, in downtown Dayton. Program details and a list of the prizes will be available on the SouthWest Ohio DX Association website as soon as both are confirmed. You will find that along with information on reservations in cyberspace at www dot SWODXA dot org (SWODXA)

**

HAMVENTION HAPPENINGS: 2010 DAYTON CONTEST DINNER MAY 15TH

And the 18th Annual Dayton Contest Dinner is now slated for Saturday night, May 15th at 6:30 P.M. local time. The venue is the Van Cleve Ballroom also at the Crowne Plaza Hotel in downtown Dayton. Master of Ceremonies will be CQ Magazine Contest Editor John Dorr, K1AR. Along with Dorr will be CQ World-Wide Contest Director Bob Cox, K3EST, who will formally announce the 2010 CQ Contest Hall of Fame inductees. Tickets are available only on-line at www.contestdinner.com. (K3LR)

**

THE SOCIAL SCENE: THE VISALIA TOP BAND DINNER

And the famed Top Band Dinner at the 2010 Visalia DX Convention will be held Friday, April 16th, at the convention hotel. That's the Birth Room at
the Visalia Holiday Inn in Visalia, California.

This years dinner speaker is Bruce Butler, W6OSP. He will present the program "The Low Bands from K4M, Midway."

Dinner is buffet style and costs $36. For reservations an email to WB6RSE at his QRZ.com address. And for those of you not aware, the term Top Band

refers to 160 meter operation. (Via e-mail)

CHANGING OF THE GUARD: LOUISIANA'S MR. HAM RADIO FRIENDSHIP - MIKE KING, W5PY, S..K

Amateur Radio has lost a great friend and ambassador in the New Orleans and southeast Louisiana region. Mike King, W5PY lost his battle with cancer late Wednesday evening, January 27th. W5PY was a ham's ham. Mike served as ARRL Assistant Section Manager for the State of Louisiana since 2002 and was net Manager for the Louisiana Traffic Net. Passing traffic was a passion for W5PY. He was also past president and past vice president of the Ozone Amateur Radio Club in Slidell, LA. and was a regular net control for the club's weekly 2-meter net. Any visitor to club meetings was greeted by
Mike at the door and introduced to everyone in the room. Mike also sent welcome letters to newly licensed hams. A friendlier guy you could never hope to meet. Even very late into his battle with cancer he could be found at the door of his church greeting worshipers as they filed in. An intensely private man, Mike never complained or hardly ever acknowledged his terminal illness.

As a naval aviator Captain King flew just about everything with wings. From fighters off of aircraft carriers to cargo planes and everything in between. Mike was awarded many medals and honors for his service in Southeast Asia, Grenada and Viet Nam. W5PY was stationed around the world and was assigned to the Vice Chief of Naval Operations Air Warfare in the Pentagon and Commander Naval Air Forces Atlantic Fleet at NAS Norfolk. After retiring from the military he flew for Braniff Airlines and retired as a 747 First Officer flying freight between Miami and South America. W5PY was an Eagle Scout and 32nd degree Mason. Sailing was a passion as well. He spent many hours sailing his Beneteau 321 on New Orleans' Lake Pontchartrain from his waterfront home in Slidell. He was a volunteer for the First Baptist Church of Slidell, the Red Cross, Life Songs Christian Radio and North Shore Regional Medical Center where he was very active during Hurricane Katrina, practically living at the hospital and spending countless hours at the hospital's ham station passing traffic.

Mike was a fixture at just about every hamfest or testing session in south Louisiana and Mississippi talking up the hobby, welcoming new hams and

spreading the word about the Slidell, LA hamfest. I'll never forget the time he came up to me and introduced me to his girlfriend, who he called "Crayola". "Don," he said, "I want you to meet Crayola. I call her that
because she's colorful. I love to surround myself with colorful people, Don. That's why I like you so much. You and Crayola are about the most colorful people I know and I wanted you guys to meet". That was Mike King,
W5PY. He was a friend to ham radio and all he met. In the more than 10 years I knew him I never once heard him say anything negative about anything or anyone. He is survived by his mother, sister and brother Joel King, KM5CA, All of San Antonio, TX. He was interred at Port Hudson National Cemetery near Baton Rouge, LA. Mike King, W5PY was 62. (AE5DW)

**

THE CHANGING OF THE GUARD: RADCOM COLUMNIST NORMAN FITCH, G3FPK - S.K.

And from the United Kingdom comes word that Radio Communications Magazine VHF/UHF columnist Norman Fitch G3FPK, has also become a silent key. The Southgate news reports that Fitch was found dead at his home in Surrey England on Friday, January 29th.

Back in April of 1989 G3FPK took over the VHF/UHF duties from Ken Willis, G8VR, when it was part of the Spectrum Analysis feature of the magazine. The column then became VHF/UHF News and eventually, it became the VHF/UHF column of today.

Norman Fitch, G3FPK, is described as having been a keen operator on the VHF/UHF and Microwave bands and had been writing for over 20 years. His friends say that he will be greatly missed. (GB2RS)

**

HAM RADIO IN SPACE: NASA TO LAUNCH THREE NEW HAM RADIO CUBESATS

NASA plan to launch 3 CubeSats with amateur radio educational payloads late in November. The small research satellites will go into orbit for several universities as part of the agency's Educational Launch of Nanosatellite mission.

The satellites, called CubeSats because of their shape, come from Montana State University, the University of Colorado and Kentucky Space. Montana State designated its satellite as Explorer 1 Prime in honor of the scientific discoveries of the Explorer-1 mission. Colorado's satellite is named Hermes with a mission objective to improve CubeSat communications through the on-orbit testing.

But its Kentucky's bird called KySat-1 that is what the ham in the street is watching because it is believed to be the first CubeSat ever to carry a 2 meter to 70 cm FM transponder. Truly a crossband repeater in space and one that should be accessible by most hams within its flight path.

CubeSats are in a class of small research spacecraft called pico-satellites. They have a size of approximately four inches, a volume of about one quart and weigh no more than 2.2 pounds. The University of Florida was selected as an alternate in case one of the three primary spacecraft cannot fly. (ANS, Southgate, others)

**

WORLDBEAT: INCREASED VENUE COST CLOSES HAMFEST

Due to increased facility rental costs at the venue of the United Kingdom's Chesterfield Rally the planners have decided to cancel all future events. They add that they have been unable to secure another location with the same space and facilities in the region apologizes for any inconvenience to attendees and exhibitors who were looking forward to this year's hamfest. The group's website at www.chesterfieldrally.com is still online and a new website at www.m0oct.com will carry details of future activities. (G6IBQ)

**

WORLDBEAT: TOP BAND FOR SPANISH HAMS IN CONTESTS

At the request of the Spain's national ham radio society the Spanish Director General of Telecommunications has permitted the use of 160 meter Top Band in certain contests. In all, some seven contest periods through the end of the year will permit Spanish hams the use of 1810 to 2000 kHz. A complete listing will soon be on-line at the society's website at www.ure.es (URE)

**

DX

In DX, word that EI6DX, will be active portable 6W from Senegal, in November. He will concentrate on the lower bands and CW. QSL via RX3RC, by the bureau or direct. Look for updates via the web at www dot ei6dx dot com.

The VP8 South Shetland Islands AO-51 operation by XR9JA will be active through February 28th. This affair was originally planned for January but had to be rescheduled. The operation is taking place at the Chilean Naval base on Greenwich Island. QSL via CE5JA, either direct or via the bureau.

7Q7HB is again heading to the warmer climate of Malawi for a period of 3 months or so. His activity will probably be on the Digital modes and on CW. QSL only direct to G0IAS with sufficient funds for return cards.

OH5SB operating maritime mobile will activate the wet squares at the Baltic on 2 meter SSB in summer 2010. His primary frequency on 2 meters will be 144.288 or 144.300. QSL direct to DL2SB.

DK1AX, will be active holiday style portable EA8 from Teneriffa in the Canary Islands through February 14th. Hes using only QRP CW on 15, 20, 30 and 40 meters with an Elecraft K1 at 5 watts to a Kelemen dipole primarily

on the QRP frequencies. QSL only via the bureau to DK1AX or direct with a self addressed stamped envelope. His address can be found at QRZ.com.

Lastly, UA3DJY, is back in Dar Es Salaam, and is operating from the D-I-T Communications Club station, 5-I-3-A, until March 1st. He says that he will try to be active on all bands with emphasis on 40, 20 and 15 meter CW and 17 amd 15 meters SSB. QSL via RK3AOL.

(Above from various DX news sources)

**

THAT FINAL ITEM: YOU TOO CAN OWN A SPACE SHUTTLE

And finally this week, if you have ever dreamed of operating ham radio from the Space Shuttle, you may soon have your chance. That is if you have a lot of extra bucks and a place on the ground to set one up as your hamshack. Graham Kemp, VK4BB of the W-I-A News had the rest of the story from down-under:

--

NASA has slashed the price of its shuttles to just 20.3m Euro. Discovery is going to the Smithsonian National Air and Space Museum while Atlantis and the Endeavour are up for sale.

The delivery date is given as the second half of 2011 and shuttle main engines are said to be available for the cost of transportation and handling.

Now it can truly be said to watch this space.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News in Brisbane, Australia.

--

One problem that might be a bit hard to deal with. If your neighbors think that your tower and beam or unsightly imagine the protests that planting the Atlantis and the Endeavour in your back 40 might create. (WIA News)

Trophy for the "Best VHF DX Expedition" of the Year 2009

During the voting period from 1st to 20th of January 2009 the team
of MMMonVHF did count 73 voters from more than 26 different countries
which clicked more than 257 times for 60 different Expeditions which
were published on our Review Page during the year 2009.
This year it was the first time that the Team of MMMonVHF decided to
change the rules and separate the Trophy for MS (Meteorscatter) and
EME Expedition. Result of your TOP VHF DX Expedition 2009:

MS: 1.) UX5UL/p & UT6UG/p & UY5UG/p 2.) 4O3A 3.) DK2ZF
EME: 1.) 5Z4EME & PI4EM 2.) E51SIX & E51EME 3.) V5/KT6Q
Random winner (a MMMonVHF T-Shirt) of all Voters is Adrian, YO9FRJ

All results in detail here: http://www.mmmonvhf.de/trophy2009.php

A short comment from the Team of MMMonVHF

First of all the Team of MMMonVHF would like to congratulate all
Expeditioners and Teams for their great activities and nice trips
during the year 2009. We would like to say as well thank you for
always hold us (MMMonVHF) as up to date with News and Pre-Announces
as possible. We promise to do our best as well in the next year to
help to make your expedition and trips with MMMonVHF Announces,
Newsletter and connections as successful as possible! THANK YOU!

AR MAGAZINE-VK4 QTC COLUMN
Written by Chris Comollattie VK4VKR
news for ar magazine to qtc@wia.org.au

QNEWS BROADCAST FEBRUARY 7 2010

Welcome to QNews from VK4WIA.
I'm Geoff Emery, VK4ZPP wondering are all hams the same.

Saturday morning and the broadcast radio was assisting in lifting the veil off sleep. The interview was on the growth of software applications for use with the new generation of mobile phones. To emphasise a point the interviewer asked, "What type of person writes these apps.... is it like the ham radio operator in their garage .....?" (Geraldine Doogue, Radio National, 30/1/2010)

This made me wonder what the general perception of our hobby is, in the wider community. Are amateurs perceived as eccentric and "geekie" or are they being misrepresented with these stereotypes? With the greater use of commercial equipment a lot of which is designed for mobile use, the size of the amateur station has physically decreased. With the use of computers, as part of the station, it is more likely that the amateur station is integrated within the family living space. But rather than the geography, it is perhaps more the reflection on us, the people.

As we spread the word of the Centenary of the WIA, this year, here is a good opportunity to introduce ourselves AND our hobby. We can show this hobby is for the kid next door and his grandmother. We can show people amateur radio is for anyone not just the geeks.

For QNEWS, this is Geoff, VK4ZPP and that is what I think.

GYMPIE
www.gceginc.org.au
Trevor Taege, VK4BAT

I'm Trevor Taege, VK4BAT with news from the Gympie Communications & Electronics Group:

Over the past few years, the Gympie district has been well served by a 2 metre repeater - VK4RCM. It was generously set up and maintained by Jason, VK4MIH.

The ownership of the property where the Repeater is sited is changing and so from February 27, the device will no longer be able to operate from Mt. Corella.

The Gympie Group will build a new Repeater and it will be moved to a new location as soon as possible. Inquiries, tests and planning are underway for this to happen as soon as possible.

There may be a short interruption to service from the end of February but we will keep you posted on developments.

The Gympie Communications & Electronics group would once again like to thank Jason for the great service he has provided to the Wide Bay region with the 2m Repeater and IRLP service.

Preparation is continuing for our weekend at Mt. Wolvi for the John Moyle Field Day Contest. At this stage the Gympie Club is planning to operate on several HF bands as well as on six metres, two metres, and 70cm.

A couple of members will try their hand at cw on at least one or two bands. Would any Club members who are planning to operate or assist that did not attend the last meeting please contact one of the committee members for further planning.

For Gympie Area News, I'm Trevor Taege, VK4BAT

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au
Secretary Clive 4928 1173
http://www.radarc.cjb.net/

This is Doug VK4DUG from the Rockhampton and District Amateur Radio Club.

Having gathered up the smaller items on a previous occasion, last Saturday about a dozen of the RADAR Club members involved them selves in a little muscle building heavy lifting exercise.

The purpose of the latest exercise was to load and transport a rather large, 40 foot self supporting three legged tower (fortunately partly dismantled), and two 4 section telescopic guyed towers and sundry other bits, to a safe RADAR sponsored location.

The club is rather fortunate that our president Jack VK4JRC has a suitable sturdy diesel truck (which I suspect would be the envy of many a would-be truckie) as well as all the necessary tie down gear. And if that's not enough, we had another professional truckie Dave VK4FDWN, to lend a hand. Jack has even provided a temporary storage location.

The equipment has been in the secure care of The Fitzroy River Coast Guard who decided that they no longer had a need for it and past it on to the RADAR Club. Many thanks to them.

It was previously installed and operating at the local site of OTC, so you can get some idea of the quality.

For those of you who no longer recognize the acronym, the Overseas Telecommunications Commission as it was then in 1946, had radio stations situated at many sites around the coast. These sites were decommissioned in 1992, and the equipment sold off, or given to possible worthy users such as the local coast guard.

As yet, the RADAR Club has not fully decided how it will utilize this latest acquisition, but several plans are in hand.

73 Doug

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day all, this is Dale VK4DMC on behalf of the Tablelands Radio and Electronics Club.

As we move into a new year of club activities our President John VK4TL has penned some interesting comments for TREC members. I would like to share with you John's words.

"FROM THE PRESIDENT.
Hi all readers, having perused our members one by one I see most are active with something or another. This is highly commendable and to be encouraged. Building small projects or putting kits together all adds to the enjoyment of the hobby. Most of us are on the older side and some of us need glasses to see. Let's face it the gear is getting smaller. The performance is enhanced these days by the new devices obtainable at small cost.
The trouble is that we often refuse to participate in miniature work because of this.

Two years ago at age 77 I put together a mini-kits surface mount 1296 MHz transverter. Sitting with me was Jeff VK4BOF who everyone up here knows has eyesight problems and he completed one also. Other members of our club are conversant with surface mount construction. Do this when most alert say in the morning, use magnifying headset. Get the right tweezers and a sharp pointy bit for the soldering iron and get building. The particular kit mentioned has also been built by Ian VK4AFC, Paul VK4APN and Keith VK4BKS. It does help to do some research into getting a high quality solder about one mm thick or smaller. So if you are put off by $3000 for off the shelf 1296 then take the plunge. If you have problems there are lots of experienced builders around to help.

Now for 10 GHz there are the DRO units for US$15 that have taken the place of Gunn units. More expensive about US$55 are YIG oscillator units from China and these can be modulated just the same. They tune over a wide range like 9.6 to 10.7 GHz. These are very stable like the DROs which come down into the ham band to about 10.4 GHz. With a 70 MHz IF such as a 2 way radio they should give such sensitivity that Gunn units are completely outclassed.

Want some help to see what direction to take with home brew, then please feel free to contact me and I will see if I can help. You may ask why I mention the above, well it's because all else comes easily off the shelf for a low cost and these things do not.

Good DX de John VK4TL - President TREC".

GIDDAY AND BEST WISHES TO ALL LISTENERS.....

GREETINGS FROM NORTH QUEENSLAND, THIS IS DON VK4FNQA,
WITH ALL OF THE GOOD NEWS AND HAPPENINGS ,

THIS TUESDAY NIGHT IS THE TARC PROJECT NIGHT AND THERE
IS SOMETHING SPECIAL HAPPENING !
A VISIT TO THE QUEENSLAND AMBULANCE SERVICE TOWNSVILLE
COMMUNICATIONS CENTRE IN HUGH STREET CURRAJONG HAS
BEEN ARRANGED FOR MEMBERS BY PAUL VK4FOTO.

THERE WILL BE A LOT TO SEE AND THANKS TO POPULAR DEMAND
ADDITIONAL TOUR POSITIONS HAVE BEEN ADDED FOR THE VISIT -
HOWEVER THESE POSITIONS ARE GOING FAST !
YOU NEED TO GET YOUR TOUR NUMBERS INTO PAUL BY THIS
SUNDAY EVENING !
THOSE LUCKY ENOUGH TO GET ON THE TOUR WILL NEED TO BE
AT THE HUGH STREET COMPLEX GATHERED AT THE CONCRETED
CAR PARK FROM 1915 HOURS FOR TOUR COMMENCEMENT
WITH PAUL VK4FOTO BY 1930 HOURS THIS TUESDAY.

TO MAKE A DEFINITE BOOKING TO BE ON THE TOUR CONTACT
PAUL VK4FOTO USING ANY OF THE FOLLOWING METHODS -
BY ELECTRONIC MAIL TO VK4FOTO AT WESTNET DOT COM
DOT AU, OR PHONE 47731196 LEAVING A MESSAGE ON THE
ROBOT IF NECESSARY, OR RESPOND TO THE TARC FACEBOOK
INVITATION TO ATTEND.

PAUL WILL ADVISE YOU IF YOU WERE FAST ENOUGH TO GET
ON THE TOUR LIST.

I SAY AGAIN......

DONT DELAY, DO IT TODAY, ELSE YOU WILL MISS OUT !

THE TARC MANAGEMENT MEETING WAS HELD LAST TUESDAY
AND A SNEEK PREVIEW OF HAPPENINGS SHOW THAT -
* A FOXHUNT WILL BE TAKING PLACE ON SATURDAY JUNE
26TH,
* THERE ARE STILL SOME DATE CLASHES IN THE
COMMUNICATIONS SUPPORT CALENDAR THAT ARE BEING
IRONED OUT.
* A VENUE FOR THE TARC JOHN MOYLE MEMORIAL DAY
WEEKEND OPERATIONS IN MARCH WILL BE ANNOUNCED
REAL SOON NOW !
* A SPECIAL THING WILL BE HAPPENING AT THE MARCH
PROJECT NIGHT .... KEEP TUNED IN FOR FURTHER DETAILS!

WELL THATS ALL FOR THIS WEEK FROM TROPICAL
PARADISE. THIS HAS BEEN DON VK4FNQA FOR THE
TOWNSVILLE AMATEUR RADIO CLUB INC, AND YOU HAVE
BEEN LISTENING TO; AND ENJOYING QNEWS FROM VK4WIA.

Press 2

Interested in the WIA Centenary celebrations,
Press 3

Concerned about intruders on the amateur bands,
Press 4

Do you have a photo of the Australian who put man on the moon?
Press 5

To hear all of those options again,
Press 9, or just sit back, relax and listen to the entire broadcast.

Hello I'm Jim Linton VK3PC and Barry Robinson VK3PV and we're presenting the WIA NATIONAL NEWS produced by Amateur Radio Victoria for the week commencing Sunday the 7th of February 2010.

VI3KIAH special station on air today

First up we welcome Fred Swainston VK3DAC from the Yarra Valley Amateur Radio Group, with an update on today's special event station VI3KIAH, good morning Fred.

(Fred) Good morning Jim and thanks for the opportunity talks about the special station we're operating today at Kinglake. The station recognises the efforts of radio amateurs and others who during the February 2009 fires were radio operators for all sorts of emergency communications on the 7th of February and for a number of weeks.

(Jim) Where and when can we listen for it?

(Fred) The radio station is operating out of the Frank Thompson Reserve in Kinglake between 2pm and 8pm, because on the 7th of February that was when the major damage occurred in Kinglake.

We wish the Yarra Valley Amateur Radio Group all the best for VI3KIAH.

Want know more about VI3KIAH? Then check out the operating schedule, frequencies and its special QSL card that will be available.
Visit the Yarra Valley Amateur Group's website
www.yarravalley.ar.org.au

Centre Victoria RadioFest

The theme this year is 'Reach for the skies'. Why? Because there will be aeronautical amateur television - we will hear more about this soon on this broadcast from Peter Cossins VK3BFG, astronomical telegazing and hunting scarce sunspots on the photosphere.

And its family friendliness includes a playground, free children's face-painting, hot and cold food and drinks or bring your own lunch to enjoy in picnic style. Free tea and coffee all day.

The Mini-lecture program: Topping the bill is the VK9NA DXpedition by the VK Microwave Group. The other lectures being - Amateur Radio goes to school presented by the Sherbrooke Radio Club, Peter Wolfenden VK3RV with an

interesting illustrated talk on Victoria's radio heritage, and a thought-provoking presentation on the end of Amateur Radio.

These are in addition to the Club Corner Precinct displays, F-Troop photo call and entry ticket draw for door prizes. And oh, don't forget the bustling Traders Hall and the second-hand tables and car-boot style sales?

See you at the Centre Victoria RadioFest, Kyneton Racecourse Sunday the 14th of February, I'm Bruce Lees VK3FFF.

Home security system QRM

Reports are starting to appear about a security and home control system that uses the spread spectrum protocol at 100 milliwatt, and at a distance of 100 metres its emissions make the 40 metre band unusable.

The system has its signal at a two to five second rate, from 7.1 to 8.5 MHz. Hey, that's not only 40 metres but also the spectrum used by broadcasting, aeronautical and marine radio.

Be alarmed and alert for this system arriving in your neighbourhood.

(Spectrum Digest)

The IARU Region 3 Operating Award

This is available for contacts made since the 5th of April 1982 with countries which have IARU member societies in the Asia Pacific region.

The countries are: Australia, Bangladesh, Brunei, Burma, China, Fiji, French Polynesia (FO8 only), Hong Kong, India, Indonesia, Japan, Korea, Macau, Malaysia, New Caledonia, New Zealand, Pakistan, Papua New Guinea, Philippines, Pitcairn Islands, Samoa, Singapore, Solomon Islands, Sri Lanka, Taiwan, Thailand, Tonga, Vanuatu and Vietnam.

One country credit is also permitted with a US Territory of Guam, Northern Marianas, American Samoa, Wake Island, Baker Howland Group, or from the Chago Archipelago VQ9.

QSL cards NOT required, but a certified log sheet with country claims list needs to be supplied.

A basic award requires seven qualifying contacts. Silver endorsement is 15 with gold 20 and awards can be open or for any mode or band.

Applications need to be made to the Award Manager, Alan Chapman ZL3GX - check your log book to see if you already qualify for the IARU Region 3 Award or go on line for more details about the rules.

http://www.iaru-r3.org/r3award.htm

(Jim Linton VK3PC)

Changing the light bulb

Unless you have tried to buy an incandescent light bulb recently it's likely you're unaware that Australia is phasing them out due to their inefficient use of electricity.

Incandescent light bulbs have been around for 130 years and they took us from the candle, fuel lamp and gas-light illumination.

The Australian Government, to reduce greenhouse gas emissions, placed an import ban on inefficient incandescent general lighting bulbs 12 months ago.

As a result, compact fluorescent lamps and extra low voltage halogen, non-reflector Lamps, that don't meet new minimum energy performance standards, can no longer be imported.

Digital Radio Plus

A Canadian development may be the way of the future where FM broadcast station signals are used to activate household appliances or even manage electricity supply. Appliances are now being fitted with microchip receivers with the aim of consumers being able to activate them via FM broadcast station signals using the internet or iPhone at energy-savings times of the day.

Digital Amateur Television - state of play

We now have on the line Peter Cossins VK3BFG, good morning Peter, how is the digital amateur television scene in Melbourne and Geelong these days?

(BFG) Thanks Barry and good morning to all. A lot has happened since the launch last June of the digitised VK3RTV television repeater. We have a DVB-T downlink which is the terrestrial standard and this can be received on many standard set-top boxes. We have two analogue and two digital uplinks. These are on 1250, 1255 and 1278 MHz. And also on 10.41GHz. The digital uplinks are DVB-S standard and analogue are FM.

(Barry) Peter, is the project all completed?

(BFG) I think this project has a little way to go yet Barry. VK3RTV has always continued to evolve from the black and white days through to the present. Currently antennas are being built to better provide for the uplinks.

Barry) From all reports it has created a lot of activity and interest in the Melbourne and Geelong area. Tell us what you have planned by the way of digital amateur television at the Centre Victoria RadioFest.

(BFG) What those at Kyneton will see is digital television on a large screen with real-time vision of the RadioFest and surrounding area transmitted from a light aircraft, in other words aeronautical DATV. There will also be experienced ATVers on hand to give advice to how to get involved.

(Barry) Thank you Peter, I'm very much looking forward to seeing and hearing it all.

The VK3RTV digitisation project was mainly funded by Amateur Radio Victoria, with support by way of $1,000 from the WIA Club Grants Program.

Now for today's small dose, or should I say 'smidgen' of trivia.

Until recently no one thought a smidgen was an actual unit of measure. But kitchen supply stores in North America and elsewhere are now selling sets of "minispoons" in which the smallest spoon is labelled "smidgen".

It is designed to hold exactly 1/2 pinch or 1/32 of a teaspoon, which is roughly 0.005 of a fluid ounce or 0.15 of a millilitre.

And where did the word 'smidgen' come from? Well apparently it is a diminutive of "smutch" or "smudge", it originally meant a small spot.

I'm John Williams VK2JJW and you're listening to VK1WIA.

The hidden cost of amateur repeaters

>From time to time we hear about the funding difficulties experienced by clubs who run a repeater, often not for the benefit of their members but for the wider amateur radio community.

In New South Wales the Lands Department is continuing on its campaign of introducing high site lease charges all in the name of cost recovery and getting a commercial return for access to sites.

Similar things are happening in other parts of Australia which are making repeater operators very anxious.

Amateur Radio Victoria funds and licences most of the repeaters in its state. The annual ACMA licence fees are nearly $4000.

In addition to this are site fees. Take for instance the Mt William repeater VK3RWZ in Western Victoria, the site fees for this repeater are around $1,000 a year!

And Recently VK3RWZ was restored to service after a major antenna failure. Rigging costs alone were in excess of $5,000 for that job.

A considerable number of complaints were received when the repeater was not on air, most came from non members of Amateur Radio Victoria. Since it has been returned to service only a couple of loyal and understanding members have expressed their thanks.

Another major new cost for repeater operators is the D-Star network. Amateur Radio Victoria has spent more than $10,000 to get VK3RMM D-Star Mt Macedon on air, we now find it has minimal use by a few operators, of these less than a quarter are Amateur Radio Victoria members.

And with D-Star comes the monthly expense of internet access for the D-STAR internet gateway.

Ongoing maintenance, replacements and upgrades to meet commercial site technical requirements are hidden costs not understood by all radio amateurs.

Do you support the organisation that provides amateur radio repeaters, if not why not join today, and in VK3 that means Amateur Radio Victoria.

I'm Ross Pittard VK3CE and you're listening to VK1WIA.

Old club callsign being maintained.

The RMIT University School of Electrical and Computer Engineering is again the custodian of the VK3MT amateur radio callsign.

It was originally issued to the 'Melbourne Technical College - Radio School' which commenced classes in 1934 and as part of the 120 year evolution of RMIT University has now been reclaimed.

Hopefully VK3MT will continue the tradition of helping to expose technical students to amateur radio.

The Centenary of Organised Amateur Radio in Australia

We now welcome to the microphone, David Wardlaw VK3ADW, Chairman of the WIA Centenary Committee, good morning David, the celebration has already begun!

It actually start on the first of January and runs right through to the end of December. A year-long celebration with participation throughout the nation.

The very busy WIA Centenary Committee is focusing on the Centenary Convention to be held in Canberra Friday 29 May through to Sunday 31 May. Initial details of this program are in Amateur Radio magazine, on the WIA website, and summarised later in this broadcast.

The Committee met last Wednesday, and news from it was that there is a planned ARISS contact with the International Space Station, during the Centenary Dinner, involving a local school.

A lot of detail of the Centenary program will be appearing on this broadcast in the months ahead.

Mini-solar cells

These are about the size of glitter that can be attached to clothing or tents. Developed by at Sandia National Laboratories in India, they can recharge batteries plus have potential satellite or remote sensing applications.

OPERATIONAL NEWS ON VK1WIA THIS WEEK BEING PRESENTED BY AMATEUR RADIO VICTORIA AND THE CENTRE VICTORIA RADIOFEST. I'M BARRY ROBINSON VK3PV.

ON AIR CONTEST AND EVENT COLUMN - DATELINE

22nd to 28 February - the 7th Antarctic Activity Week. Many more stations have indicated their intention to participate this year.
Details: http://www.waponline.it/ or list of stations
that will be active
http://www.waponline.it/Default.aspx?tabid3

27th to 28th February NZART Jock White Memorial Field Day Contest:
Details: nzart.org.nz/contests

13th to 14th March RSGB Commonwealth Contest (BERU). Details:
hfcc.org/hfcc/rule/2009/beru.shtml

20th and 21st March WIA John Moyle Memorial Field Day.

17th of April World Moon Bounce Day - Many of the world's large
parabolic dish antennas along with radio amateurs in
attendance will bounce radio signals of the lunar surface.

30 April to 6 May, Westlakes Amateur Radio Club's 12th annual CQ Repeater Contest - encouraging all radio amateurs to put a little
life into the usually quiet FM repeaters.

1st of May through to the 31st of December the special callsign VK100WIA and the WIA Centenary Award.

8th of May, VK Trans Tasman 80 metre phone contest.

8th of June, VK Trans Tasman 160 metre phone contest.

12th and 13th June, Worked All VK Shires Contest.

19th and 20th June, WIA Winter VHF-UHF Field Day contest.

19th & 20th,
and
26th and 27th June International Museums Weekend - The website ukradioamateur.org/imw has begun accepting registrations

10th of July, Jack Files Contest.

21 and 22nd of Aug International Lighthouse and Lightship Weekend - So far more than 20 Australian lighthouses are registered. Check out the website illw.net

14 and 15 of August WIA Remembrance Day Contest.

2nd and 3rd October Oceania DX Contest Phone.

9th and 10th October Oceania DX Contest CW.

20 21 November WIA Spring VHF-UHF Field Day.

Rewind - a look back at our history through the serialised written history by WIA Centenary Committee member Peter Wolfenden VK3RV with assistance of others, that is being published in the WIA journal Amateur Radio magazine.

Early regulation of the spectrum: The original Australian Wireless Telegraphy Act (1905), vested power in the Post Master General, and the Chief Electrical Engineer for the Post Office was charged with administering it.

The Act also made provision for land based Experimental Stations which enabled the establishment and authorised private amateur stations.

The Marconi Company was keen to establish itself in Australia and in June 1906 it obtained the first "land station" licence for stations in Devonport Tasmania and Queenscliff in Victoria. These were used to demonstrate the Marconi equipment; however the government declined to purchase the stations at the end of the demonstration trials, perhaps still unsure of the potential of wireless.

But in October 1909, tenders were called for the construction of coastal radio stations in Sydney and Perth.

The accepted tender was from the Australasian Wireless Company with Telefunken German equipment at about a quarter of the price submitted by the Marconi Company, triggering legal actions and squabbles over patents.

For the next 20 years or so there appears to have been much exploitation of the Commonwealth by a series of doubtful actions by some wireless companies during a cut-throat environment which saw them posture as if they were the owners of the spectrum and technology.

In hindsight, the true amateur experimenter may have been amongst the select few who, over those years, were not attempting to take advantage of their knowledge for obtaining ill gotten gains from the public purse.

Further, it could be argued that the altruistic attitude of amateurs has survived right up to today in the many ways they provide public service whether it be in education, emergency communications and other activities.

(Extract #2 from the serialised history being published in the WIA journal Amateur Radio magazine)

HAMS ACROSS AUSTRALIA.

Yarra Valley Amateur Radio Group Hamfest at Healesville on February the 28th, opens at 10am and runs until 2pm. Entry fee is still $5 and the booking fees are the same as the last 10 years at $15 for an 8 foot table.

Bring the family and you can perhaps visit the Healesville Sanctuary or go to Marysville for afternoon tea and check out how the regeneration of the town

and bush is proceeding. Full details are on the Yarra Valley Amateur Radio Group web site http://www.yarravalley.ar.org.au

Simon VK3ZNT...

"Ladies and Gentlemen,

The Oxfam Trailwalker is on again and I need your help.

The Oxfam Trailwalker Event will be held on April 16-17-18 over the same course as last year.

As you are aware this event runs continuously over three days and is one of the most hungry man hour events that WICEN is involved in.

We are once again requesting your help in running the safety and logistic communications for this event as you have most generously given of your time and skills in the past.

We are requesting an early indication as to whether you are able to assist as this event requires a lot of planning.

We would appreciate it if you would reply by email or phone as soon as you decide one way or the other.

Would you kindly indicate the days and times that you will be available?

Regards,

Simon VK3ZNT".

VK4 - QNEWS
web service local news:- www.wiaq.com/qnews/upload/qnewsbcast.htm
local news email qnews-vk-subscribe@yahoogroups.com
VKR Roundup
http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA.
I'm Geoff Emery, VK4ZPP wondering are all hams the same.

Saturday morning and the broadcast radio was assisting in lifting the veil off sleep. The interview was on the growth of software applications for use with the new generation of mobile phones. To emphasise a point the interviewer asked, "What type of person writes these apps.... is it like the ham radio operator in their garage .....?" (Geraldine Doogue, Radio National, 30/1/2010)

This made me wonder what the general perception of our hobby is, in the wider community. Are amateurs perceived as eccentric and "geekie" or are they being misrepresented with these stereotypes? With the greater use of commercial equipment a lot of which is designed for mobile use, the size of the amateur station has physically decreased. With the use of computers, as part of the station, it is more likely that the amateur station is integrated within the family living space. But rather than the geography, it is perhaps

more the reflection on us, the people.

As we spread the word of the Centenary of the WIA, this year, here is a good opportunity to introduce ourselves AND our hobby. We can show this hobby is for the kid next door and his grandmother. We can show people amateur radio is for anyone not just the geeks.

For QNEWS, this is Geoff, VK4ZPP and that is what I think.

GYMPIE
www.gceginc.org.au
Trevor Taege, VK4BAT

I'm Trevor Taege, VK4BAT with news from the Gympie Communications & Electronics Group:

Over the past few years, the Gympie district has been well served by a 2 metre repeater - VK4RCM. It was generously set up and maintained by Jason, VK4MIH.

The ownership of the property where the Repeater is sited is changing and so from February 27, the device will no longer be able to operate from Mt. Corella.

The Gympie Group will build a new Repeater and it will be moved to a new location as soon as possible. Inquiries, tests and planning are underway for this to happen as soon as possible.

There may be a short interruption to service from the end of February but we will keep you posted on developments.

The Gympie Communications & Electronics group would once again like to thank Jason for the great service he has provided to the Wide Bay region with the 2m Repeater and IRLP service.

Preparation is continuing for our weekend at Mt. Wolvi for the John Moyle Field Day Contest. At this stage the Gympie Club is planning to operate on several HF bands as well as on six metres, two metres, and 70cm.

A couple of members will try their hand at cw on at least one or two bands. Would any Club members who are planning to operate or assist that did not attend the last meeting please contact one of the committee members for further planning.

For Gympie Area News, I'm Trevor Taege, VK4BAT

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au
Secretary Clive 4928 1173
http://www.radarc.cjb.net/

This is Doug VK4DUG from the Rockhampton and District Amateur Radio Club.

Having gathered up the smaller items on a previous occasion, last Saturday about a dozen of the RADAR Club members involved them selves in a little muscle building heavy lifting exercise.

The purpose of the latest exercise was to load and transport a rather large, 40 foot self supporting three legged tower (fortunately partly dismantled), and two 4 section telescopic guyed towers and sundry other bits, to a safe RADAR sponsored location.

The club is rather fortunate that our president Jack VK4JRC has a suitable sturdy diesel truck (which I suspect would be the envy of many a would-be truckie) as well as all the necessary tie down gear. And if that's not enough, we had another professional truckie Dave VK4FDWN, to lend a hand. Jack has even provided a temporary storage location.

The equipment has been in the secure care of The Fitzroy River Coast Guard who decided that they no longer had a need for it and past it on to the RADAR Club. Many thanks to them.

It was previously installed and operating at the local site of OTC, so you can get some idea of the quality.

For those of you who no longer recognize the acronym, the Overseas Telecommunications Commission as it was then in 1946, had radio stations situated at many sites around the coast. These sites were decommissioned in 1992, and the equipment sold off, or given to possible worthy users such as the local coast guard.

As yet, the RADAR Club has not fully decided how it will utilize this latest acquisition, but several plans are in hand.

73 Doug

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day all, this is Dale VK4DMC on behalf of the Tablelands Radio and Electronics Club.

As we move into a new year of club activities our President John VK4TL has penned some interesting comments for TREC members. I would like to share with you John's words.

"FROM THE PRESIDENT.
Hi all readers, having perused our members one by one I see most are active with something or another. This is highly commendable and to be encouraged. Building small projects or putting kits together all adds to the enjoyment of the hobby. Most of us are on the older side and some of us need glasses to see. Let's face it the gear is getting smaller. The performance is enhanced these days by the new devices obtainable at small cost.
The trouble is that we often refuse to participate in miniature work because of this.

Two years ago at age 77 I put together a mini-kits surface mount 1296 MHz transverter. Sitting with me was Jeff VK4BOF who everyone up here knows has eyesight problems and he completed one also. Other members of our club are conversant with surface mount construction. Do this when most alert say in the morning, use magnifying headset. Get the right tweezers and a sharp pointy bit for the soldering iron and get building. The particular kit mentioned has also been built by Ian VK4AFC, Paul VK4APN and Keith VK4BKS. It does help to do some research into getting a high quality solder about one mm thick or smaller. So if you are put off by $3000 for off the shelf 1296 then take the plunge. If you have problems there are lots of experienced builders around to help.

Now for 10 GHz there are the DRO units for US$15 that have taken the place of Gunn units. More expensive about US$55 are YIG oscillator units from China and these can be modulated just the same. They tune over a wide range like 9.6 to 10.7 GHz. These are very stable like the DROs which come down into the ham band to about 10.4 GHz. With a 70 MHz IF such as a 2 way radio they should give such sensitivity that Gunn units are completely outclassed.

Want some help to see what direction to take with home brew, then please feel free to contact me and I will see if I can help. You may ask why I mention the above, well it's because all else comes easily off the shelf for a low cost and these things do not.

Good DX de John VK4TL - President TREC".

GIDDAY AND BEST WISHES TO ALL LISTENERS.....

GREETINGS FROM NORTH QUEENSLAND, THIS IS DON VK4FNQA,
WITH ALL OF THE GOOD NEWS AND HAPPENINGS ,

THIS TUESDAY NIGHT IS THE TARC PROJECT NIGHT AND THERE
IS SOMETHING SPECIAL HAPPENING !
A VISIT TO THE QUEENSLAND AMBULANCE SERVICE TOWNSVILLE
COMMUNICATIONS CENTRE IN HUGH STREET CURRAJONG HAS
BEEN ARRANGED FOR MEMBERS BY PAUL VK4FOTO.

THERE WILL BE A LOT TO SEE AND THANKS TO POPULAR DEMAND
ADDITIONAL TOUR POSITIONS HAVE BEEN ADDED FOR THE VISIT -
HOWEVER THESE POSITIONS ARE GOING FAST !
YOU NEED TO GET YOUR TOUR NUMBERS INTO PAUL BY THIS
SUNDAY EVENING !
THOSE LUCKY ENOUGH TO GET ON THE TOUR WILL NEED TO BE
AT THE HUGH STREET COMPLEX GATHERED AT THE CONCRETED
CAR PARK FROM 1915 HOURS FOR TOUR COMMENCEMENT
WITH PAUL VK4FOTO BY 1930 HOURS THIS TUESDAY.

TO MAKE A DEFINITE BOOKING TO BE ON THE TOUR CONTACT
PAUL VK4FOTO USING ANY OF THE FOLLOWING METHODS -
BY ELECTRONIC MAIL TO VK4FOTO AT WESTNET DOT COM
DOT AU, OR PHONE 47731196 LEAVING A MESSAGE ON THE
ROBOT IF NECESSARY, OR RESPOND TO THE TARC FACEBOOK
INVITATION TO ATTEND.

PAUL WILL ADVISE YOU IF YOU WERE FAST ENOUGH TO GET
ON THE TOUR LIST.

I SAY AGAIN......

DONT DELAY, DO IT TODAY, ELSE YOU WILL MISS OUT !

THE TARC MANAGEMENT MEETING WAS HELD LAST TUESDAY
AND A SNEEK PREVIEW OF HAPPENINGS SHOW THAT -
* A FOXHUNT WILL BE TAKING PLACE ON SATURDAY JUNE
26TH,
* THERE ARE STILL SOME DATE CLASHES IN THE
COMMUNICATIONS SUPPORT CALENDAR THAT ARE BEING
IRONED OUT.
* A VENUE FOR THE TARC JOHN MOYLE MEMORIAL DAY
WEEKEND OPERATIONS IN MARCH WILL BE ANNOUNCED
REAL SOON NOW !
* A SPECIAL THING WILL BE HAPPENING AT THE MARCH
PROJECT NIGHT .... KEEP TUNED IN FOR FURTHER DETAILS!

WELL THATS ALL FOR THIS WEEK FROM TROPICAL
PARADISE. THIS HAS BEEN DON VK4FNQA FOR THE
TOWNSVILLE AMATEUR RADIO CLUB INC, AND YOU HAVE
BEEN LISTENING TO; AND ENJOYING QNEWS FROM VK4WIA.

VK5

The South East Radio Group Convention will be held at Mt Gambier on the 12th
and 13th of June, the Queen's Birthday Weekend. The club is also rostered at
that time to use the special callsign VK100WIA.

(http://serg.mountgambier.org/)

INTRUDER WATCH - ENFORCEMENT ZONE

Region III IARU-MS Coordinator Peter Young VK3MV
WIA Intruder Watch Coordinator Karl Hennig VK6XW

VK IARU-MS reflector email to subscribe intruders@wia.org.au

IARUMS NETS
Friday 0730 UTC 7.065.5 with VK4CEU David.

Amateur Service exclusive frequencies where any non-amateur signal is
definitely an intruder.

Amateur HF Spectrum world wide

7.050 to 7.100
14.000 to 14.250
14.250 to 14.350 No broadcasters
21.000 to 21.450
24.890 to 24.990
28.000 to 29.700

Intruder Watch began 50 years ago, and is just as important, if not more so, as Region 3 IARU Monitoring Service Coordinator Peter Young VK3MV explains.

The WIA is a foundation member of the International Amateur Radio Union known as the IARU. The IARU consists of member amateur radio societies around the world with the prime aim of representing and promoting amateur radio and the allocation and protection of amateur spectrum allocations in various forums.

One of its important roles is to monitor the Amateur Service exclusive HF spectrum allocations for unwanted intrusions by other radiocommunications services.

Why a Monitoring System? Well, the amateur service must take action to protect its bands because an administration permitting a station to operate contrary to the International Telecommunications Union Radio Regulations may assert that its operation is not in breach of the Radio Regulations because there have been no complaints of harmful interference caused by that station.

Harmful interference is defined within the ITU Regulations and is the first test before the complaint is accepted.

Therefore the objective of the IARU-MS is the removal of Intruders from exclusive amateur bands.

How do we do this? The success of the IARU-MS depends on Member Societies acting to influence the licensees of Intruders in their country or the administrations of their country to remove Intruders from exclusive amateur bands or, if the Intruder is in another country, to request their administration to lodge a complaint to the administration of the country in which the Intruder is located.

Administrations generally will undertake its own measurements before action is undertaken. Some complaints result in the removal of the intruder reasonably quickly, but unfortunately, some may take years to resolve, particularly if it involves an administration in another country.

A recent example, has been the successful removal of a ionospheric over the horizon radar, located in Australia that was causing interference in the 30 meter amateur band. Although the 30 meter band is a secondary amateur service allocation, the licence conditions imposed by the ACMA requires that this radar does not cause interference to other radiocommunications services, including the amateur service.

This could not have been achieved without interference reports being filed with our IW coordinator.

In Australia the WIA's intruder watch coordinator is Karl Henning, VK6WX who with other observers have years of experience in identifying and logging

intruders as well as coordinating all the Australian observations from other amateurs in Australia.

What is an observation? This involves listening to signals and determining if they are genuine amateur QSO's. If an intruder is suspected then details are recorded. That is date, time, emission - for example upper or lower sideband AM, CW, or digital, the signal bandwidth, the bearing direction, the general nature of the signal, if some form of identification is used and any other characteristics that may assist the identification and location of the intruder.

The WIA needs more IW volunteers!

We always need more amateurs to undertake intruder watch to lighten the load. If you value your HF spectrum why not become a IW reporter?

Want more information?

The WIA's website under the "members" tab has more information - look for the intruder watch tab.

(Peter Young, VK3MV Region 3 Monitoring Service Coordinator and WIA Director)

Aviation network upgrade

The government-owned corporation, Airservices Australia in its project to modernise the VHF radio communication network across Australia has reached a milestone.

Its technicians have now upgraded air - ground - air voice communication equipment at 100 of around 150 sites nationally - the latest being on Table Mountain, Rockhampton.

Airservices is replacing outmoded radios, aerials and network equipment with state-of-the-art hardware as part of an eight year, $46 million project.

Ultimately, all VHF services will be changed onto digital bearers as part of a separate multi-million dollar upgrade of Airservices own national telecommunications infrastructure.

The VHF System Upgrade Project is due to be completed this year.

(Barry Robinson VK3PV)

Very interesting Barry, and also recently announced is that the Rail Corporation New South Wales has signed a deal to replace its analogue radio network with a digital radio system from China.

The Australian mains power plug octogenarian

This month the familiar three pin Aussie developed plug that is also used in some other countries, is celebrating its 80th birthday.

Smaller and smaller radios

Perhaps some old-timers remember when they purchased a truly portable 2 metre rig, such as the IC215, about the size of two house bricks and weighing 1.9 Kg. A few years later, the smaller FT208R came on the market - this time about half the size and half the weight. With the arrival of the FT 26 however, hams were relieved that a 'small' handheld had been achieved. Measuring just 55 mm by 146 mm by 33 mm, and weighing 430 gm, this 2 metre handheld was able to carried everywhere.

Today, a new generation of small handhelds are available from all the well known manufacturers - handhelds such as the Icom IC-7A.

Some of these dual-band 2 metre/70 centimetre radios, which include a broad range of receiver frequencies, are only slightly larger than a credit card even though capable of nearly 2 watts on transmit.

But just how small will radios become?

Recently physicists at the University of California, America, announced they had constructed 'a fully functional, fully integrated radio receiver, orders-of-magnitude smaller than any previous radio'. Constructed from a single carbon nanotube, the radio is less than a micron long and only 10 nanometers wide, or 10,000 times thinner than a single human hair.

A matching ultra-miniature transmitter is planned to be built soon.

Go to the Nanotube Radio Website to read about the radio, view videos that were photographed through a high resolution electron microscope, and listen to the receiver in action as it plays 'Good Vibrations' by the Beach Boys.

Google the website and see for yourself (www.physics.berkeley.edu/research/zettl/projects/nanoradio/radio.html)

I'm Murray Lewis VK3EZM and you're listening to the Amateur Radio Victoria produced VK1WIA broadcast.

MEDIA WATCH
www.wiaq.com/admin/uploads/weeklytally.rtf
www.cq-amateur-radio.com/WorldRadio.html

Groups to present this WIA National News Service

February 21 - Central Coast Amateur Radio Club (Promoting Wyong Field Day)
March 7 - Amateur Radio New South Wales (Promoting the WIA Centenary)
March 14 - And it is across to VK6 Denis and NEWSWEST gang
March 28, April 4 and 11 - Robert Broomhead VK3DN.
April 25 - Down to VK7 with the Radio and Electronics Association of Southern Tasmania (ANZAC Weekend)
MAY 9 - Canberra Region Amateur Radio Club (promoting CRARC / WIA AGM)

MAY 30 - VK100WIA WIA directors join a live outside broadcast from Canberra

Tracking ships from space

Two new receivers are soon to be tested from the International Space Station to help keep track of large ships at sea.

VHF radio signals from a ship's transponder regularly transmit the vessel's identification and location, but this data can only be picked up line-of-sight by other ships or when near land.

To improve the tracking of ships, these signals will also be received on the space station to see if it can provide greater real-time tabs on shipping movements.

The Australian who put man on the moon

An article in the December, 2009 issue of Lo-Key, the journal of the Australian QRP Club, noted the important work of an Australian radio amateur.

An enthusiastic ham for all of his life, William Ross Adey was born in Adelaide in 1922 and got his callsign VK5AJ at the aged of 17.

In the next decade he established the trademarks of his career in medical research and electronics.

At the age of 35 he was appointed Professor of Anatomy and Physiology at the UCLA Medical School in America.

Within three years, Professor Ross Adey, now K6UI, was appointed as Director of the new Space Biology Laboratory for human research, established to fulfill President John Kennedy's commitment to put a man on the moon in the 1960's.

His laboratory developed the technology for biotelemetry from space to monitor the astronauts' health, including recordings to show the effects of weightlessness on brain function.

A full story on about this remarkable Australian who helped put man on the moon, is being written for publication in the WIA journal Amateur Radio magazine.

Do you remember Ross Adey? He used to visit ham radio friends in Melbourne. A photograph of him is required to accompany that article. If you can assist with a photo, please contact either Jim Linton VK3PC vk3pc@wia.org.au or Murray Lewis VK3EZM lokey.editor@yahoo.com

(Murray Lewis VK3EZM)

Silent Key

Mark Dods VK3ZR had an established a career in the electronics industry when in the late 1970s became an enthusiastic radio amateur.

After the 1983 Ash Wednesday bushfires he answered the call for radio amateurs to provide communications for the clean-up at Mount Macedon, thus began his involvement in WICEN.

He oversaw its Incorporation in 1989/90, served on the Committee of Management as President and State Coordinator for three years, and as WIA Victoria Representative for another six.

The contributions of Mark were recognised in 1994 when he was made an "Esteemed Member" of WICEN.

His service included the North East Victorian floods of 1993, the Y2K or Millennium bug WICEN network for the Victoria Police 1999, and bushfires 2003, 2006 and 2009.

Mark was WICEN Victoria's Public Officer from 1997 until his death.

He was also an active member of RECOM, the communications arm of the Red Cross, and provided help in maintaining radio communications for the McCrae Yacht Club.

Mark died of cancer on Sunday January 17th at his home in McCrae.

His more than 25 years of volunteer work with WICEN was recognised in this year's Australia Day's Honours List, with the Emergency Services Medal.

In the true style of this gentleman, the only reason Mark Dods VK3ZR agreed to be nominated for this high award, was so that it was recognised that service as a member of WICEN, was as valid a contribution as service with any other emergency agency.

Now for a quick review of this month's WIA journal Amateur Radio magazine.

The cover story is the trip by members of the Blue Mountains Amateur Radio Club to Poeppel Corner, in the heart of the Simpson Desert at the borders of the Northern Territory, Queensland and South Australia.

More details on the WIA Centenary Celebration can be read, along with the first in the serialised history of radio.

Centenary activities are to take place in Canberra over the weekend Friday 28th through Sunday 30th of May, in conjunction with the WIA's annual general meeting and member forum.

Highlights include a series of presentations on the early days of radio, a Saturday evening Centenary Dinner, the special station VK100WIA in conjunction with the Centenary Award will run all three days, a BBQ lunch and public display of amateur radio.

Turning to page 28, the topic in the Foundation Corner column is, refurbishing aluminium antennas, by Geoff Emery VK4ZPP - the do's and do not's of antenna restoration.

On page 37, Spotlight on SWLing by Robin Harwood VK7RH notes the Sydney to Hobart Yacht Race night communications on HF were very difficult due to

interference from the combined effects of a clandestine broadcaster in South Korea, and an even louder jammer signal.

Also making an interesting read in Amateur Radio magazine, sent to WIA members and available in many newsagents around Australia, are tales from the Lord Howe Island VK9LA DXpedition.

Battery power your home

Electronics manufacturer Panasonic will launch next year a massive lithium-ion storage battery capable of powering an average home for up to a week

The Final Final

Thank you to Graham Kemp VK4BB for the invitation for Amateur Radio Victoria to present the VK1WIA broadcast.

Appreciation is extended to those who assisted with today's presentation including the interviewees - David Wardlaw VK3ADW, Fred Swainston VK3DAC and Peter Cossins VK3BFG.

To our support announcers Steve Bushell VK3HK, Murray Lewis VK3EZM, Tim Lewis VK3HAM and the Voice of the Centre Victoria RadioFest Bruce Lees VK3FFF. Thank you John Williams VK2JJW for reading the trivia item, as only you can.

The Amateur Radio Victoria team has enjoyed bringing you this broadcast and hopes you liked it too.

Now from Jim Linton VK3PC Barry Robinson VK3PV - GOOD MORNING EVERYONE!

GB2RS NEWS

Sunday 7th February 2010

The news headlines

* RSGB responds to Ofcom WRC consultation

* Long time GB2RS newsreader retires

* Norman Fitch, G3FPK, silent key

The RSGB has responded to Ofcom's consultation on World Radiocommunication Conference by submitting a detailed response; see the spectrum forum section of the RSGB website. This has been a combined effort by the three spectrum managers, Murray Niman, G6JYB, David Butler, G4ASR and John Gould, G3WKL, with some specialist input by RSGB Technical Consultant Peter Chadwick, G3RZP. This was followed by careful scrutiny by the RSGB Spectrum Forum and, of course, approval from the Board. The purpose of the response is to protect existing allocations, support the agenda item for an amateur allocation near to 500kHz and give indication to Ofcom of the range of issues that we would like covered at future Conferences. The consultation has to be seen as a formal exercise that supports an already good working relationship in this area with Ofcom, whereby the Society enjoys occasional membership of the UK delegation to various international working groups that are engaged in preparatory work for WRC-12.

Last Sunday, 31st January, Jim Grieve, G4ARZ read the GB2RS News on 80 metres for the last time. He has decided to stand down now for health reasons. The Society would like to thank him for his dedication to the news service. He has been reading for the South East since June 1973, and used to be the standby news reader for Arthur Milne, G2MI. From now on Don, G3WDY and Philip, G3WUZ will read the news on 3640kHz at 0900hours for the South East and South West, whilst Philip, G4NZQ and Mike, G4DYC will read for East Anglia on the same frequency at 0930hours.

Sad news now. RadCom VHF UHF columnist Norman Fitch, G3FPK died at his home on Friday 29th January. Norman starting writing a VHF UHF column in RadCom back in 1989 when he took over from Ken Willis, G8VR. He has written that column in every issue of RadCom since and his input will be greatly missed. An active amateur in the early mobile scene, Norman was the honorary secretary of the Amateur Radio Mobile Society back in

the 1960s and was a regular attendee of the VHF Convention. Those who knew G3FPK have described him as a true professional in his work and a gentleman in his private life. Staff at the RSGB, Members who regularly corresponded with him and his friends on the sked he kept every day send their condolences to family and friends.

The RSGB Spectrum Defence Fund has reached its first milestone, having received over £10,000 of donations from concerned amateurs. However, this is still well short of what the RSGB has already spent in seeking legal advice on the PLA issue. The Fund is still desperately in need of your donations, which can be posted to RSGB HQ or you can donate online at www.rsgb.org. If you would like more details on the noise from these PLA devices, visit the UKQRM website where you will find a wealth of information including sound files. The RSGB would like to thank the UKQRM group for maintaining this website with up to date information.

The QSL sub manager for the G2 series of callsigns would like to encourage those amateurs to think about getting envelopes and stamps to him as soon as possible. He has a number of QSL cards waiting to be sent

2

on to G2 callsigns but few envelopes to achieve this. Details for John Godfrey, M0JOH can be found in the 2010 Yearbook or on the RSGB website.

New D-Star digital repeater node GB7NE at Lynemouth in Northumberland has now been connected via the Internet to the D-Star network. The repeater operates using digital voice GMSK modulation with its output on 439.450MHz. The equipment at Lynemouth is fully homebrew and is based on the GB7MH design described in the February 2010 RadCom. GB7NE is the third non-Icom D-Star repeater node in the country. For more information, have a look at the Northumbria Repeater Group website, gb7ne.org.uk.

The forthcoming 3C0C DXpedition to Annobon is looking for support for the DXpedition. Any help is always appreciated. For full details on the DXpedition may be found on their website at www.3c0c-annobon.com/.

A photo & video report of the MM0DGR/P DXpedition to GMFF-015 is available at www.srars.org/wff- reports/gmff-015.htm. The operators would like to thank everyone who contacted them.

Horndean & District ARC will shortly be running Foundation and Intermediate licence classes and exams. Please contact club secretary Stuart on 023-9247-2846 or by e-mail to stuart.swain@hotmail.co.uk if you are interested in taking part.

Whitton Amateur Radio Group has a Foundation course starting on 17 February. The course normally runs on a Wednesday evening at 7:30pm. Contact Ian, G0OFN on 0870 760 5082 or by e-mail to g0ofn@msn.com if you are interested in the course.

The Bury Radio Society is running a Foundation course starting on the 16 March. Anyone interested please contact Norman, G1HHU on 07525 932729 or by e-mail to g1hhu.norman@googlemail.com for further details.

And now for the details of rallies and events for the coming week

Due to unforeseen circumstances, the Northern Cross Rally, due to be held on Sunday 14 February at Ossett School hosted by Wakefield and District Radio Society, has had to be postponed. It is hoped that a new date can be agreed with the venue for later on this year.

Today, 7 February, the 25th Canvey Radio & Electronics Rally takes place at 'The Paddocks', Long Road, Canvey Island, Essex SS8 0JA. Doors open at 10.30am and admission is £2.

Ballymena Amateur Radio Club, Gi3FFF, will be holding its annual Winter Bring and Buy sale on Friday 12 February from 6.30pm onwards at the new Ahoghill Community Centre, in the same hall as last year. For directions and map go to http://GI3FFF.synthasite.com or for any other information contact Hugh Kernohan, GI0JEV on 02825871481 or by e-mail to HKernohan@aol.com.

On 14 February, the Harwell Radio and Computing Rally will take place in the Didcot Leisure Centre, Mereland Road, Didcot OX11 8AY. There will be free car parking and admission is £2 with accompanied under 12 visitors admitted free. Doors open at 10.30 with disabled visitors gaining access at 10.15am. More details are available on 01235 816379.

3

Now for the news of special events

Special event station GG100WD for Wilton Division Guides will be operating in Batley on the weekend of 20 and 21 February. The station will be operational on HF, 2m and 70cm from 11am on Saturday to 2pm on Sunday. The organisers would appreciate any offers of help to operate the station. Please contact Tony, G4LMS on 01924 467612 for details.

GG100RE will operate from Eltham in south-east London on Saturday 20 February for Thinking Day on the Air, celebrating the 100th anniversary of the Girl Guide movement. Two stations will be active throughout the day, with Guides of all ages passing greetings messages on 80, 40 and 20m. The station will be operated by Cray Valley RS, full details on qrz.com.

Celebrating the Golden Jubilee of the British Amateur Radio Teledata Group, GB50ATG will be operated by John, GW4SKA from 8 February. Lots of QSOs have been made throughout the time that the special callsign has been operated in different parts of the country but they are always looking for more. If you would like to win a certificate or plaque, take a look at the rules for the BARTG Golden Jubilee Award on the BARTG web site, www.bartg.org.uk.

In a joint even venture between the Northampton Radio Club & the Coventry Amateur Radio Society to commemorate the 75th Anniversary of the Daventry Experiment, GB75RDF & GB0RDF will be operating from the Ex BBC site at Borough Hill, Daventry during February. GB4RDF will be operating from the Birth of RADAR Memorial from 18 February until 17 March. Details can be found on QRZ.COM or contact Brian, G8GMU on 07801 86 26 86.

And now the HF DX news compiled from 425 DX News and other sources.

Until 10 February, W6HFP, W3FF, NE1RD, WZ1P, WG0AT, KC4VG, N7UN, KB9AVO and K8EAB will sign J6/homecall from St Lucia. They will be using all bands and modes. More information at http://sites.google.com/site/caribbeanbuddies/.

N7I will be operating in Honolulu, Hawaii, until 10 February, mainly on 28.460 and 14.260MHz. QSL via KL7JR.

N7MSU will be operating as V31SU from Belize until 23 February in his spare time using the 40 and 20m bands with CW and SSB. QSL via N7MSU or see QRZ.com.

XR9JA will be the callsign of the forth coming Greenwich Island operation. The operators will be there until 28 February using CW, SSB, and PSK-31 on 160 to 6 metres. They also plan satellite operation using AO- 51. QSL via CE5JA either direct or via the bureau.

Now the contest news

10 February sees the data leg of this month's 80m Club Championship take place from 2000 to 2130UTC. The exchange is signal report and serial number.

4

The 432MHZ UK Activity Contest takes place on 9 February between 2000 and 2230 using all modes. The exchange is signal report, serial number and locator.

The first 1.8MHz contest takes place on 13 and 14 February. There should be plenty of UK and Continental European stations to work in this one, plus some longer DX if you have a sufficiently competitive station. Times are between 2100 and 0100UTC using CW and the exchange is signal report, serial number and district.

Internationally, the Dutch National Society VERON PACC Contest takes place on 13 and 14 February between 1200 and 1200. For non-Dutch entrants there are sections for various combinations of power level, mode and single- or multi-band. Send a report and serial number, but expect to receive a report and a 2- letter Province code.

The CQ WW WPX RTTY Contest also takes place over the entire 48 hours of the weekend 13 and 14 February. This is one of the biggest RTTY events of the year. For single-op stations there are sections for low- and high-power (but not QRP), and single- and multi-band. For multi-op

stations, its all-band and high- power only, with Multi-one for a single transmitter, Multi-two for two transmitters and Multi-multi for anything greater. Please bear in mind that Multi-multi stations send separate serial numbers per band, so you may receive a lower number when you work a multi-multi station on a second or subsequent band.

Now the solar factual data for the period from the 25th to the 31st of January, compiled by Neil Clarke, G0CAS on the 1st of February.

The active group that was mentioned in last weeks report that produced the M class solar flares remained visible even though it decreased in size every day until it disappeared on the 31st. The group never produced any more flares and solar activity was very low every day. Meanwhile, elsewhere on the solar disc a group emerged on the 30th and grew in size rapidly. Growth slowed on the 31st. Likewise, this group as so far remained quiet. Solar flux levels declined from 81 units on the 25th to 73 by the 29th. The average was 77. The 90 day solar flux average on the 31st was also 77 units. That's the same level as last week. Geomagnetic activity was quiet everyday. The most disturbed day was the 30th with an Ap index of only 4 units. The average was Ap 3 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 320 and 450 kilometres per second. Particle densities were low except for the 28th and the 30th which increased to 15 and 19 particles per cubic centimetre respectively. Bz fluctuated no more than minus and plus 7 nanoTeslas for the period.

And finally the solar forecast. A lot will depend this week on if any sunspot groups appear. Solar activity is expected to be very low. There will be a slight chance of activity increasing to low. Solar flux levels are expected to be into the 80s if spots do appear or the 70s if the solar disc is spotless. Geomagnetic activity is expected to be at quiet levels everyday. MUFs during daylight hours at equal latitudes are expected to be about 23MHz for the south and 20MHz for the north. Darkness hour lows should be around 8MHz. Paths this week to Japan should have a maximum usable frequency with a 50 per cent success rate of around 19MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. The best time to try this path will be between 0800 and 1100 UTC.

And that's all for this week from the propagation team.

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA On Sunday 7 February Chelmsford Amateur Radio Society is at the Canvey Island Rally from 10 to 4pm. Contact Martyn, G1EFL, on 01245 469 008. On Sunday 7 February South Essex Amateur Radio Society is running the 25th Canvey Radio & Electronics Rally at The Paddocks, Canvey Island. Contact Norman, M0FZW, on 01268 692776.

On Sunday 7 February Waterlooville Amateur Radio Club is running its exam course. Details from Rich, G4IBW, on 02392 680852. On Monday 8 February Coulsdon Amateur Transmitting Society is having a talk by Terry, G4CDY, entitled how to lose your SMD virginity. More information from Andy, G8JAC, by email to g8jac@btinternet.com. On Monday 8 February Felixtowe & District Amateur Radio Society is having a talk on EME by Sam, G4DDK. More information from Paul, G4YQC, by email to pjw@btinternet.com. On Monday 8 February Milton Keynes Amateur Radio Society is having a talk on the 4m band and conversion of ex-PMR radios. For more information go to www.mkars.org.uk. On Tuesday 9 February Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815. On Tuesday 9 February Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008. On Tuesday 9 February Harwell Amateur Radio Society is holding its construction contest. Contact Malcolm, G8NRP, on 01235 524844. On Wednesday 10 February Aylesbury Vale Radio Society is having a discussion evening. Details from Roger, G3MEH, on 01442 826 651. On Wednesday 10 February Chelmsford Amateur Radio Society is having a committee meeting at Danbury. Contact Martyn, G1EFL, on 01245 469 008. On Wednesday 10 February Dover Radio Club is watching a video of the 100th Anniversary of the first channel crossing by aircraft, with Brian, G8ZYZ. For more information contact Brian, G4SAU, by email to g4sau@darc.org.uk. On Wednesday 10 February Farnborough & District Radio Society is having a talk on virtual radar by Chris, G0WTZ. Details from Derek, G3OFA, by email to mail@farnboroughradio.org.uk. On Wednesday 10 February Harwich Amateur Radio Interest Group is having a talk on RF-ID by James, M0ZZO. Details from Kevan, 2E0WMG, on 07766 543784. On Wednesday 10 February Norfolk Amateur Radio Club is having an informal evening. Details from Chris Danby, G0DWV, on 01603 419204.

6

On Wednesday 10 February South Essex Amateur Radio Society is having a talk and presentation by Peter, G4OAD. Contact Norman, M0FZW, on 01268 692776. On Wednesday 10 February Southgate Amateur Radio Club is having a RadCom evening, when Graeme Wilkes will bring four PCs and CDs of all the back issues of RadCom. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Wednesday 10 February Waterlooville Amateur Radio Club is having a CW night. Details from Rich, G4IBW, on 02392 680852. On Wednesday 10 February Worthing & District Amateur Radio Club is having an

explanation of the D-Star system and its operation by David Lake, G4ULF. For more information contact Roy, G4GPX, on 01903 753 893. On Thursday 11 February Bittern DX Group is having an informal evening. Details from Linda, G0AJJ, on 01692 404154.

On Thursday 11 February Edgware & District Radio Society is having a talk by John, G3SJE, entitled Amplitude Modulation, nothing beats me! More information from Mike, G4RNW, on 0208 950 0658. On Thursday 11 February King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV, by email to ral-g3rsv@supanet.com. On Thursday 11 February Reading & District Amateur Radio Club is having a talk on the magic of six metres by Don Field, G3XTT. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 11 February Shefford & District Amateur Radio Society is having a talk by its construction competition winner. Details from David, G8UOD, on 01234 742 757. On Friday 12 February Cambridge & District Amateur Radio Club is having a general social chat & shack evening. Details from Lawrence, M0LCM, on 07941 972724. On Friday 12 February Itchen Valley Amateur Radio Club is having a members evening. Contact Charlie, M0WYM, on 02380 439560. On Friday 12 February Mid-Sussex Amateur Radio Society is having a radio night. Contact Peter, G4AKG, on 01444 239371. On Friday 12 February Radio Society of Harrow is having a discussion and hands on, practical workshop on soldering techniques. Members are invited to bring along their construction projects, tools and soldering irons, for advice. More information from Linda, G7RJL, on 0208 386 8586. On Friday 12 February Wimbledon & District Amateur Radio Society is on the air and having a construction evening. Contact Jim, M0CON, on 020 8874 7456.

On Sunday 14 February Reading & District Amateur Radio Club is having a talk on HV power distribution to railways by Richard O'Keeffe, G0FFL. Details from Pete, G8FRC, on 01189 695 697.

NEWS FOR THE SOUTH-WEST On Monday 8 February Cornish Amateur Radio Club Computer Section is having part four of the talk by Peter, G3WKP, on music and computers. Details from Steve, G7VOH, on 01209 844939. On Tuesday 9 February Blackmoor Vale Amateur Radio Society is watching the Russian Alaskan Islands video. Contact Tony, G0GFL, on 01258 860741.

7

On Tuesday 9 February Poldhu Amateur Radio Club is having a talk by David Barlow, G3PLE, on Minnehaha, the Bishop and the Lizard. Details from Keith Matthew, G0WYS, by email to vickeith@globalnet.co.uk. On Wednesday 10 February Taunton & District Amateur Radio Club is operating the club station & holding a Morse class. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 10 February Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048. On Thursday 11 February South Bristol Amateur Radio Club is having a

technical topics evening with Len, G4ZRY. Contact Len, G4RZY, on 01275 834 282. On Thursday 11 February Swindon & District Amateur Radio Club is having a natter night. Contact Den, M0ACM, on 07810 317750. On Thursday 11 February Yeovil Amateur Radio Club is holding its construction competition. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk. On Friday 12 February Saltash & District Amateur Radio Club is having a talk on loop aerials by Jules, M1AGY on Loop aerials. Contact Brian, M0BHG, on 01752 844321. On Friday 12 February Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR THE MIDLANDS On Monday 8 February Gloucester Amateur Radio & Electronics Society is operating the club equipment. Contact Anne, 2E1GKY, on 01452 548478, daytime. On Monday 8 February South Birmingham Radio Society is having a rally planning evening. Contact Don, on 0121 458 1603. On Monday 8 February Stratford Upon Avon District Radio Society is having a talk on the computer control of receivers by G8UKT. Contact G0CHO, on 01608 664488. On Tuesday 9 February Eagle Radio Group is having a talk on planning permission for radio amateurs by Jim, G0EJQ. Details from Terry, G0SWS, on 01507 478590. On Tuesday 9 February Loughborough & District Amateur Radio Club is having a talk on the AirNav Radar Box by Brian, G8BUB. More information from Chris, G1ETZ, on 01509 504 319. On Tuesday 9 February Mid-Warwickshire Amateur Radio Society is having a meet your fellow members night at the Emscote HQ. Details from Bernard, M1AUK, on 01926 420 913. On Wednesday 10 February Bolsover Amateur Radio Society is having a natter night. For details, send an email to postmaster@g4rsb.org.uk. On Wednesday 10 February Hinkley Amateur Radio Society is having an antenna workshop on the DBJ1/2 portable VHF/UHF antenna by John Rogers, M0JAV. Details from John, M0JAV, on 07836 731544. On Wednesday 10 February Lincoln Short-Wave Club is discussing ideas for the club's future activities. For more information contact Pam Rose, G4STO, on 01427 788356. On Wednesday 10 February Midland Amateur Radio Society is having a committee meeting and holding training classes. Details from Norman, G8BHE, on 01214 229 787.

8

On Wednesday 10 February South Notts Amateur Radio Club is on the air and using Morse. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc. On Wednesday 10 February Telford & District Amateur Radio Society is having an under £5 construction competition. Contact Mike, G3JKX, on 01952 299 677. On Thursday 11 February RAF Waddington Amateur Radio Club is having a talk on contesting and VHF DX by Bryn Llewellyn, G4DEZ. Details form Judy Rowlands on 07544 456422. On Friday 12 February Coventry Amateur Radio Society is having its construction competition. Contact John, G8SEQ, on 07958 777363. On Friday 12 February South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

NEWS FOR THE NORTH OF ENGLAND On Monday 8 February Angel of the North Amateur Radio Club is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036. On Monday 8 February Bolton Wireless Club is having a talk on digital amateur television by Darren, G7LWT. For details, send an email to boltonwireless@gmail.com. On Monday 8 February Sheffield Amateur Radio Club is having a talk by Peter, G3PHO on simple wire directional antennas for the suburban QTH. For more information contact Trevor Wood, M0TWS, by email to trevorwood6@yahoo.co.uk. On Tuesday 9 February Otley Amateur Radio Society starts its Foundation Course. Contact Paul, 2E0PAK, on 07768 996370.

On Tuesday 9 February Warrington Amateur Radio Club is having a talk on mobile power by Steve, 2E0BUI. Contact Roger, M0DWQ, on 07868 000 705. On Wednesday 10 February Hornsea Amateur Radio Club is having an activity night, taking part in the CW 80m CC Data. Contact Gordon MacNaught, G3WOV, on 01377 240573. On Thursday 11 February South Cheshire Amateur Radio Society is having the second part of the talk on oscilloscopes by Dave G8DHQ. Contact Chris Wiseman, G0RDK, on 01782 773185. On Thursday 11 February South Manchester Radio and Computer Club is having a talk by Ron, G3SVW / VP8LK entitled Antarctica - 40 years on. Details from Ron, G3SVW, on 0161 969 3999. On Friday 12 February East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR SCOTLAND On Tuesday 9 February Kilmarnock & Loudoun Amateur Radio Club is having a club night. Contact Graham, MM3GDC, by email to mm3gdc@btinternet.com. On Tuesday 9 February Livingston & District Amateur Radio Society is having an operating evening. For more information contact Norman, on 07740 946192. On Wednesday 10 February Kingdom Amateur Radio Society is having a shack night. Details from Brian, MM0XBD, on 01383 738905.

9

On Wednesday 10 February Lothians Radio Society is having a talk on microelectronics technology by Professor Tom Stevenson of the University of Edinburgh. Contact Andy Sinclair, by email to lrs_secretary@moosedata.com. On Wednesday 10 February Paisley YMCA Amateur Radio Club is having a training evening. Contact Bill Anderson, 2M0BZZ, on 01505 613633.

On Thursday 11 February Aberdeen Amateur Radio Society is having a construction and on the air evening. More information from Lewis, GM4AJR, on 01224 575 663.

NEWS FOR WALES On Tuesday 9 February Marches Amateur Radio Society is having a junk sale at the meeting. Please feel free to bring any items you wish to sell. For more information contact Dave, MW0AYM, on 01691 777242. On Friday 12 February Newport Amateur Radio Society is on the air and running its Intermediate class. Details from Gareth Price, on 01633 880081.

NEWS FOR NORTHERN IRELAND On Wednesday 10 February Lough Erne ARC is hosting a talk and equipment demonstration led by John McCullough GI4BWM, Chairman of the RSGB Emerging Technology Coordinating Committee. The Keepers of Sligo, West Tyrone and Fermanagh repeaters are among a strong attendance expected. The agenda includes giving those who use repeaters an opportunity to thank those who do all the hard work of providing them, and to encourage more use and variety of enjoyment of repeaters. The event starts at 7pm sharp so it can finish in time to let away those with a distance to drive home. The venue is SHARE in Co Fermanagh, which is also the venue for the Club's traditional April Rally, which will be held on Sunday 11 April this year. All radio amateurs and experimenters are welcome, as are the 18 students on the Club's Foundation course. Likewise welcome are questions and suggestions before, at and after the event. Details from Michael Clarke, MI5MTC, by e-mail to mi5mtc@learc.eu or telephone 028 6862 1436.

And that's the end of this week's GB2RS news broadcast,

prepared by the Radio Society of Great Britain.

76. any suggestions for Twitter #hashtags for calling CQ and CQ DX?

Newsgroup: rec.radio.amateur.misc
Date: 2010-02-05 23:15:55 UTC
From: ki4rwp+usen1@gmail.com

I see #CQ is already used for some unrelated reference.

Any suggestions for hash tags that might be useful?

Is any already being used for these? Is there an website
with an index of amateur related tags?

perhaps: #cqde or #cqdx

(?)

77. Does EchoLink still announce itself when connecting/disconnecting?

http://sparqi.blogspot.com/2007/08/echolink-follies.html

Just setup current version of EchoLink this morning and then
I read this blog posting from 2007 commenting about the way
it announces itself (and me) when it connects/disconnects.

Just wondering, does EchoLink still announce when
connecting and disconnecting to remote nodes/repeaters?

> RESTRUCTURING: ﷺPETITION FILED FOR CREATION OF U.S. 4 METER BAND
>
> QRZ.com lead moderator Glen Zook, K9STH, of Richardson, Texas has filed a
> Petition for Rulemaking to the FCC. ﷺOne aimed at creating a 70.000 MHz to
> 70.500 MHz amateur radio band in the United States. ﷺAmateur Radio
> Newsline's Bruce Tennant, K6PZW, has more:
>
> --
>
> In his January 27th filing, Glen Zook, K9STH, notes that the 4 meter band
> spectrum has been authorized in a growing number of European and African
> nations. ﷺHe says that by establishing such privileges for amateur radio
> operators in the United States and other areas over which the Commission
> has jurisdiction that it would be of great benefit to those operators
> residing in such areas.
>
> According to Zook, the recent migration of broadcast television stations to
> primarily the UHF frequencies has basically eliminated any probable
> interference to television channels 4 or 5 which otherwise might have
> occurred. ﷺThis is because the 4-meter band is located on frequencies that
> were allocated to television channel 4. ﷺSince the 4-meter amateur radio
> band does not fall in the 72.0 MHz to 76.0 MHz segment which is allocated
> to Operational Fixed and various mobile services there would be no
> potential co-channel or adjacent channel interference.
>
> In his proposal Zook suggests that the FCC allow all classes of amateur
> radio operators operating privileges on this new band. ﷺHowever, he also
> suggests that Novice Class licensees be restricted to a lower output level
> than those allowed for Technician, General, Advanced ﷺand Extra Class

> licensees. ?He says that if the present maximum power output limitation of
> 1500 watts P-E-P is ?granted to the higher class licensees then the Novice

> YHOTY: ?2010 YOUNG HAM OF THE YEAR AWARD NOMINATING PERIOD NOW OPEN
>
> The nominating period for the 2010 Amateur Radio Newsline Young Ham of the
> Year Award is now open. ?Each year, we here at the Amateur Radio Newsline
> in association with Vertex Standard Corporation -- the makers of Yaesu
> brand ham radio gear and CQ Magazine combine to honor a ham radio operator
> age 18 or younger. ?This, for his or her contributions to ham radio or to
> society itself through ham radio.
>
> It is expected that Vertex-Standard will once again fly the winner to
> Huntsville, Alabama, where the award will be formally presented. ?Hotel
> accommodations as well as convention tickets are normally provided. ?CQ
> Magazine says that it will again treat the recipient to a week at
> Spacecamp-Huntsville as it has done in years past.
>
> Please note that if the recipient is unable to travel to the convention,
> Amateur Radio Newsline will attempt to arrange a special award ceremony
> where ?he or she resides. ?This might be at his or her school, in front of
> his or her Amateur Radio club. ?In this case the trip to the convention
> will be forfeited by the recipient, but all other aspects of the award will
> remain.
>
> All nominations and materials required by the official rules must be
> received by Amateur Radio Newsline no later than midnight on May
> 30th. ?Both mail in and electronic submission are being accepted this

> year. Full rules and a downloadable nominating form are now on our website
> at www dot arnewsline dot org. Just scroll down until you see "2010 Young
> Ham of the Year Awards Now Being Accepted" and click on the words "here" to
> download the directions and the form. We look forward to hearing from
> you. (ARNewsline(tm))

> RADIO TESTING: NCVEC RELEASES REVISED ELEMENT 2 TECH QUESTION POOL
>
> A revision to the new Element 2 Technician class ham radio testing question
> pool released this past January 4th. This, as the Question Pool
> Committee of the National Conference of Volunteer Examiner Coordinators
> says that after further review that it found and corrected more than 50
> minor typographical errors. Also that it clarified the questions and
> answers making them easier to understand.
>
> These changes are now incorporated in a revised Element 2 question pool
> that contains some 400 questions. 35 are selected to make up any given
> Element 2 exam. And in a departure from past Element 2 question pools this
> one contains graphics and diagrams.
>
> According to the NCVEC the errata list, as well as the revised Technician
> question pool, is available on the organizations website at www dot ncvec
> dot org. This new Element 2 question pool becomes effective for Technician
> class examinations administered on or after this coming July 1st and will
> remain valid until June 30, 2014. (NCVEC)

> COMMUNICATIONS LAW: NEW GROUP FORMED TO FIGHT DISTRACTED DRIVING
>
> A new group with government support is targeting all forms of distractions
> while driving. And while amateur radio is not yet in its gun-sights, hams
> will want to keep a close eye on this one as we hear from Frank Haas, KB4T,
> has the details:
>
> --
>
> The National Highway Traffic Safety Administration has teamed up with the
> National Safety Council for form a new organization to end distracted
> driving. This through the creation of a new organization called
> FocusDriven which is the first nonprofit organization devoted to combating
> distracted driving and supporting victims of distracted drivers.
>
> The National Highway Traffic Safety Administration defines distracted
> driving as any non-driving activity a person engages in that has the
> potential to distract him or her from the primary task of driving and
> increase the risk of crashing. It notes that there are three major types
> of driving distraction that incude visual, manual and cognitive. In simple
> terms this means any activity that causes a driver to take one's eyes off
> the road, ones hands off the steering wheel, or one's mind off of driving.
>
> While distracted driving has always been a safety issue. Now, with the
> advent of mobile communication devices and other mobile technologies, it
> has become what the FocusDriven calls a growing epidemic. The group
> considers cell phone texting the most alarming of newer distractions,
> because it involves all three types of distraction. Other forms of
> distracted driving includes driving while using a cell phone, changing a
> radio station, eating and drinking, talking to passengers, grooming, using
> a CD or Mp3 player, watching a video or reading, or using a PDA or
> navigation system or other portable electronic devices.
>
> So far, a ban against texting while driving has been enacted in 19 states
> plus Washington D.C. and Guam. Six states plus Washington D.C. and the
> Virgin Islands have banned the use of all hand-held devices for any reason
> while driving. Most but not all do have exclusions for users of two-way
> business communications and some have extended that exclusion to amateur
> radio.
>
> For the Amateur Radio Newsline, I'm Frank Haas, KB4T, in Holly Hill,
> Florida.
>
> --

>
> RESCUE RADIO: PROPOSED EAS CHANGES COULD LEAD TO ANNUAL TESTS
>
> Federal telecommunications officials are planning to hold the first
> nationwide test of the broadcast Emergency Alert System, but they have yet
> to set a specific date. And it will not happen until new regulations are
> in place.
>
> FCC rules currently provide for voluntary testing at the state and the
> local level, but not nationally. The FCC has now issued a Second Further
> Notice of Proposed Rulemaking to change the rules governing the Emergency
> Alert System so as to conduct national testing at least once a year.
>
> The FCC is also proposing requiring a more detailed form documentation from
> participating TV, radio and cable operations. The information would be due
> to the commission within 30 days after the test, and would be made
> available to the public. The agency is also asking for feedback on the
> equipment used to retransmit the EAS codes, which the agency says differs
> depending on the manufacturer. (FCC, Broadcast &Technology)

> CHANGING OF THE GUARD: LOUISIANA'S MR. HAM RADIO FRIENDSHIP - MIKE KING,
> W5PY, S..K
>
> Amateur Radio has lost a great friend and ambassador in the New Orleans and
> southeast Louisiana region. Mike King, W5PY lost his battle with cancer
> late Wednesday evening, January 27th. W5PY was a ham's ham. Mike served
> as ARRL Assistant Section Manager for the State of Louisiana since 2002 and
> was net Manager for the Louisiana Traffic Net. Passing traffic was a
> passion for W5PY. He was also past president and past vice president of the
> Ozone Amateur Radio Club in Slidell, LA. and was a regular net control for
> the club's weekly 2-meter net. Any visitor to club meetings was greeted
> by
> Mike at the door and introduced to everyone in the room. Mike also sent
> welcome letters to newly licensed hams. A friendlier guy you could never
> hope to meet. Even very late into his battle with cancer he could be found
> at the door of his church greeting worshipers as they filed in. An
> intensely private man, Mike never complained or hardly ever acknowledged
> his terminal illness.
>
> As a naval aviator Captain King flew just about everything with
> wings. From fighters off of aircraft carriers to cargo planes and
> everything in between. Mike was awarded many medals and honors for his
> service in Southeast Asia, Grenada and Viet Nam. W5PY was stationed around
> the world and was assigned to the Vice Chief of Naval Operations Air
> Warfare in the Pentagon and Commander Naval Air Forces Atlantic Fleet at
> NAS Norfolk. After retiring from the military he flew for Braniff Airlines
> and retired as a 747 First Officer flying freight between Miami and South
> America. W5PY was an Eagle Scout and 32nd degree Mason. Sailing was a
> passion as well. He spent many hours sailing his Beneteau 321 on New
> Orleans' Lake Pontchartrain from his waterfront home in Slidell. He was a
> volunteer for the First Baptist Church of Slidell, the Red Cross, Life
> Songs Christian Radio and North Shore Regional Medical Center where he was
> very active during Hurricane Katrina, practically living at the hospital
> and spending countless hours at the hospital's ham station passing
> traffic.
>
> Mike was a fixture at just about every hamfest or testing session in south

> Louisiana and Mississippi talking up the hobby, welcoming new hams and
> spreading the word about the Slidell, LA hamfest. I'll never forget the
> time he came up to me and introduced me to his girlfriend, who he called
> "Crayola". "Don," he said, "I want you to meet Crayola. I call
> her that
> because she's colorful. I love to surround myself with colorful people,
> Don. That's why I like you so much. You and Crayola are about the most
> colorful people I know and I wanted you guys to meet". That was Mike
> King,
> W5PY. He was a friend to ham radio and all he met. In the more than 10
> years I knew him I never once heard him say anything negative about
> anything or anyone. He is survived by his mother, sister and brother Joel
> King, KM5CA, All of San Antonio, TX. He was interred at Port Hudson
> National Cemetery near Baton Rouge, LA. Mike King, W5PY was 62. (AE5DW)

> sunspot 1043 emerged, high in our Sun's northern hemisphere. The
> average daily sunspot number this week fell more than 13 points to
> 14.6; the average daily solar flux declined nearly 7 points to 75.
> Geomagnetic activity was up, and the average daily planetary A index
> rose 2 points to 5.1. The average daily sunspot number for January was
> 21.3, and the 3-month trailing average -- centered on December -- was
> approximately 15.2. Like last month, the average for the month greater
> than the 3-month average centered on the previous month is a good
> trend. The difference between the monthly average sunspot number and
> the trailing 3-month average has been positive since September. The
> difference for November, December and January was 0.6, 5.5 and 6.2. For
> 2009, the 3-month average centered on January through December
> (resolved to two digits beyond the decimal point) was 2.19, 2.02, 1.49,
> 2.01, 4.23, 5.2, 4, 4, 4.64, 7.1, 10.16 and 15.15. The predicted
> planetary A index for February 4-9 is 5, 5, 8, 10, 10 and 5. The
> predicted solar flux for those same days is 78, 80, 82, 85, 88 and 90.
> Look for more information in the Solar Update -- including news on 6
> meter openings, and a piece from Carl Luetzelschwab, K9LA, about an
> auroral oval image -- on the ARRL Web site on Friday, February 5. For
> more information concerning radio propagation, visit the ARRL Technical
> Information Service Propagation page

Thanks for a fine business report. Fine business indeed! All good hams should support the League.

80. SARL NEWS - SUNDAY 07 FEBRUARY 2010

Newsgroup: rec.radio.amateur.misc
Date: 2010-02-06 20:00:12 UTC
From: website@sarl.org.za
Message-ID: <20100206200004.E837133C76@panix2.panix.com>
Source record: 6199
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 07 FEBRUARY 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web-stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for detail. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325; 14,235; 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750; 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit.)

SILENT KEY

It is with regret that we must announce the passing of Neville Swanepoel, ZS6AQX, on the 25th January. Sincere condolences to his family and friends.

(PAUSE)

In the news today:

PE HOME CONSTRUCTION COURSE IN THE BALANCE

BOOKINGS FOR THE PIC COURSES NOW OPEN

POOR OPERATING A CAUSE OF CONCERN

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

PE HOME CONSTRUCTION COURSE IN THE BALANCE

Bookings for the Home Construction Course planned for Saturday 20 February in Port Elizabeth are low which may cause cancellation of the event. In both Johannesburg and Cape Town delegates had to be turned away. The course in Durban yesterday was attended by 15 delegates which is the minimum to make the course viable.

Bookings for Port Elizabeth are still open till Thursday 11 February when a final decision will have to be made. For details visit www.sarl.org.za and select RTA.

BOOKINGS FOR THE PIC COURSES NOW OPEN

Within minutes of posting the announcement on the SARL web, the first booking was received. PIC courses will be held in Gauteng, Cape Town, Durban and Port Elizabeth.

The course fee is R300 for SARL members and R650 for non-members. The fee includes: tuition, required software on a CD, a demonstration board with a PIC and 2 project PC boards.

Full details on www.sarl.org.za. Click on RTA.

POOR OPERATING A CAUSE OF CONCERN

Participants in the President's Net last Sunday voiced their concern over poor operating procedures and the use of inappropriate language on the air. While these unacceptable practices are carried out by a small number of radio amateurs, it tarnishes the image of the hobby. Another issue raised by several speakers was the abuse of power by ZU license holders who do not adhere to the 20 Watt power limit as specified for their class of license. ZU licence holders can face fines or even cancellation of their license if they do not adhere to the condition laid down in the regulations.

The use of inappropriate language on the air is a serious offence and can lead to cancellation of the culprit's license.

These and several other operational issues will be discussed when the SARL Council meets in early March.

76 Radio Amateurs reported in after the President's net, no doubt there were many more listeners. The lucky winner of the memory stick is ZS1BFE. It will be in the mail soon.

SARL MEMBERSHIP CLOSER TO THE 1 400 TARGET

This week the SARL gained 18 members. The membership now stands at 1 370. We welcome the following new and re-instated members to the SARL:

ZR1PN - Paul Le Roux ZR6JA - Jacques van der Merwe ZS6BJ - Gabriel Joubert ZS6FOX - MW van Alphen ZS1CD - Barrie Evrard ZS6BCI - Wally Moll ZR2JG - Johannes Geldenhuys ZS2MR - Martin Ras.

We welcome the following newcomers to the SARL and Amateur Radio. They will receive listener call signs during this coming week:

Kevin Smith Graham Lambrechs William Wright Barry Els Vincent Molly Desmond Mullen.

ZS10WCS OPERATION MOVES TO THE FREE STATE

The Bloemfontein Amateur Radio Club will be hosting the ZS10WCS special event callsign during February. Thus far the record number of QSO's and DX locations worked is held by the Boland Amateurradioklub. Will the Bloemfontein club members beat Boland? One thing they have in their favour, conditions are currently far better than what it was in

September.

CONTEST NEWS

Some 78 stations participated in the first SARL 80 m Club Contest held on Wednesday 27 January. Nineteen logs were submitted.

The results are as follows:

1st ZS Contest Group, 3 logs, 93 points; 2nd Port Elizabeth ARS, 2 logs, 63 points; 3rd West Rand ARC, 7 logs, 59 points; 4th Antique Wireless Association, 4 logs, 59 points; 5th Sasolburg ARC, 1 log, 31 points; 6th Lichtenburg ARC, 1 log, 17 points; 7th Secunda ARC, 1 log, 4 points.

The SARL's next 80 m Club Contest will be run on Wednesday 31 March and is a digital contest with PSK and RTTY.

CLUB NEWS

On Monday evening 8 February ZS6JVT, the radio club of the Higher Technological School, John Vorster, in Rietfontein, Pretoria, will hold an information meeting at the school for young people interested in amateur radio. The proceedings will include:. 1. A Power Point presentation of about 45 minutes which will tell and show what amateur radio is. 2. A discussion about the presentation of RAE classes for the Class A and B licenses. 3. A discussion about competitions, building projects and outings.

Parents and learners are invited to attend the meeting which will commence at 19:00 in the Electronics Centre of the school. It will be appreciated if amateurs will also attend so that informal discussions can take place afterwards with interested people.

For m&#65533;re information contact Johan, ZS6PSS, at 082 446 1581 during office hours.

The Sandton Amateur Radio club will be starting their first Class A RAE lecture series for the year on the 10th February 2010 at 19:00 at the NARC in Honeydew.

Any person interested in joining the lecture series, is more than welcome to join them this Wednesday or for more information they can contact Mark Zank ZS6YES ,on his cell which is 083 367 8943 or alternately email him to zs6yes@gmail.com.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Currently sunspot 1 043 is still the only active region on the visible surface of the sun. The effective sunspot number is expected to be between fifteen and twenty for the coming week.

20 and 15 m will provide the best opportunities for DX. Conditions to India will be good from the afternoons onwards. During the late

afternoons and early evenings it will be moderate towards Europe. In the afternoons there are good possibilities of contacts with the USA on 15 m. Contacts with Australia will be possible on 20 m for a short while during the mornings. During the afternoons and evenings 20 and 15 m contacts may also be possible with Brazil.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the middle of the day. With summer here 20 m is also once again very useful for contacts over the longer distances, especially up to two o'clock in the afternoons.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

7 February - AWA CW Activity still on today; 8 February - Information meeting for young people interested in amateur radio at the Higher Technological School, John Vorster at 19:00; 10 February - Start of RAE classes at the NARC at 19:00; 13 and 14 February - SARL National Field Day; 20 February - Home Construction course in Port Elizabeth; 28 February - New closing date for the SumbandilaSat essay competition; 28 February - Final date for entries in the ARRISS-SAT project to be submitted to youth@sarl.org.za; 5 March - Closing date for the Tinus Lange Awards, and 27 March - 2010 SA AMSAT Space Symposium; 31 March - SARL 80 m Club Contest with PSK and RTTY.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz.

Sentech sponsors the ARMI transmissions on the non-amateur frequencies. You have listened to a bulletin of the South African Radio League compiled by George, ZS6NE.

Thank you for listening, 73.
/EX

81. NZART Headquarters Infoline Issue 200

****
Two-hundred Infolines Later
On the 14 January 2001 Issue #1 on HQ Infoline was e-mailed.
Below is the introduction to the first Infoline.
"Greetings everyone,
Welcome to the first edition of Headquartersï¿½Info-Line a fortnightly bulletin of news from NZART Headquarters E-mailed directly to Branches. Use it for display, for discussion, but most importantly it can be used by newsletter editors. Use the information in part or in full, each item will be self contained. Newsletter editors who wish to receive a direct mailing of "Headquartersï¿½Info-Line" should send their E-mail address to

jim.m@clear.net.nz
At the November Meeting, Council appointed me, Jim Meachen ZL2BHF, Editor of "Headquarters Info Line". This bulletinï¿½s publication is on an 18 month trial basis and will generally not contain material that would normally be published in Break-In. This month there will be one issue but commencing February there will be two issues per month the first on Sunday 4th February.
Well, that's the intro, here's the info."

In the nine years since the above text was written, HQ Infoline has filled the gap between the issues of Break-In by supplying timely information to members.

With this issue, Infoline introduces a revised process for repeater, beacon and link applications to the FMTAG (Frequency Management Technical Advisory Group).

Currently, applications for repeater and beacon stations are required to be reported in Break-In before the application can proceed. Because Break-In is published every two months, this brings an excessive time delay into the procedure.

The revised procedure removes the required Break-In publish requirement and the inbuilt delay. It has added, that all NZART methods of communicating to members and others, are used to show current applications in progress. (NZART Web, HQ Infoline, Official Broadcast and, of course, Break-In).

To see the new process in action, please see the next item in this bulletin, and the NZART Web at http://www.nzart.org.nz/fmtag/index.html. You will see on this page, the FMTAG main page, the flow chart covering the new process and a new link "Applications Being Processed".

****
FMTAG NOTES FOR FEBRUARY 2010

PROPOSAL PUBLISHED ON THE NZART WEB SITE AND IN THE NEXT ISSUE OF HQ-INFOLINE

Branch 81 Waikato VHF has applied to relocate its Raglan 5675 Repeater, by about 3.4 km, to Te Uku, at map reference NZ260 R15 835684, owing to the construction of a wind farm near the present site. An engineering evaluation confirms that there will be no interference to other stations and that the repeater transmit frequency can remain on 145.675 MHz with the repeater receive frequency remaining on 145.175 MHz.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matters and recommendations, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on

the NZART web site:

http://www.nzart.org.nz/nzart/fmtag.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz
****
>From The NZART Business Manager ZL2TDM
Debby says... HAPPY NEW YEAR, yes I know I am rather late, but I finally remembered to write something for Jamie to include in HQ Info-line.

First of all as usual, I need to remind members who have yet to pay their subs as they will not receive the February issue of Break In which is due out in the next couple of weeks. Please contact me if you are unsure if you have paid.
There are over 400 members who have yet to pay their subscriptions. NZART desperately needs these members to ensure 'continuity of service. Last three words added by Editor'

I realise that now the office is only open three days a week can be annoying for some members, however if you call and I am not here, please leave your contact details and I will call you back on my return. I would prefer you only call my cell phone if and urgent response is required. However most of the time information that is sought can either be found on our web page, or by contacting a Councillor in your area.

Council will be meeting face to face over the weekend of 20th and 21st Feb so if you have any urgent issues you need Council to consider, please send to me by the 17th February.

Lastly the office will be closed from Tuesday 2nd February until Wednesday 10th due to family matters.

Talk soon...Debby ZL2TDM
****
ZL3 Radio Buildathon

The 3rd ZL3 Radio Buildathon was held on Saturday January 30th in Christchurch.

A summary report of the event and many photographs can be viewed here:

http://sites.google.com/site/zl3buildathon/

In the year to 31/12/2009, 1058 visits were made to the ZL3 Buildathon website from 164 Cities located in 35 countries.

Read more here: http://sites.google.com/site/zl3buildathon/world-map/
****
MS Report "MISC" (Miscellaneous) Update

This update has details on the "Utility DXers Forum (UDXF)". A group that are interested in HF stations that transmit numbers.

"Numbers & Oddities" a.k.a. the "Spooks Newsletter" is a newsletter for the members of the Utility DXers Forum (UDXF) and the Spooks mailing list and

everyone else who is interested in Numbers Stations.

"Numbers & Oddities" covers the fascinating world of Numbers Stations and all kinds of other odd signals on HF.

****
Intruderwatch

The Monitoring Service Coordinator has recently sought the approval of the NZART Council and the National System Trustees to use the National System - e.g. 439.875 MHz periodically to encourage more participation in monitoring the HF bands to report intruders throughout New Zealand. You may find myself and other voluntary observers briefly requesting confirmation of an intruding signal to verify the strength and direction for confirmation or to alert others to a potential intruder, which is being verified. By this means, it is hoped that we can quickly establish and confirm it is a real signal and not just local QRM from another source.

A suggested procedure is: This is <your callsign> intruderwatch request, can anyone verify the following signal on <Frequency>; <Mode> please over?

Hopefully, someone will respond and assist you to verify and confirm the potential signal.

Keep your responses short, as others, may need to use the National System.

Please send an e-mail to the the Monitoring Service Coordinator using either ms@nzart.org.nz or my direct e-mail john.martin@nz.ibm.com or through the appropriate e-mail reflectors.

With the following: Date/Time; Frequency; Mode; RST; Direction, if possible; any comments about the signal.

Remember, if you want to report a suspected pirate, I suggest you do so directly via e-mail as above, discreetly rather than on the National System.

If you are able to participate or assist, it would be appreciated by the Amateur Radio community within New Zealand, to help you all to continue to enjoy this hobby and public service.

73 John MS Coordinator de ZL1GWE
****
IARUMS Region 1 Report 2009

This report gives a general overview of the development of the IARU Monitoring System in Region 1 in 2009, essential material, goals and dependencies for the success of the system.

Currently there are 87 societies in Region 1 with 19 active in the Monitoring System. That is a roughly 22 % of the societies. It is very important to stay updated with the various societies' board members changes and maintain as updated as possible a list of such personnel. Our aims is to recruit more member societies from countries in Region 1 for the Monitoring System....

****
Kiwi Digital Modes Group RTTY Contest

The contest dates are April 17th (80 m) & 24th (40 m) which are both Saturdays. The contest is open to all ZL & VK stations. The times for the contest are 1000 UTC to 1100 UTC. The link to the KDMG website for more information is:

http://www.qsl.net/zl2sky/new_page_1.htm.

****
NZART Web Update

NZ Repeater & Beacon Maps & Bandplan Info

The maps have been updated for 2010.

With the Wellington & Wairarapa map a new system has been tried to indicate the station location. Instead of a dot indicating the station location and a line to the label, a cross has been used for the station location, with a line to the label as before. Also for two stations at the same location, a partial box has been placed at one end of the label as part of the line to

the location. The labels for Mt Victoria and Hawkins Hill have been dropped down the page to stop the map outline interfering with the text.

http://www.nzart.org.nz/maps/2010/ww.pdf
====
FMTAG Page Update

>From the lead article above and the changes to the FMTAG procedure, an additional page has been added to the FMTAG main page.

This page is for the listing of the "Application Being Processed". The list will have the branch/applicant's name, followed by a brief reason for the application.

http://www.nzart.org.nz/fmtag/fmtag-abp.html
====
Bandplan Update

An observant amateur noticed that FM was not allowed for in the bandplan as published on:

http://www.nzart.org.nz/maps/2010/bp1-2.pdf

This has now been corrected by the following changes:

The KEYS have been changed and added to:
A = all modes with bandwidth less than 16 kHz.
AN = all modes with bandwidth less than 6 kHz.
AW = all modes.
D = data modes with bandwidth less than 16 kHz.
DN = data modes with bandwidth less than 6 kHz.

Individual bands have been changed as follows:
Replace A with AN below 24.990 MHz
Replace A with AW starting at 921.400 MHz and up
Replace D with DN below 28.150 MHz

The bandplan as shown on the above URL reflects these changes.

51.000 to 53.000 MHz - 6 metres
This band has had "See note" added to 50 to 51 MHz.
The note reads: "Operation between 50 and 51 MHz requires the possession of a MED 6 metre contract."
****
DIGITAL CONVERSION OF ANALOGUE AMATEUR TV TRANSMITTERS
BULK PURCHASE SCHEME

Branch 74, The Wellington VHF Group Incorporated, is importing Digital Amateur Television (DATV) equipment for the conversion of analogue mode Amateur TV Transmitters to digital.

Branch 74 is operating a Bulk Purchase Scheme, to achieve better pricing, and invites enquiries from Branches wishing to convert their transmitters to the Digital TV mode.

The cut-off date for the next equipment order is Thursday the 25th of February.

For more information, please email Branch 74 at:

zl2wa@clear.net.nz
****
CHANGE to VHF/UHF/SHF CONTEST RULES
The rules are changed by modifying part of Clause 1 of the Contest Rules by adding, at the end, the words: "or Easter".

Part of Clause 1 goes from:
Low Band Contest
All bands 50 MHz to 440 MHz. First Saturday in April, and the following day.
Delayed one week if it clashes with VHF Convention.

To:
Low Band Contest
All bands 50 MHz to 440 MHz. First Saturday in April, and the following day.
Delayed one week if it clashes with VHF Convention or Easter.

THE NEXT CONTEST

The next contest is the Low Band Contest, 50 MHz to 440 MHz, on Saturday the
10th and Sunday the 11th of April 2010. This is the weekend after Easter.
The operating times are: Saturday 1700 to 2300 NZT and Sunday 0700 to 1300
NZT.

The contest after that is the Hibernation Contest, 50 MHz and up, on
Saturday the 12th and Sunday the 13th of June 2010. This is the weekend
after Queens Birthday weekend. The operating times are: Saturday 1700 to
2300 NZT and Sunday 0700 to 1300 NZT.

All contest logs should be sent, to arrive within two weeks, to:

zl2wa@clear.net.nz
with Contest Log in the subject line, or by post to:

Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 7th February 2010

IRTS is supporting Engineers Week 2010

Following the success of last year, IRTS, together with local radio clubs, is once more involved in Engineers Week organised by Engineers Ireland from 8th to 13th February. This year sees an expanded number of locations and sessions.

There will be 18 presentations of "Decoding the Code - from Samuel Morse to SMS" in Athlone, Limerick, Cavan, Bailieborough, Kiltimagh, Balla, Dundalk, Tullamore, Carlow and Cork and up to 500 school children are expected to attend. Most sessions are fully booked.

In Dublin IRTS has been invited to take part in Family Day at Engineers Ireland Headquarters at 22 Clyde Road
on Saturday 13th.

Participants will be able to come and experience the wonderful world of electronics and communications. They will discover how radio waves travel across the world and see how, a century before the invention of SMS texts, coded abbreviations were used to send messages quickly around the globe. They will also have the opportunity to identify electronic components and to build a simple electronic circuit to take away and use
to send messages.

Further information from S&#65533;amus EI8BP at (087) 259 0691
or from www.engineersweek.ie

Echo Ireland

The current Issue of Echo Ireland has gone off to be printed and should be with our members over the
coming days.

Nomination of Awards for IRTS Trophies.

The time is here again for nominations for the several awards for IRTS trophies that are required from within the membership, this includes the awards for service to the Society, or to amateur radio. Awards in

this section may be to members or non-members.

Also Awards for other achievements, awards in this section include the 70 cms trophy, the 4 and 6 Metre shields, the SWL award, and the awards for quality construction projects. These are confined to members only.

When considering your nominations please refer to previous successful nominees as included in www.irts.ie/cgi/awards.cgi

Nominations may be from Clubs or individuals, must be in writing, and can be forwarded to the awards committee by regular post addressed to Peter Grant EI4HX, QTHR or by email to ei4hxperimental /at/ eircom.net Chair of awards committee or any other member of the awards committee. Pat EI2HX or Pat EI9HX.

Closing date for nominations is April 2nd 2010

Norman Fitch G3FPK Silent Key

The Radcom VHF/UHF columnist Norman Fitch G3FPK was found dead at his home in Purley, Surrey on Friday January 29th Norman was a keen operator on the VHF/UHF and Microwave bands and had been writing the RadCom VHF/UHF column for over 20 years.

In April 1989 he took over VHF/UHF from Ken Willis, G8VR, when it was part of the Spectrum Analysis. The column then became VHF/UHF News and eventually, it became the VHF/UHF column of today.

He will be greatly missed.

Request for Return of Trophies presented in 2009

It is time once again to recall all trophies presented at the 2009 AGM in Athlone.

Trophies and cups can be returned to the IRTS stand at the Phoenix Radio Rally, or to any IRTS Committee Member to arrive to Peter EI4HX on or before the IRTS committee meeting in early March 2010. This will allow time for engraving to be done, and also any small repairs.

REPEATER MEETING 10 FEBRUARY

The Keepers of Sligo, West Tyrone and Fermanagh Repeaters are among an expected strong attendance for talks and an equipment demonstration led off by John McCullough GI4BWM, Chairman of the RSGB Emerging Technology Coordinating Committee.

The meeting is hosted by Lough Erne ARC at 7.00 pm on Wednesday 10 February in SHARE, also venue for the Club's traditional April Rally -

this year on Sunday 11 April. The meeting kicks off at 7pm and all are welcome
to attend.

More information is available from Michael Clarke Mi5mtc, Chairman Lough Erne ARC email mi5mtc at learc.eu website www.learc.eu Tel 028/048- 6862-1436

GB10GKA Special Event Station

To mark the 10th Anniversary of the closure of the World's largest Maritime Radio Station, Portishead Radio / GKA, a special callsign GB10GKA has been granted. GB10GKA is being activated for a period of one month 30th April 2010 through 27 May 2010.

Hours of operation will be dependent on individual operator's free time however, it is intended that the callsign will be active extensively throughout the licenced period. Operation will be primarily on CW.

Operations will be on all HF bands each manned by an ex-GKA Radio Officer.

Point of contact: Tony Roskilly G3ZRJ g3zrj.morsekey /at/ btinternet.com

Information about Portishead Radio can be found at: http://www.gka.btinternet.co.uk/

New Club Startup North Cork

There is a new Radio Group starting up in the North Cork Area.

Currently a small group of small group of Amateur Radio operators and enthusiasts. Membership is open to all with an interest in the group and its commitments to
radio awareness in North Cork.

Further info is available via the website http://www.northcorkradiogroup.com

Membership is currently 10.00 per annum, applications and the club constitution are also
located on the Webpage.

CARA AGM

The Crossakiel Amateur Radio Association's AGM is being held at the Welcome Wagon Crossakiel, on 17th February
at 20.30pm.

All members are requested to attend.

South East Amateur Radio Group

The Annual General Meeting of South Eastern Amateur Radio Group will take place at 8.00 p.m. on Monday the 22nd of February 2010 in the Roanmore Social & Sports
Club, Cleaboy Road, Waterford.

All members are asked to attend and visitors are welcome.

Limerick Radio Club

The AGM of the Club will be held on Thursday 25th February 2010 at the Limerick Institute of Technology at 7:30 pm. All members of the Club are
requested to attend.

The regular monthly meeting on the 2nd Thursday of the month (11th February) has been cancelled to facilitate
the AGM later in the month.

South Dublin Radio Club AGM

The South Dublin Radio Club annual general meeting (AGM) will take place on Tuesday 2nd of March.

Classes are still being run every Tuesday evening and
visitors are always welcome.

Rallies

Phoenix A.R.C Rally 14th February

The Rally will be held as usual at Coolmine Community School near Blanchardstown on Sunday 14th February 2010.Doors open from 9am to 2.30pm. Usual traders will be present and to encourage a real Amateur Radio orientated Rally bring and buy tables
will be free of charge.

For tables contact Tony at 087-2349997 or Tom at 01-8211043 this is the first rally of the New Year and usually a very enjoyable occasion. Refreshments and plenty of car parking are available

Limerick Radio Club

Radio, Electronics & Hobbies Fair

The Radio, Electronics & Hobbies Fair takes place on Sunday 7th March 2010 at the Radisson SAS Hotel, Ennis
Road, Limerick.

Doors Open at 11:00 AM. Admission is 5 Euro. No charge for children when accompanied by an adult. There will be the usual traders attending the Fair. A Bring & Buy
Sale will also take place.

Lagan Valley ARS Rally 20th March

The Lagan Valley ARS Rally will be held at 11.30am in
The Village Centre, Hillsborough

Contact: Jim Henry, GI0DVU on 048 9266 2270

Lough Erne Rally 11th April

Lough Erne Amateur Radio Club Annual Rally - The Share Holiday Village, Lisnaskea, Co. Fermanagh BT92 0EQ N. Ireland. Access from Erne/Shannon Waterway. 11.30 am Details Iain 028 66326693, Email gibbjgbb /at/ aol.com
(www.learc.eu)

Dundalk Rally 25th April The Rally will commence at 11.00am, followed by the IRTS AGM at 2.00pm.

Further details for booking, trader's tables or any other info please e-mail the following, Thos EI2JD chairman /at/ ei7dar.com or Peter EI4HX secretary /at/ ei7dar.com

Mid Ulster Radio Club Rally 29th May

This year the Rally will be held at Drumgor Youth Centre, Drumgor heights, Craigavon. More details will be available closer to the time. If interested in booking a table for the event or for more information, please go to www.muarc.com or contact
0044(0)2838348451.

For more information on Rallies please check the
IRTS Website.

This week in History

1893 Edison opens first motion picture studio, West
Orange, New Jersey.

1899 SS "R F Matthews" collided with the lightship, which alarmed the lighthouse ashore to get assistance. This was the first time ever a distress call was transmitted by radio from a ship at sea!
Sent 'HELP' etc...

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following
Sunday's bulletin.

85. Can a 5/8 wave vertical mobile antenna be used for 2 meter SSB?

Newsgroup: rec.radio.amateur.misc
Date: 2010-02-09 01:10:57 UTC
From: ki4rwp+usen1@gmail.com

2 meter USB on a 5/8 wave vertical mobile antenna?

Currently I'm testing a beacon on 2m USB.

I know SSB is generally used on a horizontal antenna,
but is a vertical antenna (Hustler SF-2) useable for USB?
Or am I wasting my time?

thanks
73

The modulation mode doesn't require a specific transmit antenna
polarization.

You can use any polarization on any mode.

As you suspect, the 5/8 wave vertical is a short range antenna and you
won't get much distance using it, unless you're on a mountaintop or
the antenna is atop a TALL tower.

Also, the antenna may be cut for the higher end of the band -- around
146 MHz. If your beacon is operating in the SSB portion of the band
-- down close to 144 MHz, the SWR will be high but should not be a
problem.

A 5/8 wave vertical has a decent DX takeoff angle. No gain, but most of
the energy is in a single lobe.

89. [DXNL] DXNL 1662 (Feb 10, 2010)

DXNL 1662 - Feb 10, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

C6 - BAHAMAS
Bob,N4BP (C6AKQ), Mike,K4RUM (C6AUM), and Tim,N4UM (C6ARU), will arrive in Lucaya/Freeport on Grand Bahama Island (NA-080) on Feb 15 and will be joined by Kevin,K4PG (C6APG), on Feb 18. The operation includes a participation in the ARRL International DX CW Contest (Feb 21/22). C6APG will join as single op on 40m, C6AKQ as single op on 80m, C6AUM as single op on 160m and Tim,C6ARU, will decide later. They will focus on the WARC bands and digital modes before the contest starts. QSLs direct to their homecalls or via LoTW.

Drew,N2RFA, is signing C6ABB from Nassau (NA-001) when working in RTTY, SSTV and PSK31 on 17m/20m/40m/80m from Feb 8-18. QSL via homecall.

CN - MOROCCO
Guy,F8ALU, is momentarily active as CN2BG and will stay in Morocco until the beginning of March. Usually you can find him on 14115 and 14130 kHz. QSL via his homecall.

J3 - GRENADA, NA-024
J38XX will be the callsign of Ulf,DL5AXX, from Feb 10-24. Ulf will be active mainly on the lowbands and in the upcoming ARRL CW Contest. His equipment includes a K3 transceiver, a small amplifier, a vertical for 40m, an inverted L for 80m/160m and a spiderbeam for 30m-10m. Ulf plans to upload his log daily to http://www.clublog.org and to his personal logcheck with OQRS (http://www.dl5axx.de/dxlog).
The easiest way to obtain a QSL card is via OQRS, else via bureau or direct; no LoTW, no eQSL.

Bill,K4LTA, will show up as J37BO between Feb 11 and Mar 3. Together with NK4N he will join the ARRL DX CW Contest in multi/single class as J38A. QSLs for both calls via K4LTA.

J7 - DOMINICA, NA-101
Steve,KL7SB, announced to be active as J79SB in CW, SSB, RTTY and PSK31
on the HF bands from Feb 9-18. QSL via NI5DX.

JT - MONGOLIA
YL Munkhmend "Mend",JT1JC, was very active in RTTY and PSK31 during the
last weeks. She is the XYL of Gankhuyag,JT1CJ. Listen for her on 20m
in PSK from 2245-0030 UTC and in RTTY from 0700-0800 UTC.
QSL via PO Box 73, Ulaanbaatar-35, Mongolia.

OA - PERU
Fred,OA4/DL1NL, is staying in the Peruvian capital Lima until the mid
of February. He is active mostly in CW on HF whenever his time permits.
QSL cards should be sent via his homecall.

PJ4 - NETHERLAND ANTILLES, BONAIRE, SA-006
Roger,N4RR, will be on Bonaire (SA-006, WLOTA LH-1279) from Feb 10-15.
He will sign PJ4/N4RR in CW and RTTY and will use the special callsign
PJ4R in the single OP/allband/low power class of the WPX RTTY Contest
on Feb 13/14. Both QSLs via his homecall.

T8 - PALAU, OC-009
Mike,T88SM (JA6EGL), and Hiro,T88HS (JA6KYU), are working in CW/SSB
on 80m-10m from Koror (OC-009) from Feb 10-16.
QSLs only direct via their homecalls.

V3 - BELIZE
V31RI is the call of Ben,DL6RAI, from Feb 10 until Mar 2. His QTH is
Consejo Beach and you can expect activities mostly in CW and in SSB.
QSLs via bureau or direct to his homecall, via LoTW is ok as well.

XE - MEXICO, NA-167
Yahir,XE2JA/XF1, and maybe also other OPs will be active from the
island of Alcatraz (aka Pelicano, Sonora State North Group, NA-167)
in SSB and RTTY on 80m-15m and via the satellites AO-51, AO-27, SO-50
from Feb 11-14. Following operating frequencies were announced:
SSB: 3790, 7060, 14260, 18140, 21260 kHz,
RTTY: 3585, 7044, 14085, 18104, 21085 kHz.
More information is available at: http://xe2ja-xf1.blogspot.com
His QSL manager is EA5XC.

XU - CAMBODIA, AS-133
Wim,ON6NP, Wim,ON6TZ, and Peter,XU7ACY (NO2R), will show up as XU7KOH
from the island Koh Russei (AS-133) from Feb 12-16. They will be joined
by Eddy,ON4AFU, and Joel,F5PAC, from Feb 19-23. QSL via ON7PP.
For more information visit: http://www.xu7tzg.be
After their return home an online logbook will be published there, too.

YN - NICARAGUA
Stan,AC8W (YN2WW, QSL via K8DD), Hank,K8DD (YN2DD, QSL via K8DD),
Jim,KB8TXZ (YN2TX, via KB8TXZ), and Lee,N8LJ (YN2LJ, via K8ESQ), will
be active from Nicaragua from Feb 16-25 including a participation in
the multi single category of the ARRL CW Contest. Before and after the
contest you will find YN2DD working mostly in CW and RTTY on 17m,

YN2WW primarily on 30m, YN2LJ in CW on the lowbands and YN2TX in SSB.

5X - UGANDA
Jack,NP2OR, is momentarily active from Masaka and will stay there until May. He is QRV as 5X7JD in SSB on 20m/40m every day from 0500-1550 UTC. He is running 100 watt into a Hy-Gain vertical or a folded dipole. QSLs only direct via Jack Dunigan, Box 100, Masaka, Uganda.

5Z - KENYA
Enrico,5Z4ES, Frank,IK8TEO, Tony,IK8UHA, and Antonio,IK8VRH, will sign 5Z0H from Feb 12-25. The prefix 5Z0 has been issued for the first time. They will also activate the islands Wasini (AF-067) and Lamu (AF-040) during this period of time. The team plans to operate with two stations simultaneously in CW, SSB and RTTY on 160m-10m.
Their QSL manager IK8VRH confirms the cards direct, via bureau or LoTW. More information is available online at: http://www.ddxc.it

9Y - TRINIDAD AND TOBAGO, SA-009
Mike,9Y4/DF8AN, is working mostly in CW on HF from Tobago (SA-009) from Feb 8-22. QSLs direct or via bureau to his homecall.

FRANCE, SPECIAL EVENT STATION
The special callsign TM7AAW will be activated by Francois,F8DVD, during the "7th Antarctic Activity Week" from Feb 13-28. QSL via his homecall.

ITALY, SPECIAL EVENT STATION
The special callsign IU2ANT will be activated by Paolo,IK2QPR, during the "7th Antarctic Activity Week" from Feb 15-28. QSL via his homecall.

MOROCCO, SPECIAL EVENT STATION
The special event station 5E50SA reminds the devastating earthquake which destroyed the Moroccan city Agadir 50 years ago. 5E50SA can be found on the air until Feb 28. QSLs via EA7FTR.

THE NETHERLANDS, SPECIAL EVENT STATIONS
The national park "De Hoge Veluwe" is existing for 75 years now. For this reason Fred,PA0FAW, is working as PA75HV during February and two more times this year. These activities do not count for the national parks award because Fred is using the callsign from his home.
QSLs can be sent via bureau, direct or eQSL to PA0FAW, no LoTW!

DXCC: Following QSL cards are accepted for DXCC credit now:
D44TXP, D44TXO, D44TXS, D44TXI, D44TXF, D44TXQ and D44TXR.

SILENT KEYS: Alonso Ulloa Mireles,XE1ZZA, passed away in his hometown Guadalajara on Jan 27. Alonso was a wellknown DXer and DXpeditioner worldwide. Other DXers who became a silent key during the past time are Norman Fitch (G3FPK), John Dunlop (GM0WDF/GM6LNM), Robert King (K5IY), Terry P. Morton (KJ6OW), David Charles Blanchard (N3II), Rudolf A. Yanson (RW0IZ), Viktor T. Korostyljov (UN7QB), Judge L. Bodycote (W1PEA), Kenneth M. Smith (W7HRY), James M. Durante (W9NB), and Francisco Lopez Diaz (XE2NLD).

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Feb 13/14: CQWW RTTY WPX Contest
Feb 13/14: PACC Contest
Feb 13/14: RSGB 1.8 MHz CW Contest
Feb 21/22: ARRL International DX CW Contest

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AS-136, BY, Changxing Island: David,BA4DW/4, will work in holiday style with
100 watts and wire antennas from Feb 11-19. QSL via BA4DW.

OC-031, C2, Nauru: Dieter,DJ2EH, and his XYL Anneli,DL8NBH, are signing
C21DL and C21YL from Nauru between the end of January and Feb 14.
QSLs via homecalls (direct/bureau).

OC-141, VK8, Australia NT North Group: Bill,VK4FW, plans to work as VK8MM
from Groote Eylandt Island from Feb 14-20. QSL via homecall.

Lighthouse activities (WLOTA/ARLHS/ILLW)

PJ4R LH 1279 Bonaire Feb 13/14
PJ4/N5RR LH 1279 Bonaire Feb 10-15
PJ7MF LH 0711 Sint Maarten resident

interested DX station or DXpedition team looking for a reliable QSL manager
please contact Ronny via: http://www.do8la.de.tl/QSL-_-Manager-_-Service.htm

Contest use of 1810 to 2000 kHz in Spain

At the request of the URE the Spanish Director General of Telecommunications
has permitted the use of the amateur radio band from 1810 kHz to 2000 kHz
in several contests. Outside of these contest the Spanish HAMs are only
allowed to use the frequencies from 1830-1850 kHz and not the segment from
1810-1850 kHz which is primarily allocated to HAM radio in IARU region 1.
The official document in Spanish can be found online at:
http://www.mityc.es/telecomunicaciones/Espectro/radioaficionados/Documents/

90. ARRL Nebraska State Convention

Newsgroup: rec.radio.amateur.misc
Date: 2010-02-11 14:39:41 UTC
From: ARRL NE Section <memberlist@www.arrl.org>
Message-ID: <20100211140002.42DEE20856@bmail.arrl.org>
Source record: 6059
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,nebr.misc,rec.radio.info

Join us at the ARRL Nebraska State Convention -- End of Winter Hamfest
on March 20, 2010. Among the featured speakers are Bob Allison,
WB1GCM, from ARRL HQ giving us a look at the ARRL Lab and how it works
and the ARRL Midwest Division Director, Cliff Ahrens, K&#65533;CA, who will be
bringing us up to date happenings at ARRL HQ and within the Division.

This looks like a great event. There will be lots of hams to talk with,
lots of equipment to look at, and plenty of interesting presentations.

The Convention is being held at the Lancaster Event Center located at
84th and Havelock in Lincoln. For more information, please visit the
hamfest website: http://www.lincolnhamfest.org. You can also download
a flyer describing the event at
http://www.ctwsoft.com/hamfest/2010_LARC_Conv_Flyer.pdf.

I'll look forward to seeing you there!

73, Art K&#65533;AIZ

ARRL Nebraska Section
Section Manager: Arthur I. Zygielbaum, K0AIZ

==> ON-THE-AIR : GET READY FOR THE ARRL DX CW CONTEST

The weekend of February 20-21 will be a busy one for CW operators as
the 2010 ARRL DX CW Contest takes center stage. First started in 1929
as the ARRL International Relay Party, the ARRL DX CW contest lays
claim to the longest running contest in Amateur Radio. Stations from
all around the world -- from Australia to Zimbabwe -- should be active
for this great event that takes place on 160-10 meters (contest QSOs
are not permitted on 60, 30, 17 or 12 meters). Read more here
<http://www.arrl.org/news/stories/2010/02/09/11334/?nc=1>.

==> ARRL FIELD DAY : 2010 FIELD DAY PACKETS NOW AVAILABLE

It's that time of year again -- time to start gearing up for ARRL
Field Day, June 26-27, 2010! ARRL's flagship operating event -- always
held the fourth full weekend in June -- brings together new and
experienced hams for 24 hours of operating fun. Field Day packets are
now available for download
<http://www.arrl.org/contests/forms/fd-2010-packet.pdf> and include the
complete rules (including changes for 2010), as well as other reference
items such as forms, ARRL Section abbreviation list, entry submission
instructions, a Frequently Asked Questions section, guidelines for
```

getting bonus points, instructions for GOTA stations, a kit to publicize your event with the local press and more.

==> EYE ON AWARDS : THE IARU REGION 2 AWARD

In October 2009, IARU <http://www.iaru.org/> Region 2 <http://www.iaru-r2.org/wp-content/uploads/r2-award.pdf> announced a new award -- the IARU Region 2 Award <http://www.iaru-r2.org/wp-content/uploads/r2-award.pdf#pdf> -- available to amateurs and shortwave listeners who submit confirmed QSLs with 20 Region 2 countries or entities. To be considered for the award, contacts must have been made after April 16, 1964 -- the date when IARU Region 2 was founded. Read more here <http://www.arrl.org/news/stories/2010/02/11/11335/?nc=1>.

==> HINTS AND KINKS: UNISTRUT ANTENNA SUPPORT

This idea comes to us from Louis Kobet, WB3DZD, of Camas, Washington.

When considering a center support for the installation of an inverted V antenna I decided on the following requirements: a strong material, easy assembly, corrosion resistant and with tilt-over capability. The initial design was to use several 10-12 foot sections of antenna mast or 2 inch galvanized pipe coupled together. Due to the cost of antenna mast and galvanized pipe being more than anticipated, an alternative, 10 foot sections of 1-5/8 inch Unistrut channel was selected.

Figure 1: The PVC pipe and hoist pulley device mounted to the top of the Unistrut for hoisting the antenna. Unistrut is a ham's Tinkertoy. It is available in 13/16, 1 1/4 and 1-5/8 inch widths, 10 and 20 foot lengths and in 12, 14 and 16 gauge sizes. It is made with dipped surface protective treatments from electro-deposition acrylic green to "hot dipped" galvanized coatings and multiple channel designs (including telescoping sections). A vast selection of brackets and fasteners is available and it is continuously slotted for easy guying. The design and choices for project use are limited only by the creativity of the user.

The tilt over base support consisted of a treated 4Ã□4 inch landscape post anchored in concrete. (The wooden post was moisture sealed at the top using the dipped coating used for hand tools and along the length with several coats of wood sealer.) The Unistrut mast pivot point on the support base was a 3 inch lag bolt about 50 inches above ground. In retrospect, a section of Unistrut could have been set in the concrete as the antenna base support.

The Unistrut mast preparation consisted of black paint (except for areas where the sections were bolted together) and the addition of a hoisting pulley mounted at the end of a 2 foot PVC pipe (see Figure 1). One problem encountered was in bolting the Unistrut together. Bolting back-to-back against the base of the "U" was not possible because I couldn't get a socket on the bolt head inside the Unistrut channel. To get around this the Unistrut was bolted with the open "U" ends face to

face. Square Unistrut channel would have eliminated this issue. The three Unistrut sections were bolted together with about a 12 inch overlap.

An antenna hoisting line was fed through the pulley and mast section carried to the base support for mounting. After attaching the mast to the pivot point it was tilted up into position, plumbed and secured in place with three additional lag bolts.

The V antenna was spread out, transmission cable attached and hoisted to the top of the mast. The ends of the V antenna were attached to a 12 foot landscape treated 4Ã□4 that was secured to the property fence.

Do you have an idea or a simple project that has improved your operating? Maybe you've taken something commonly found around the home and developed a ham radio use for it? Why not share your hints with fellow hams in "Hints and Kinks," a monthly column in QST. If we publish your hint in QST, you will receive $20. Send your hints via e-mail <h&k@arrl.org> or to ARRL Headquarters, Attn: "Hints and Kinks," 225 Main Street, Newington, CT 06111. Please include your name, call sign, complete mailing address, daytime telephone number and e-mail address.

==> LEGISLATIVE HAPPENINGS: MORE COSPONSORS ON BOARD FOR HR 2160

<http://www.arrl.org/news/stories/2009/05/12/10818> Last month, another Congressional Representative -- Jo Bonner (R-AL-1) -- pledged his support for HR 2160 <http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_bills&docid=f:h2160ih.txt.pdf>, The Amateur Radio Emergency Communications Enhancement Act of 2009, bringing the total number of cosponsors to 34, including original sponsor Sheila Jackson-Lee <http://www.arrl.org/news/stories/2009/04/30/10792/?nc=1> (D-TX-18). HR 2160 is also sponsored by W. Todd Akin (R-MO-2), Michael Arcuri (D-NY-24), Roscoe Bartlett (R-MD-6), John Boozman (R-AR-3), Madeleine Bordallo (D-Guam), Andre Carson (D-IN-7), Geoff Davis (R-KY-4), Bob Filner (D-CA-51), Scott Garrett (R-NJ-5), Bart Gordon (D-TN-6), Brett Guthrie (R-KY-02), Maurice Hinchey (D-NY-22), Michael Honda (D-CA-15), Mary Jo Kilroy (D-OH-15), Tom Latham (R-IA-4), Zoe Lofgren (D-CA-16), Blaine Luetkemeyer (R-MO-9), Thaddeus McCotter (R-MI-11), Charlie Melancon (D-LA-3), Candice Miller (R-MI-10), Dennis Moore (D-KS-3), John Olver (D-MA-1), Bill Posey (R-FL-15), Dana Rohrabacher (R-CA-46), Bennie Thompson (D-MS-2), Michael Turner (R-OH-3), Peter Welch (D-VT), David Wu (D-OR-1), C.W. Bill Young (R-FL-10) and Don Young (R-AK). Click here <http://www.arrl.org/news/stories/2009/05/12/10818> for information on how to encourage your Congressional Representative to sponsor HR 2160.

==> PIO NEWS : THE FEBRUARY ISSUE OF CONTACT! NOW ONLINE

<http://www.arrl.org/pio/contact/> The ARRL is committed to public relations and has built a national PR program designed to represent Amateur Radio to government, the media and the public. The Newington Headquarters' national effort is supported -- and greatly enhanced -- by ARRL public information appointees and other interested volunteers who work to promote Amateur Radio on the local level. One of the tools to help these volunteers is CONTACT <http://www.arrl.org/pio/contact/2010/02/>, the monthly online newsletter designed to be a resource for ARRL Public Information Coordinators (PIC <http://www.arrl.org/FandES/field/org/pic.html>), Public Information Officers (PIO <http://www.arrl.org/FandES/field/org/pio.html>) and anyone with an interest in Amateur Radio public or media relations activities. Each issue contains helpful articles and tips to help spread the good word about Amateur Radio.

The February issue of CONTACT was released earlier this week and is full of information that you can use. With Field Day approaching, how are you going to publicize your club's participation in the largest operating event in the world? Find out what some hams will be doing combine Field Day with other events happening in their communities. Speaking of Field Day, find out how your club can earn 500 bonus points. Learn how a club in New Zealand got people who had no electronics experience excited about Amateur Radio. There's more information in the February issue of CONTACT. You can read it -- as well as other materials prepared specifically to promote Amateur Radio -- on the PIO Web page <http://www.arrl.org/pio/>.

==> NEW ARRL WEB SITE COMING SOON

After more than two years of planning, designing and writing, we here at the ARRL are eagerly anticipating the launch of the new ARRL Web site. We've been able to make the online experience easier for our members -- from the online store, to registering for a class, to finding a club -- plus we've created a new, enhanced member profile with many more options available. We've made improvements with you in mind, making sure that we've created the easiest, most enjoyable online experience possible. The new Web site will be available at the end of February.

==> ITU NEWS: ITU DIGITIZES HISTORICAL ARCHIVES

The International Telecommunication Union (ITU <http://www.itu.int/>) announced <http://www.itu.int/newsroom/press_releases/2010/CM02.html> on February 11 that they have launched the History of ITU portal <http://www.itu.int/history>. This program -- the digitizing of the ITU's archive of historical documents -- aims to improve access to information on the ITU and chart its evolution since its establishment in 1865, while ensuring the long-term preservation of historic documents. The archives will be freely accessible. ITU's Historical Documents Digitization Program is an ongoing project to catalogue and scan key ITU documents and outcomes of major conferences and make them

available on the web. Optical character recognition (OCR <http://en.wikipedia.org/wiki/Optical_character_recognition>) allows the documents to be fully searchable. Documents generated from ITU Plenipotentiary Conferences -- as well as from early radio, telegraph and telephone conferences -- are now available on the portal. The portal provides background information, key data and links to the documents and other materials for each conference. The digitization program will continue to make available documents of historic significance, including those related to Radiocommunication Conferences since 1903.

==> SILENT KEY: HERBERT "PETE" HOOVER III, W6ZH (SK)

Herbert "Pete" Hoover III, W6ZH (ex-W6APW) -- the grandson of Herbert Hoover, the 31st President of the United States, and the son of former IARU and ARRL President Herbert Hoover Jr, W6ZH (SK) -- passed away <http://www.legacy.com/obituaries/latimes/obituary.aspx?n=herbert-hoover-pete&pid=139549574> February 4, 2010. He was 82. A resident of San Marino, California, Hoover was active in ARRL activities, serving as a Director of the ARRL Foundation <http://www.arrlf.org/> in 1976 and as a member of the ARRL Long Range Planning Committee from 1978-1981. In the 1970s, Hoover, along with EIMAC's Bill Eitel, W6UF (SK), established a matching fund to encourage contributions to the amateur satellite program. Hoover served as Vice President and Trustee of the Pasadena (California) Radio Club and was also a member and former President of the Southern California DX Club. In 1978, he was elected to the National Red Cross (later the American Red Cross) Board of Governors. A memorial service is being planned. Donations may be made to Doheney Eye Institute, 1490 San Pablo St, Los Angeles, CA 90033; Hoover Institution, 434 Galvez Mall, Stanford University, Stanford, CA 94305-6010; Herbert Hoover Presidential Library Association, 302 Parkside Dr, West Branch, IA 52358 or the House Ear Institute, 2100 W 3rd St, Los Angeles, CA 90057.

==> SILENT KEY: CHRIS WALTERS, N0HVK, KILLED IN CONNECTICUT EXPLOSION

Chris Walters, N0HVK, of Florissant, Missouri, was killed in an explosion <http://www.nbcconnecticut.com/news/Widow-Mourns-Husband-Killed-in-Plant-Blast-83855942.html> on Sunday, February 7. He was 48. Walters -- who was employed as a safety manager for an electrical subcontractor at the Kleen Energy Plant in Middletown, Connecticut -- was one of five men killed in the explosion; at least a dozen were injured. The accident received national news coverage. According to officials, the plant was in the process of doing a "blow down" -- clearing the natural gas lines -- when the explosion occurred, but investigators are still determining the cause of the explosion. According to his wife, Fran, Walters was unemployed in Missouri and had been in Connecticut for two months working a temporary job. While in Connecticut, Walters found time to

enjoy Amateur Radio activities. He was a member of the Shore Point Amateur Radio Club (SPARC <http://sparc.us/sparc.htm>), volunteering for community events and fundraisers with the club; he was also part of SPARC's first ARRL Field Day. Connecticut Governor M. Jodi Rell requested that flags fly at half-staff on February 10 in honor and memory of the five men who perished in the explosion. -- Some information provided by WVIT and SPARC

==> SOLAR UPDATE

Tad "Light breaks where no Sun shines <http://www.poemhunter.com/poem/light-breaks-where-no-sun-shines/>" Cook, K7RA, reports: The increasing sunspot activity continues, and images from NASA's STEREO mission <http://stereo.gsfc.nasa.gov/> show a string of active regions in the Sun's northern hemisphere -- both visible and over the horizon on the far side. The high sunspot number for the week was 71 on February 8; the average for the week was 43.3. We haven't reported a weekly average that high since the week of March 27-April 4 in 2008 when it was 43.6. The daily sunspot number hasn't been as high as 71 since May 28, 2006 when it was 78. The earlier reading that reached that level or more was 105 on April 6, 2006. On February 8 -- when the daily sunspot number was 71 -- the total area covered by sunspot activity was 460 millionths of a solar hemisphere. That number hasn't been as high since the same earlier week in 2008 that had a high sunspot number average. The dates were March 26-27 when the area of sunspots was 520 and 510. Look for more information on the ARRL Web site on Friday, February 12. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by Dylan Thomas' Light Breaks Where No Sun Shines <http://www.poemhunter.com/poem/light-breaks-where-no-sun-shines/>.

==> THIS WEEK ON THE RADIO

This week, the NCCC Sprint Ladder is February 12. The YLRL YL-OM Contest is February 12-14 and the FISTS Winter Sprint is February 13. On February 13-14, be sure to check out the CQWW RTTY WPX Contest, the KCJ Topband Contest, the Louisiana QSO Party and the OMISS QSO Party. The North American Sprint (SSB) and the SKCC Weekend Sprint are both February 14. The Classic Exchange (Phone) is February 15 and the AGCW Semi-Automatic Key Evening is February 17. Next week, the ARRL International DX Contest (CW) <http://www.arrl.org/contests/rules/2010/intldx.html> is February 20-21. There is another NCCC Sprint Ladder on February 19. The Feld Hell Sprint is February 20, the Run for the Bacon QRP Contest is February 22 and the SKCC Sprint is February 24. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.

Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, February 21, 2010, for these online course sessions <http://www.arrl.org/cep/student/> beginning on Friday, March 5, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1696 - February 12, 2010

Please note that this is an extended amateur radio Newsline report with three breaks and a total running time of 34 minutes. Newscast begins rightnow.

**

Amateur Radio Newsline report number 1696 with a release date of Friday, February 12th, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio relief communications continue in Haiti, a UK publisher gives financial support to the RSGB's fight against BPL, a major sunspot appears on the surface of the solar disc, a radio prank brings a $16,000 fine and a teen finds a way to send radio waves through solid rock. Find out the details on Amateur Radio Newsline(tm) report number 1696 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM RADIOS ROLL EXPANDING IN HAITI

Amateur radio's effort to assist in earthquake ravaged Haiti continues to expand. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

The role being played by radio amateurs in post quake relief efforts is far from over. This with word through the ARRL that Doug Lapin, K1OY, and the Dominican Radio Club's team were to returned there earlier this past week to install another repeater which will serve as a major upgrade to the system.

There are two fixed sites at the Dominican Embassy and the UN Logistics Base. The system is used primarily by the Dominican Red Cross. Lapin and the Dominican group were to be in Haiti for two days and hoped come back the following week to upgrade the power plant.

Lapin says that he attended a recent United Nations weekly status meeting where was deluged with requests by the UN and others to use the network. He notes that there are still severe communications problems in Haiti, especially as more aid organizations get organized.

Meantime, Julio Ripoll, WD4R, reports that the University of Miami Hospital's Amateur Radio teams have been very busy passing messages

between
Florida the hospital ship Comfort and around the airport in Haiti. He notes that the University of Miami Hospital's hams have also been put to work repairing radio and medical equipment for other relief groups.

Ripoll says that landline communications are still down and that cell phone service is "only about 80%. And says Ripoll, the latter is only in the immediate area of Haiti's main airport.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

With Haiti's communications infrastructure still in a state of disarray, it appears that ham radio will play an important role in rescue radio efforts for months to come. (ARRL)

**

RESCUE RADIO: MARS UNITS TO SHARE HAITI RESPONSIIBILITY

Meantime, to assist the MARS communications support effort in earthquake relief to Haiti, the heads of Army, Air Force, and Navy-Marine Corps MARS have agreed to divvy up responsibilities among the three MARS programs. In a report carried by the ARRL, Air Force MARS Public Information Officer David Trachtenberg, N4WWL, said that the delegation of responsibility will facilitate more efficient utilization of MARS communications assets in the overall relief operation. The January 12th earthquake wiped out the island nation's communications infrastructure. (MARS Release)

**

RESCUE RADIO: A LIST OF NATIVE HAITIAN HAMS

A partial list of hams believed to have been active from Haiti prior to the January earthquake has surfaced. Amateur Radio Newsline's Don Wilbanks, AE5DW, has the calls to listen for:

--

According to a posting from KC8VWM, the following stations represent "known" Haitian nationals who are hams who have been operating stations in Haiti in the past year or so. They are HH2AW, HH2DMJ, HH2DZ, HH2GM. HH2FJM, HH2JR, HH5HK, HH3AR, HH6JH, HH2B and HH2LX.

There may be others but if there are they have not been heard on the air in a long time. Charles adds that some of these call signs may have expired and some hams may have relocated to other countries. Also, latest reports indicate none of these stations listed in Haiti have been contacted.

I'm Don Wilbanks, AE5DW, near New Orleans.

--

At airtime nothing more is known about the health and welfare of anyone on this list. (KC8VWM via Internet)

**

RESCUE RADIO: ETOW TO SEND WIND UP RADIOS TO HAITI

In other Haiti earthquake relief news, some free radios are on their way to Haiti to help the general public know more about humanitarian efforts coming their way. Jim Damron, N8TMW, has the details:

--

The humanitarian organization Ears to our World has launched an initiative to distribute a substantial number of Eton Corporation-donated radios to individuals in remote and impoverished areas of that nation. These are wind-up generator powered radios which also have a built-in flashlight.

The group believes that the radios could provide life-saving medical and food/water supply information to families and communities.

The organization is currently raising funds to help pay the expedited shipping costs and perhaps allocate even more radios for a future shipment.

I'm Jim Damron, N8TMW.

--

The initial shipment of over 100 of these self-powered radios was to be sent to Haiti this last week. (Southgate)

**

THE BPL WAR: UK PUBLISHER DONATES TO RSGB ANTI BPL FIGHT

PW Publishing, the company that owns United Kingdom magazines Practical Wireless and RadioUser, has joined the BPL fight. This as it becomes the first corporate donor to the Radio Society of Great Britain's Spectrum Defense Fund. The company has also generously given the RSGB advertising space throughout the year to highlight the problems of Broadband over Power Line interference. (GB2RS)

**

PROPAGATION: A BIG SUNSPOT AT LAST

A possible turning point in the High Frequency propagation doldrums. This as Spaceweather dot com reports the sudden emergence of sunspot 1045 which in turn has caused a sharp increase in solar activity.

The active region appeared on Saturday, February 6th. By mid-week it had produced three M-class and almost a dozen C-class solar flares. The strongest blast, an M6-class eruption on February 7th, may have hurled a coronal mass ejection toward Earth.

Whether or not sunspot 1045 is a precursor to ongoing improved solar activity or just a one-time occurrence remains to be seen. Sample sounds

and images may be found at spaceweather.com. (Spaceweather)

**

RADIO HONORS: ARRL ANNOUNCES LEONARD AWARD WINNERS

Three people have been named as recipients of the ARRL's 2009 Bill Leonard W2SKE, Professional Media Award. First up in the audio category is radio host Ted Randall, WB8PUM of the weekly QSO Radio Show. The ARRL Board of Directors recognized that Randall's show has become even more effective as a podcast of consistently high quality in its treatment of issues within amateur radio week after week. Ted was the recipient of this award in 2008, as well.

In the area of video the award was given to reporter Kim Byrnes of Kansas City television station WDAF. She covered the Raytown Amateur Radio Club's 2009 Field Day operation for her station's Sunday morning news magazine. Byrnes also provided reports on the diverse aspects of amateur radio, specifically highlighting ham radio as a hobby, as an emergency communications service, and as a radiosport. She also chronicled the evolution of two-way radio technology with what the Board called a fascinating video report.

Lastly, the print journalism award was given to Vicky Taylor who is a reporter for the Chambersburg, Pennsylvania, newspaper Public Opinion. She was honored for her coverage of the licensing of 8 year old Victoria Latham, KB3SSM, and her 7 year old sister Veronica, KB3SSN. This was the heartwarming story of how these two pre-teens convinced their dad Shannon, W3SML, and mom Rachel, KB3RNP, that they were ready to get their ham tickets. (ARRL)

**

BREAK 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the N7VGS repeater serving Star Valley, Wyoming.

(5 sec pause here)

**

ENFORCEMENT: RADIO PRANK LEADS TO $16000 FINE

A New York radio station that played what has been described as a distasteful radio prank on a listener has been issued a proposed fine of $16,000 by the FCC. But it's not what was said that got the station in trouble, but the way it tried to circumvent the FCC rules that say a person being recorded during a call must be advised before the station rolls tape. Amateur Radio Newsline's Bruce Tennant, K6PZW picks up the story from here:

--

In its Notice of Apparent Liability for Forfeiture against WSKQ Licensing, Inc. the regulatory agency says it is proposing to assess this $16,000 fine because of WSKQ's apparent willful and repeated violation of Section 73.1206 of the Commission's Rules. This by broadcasting a telephone conversation without giving prior notice to the individual being called of its intention to do so.

On August 23, 2007 the FCC's Enforcement Bureau received a complaint alleging that a station employee made a call to a woman claiming to be an employee of a local hospital. The caller told the recipient of the call that her husband had been seriously injured in a motorcycle accident and that he died at the hospital. The complaint also alleged that the call recipient became distraught when she received this information. Thereafter, the Station employee informed her that the call was a nothing more than a joke.

Based on the complaint the FCC issued a letter of inquiry to WSKQ Licensing on September 25, 2008. In its response WSKQ Licensing stated that its parent company, Spanish Broadcasting System, Inc., contracted with a vendor, Rubin Ithier, who recorded the call for a prank call feature show. It admitted that Ithier initiated the call broadcast by the station. It went on to claim that the call was made at the call recipient's husband's request, and that Ithier performed the prank.

WSKQ Licensing did admit that Rubin Ithier did not inform the call recipient that the call was being recorded for later broadcast until after the call had been recorded and played over the air. The licensee provided a transcript of the program, the content of which confirmed that the call recipient was not given notice prior to the call being recorded that it was being recorded for future broadcast. The licensee also admitted that the Station broadcast the call twice on August 23, 2007.

WSKQ Licensing also included a recording and transcript of the broadcast. We have read it and find it far to distasteful to repeat. I does however indicate that the prank call recipient hung up the phone when she learned that the call was a prank. Also that Rubin Ithier telephoned her again to obtain her permission to broadcast the call.

In its February 4th decision to issue the proposed fine the FCC did not touch on the content of the prank call. Rather its concern was the fact that the call was recorded and replayed without the consent of the recipient. As such, the FCC says that based on the preponderance of the evidence, that the person who made the prank call willfully or repeatedly violated the Communications Act or a Commission rule. As such the FCC concluded under the procedure that WSKQ Licensing used in producing this broadcast that it is apparently liable for the willful and repeated violation of Section 73.1206 and liable for a $16,000 fine.

For the Amateur Radio Newsline, I'm Bruce TennantK K6PZW, in Los Angeles.

--

As is customary, the FCC has given the station's owners 30 days to pay the $16,000 fine or file an appeal. (FCC)

**

RADIO LAW: CODIFYING THE VANITY CALL SIGN RULES

The FCC is in the process of making permanent the rules governing the Vanity call sign program. As regular listeners are aware, late last year, the FCC issued a Notice of Proposed Rule Making titled WT Docket 09-209 that seeks to amend the Commission's Amateur Radio Service rules. This, to clarify certain rules and codify existing procedures governing the vanity call sign system, as well as revise certain rules applicable to club stations.

Now, interested parties may make comments on this Notice of Proposed Rule Making via the Federal eRulemaking portal or the FCC's own website. Comments must be submitted by March 26, 2010 with reply comments due no later than April 12, 2010. RADIO LAW: FCC CLOSES CABLE SYSYEM PROGRAMMING LOOPHOLE

Cable TV companies will no longer be able to use a federal loophole to withhold sports networks and other popular programming they own from satellite providers and other rivals. This after the Federal Communications Commission voted 4-to-1 on Wednesday, January 20th to close the so-called terrestrial loophole that was written into a 1992 federal cable regulation law.

Under that legislation a cable TV provider must let competitors carry any channel it owns if satellite connections are used to transmit the channel to the individual cable systems around the country. Until now, the provision didn't apply when cable operators sent programming over land-based networks instead. As a result cable companies have been using the loophole to withhold sports and other programming from competing services. Now that the quirk in the law is gone, satellite and phone-line television providers are calling it a big win for consumers and fair competition in the marketplace. (Published reports)

RADIO ACCIDENTS: PHOTOS OF THE KWRM TOWER THAT SNAPPED IN HALF

High winds may be to blame for the recent toppling of an AM radio station tower out in Corona, California.

One person speculates that a gust in excess of 100 MPH during a tornado watch may have been involved. This, since the KWRM towers have withstood very high winds in the past.

The station is currently investigating to determine the exact cause of the structure's failure. Photos of the felled tower can be seen at the http://earthsignals.com/add_CGC/Images/KWRN_tower_down.html (CGC)

NAMES IN THE NEWS: KQ6FM NEW RADIO SHOW IN MONTEREY CALIFORNIA

And as most of you know, many of the voices you hear on Amateur Radio Newsline have professional careers as news reporters and voice over talent. Some even have their own radio shows and that includes our own Don Carlson. KQ6FM.

Thanks to the magic of modern digital communications, Don has just begun a new gig at a new radio station in Monterey, California known as Z-97.9 FM. What's so neat about this is that Don does the show from the comfort of his own studio in Reno, Nevada. Its then sent digitally to Monterey where the voice of Don as D-J Don Murray is heard playing the greatest hits of the 60's and 70's over Z97.9 from 10 in the morning until 2 PM in the afternoon, local Pacific time.

You can read more about Don the radio air personality and his new job at http://www.z979fm.com/The-DJ-s/5304063 (ARNewsline(tm))

THE SOCIAL SCENE: INTERNATIONAL DX CONVENTION IN APRIL IN CALIFORNIA

Turning to the ham radio social scene, the 61st Annual International DX Convention sponsored by the Southern California DX Club will be held April 16th to the 18th at the Holiday Inn Hotel and Conference Center, in Visalia, California. This is the premiere DX gathering in the world with top names from around the world in attendance. More information is on-line at www.dxconvention.org (IDXC)

**

THE SOCIAL SCENE: HEIL SOUND TO AGAIN HOST HAM RADIO RECEPTION AT NAB

Heil Sound Limited and BSW will again co-host the annual Amateur Radio Reception at the 2010 National Association of Broadcasters Convention to be held this spring in Las Vegas, Nevada. The event is slated for Wednesday, April 14th from 6 to 8 PM Pacific time at the Hilton Las Vegas Convention Center Hotel. The hotel is right next door to the Convention Center. Just bring your NAB badge to get in.

Again that's Wednesday, April 14th from 6 to 8 PM Pacific time at the Hilton Las Vegas Convention Center Hotel for the 2010 Amateur Radio Reception co-hosted by Heil Sound Limited and BSW. We hope to see some of you there. (Heil Sound via Facebook)

THE CHANGING OF THE GUARD: FORMER ARRL FOUNDATION DIRECTOR PETE HOOVER, W6ZH - S.K.

We have said this way too many times in recent days and we find ourselves saying it again. That being the changing of the guard in amateur radio which continues with word of the passing of Herbert Hoover III, W6ZH, on February 4th at the age of 82.

A resident of the Los Angeles suburb of San Marino, "Pete" as he was known in the ham community was a grandson of United States President Herbert Hoover. He was also the son of former IARU and ARRL President Herbert Hoover Jr, W6ZH whose callsign Pete adopted.

Pete Hoover grew up in California, where he was an electrical engineer and venture capitalist. And following in his family's tradition of public service he was elected to the board of the National Red Cross which later became the American Red Cross Board of Governors. Although he never lived in his grandfather's home state of Iowa, he was active as a trustee with the Herbert Hoover Presidential Library Association in West Branch.

But it was to amateur radio where Pete Hoover, W6ZH, devoted a lot of his time and personal wealth. An ardent supporter of the ham radio space program in the 1970's, Pete and the late Bill Eitel, W6UF, jointly established a matching fund to encourage contributions to the amateur satellite program.

Pete was also involved in several important ARRL activities. He served as a Director of the ARRL Foundation in 1976 and as a member of the ARRL Long Range Planning Committee from 1978 to 1981. Locally, W6ZH, served as Vice President and Trustee of the Pasadena Radio Club and was also a longtime member of the Southern California DX Club.

Pete Hoover, W6ZH, is survived by his wife Meredith, his son Stephen Hoover, his daughter Leslie Hoover-Lauble along with his grandchildren and great grandchildren. In lieu of flowers, the family requests donations be made to one of several charitable institutions: Doheney Eye Institute, 1490 San Pablo St., Los Angeles, CA 90033, Hoover Institution, 434 Galvez Mall, Stanford University, Stanford, CA 94305-6010, Herbert Hoover Presidential Library Assoc., 302 Parkside Drive, West Branch, IA 52358, House Ear Institute, 2100 W. 3rd St., Los Angeles, CA 90057

A future memorial service is being planned. (ARNewsline(tm) from various published reports)

**

HAM KILLED IN POWER PLANT INDUSTRIAL ACCIDENT

A ham has lost his life in an industrial accident at a power generating facility that is under construction in Connecticut. According to the Shore Point Amateur Radio Club, member Chris Walters, N0HVK, of Florissant,

Missouri, was one of five workers killed in the Sunday, February 7th explosion at the Kleen Energy Plant near the city of Middletown, Connecticut.

Walters, a 48-year-old father of three was in Connecticut to work a temporary job as a safety manager for an electrical subcontractor at the plant where the accident occurred. According to Middletown Mayor Sebastian Giuliano the workers were purging a natural gas pipeline when the explosion occurred. The cause of the accident remains under investigation.

In a posting to its website the Shore Point Amateur Radio Club said that Walters has been a member of the club since October of 2009. It said that N0HVK embodied the spirit of amateur radio by volunteering for community events such as walk-a-thons, fundraisers and by attending club meetings. He was also a part of the club's first Field Day.

Chris Walters, N0HVK, is survived by his wife Fran and three children, ages 10, 13 and 15. The Shore Point Amateur Radio Club says that it plans to take up a collection to assist the family. (Southgate, telegraph.com, CBC)

EMERGING TECHNOLOGY: NIST UNVEILS THE WORLDS MOST ACCURATE CLOCK

Researchers at the National Institute of Standards and Technology have produced what they call an enhanced version of an experimental atomic clock. One based on a single aluminum atom that is more than twice as accurate as the previous pacesetter based on a mercury atom.

The new clock is the second version of NIST's "quantum logic clock. It derives its name from the fact that it borrows the logical processing used for atoms storing data in experimental quantum computing. This is another major focus of the same NIST research group.

According to measurements to be reported in Physical Review Letters, the new aluminum atom clock should neither gain nor lose one second in about 3.7 billion years. (Science OnLine)

**

HAM HAPPENINGS: GB10GKA TO REMEMBER PORTISHEAD RADIO

If you are a follower of radio history then this is for you. As you may be aware, Portishead Radio using the callsign GKA was a radio station in England that provided worldwide maritime communications and long-range aeronautical communications from 1928 until 2000. At its height of operation it was the world's largest and busiest radiotelephony station that in 1974 employed 154 radio operators who handled over 20 million words per year.

Now, to mark the 10th Anniversary of the closure of Portishead Radio the special callsign GB10GKA has been authorized from April 30th through May 27th. Operations will be on all High Frequency bands with each position manned by an ex-GKA Radio Officer.

Communications will primarily be on CW. Hours of operation will be dependent on individual operator's free time. More information about Portishead Radio can be found on-line at www.gka.btinternet.co.uk. (GB2RS)

**

BREAK 3

From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

DX

In DX, word that TX4T is the callsign of F6BEE, FO8RZ, G3TXF, and VE2TZT as they activate Tahiti on 160 through 10 meters through February 24th. They hope to take part in the CQ WPX RTTY Contest (on February 13th and 14th as well as the ARRL DX CW Contest the weekend of February 20th and the 21st. QSL via the bureau to G3TXF.

N7MSU should be on from Belize as V31SU through February 24th. His operation will be on CW and SSB concentrating on 40 and 20 meters. QSLs should be sent to his home call either direct or via bureau.

And while kind of short notice, VK6DXI, will be in Zimbabwe through February 13th. While he does not have much time for amateur radio he still hopes to make some QSOs as Zed-21-D-X-I. If you work him please QSL via SP5UAF.

NE8Z will once again be in Ecuador and plans to be active through February 24th as HC1MD. Activity should be on 80 through 10 meters using CW, SSB, RTTY and PSK31. QSL via K8LJG.

DL1NL is currently active "portable OA4" from Lima, Peru. He will be there
through mid-February mostly on CW from Radio Club Peruano as time permits. His recent activity shows he can usually be found on 20, 17 and 15 meters between 1530 to 1730 UTC. QSL via his home callsign.

N0RC will be active "stroke OX3" from Thule, Greenland between March 22nd
and April 8th. His operation will be limited as work permits, but he plans to operate at least every other day. QSL to N0RC direct or via the bureau.

Lastly, our old friend John Abbruscato, W5JON, will again be operating from a hilltop QTH overlooking the Caribbean Sea, at Marigot Bay on St. Lucia. Listen out for him as J68JA from March 2nd to the 11th on 160 through 6 meters. QSL direct to W5JON. He adds that as in the past, his XYL Cathy,W5HAM, will be very busy pool side.

(Above from various DX news sources.)

**

THAT FINAL ITEM: TALKING THROUGH ROCK

And finally this week, the story of a young experimenter who is taking communications underground. And his work might save lives. We have more in this report from Amateur Radio Newsline's Norm Seeley, KI7UP:

--

According to National Public Radio, caves are some of the last places in the world left to explore. And while cave exploration or caving is relatively safe, if something goes wrong a rescue can take days or longer.

Part of the delay is because cell phones, walkie-talkies and most radio systems simply do not work when trying to communicate underground through hundreds of feet of solid rock. But now a 16 year old New Mexico teenager named has Alexander Kendrick has developed a device that may make it possible for someone trapped hundreds or even thousands of feet under the Earth's surface to text a message for help.

NPR says that Kendrick's device looks something like a computer attached to a ham radio transceiver. But ham radio it isn't because it transmits data using ultra frequency radio waves that can penetrate rock more easily than on the high frequency or VHF bands.

The first test of Kendrick's cave communications device was at the famed Carlsbad Caverns in New Mexico. Kendrick was at the 950 foot level below the surface and transmitted the single word "happy" to a receiving station manned by his father directly above. The screen on the surface displayed only the letters "a-p-p-y." Not 100% copy bit in an emergency situation more than enough to alert rescue workers of a cave explorers need.

Even at only this level of success observers believe that Kendrick's invention holds the potential to significantly speed the rescue process with the ability to text from underground caves. They say that it may have other applications as well.

As far as we can determine, Alexander Kendrick is not a radio amateur. No matter, because for his development of this new underground texting communicator he was named as the winner of the 2009 International Science Fair. As such, he was awarded a new computer, a trip to Switzerland and a $12,000 cash prize. We say congratulations on a job well done.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

You can read and hear more about this remarkable teenage inventor at http://www.npr.org/templates/story/story.php?storyId3116417&ft=1&f1001 (NPR)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, The RAIN Report, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award is now open. Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www dot arnewsline dot org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. We look forward to hearing from you.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Frank Haas, KB4T, saying 73 from Holly Hill, Florida, And as always, we thank you for listening.

EME: Echoes of Apollo weekend, April 16, 17,18

The Echoes of Apollo weekend, a Friday, Saturday, Sunday event,
April 16, 17, 18, features Arecibo Participation, and now, Haystack
/MIT, joining CAMRAS in Holland, and HB9MOON in Switzerland, and of
course the whole rest of the EME community. The event shares the
weekend with the DUBUS contest, and also the huge ARRL DX convention
in Visalia. Since Arecibo is on board, for 432, and possibly 1296,
it wont take much for a QSO with them. I am still looking for input
for structure of the EOA event, beyond just some big dishes
participating, some objective, or organized activity goals. Kids and
science outreach, and media coverage should be high priorities. Would
anybody be interested, or equipped to set up a Demo EME station in
the Parking Lot of the Visalia Convention Hotel, and do/demonstrate
EME? Would such be welcomed by the HF oriented DXing management of
the Convention? Best Regards, 73, de Pat Barthelow AA6EG via MoonNet

***

RADIO-ACTIVE SUNSPOT:

Behemoth sunspot 1045 is crackling with M-class solar flares--and
that's not all. "There have been many loud shortwave radio bursts
over the past two days," reports amateur radio astronomer Thomas
Ashcraft of New Mexico. "Some of the bursts have completely
saturated my receivers." Just listen to the sounds coming from the
loudspeakers in his observatory. The roaring sounds you just heard
were mainly Type III radio bursts, caused by beams of electrons
streaming through the sun's outer atmosphere. Sunspot 1045 appears
poised to explosively accelerate more electrons in the days ahead
as the flare-show continues. Ham radio operators, point your Yagis
toward the sun! BIG SUNSPOT: The sudden emergence of big sunspot 1045

over the weekend has caused a sharp uptick in solar activity. The
active region has produced three M-class and almost a dozen C-class
solar flares since it appeared on Saturday. The strongest blast, an
M6-class eruption on Feb. 7th, may have hurled a coronal mass ejection
toward Earth. SOURCE: http://spaceweather.com/ February 8, 2010

GB2RS NEWS

Sunday 14th February 2010

The news headlines

RSGB Convention moves to a new venue

Antarctic Activity Week

George Dobbs to appear at Lough Erne Rally

The RSGB Convention is moving to a bigger venue for 2010. Taking place between 8 and 10 October, the Convention will be at Horwood House, near Milton Keynes. This new venue provides the RSGB Convention with new purpose-built meeting rooms, comfortable lounges and bars, delightful country surroundings and 182 en-suite bedrooms. All bedrooms are within the complex and have easy access to the lecture rooms that we will be using. It is just a short distance from Bletchley and Milton Keynes stations and easily accessible from the M1 motorway. The Convention programme will be announced soon and it planned to further expand the popular lectures and increase the activities for the visitors. Details will appear on the RSGB website and in RadCom in due course.

The 7th annual Antarctic Activity Week to celebrate Antarctica takes place from 22 and 28 February. The organisers say that this year's event could be better than previous years with many more stations participating. More information on this event is online at www.waponline.it.

QRP author George Dobbs, G3RJV will be attending a QRP display at the Lough Erne Amateur Radio Club Rally on Sunday 11 April. Graham Firth, G3MFJ, who is another listed in the International QRP Hall of Fame, is bringing the entire G-QRP Club stall, with lots of interest for low-power radio amateurs, and those intrigued by building their own rigs. On a second QRP table, Dom Baines, M1KTA will display home-built kits, receivers, transmitters and accessories, similar to his very popular exhibition at the recent GQRP Convention. A third display will be set up by Brendan Minish, EI6IZ, from the Mayo Radio Experimenters Network. His will feature top quality Elecraft QRP kits from the USA. Further details may be obtained from Michael Clarke, MI5MTC, on 028 6862 1436 or by e-mail to mi5mtc@learc.eu.

MM0DFV has a photo and video report on his trip to Loch Lomond National Nature Reserve at www.srars.org/wff-reports/gmff-046.htm. The QSL-card for this activity has been already designed and printed. All who made a QSO will receive this card via the QSL bureau. Jurij would like to thank everyone who supported him during this World Flora and Fauna activation.

On 4 February the Arfon Repeater Group's amateur TV repeater GB3TM, located on the north coast of Anglesey in North Wales, had modifications made to its transmission mode. A digital transmitter was installed and is now operational on 1316MHz. It is planed that GB3TM will transmit on both analogue and digital modes, but not both at the same time. The analogue mode will be the normal mode, with the digital system being called up by DTMF tones by the user. Further information can be seen on the Arfon Repeater Group's website at www.arfon.info. Reports would be welcomed on the new mode by the repeater keeper, David GW8PBX. A link is available on the website

2

Mid Ulster Amateur Radio Club will be running an Intermediate course with the registration night held on Friday 19 February at Place Initiative, 1b Ardress Park, Portadown BT62 3TP, from 7pm till 9pm. The course has limited places so attendance at the registration is essential for interested persons. Any more information can be found at www.muarc.com, or by contacting the exam secretary on 02838 348 451.

And now for the details of rallies and events for the coming week

Due to unforeseen circumstances, the Northern Cross Rally due to be held today, Sunday 14 February, at Ossett School hosted by Wakefield and District Radio Society, has had to be postponed. It is hoped that a new date can be agreed with the venue for later on this year.

Today, 14 February, the Harwell Radio and Computing Rally will take place in the Didcot Leisure Centre, Mereland Road, Didcot OX11 8AY. There will be free car parking and admission is £2 with accompanied under 12 visitors admitted free. Doors open at 10.30am with disabled visitors gaining access at 10.15am. More details are available on 01235 816379.

The Radio Active Rally will take place on 21 February at Civic Hall, Nantwich, Cheshire CW5 5DG. Doors open at 10.30am and there will be trade stands, a Bring & Buy and catering on site. Details from Simon Chettle, G8ATB, on 01270 841506.

Also on 21 February, the Swansea ARS Rally will be at a new venue. Following the major fire at the Afan Lido the show has now re-located to the Court Herbert Sports Centre, Neath Abbey SA10 7BE, 2 miles from M4 J43 via A465. Doors open at 10.30am and admission is £2.50. There is a free car park and plenty of tradestands, a Bring & Buy as well as special interest groups. Details from Roger, GW4HSH, on 01792 404422.

Now for the news of special events

There will be a special event station GG100WD for Wilton Division Guides operating in Batley on the weekend of 20 and 21 February. The station will be operational on HF, 2m and 70cm from 11am on Saturday to 2pm on Sunday. The organisers would appreciate any offers of help to operate the station. Please contact Tony, G4LMS on 01924 467612 for details.

GG100RE will operate from Eltham in south-east London on Saturday 20 February for Thinking Day on the Air, celebrating the 100th anniversary of the Girl Guide movement. Two stations will be active throughout the day, with Guides of all ages passing greetings messages on 80, 40 and 20m. The station will be operated by Cray Valley Radio Society. Full details are on qrz.com.

On Saturday 20 February the Caterham Radio Group are again running a Thinking Day On The Air Station using the callsign GX0SCR for the 25th time from Caterham Surrey on behalf of the Caterham Guide Groups. This is the 14th year the Caterham Radio Group has worked with the 9th Caterham Guide Leader running their Radio Communication Day Event. It is expected licensed Guides with M3 call will be assisting with the operating on 2 metres and LF/HF bands. The Caterham Radio Group team would very much appreciate your calls on 2 metres and the LF and HF bands to assist in the passing of greeting messages to and from the young ladies and making it another successful event.

Coulsdon ATS will have a Thinking Day on the Air station on the air on 21 February. Starting at 8.30am, GB4SUN will be on the air with the South and Upper Norwood Guides.

3

And now the HF DX news compiled from 425 DX News and other sources.

Phil, G3SWH and Jim, G3RTE will be active from Christmas Island, IOTA reference OC-002, between 20 and 27 February. Both Phil & Jim will use the callsign VK9X/G6AY with activity on CW only using all bands between 80 and 10 meters. No 160m activity is planned. Propagation permitting, they plan to have two stations on air for as many hours every day as possible. QSL via G3SWH.

N7MSU will be on the air as V31SU from Belize between 4 and 23 February in his spare time on 40 and 20m using CW and SSB. QSL v&#65533;a N7MSU. See QRZ.com for more details.

G3TBK will be reactivating J88DR in St. Vincent from 18 February to 15 March. Activity will be on all HF bands using CW, SSB and RTTY. This will include an entry in the Commonwealth Contest. QSL via G3TBK, either via the RSGB Bureau or direct.

Now the contest news

16 February sees the UHF UK Activity Contest between 2000 and 2230UTC using all modes on the 1.3 and 2.3GHz bands. The exchange is signal report, serial number and locator.

The 80m Club Championships CW leg take place on 18 February between 2000 and 2130UTC. The exchange is signal report and serial number.

The CW leg of the ARRL International Contest takes place over the entire 48-hours of the weekend 20 and 21 February. There are sections for various power levels from QRP to QRO, single- and multi-op stations and single- and multi-band entries. Those outside of North America should work American and Canadian stations only. Send a signal report and your transmitter output power, but expect to receive a 2-letter State or 3-letter Province code.

Now the solar factual data for the period from the 1st to the 7th of February, compiled by Neil Clarke, G0CAS on the 8th of February.

The solar disc had spots visible every day, however, from the 2nd to the 4th it was only a single spot. On the 6th a sunspot group emerged and grew rapidly and within a day had produced 3 M class solar flares. The largest was a M6/1N during the early morning of the 7th which increased solar activity to high. Solar flux levels increased from 74 units to 90 by the 7th. The average was 79 units. The 90 day solar flux average on the 7th was 78, that's one unit up on last week. X-ray flux levels increased from A2.8 units to B2.2. The average was A5.4 units. Geomagnetic activity was quiet everyday, though only just, the 2nd and the 3rd saw the Ap index at 9 units. The average was Ap 5 units. Solar wind data from the ACE spacecraft saw wind speeds increased to 590 kilometres per second on the 3rd but then decline to 330 by the 6th. Particle densities were low except for a brief increase to 14 particles per cubic centimetre on the 6th. Bz varied no more than minus 8 and plus 7 nanoTeslas during the period.

And finally the solar forecast. As happened in recent weeks, active sunspot regions can appear with no notice at all, if this happens then solar activity could increase to moderate levels. However, more likely is that activity will be very low to low. Solar flux levels with a spotless Sun should be in the high 70's, but if spots do

4

appear then could be into the 80's. Geomagnetic activity is expected start at quiet levels but by Tuesday activity could increase due to a recurring coronal hole. Activity should then decline to quiet levels again before next weekend. MUFs during daylight hours at equal latitudes should be around 22MHz for the south and 19MHz for the north. Darkness hour lows are expected to be about 8MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of around 20MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. The best time to try this path will be between 1400 and 1800 UTC.

And that's all for this week from the propagation team.

Looking for a freeware program to control my Yaesu FT-727 from a
Windows PC or a PDA, wince or palm.

Yes, I have the control protocol information.
Yes, I've written 8051 programs to control it...years ago.

I'd rather not reinvent the user interface for the PC if
it's already available.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 14th February 2010

IRTS 78th AGM

Dundalk Amateur Radio Society shall be hosting the 78th Irish Radio Transmitters Society A.G.M over the weekend of Saturday 24th and Sunday 25th April 2010.

The venue for the event is the Fairways Hotel, Dundalk Co.Louth, a number of rooms have been reserved for anyone staying overnight, however it is advisable to
book a room early.

The Annual IRTS Meal will commence on Saturday 24th April 2010 at 8.30pm.The Radio Rally will commence on Sunday 25th April 2010 at 11.00am, followed by the IRTS
AGM at 2.00pm.

Further details for booking trader's tables or any other info please e-mail the following Thos EI2JD at email address chairman /at/ ei7dar.com or Peter EI4HX at email address secretary /at/ ei7dar.com

---

Nomination of Awards for IRTS Trophies.

The time is here again for nominations for the several awards for IRTS trophies When considering your nominations please refer to previous successful nominees as included in www.irts.ie/cgi/awards.cgi

Closing date for nominations is April 2nd 2010

Request for Return of Trophies presented in 2009

It is time once again to recall all trophies presented
at the 2009 AGM.

Trophies and cups can be returned to the IRTS stand at the Phoenix Radio Rally, or to any IRTS Committee Member to arrive to Peter EI4HX on or before the IRTS committee meeting in early March 2010. This will allow time for engraving to be done, and also any
small repairs.

AREN Meeting

The AREN Annual meeting took place last weekend in Clonmel County Tipperary. The broad agenda included various items, including a review of previous year's activities, an Update on the Major Emergency Management Process and various other items. The AREN Mobile Command Post (MCP) was in attendance for everyone to inspect. and a wide ranging discussion on various aspects of Emergency Communications was had.

AREN would like to welcome Ger McNamara EI4GXB into the roll of Public Information Officer.

Many thanks to all who travelled long distances to participate.

QRP at Lough Erne Rally

Rev. George Dobbs, G3RJV is the world's best known QRP enthusiast. He will attend a major QRP display at the Lough Erne Amateur Radio Club Rally on Sunday 11 April. The Rally is again in SHARE on the shores of Lough Erne, where islands abound with remains of ancient Celtic Christianity, George's other keen interest.

Graham Firth, G3MFJ, who is another listed in the International QRP Hall of Fame, is bringing the entire G-QRP Club stall, with lots of interest for low-power radio amateurs, and those intrigued by building their own rigs. Graham will also tour the Erne's historic Second World War flying boat sites. On a second QRP table, Dom Baines M1KTA will display home-built kits, receivers, transmitters and accessories, similar to his very popular exhibition at the recent GQRP Convention. This will be another excellent opportunity to examine, ask questions and get expert advice from a master kit-builder.

A third and most interesting display will be set up by Brendan Minish EI6IZ, from the Mayo Radio Experimenters Network. His stall will feature top quality Elecraft QRP kits from the USA, along with much good advice from Brendan for novice and experienced kit builders alike. Brendan's display will also feature Elecraft's latest K3 kit, everything you need to build your own 100 watt rig to standards of quality that match the best on the amateur radio market.

So, for all radio amateurs and experimenters interested in today's thriving and traditional heart of amateur radio, home construction and low power operation, the place to be on Sunday 11 April has to be the Lough Erne Rally, near Lisnaskea in Fermanagh. Details are on the usual rally lists and www.learc.eu .

Dundalk Amateur Radio Society

Recently DAR have added a HF receiver to their website, this can be controlled via the Internet this is another well appointed addition to all that DAR have available.

The DAR contest team of EI0W would like to welcome Anthony EI8GHB as a new team member.

Congrats also to Thos for all his hard work operating in IOTA a photo of his recent IOTA antenna System is on the front cover of the current issue of RadCom.

The DAR website can be found at www.ei7dar.com

Geopark Weekend

This years Geopark Communication weekend takes place over the weekend of 22 May - 23 May Radio stations from around the world will be exchanging greetings over the airwaves with Radio Operators operating special event stations from Geoparks of which there are 53 Parks of this status worldwide.

Grenada operation

Harry, AC8G, will once again be active as J37K
beginning March 4th.

Activity will include the ARRL DX SSB Contest (March 6-7th) as a Single-Op/High-Power entry.

Harry tells readers to look for him outside of the contest mid-mornings on March 4-5th. He expects most of his time will be on 15 or 17 meters SSB beaming EU during openings. However, Harry will check 10 and 12 meters occasionally.

QSL to AC8G, stateside direct with SASE. For others sending by the Bureau, please clearly mark for QSLs to
go to AC8G.

LORAN-C shut down

On February 8 the U.S Coast Guard shut down the Loran-C a navigation system that has been in use since
World War II.

LORAN (LOng RAnge Navigation) made use of a network of Low Frequency (LF) radio transmitters and the receivers used these multiple signals to determine the location and speed of the vessel. It has served mariners and
aviators well for over 60 years.

Northern Ireland's first D-STAR 'hot spot'

Northern Ireland has its first D-STAR 'hot spot' -
Belfast simplex node MB6NI.

A hot spot provides access onto the D-Star network and MB6NI is located in Carrickfergus and was a project of GEARS to get more D-Star access in the Greater Belfast,
Belfast Lough areas.

The spot is run by Brian GI6DKQ and the plan is to try and get more amateur radio clubs or individuals to put up their own spot and create a hot spot network
covering Northern Ireland.

MB6NI is running on 145.2125 MHz

Further information can be had from Brian GI6DKQ

CARA AGM

The Crossakiel Amateur Radio Association's AGM is being held at the Welcome Wagon Crossakiel, on 17th February
at 20.30pm.

All members are requested to attend.

South East Amateur Radio Group

The Annual General Meeting of South Eastern Amateur Radio Group will take place at 8.00 p.m. on Monday the 22nd of February 2010 in the Roanmore Social & Sports
Club, Cleaboy Road, Waterford.

All members are asked to attend and visitors are
welcome.

Limerick Radio Club

The AGM of the Club will be held on Thursday 25th February 2010 at the Limerick Institute of Technology at 7:30 pm. All members of the Club are
requested to attend.

The regular monthly meeting on the 2nd Thursday of the month (11th February) has been cancelled to facilitate
the AGM later in the month.

South Dublin Radio Club

The South Dublin Radio Club annual general meeting (AGM) will take place on Tuesday 2nd of March.

Classes are still being run every Tuesday evening and
visitors are always welcome.

Rallies

For Rally info and contact details please check out the IRTS Website at
http://www.irts.ie/cgi/rallies.cgi

This week in History

1876 Elisha Grey transmitted music over a
telephone line.

1880 Edison notes experiments on what would be the
'Edison effect' electron flow.

1908 First round-the-world car race begins New York,
ends Paris in August.

Items for inclusion in next weeks Radio News should be forwarded to
Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail
dot com" Or by phone to 087-6265418 News can also be submitted via
e-mail to "newsteam at irts dot ie" for automatic forwarding to both
the radio and printed news services.

Please note that items for the radio news should reach the editor no
later than midday on Thursday in order to be guaranteed inclusion in
the following
Sunday's bulletin.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 947
BID: $OPDX.947
February 15, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K & ADXO, N4AA & QRZ DX, W4GKR, W4VQ, KH6BZF, N7OU, K8SM, K8YSE, W8GEX (60m News), Algarve STAR DX Team, AT International, CE3FZL, CO8TW, CT1CZT, CX3AL, DK7PE, DL7MAE & The DX News Letter, DX World.Net, DxCoffee Web Page, F5NQL & UFT, G3SWH, G3VOF, I1JQJ/IK1ADH & 425 DX News, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, PT7WA, RSGB IOTA Web Site, SP5UAF, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 7th-February, through Sunday, 14th-February there were 231 countries active. Countries available: 3A, 3B8, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5A, 5B, 5H, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E4, E5/n, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T30, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V8, VE, VK, VK9W, VP2E, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5X, UGANDA. Jack, NP2OR, is active as 5X7JD from Masaka. Reports indicate that he will stay there until May. He can be found daily on 40 or 20 meters SSB between 0500-1550z. He is using a IC-718 transciever w/100 watts into

a Hy-Gain multiband vertical. QSLs only direct via Jack Dunigan, Box 100, Masaka, Uganda.

5W, SAMOA. Operators Bill/N7OU and Bob/W7YAQ are now active as 5W0OU and 5W0YA, respectively, from Apia until February 16th. This is the first part of their operation before being active from Tokelau (ZK3) between February 17th and March 10th (See OPDX.940). Operations will be on 160-10 meters but mainly on CW, with some SSB and RTTY, using 100 watts and vertical antennas. If you miss them on this trip, you will have another chance after their ZK3 operation between March 11-15th. QSL via their home callsigns.

5Z, KENYA. Cato, LA9PF, is now active as 5Z4/LA9PF until May. Look for him to be active mainly on SSB and the Digital modes. QSL only direct to: Cato B. De Savigny, POB 5642 Malindi, 80200 Malindi, Kenya.

6V, SENEGAL. Giovanni, I5JHW, is active as 6V7V from La Somone until February 23rd. Activity is holiday style (However, he was in the CQ WPX RTTY Contest this past weekend), and most of his operations have been on 20 meters SSB. QSL via his home callsign, direct or by the Bureau.

7O, YEMEN (Interesting Item of the Week [Don't Get Excited]!). It seems well known DXers Hrane/YT1AD, and Dmitry/RA9USU are currently travelling through Sanaï¿½a, Yemen. No details were provided on why, but you can track their Toyota Land Cruiser using the established CityPoint system. On the map it shows 7O/RA9USU traveling throughout Yemen. To view their travels, visit the Web page: http://cplite.citypoint.ru
Login as: yemen
Password is: yemen
Presently, no details on whether any activity will take place or if a license was issued.
** LAST MINUTE UPDATE: The DxCoffee Web page is reporting the following from Hrane, YT1AD (not edited):"... We was 7 days in Yemen. After conversation in Ministry for telecommunication, with Director for FREQ and regulations, person, ex student in Russia, speak Russian and understand amateur radio, final answer is: NOT license for 7O. In last 20 years not any valid license is issued by Yemen Government and Ministry for telecommunication. King Husein from Jordan visited Yemen, but answer for HE King Husein was : NOT. Main reason is security!"

** EDITOR'S COMMENTS: OPDX has heard the above statement once before about amateur radio not being allow for 20 years in Yemen. Most recently in 2005 by Vladimir, UA4WHX. However, this can not be totally true because there have been operations that have taken place and have been accepted for DXCC. Two major operations stand out:
7O1AA - By 9K2DR and 9K2EC in late May and early June of 1990
7O8AA - By F2VX and F6EXV in late July and early August 1990
Also active and accepted was activity by the German group as 7O1YGF in mid-April of 2000 and OH2YY as 7O/OH2YY in early May of 2002. It is obvious that the above operations talked to/received the approval by the right individual in the Yemen Government with the proper

authorization to issue a license and allow these operators to operate in "7O". Otherwise, the DXCC Desk would not have accepted these "7O" operations.

8P, BARBADOS. Yuri, VE3DZ, will be active as 8P9AA between February 15-23rd. Activity will be on all HF bands using CW, SSB and RTTY. His activity will also include the ARRL International DX CW Contest (February 20ï¿½21st) using the callsign 8P3A as a Single-Op/All-Band entry. QSL via his home callsign.

9H, MALTA (IOTA Op). Operators Olaf/DL4HG and Holger/DL5XAT will be active as 9H3TX during the ARRL DX CW Contest (February 20-21st) as a Multi-2 entry. QSL via LoTW or via DL5XAT, by the Bureau or direct. Operators will be there between February 17-24th. QTH is Gozo Island (IOTA EU-023, MIA MM-004, WLOTA LH-0046). They will only be using 100 watts into vertical antennas.

9X, RWANDA. Operators Rudi/DK7PE and Georg/DK7LX are now active as 9X0CW and 9X0LX, respectively, in Kigali until February 18th. Rudy informs OPDX that they are running only wire antennas. Georg is concentrating on the higher bands and Rudy on 160m, using an Inverted Vee and a Pennant for RX. This is mainly a CW operation. QSNs show most on the activity has been on 160 and 30 meters. QSL via their home callsigns.

A9, BAHRAIN (Update). Dave, EI3IO, has received his license and is expected to be active as A92IO from Sar, Northern Region, Kingdom of Bahrain (AS-002). His activity will last until at least August 2011. His focus will be on 80-10 meters, but he does plan to be on 160 meters. QSL direct to: Dave Court, P.O. Box 31183, Budaiya, Bahrain. QSL can also go by the Bureau to EI3IO. For more details about QSLing, please see QRZ.com. He has a A92IO Web page at: http://A92.ath.cx

ANTARCTIC ACTIVITY WEEK. Nuccio, I0YKN, will be active as IA0ANT from Italy between February 22-28th, for the Antarctic Activity Week. QSL via his home callsign. A special award is available. For details, go to: http://www.dreamingsea.it/diplomaasea.asp

C3, ANDORRA. Members of the "Andorran Amateur Radio Union (URA)" will team up with Spanish hams from the "Group Soria Contest Soria (URE)" and the "Union Radio Friends Soria (URASO)" to be active as C37NL during the CQWW 160M SSB Contest (February 26-28th). Carlos, EA1DVY, is the team leader. Activity is to celebrate 30th anniversary of the "Radio-aficionats Andorrans". QSL via C37URA. For more details, visit the following Web pages at: http://ura30anys.blogspot.com http://www.uraso.es/andorra160/html/principal_es.html

C6, BAHAMAS. Steve, AK0M, will be active as C6ASB from the Grand Bahama Island (NA-080) between February 16-22nd. He is one of many operating from the Bahamas for the ARRL DX CW Contest (February 27-28th). Operations will be holiday style and will include a part-time entry in the contest as a Single-Op/All-Band/QRP category. Bands will be 40-10 meters, and operation will be primarily CW. Power will be 10w outside of the contest,

and at 5w during the contest. QSL via LoTW, or via AK0M by the Bureau or direct w/SASE. Visit his Web page at:
http://www.ak0m.com/c6asb/c6asb_feb_2010.htm

CR3/CT9, MADEIRA ISLANDS. German operators Walter/DJ6QT, Falk/DK7YY, Wolfgan/DK9VZ, Hein/DL2OBF, Tom/DL5LYM, Juergen/DL6WT and Frank/DL8WAA will be active as CR3L during the ARRL DX CW Contest (February 20-21st) as a Multi-? entry. QSL via DJ6QT. Operators will probably be active as CT9/homecall before and after the contest.

CR51100/CS5, PORTUGAL (Special Event). Members of the "Portuguese Navy Ham Radio Club - NRA" and the Navy are proud to announce a special event to take place between 0900-1900z, February 18-20th, to celebrate the 1st centenary since radio telegraphy was first used as an official service in the Navy. Look for two special event stations, CR5100AM and CR5100VZ, plus an onboard station CS5DFG to be active. One station is located in Lisbon, the other station located 15 miles south of Lisbon and the third one not far from the others. A special QSL card and a special award have been issued by the Navy. The NRA will QSL all stations that contact one of these three stations during the dates and periods above. Look for the above stations on the bands and be awarded with a special QSL card and award.

CW3, URUGUAY (Lighthouse Activity). Members of the "RADIO CLUB URUGUAYO" will be active as CW3R from the Punta Negra Lighthouse (ARLHS URU-015) during the upcoming South American Lighthouses Weekend between February 26-28th. Activity will be on 80-10 meters using CW, SSB and the Digital modes with at least two stations on the air. This year ARLHS is sponsoring this activity. This will be the second activation of PUNTA NEGRA LIGHT-HOUSE. QSLs for this activity only go DIRECT to: Radio Club Uruguayo, P.O.Box 37, 11000, Montevideo, URUGUAY, SOUTH AMERICA (w/SAE and 1 new IRC or 2 USDs).

DK4, GERMANY. Rich, W4GKR, recently active as W4GKR/TI5 from Alajuela, Costa Rica, is now in Berlin and should be active as DK4GKR by the time you read this. Activity will be mainly 40/20 meters using SSB and PSK31. Suggested modes and frequencies are:
PSK - 7038 kHz (+/-) nite SSB - 7183 kHz (+/-) nite
14072 (+/-) 95% day 14183 kHz (+/-) day
He is using an old Omni radio w/100 watts into G5RV. QSL via his home callsign, direct or by the Bureau.

E4, PALESTINE (Update). Dates for the upcoming E4X operation have been announced. Activity will take place between May 28th and June 6th. The operators mentioned are: Antonio/EA5RM (Team Leader), Roberto/EA2RY, Fernando/EA5FX, Manuel/EA7AJR, Jose/EA7KW, Florent/F5CWU, Alain/F6ENO, Bernard/F9IE, Fabrizio/IN3ZNR and Valery/UT7CR. Operations will be on 160-6 meters including 30/17/12 meters using CW, SSB and RTTY with at least 3 stations on the air at the same time on different bands and modes. QSL via EA5RM: Antonio Gonzalez, P.O. Box 930, E-03200 Elche, SPAIN. Remember that a band and mode survey is being taken on their Web page at: http://www.dxfriends.com/e4x/index.php

ED8, CANARY ISLANDS (Special Event). Juanjo, EA8BGO, will activate the special event station ED8BGO from the Canary Island's Space Center, February 16th. The Maspalomas Space Station is a center of Spanish satellite tracking under the National Institute of Aerospace Technology (INTA) and operated jointly with INSA.1. Officially called the "Canary Space Center," although it is a little known appellation even among the staff of INTA. It is located in the municipality of San Bartolome de Tirajana on the Island of Gran Canaria, just a few miles from the tourist resort of Maspalomas. For more details about the center, read Juanjo comments on QRZ.com at:
http://forums.qrz.com/showthread.php?t#6802
Also go to: http://www.esa.int/esaMI/Operations/SEMWPDSMTWE_0.html

EF8, CANARY ISLANDS. Operators Don/K4ZA, Val/RD3AF, Gimanov/RZ3AZ and John/W2GD will be active as EF8M from Santa Maria de Guia, Las Palmas Gran Canaria (AF-004, DIE S-005, WLOTA L 0969), during the ARRL DX CW Contest (February 20-21st) as a Multi-2 entry. QSL via UA3DX.

GB6GEO WEEKEND. Once again radio stations from around the world will be exchanging greetings over the airwaves with the English Riviera Global Geopark in May as amateur radio operators transmit live from Kents Cavern in Torquay, right in the heart of the English Riviera Global Geopark. Using a special event call sign, GB6GEO, will establish contact with other radio stations around Britain, Europe and around the world from a base set up outside the entrance to Kents Cavern, Devonï¿½s internationally famous Stone Age cave and gateway to the English Riviera Global Geopark. There are now 53 Geoparks around the world, but this special radio event is being coordinated from Kent's Cavern. Visitors will be able to link up with several other Geoparks by radio over the weekend, including Araripe Geopark in Brazil; Kanawinka Geopark in Australia; Langkawi Geopark in Malaysia; the Petrified Forest of Lesvos Geopark in Greece, the Brecon Beacons in Wales, Nature Park Terra Vita, Germany, Hateg Country Dinosaur Geopark Romania, Naturtejo Geopark Portugal, and to the Copper Coast Geopark in Southern Ireland.
Many Geoparks also have show caves, and those participating so far include: Smoo Cave in the North West Highlands Geopark in Scotland, Marble Arch Caves Geopark in Northern Ireland and Unicorn Cave in the Harz Mountains in Germany. With the event now global, the event will run from 0900z on Saturday, May 22nd, through the night to 1600z on Sunday, May 23rd.
GEOPARK CERTIFICATE: For amateur radio stations/SWL's around the world who contact/hear Geopark stations, the English Riviera Geopark is offering a special beautiful commemorative European Geoparks Network radio amateur certificate for contacts with GB6GEO (instant qualifier), or two Geopark stations excluding GB6GEO. (this award will also apply to SWL's on a heard basis). This certificate is endorsed by the Queen's husband H.R.H The Duke of Edinburgh, with his own words congratulating the holder. Certificates will cost in the UK 2.50 GBP each, in Europe 4 Euros and Rest of the world 5 USDs.
Alternatively certificate holders to be the first in their country to claim the certificate will have an 'FC' suffix following the certificate number. This denotes the first person in their country to claim the

'Geoparks' award. These certificate holders will be worth one point towards the basic certificate that requires two points, or work any five (5) certificate holders. Many of these certificate holders can be found in the Torbay Amateur Radio Society nets and/or details from the Web site at: http://www.tars.org.uk
Certificate Manager/Direct QSLs go to Martin Foster, G3VOF (QTHR or QRZ.com). Please also see QRZ.com for the latest updates. Only log details are necessary.
QSL DETAILS: There are special glossy high quality souvenir QSL cards for this event promoting the English Riviera Geopark. All QSL cards will automatically be sent out via the Bureau, or send an SASE in the UK. If you are outside the UK, then please send an addressed envelope and sufficient funds for return postage. If you would like a card direct (Please QSL via G3VOF).
Any information required about GB6GEO, please contact Martin Foster (G3VOF) via E-mail at: martin@riviera.fm or via QRZ.com. If you live in Austria, Australia, China, Croatia, Norway, Czech Republic, France, Italy, Spain or Brazil and would like to participate this year (2010) in the Geoparks Communication Festival by putting on a "GEO" callsign, please get in touch with G3VOF via E-mail (at the above address).

HZ1, SAUDI ARABIA (Special Event). Special event station HZ1IRH is now active through February 17th. Activity is to celebrate the "International Hail Rally" <http://www.hailrally.com.sa>. Operations have been on 40 and 20 meters SSB. Operators mentioned are: HZ1AN, HZ1BT, 7Z1SJ, 7Z1CQ, 7Z1AQ, 7Z1AL, 7Z1OO, HZ1FH, HZ1CQ and HZ1HN. QSL via HZ1BT.

IOTA NEWS.....
AS-019. Wolfgang, OE1WWL, will be active as 9V1OE/p from Sentosa Island (Grid Loc. OJ11VH), Singapore, between February 17-23rd. He will be on SSB using his IC-703 running at 10 watts into a random wire. QSL via OE1WWL, by the Bureau (preferred) or direct to the 9V1OE address on QRZ.com. Visit his Web page at: http://www.qsl.net/9v1oe

EU-065. Members of the F6KOP team will be active as TM7CC from Ouessant Island (DIFM AT-001) between March 12-20th. Activity will be on 160-10 meters, including the 30/17/12m bands, using CW, SSB, RTTY and PSK31. Operators mentioned are: Michel/F1AFW, Henri/F1HRE, Gerard/F2JD, Gerard/F2VX, Franck/F4AJQ, Jean-Michel/F4DLM, Olivier/F4FLF, Martin/F4UKP, Michel/F5EOT, Robert/F5HTR, Ghislain/F6CEL, Alain/F6ENO, Jean-Paul/F8BJI, Gabriele/I2VGW and Bob/N6OX. QSL via Bernard, F9IE. For more details, visit their Web page at: http://www.tm7cc.com
Twitter page at: http://twitter.com/tm7cc

EU-068. Members of a French DX Group will be active as TM5EL from Sein Island (AT-007, L-2721, PB-106, Loc: IN78NA), France, between April 7-14th. Activity will be on the HF bands, as well as 6m, 2m, 70cm and 23cm, using CW, SSB and the Digital modes. QSL via F6KHI, direct or by the Bureau. Operators mentioned are:

Tom/F4BCG, Pat/F4FCS, Antoine/F5RAB, Christian/F6AXN, Didier/
F6DXE, Francis/F6DPD and Jack/F8AEJ.

EU-078. Christian, EA3NT, will be making another attempt to Formigues
Islands (DIE E-058, FEA E-0467, WLOTA LH-2128, ARLHS SPA-139)
along with Oscar/EA1DR, George/EA2TA and Vincent/F4BKV. Callsign
will be EG3FI, and operations will take place between June
25ï¿½26th. The first ever DXpedition to Formigues took place
last year but only lasted for a few hours (See Web page:
http://www.tinet.cat/~jfcp/eg3fi.html). ADDED NOTE: All the
members of this operation will also be involved in the upcoming
Flannan Isles (EU-118) DXpedition between June 18-21st (See
OPDX.944 or Web page: http://www.ms0int.com).

OC-261. Andrey (Andy), VK5MAV, will be active VK5MAV/5 (or possibly a
special callsign/prefix) from Flinders Island sometime between
September 21-28th (exact dates TBA). Activity will be on
40/20/15/10 meters, mainly on CW. He is looking for any
help/support. QSL via VK5MAN, direct or by the Bureau.

SA-019. Operators Nilzo/PY6AWU, Jose/PY6HD and Roberto/PY6RT will be
active as ZZ6Z from Santa Barbara Island in the Abrolhos
Archipelago group between February 25-28th. The Brazilian
Navy schedule could affect the dates. Activity will be on
80-10 meters SSB only. QSL via direct only to PY6HD.

IS0, SARDINIA. Members of the F6KOP Team will be active as IS0R from
Isola Rossa, Sardinia (EU-024, Loc. JN41ka), between May 7-15th. Activity
will be on 160-6 meters, using 3 stations on HF and 1 station on 6 meters.
They plan to use CW, SSB and RTTY. Each station will be a FT450 with an
Acom 1010 using Micro Ham and PC. Antennas include 6m Yagi Beam, Spider
Beam for 30-10m, 4 square for 40m, vertical for 80m (K9AY) and an Inverted
L for 160m plus a beverage. Operators mentioned are: Team leader Thierry/
F4TTR (SSB), Sebastien/F5UFX (SSB), John/F5VHQ (SSB), Sergio/IS0AWZ (SSB),
Norbert/F6AXX (CW), Maurice/F5NQL (CW), Bruno/F5AGB (CW), Jean-Paul/F8BJI
(Digi), Henri/F1HRE (Digi) and Frank/F4AJQ (Digi). QSL route TBA.

JD, OGASAWARA (Update). Kirk, JF3MYU, will be active as JD1BNN between
March 28-31st. He is part of the "JD1 PROJECT 2010" and is expected to
be there with four other operators who will be staying long (See the next
JD, OGASAWARA). Kirk's activity will be focused on the 30/17/12m bands,
SSB, some CW and 6 meters. QSL is "OK" via the JARL Bureau but write
JD1BNN on your QSL (so it can be sorted easily). Also, you can receive
his QSL direct if you send your QSL to his address in Kobe, JAPAN:
Kirk Itaya, 5-1-35, Daikaidori, KOBE, 652-0803 JAPAN. Please enclose
SAE plus sufficient return postage. For JA stations, SASE, please. For
NA, SA, EU and AF include one new IRC or 2 USDs. For Asia, one IRC or
1 USD.

JD, OGASAWARA. Operators Stan/AC8W (JD1BNK), Ted/K8AQM (JD1BNM), Steve/
K8QKY (JD1BNQ) and Brian/KG8CO (JD1BNJ) will be active from Chichijima
Island (AS-031) as part of the "JD1 PROJECT 2010" between March 28th and

April 12th. Activity will be on 160-10 meters using CW, SSB and RTTY.
Each operator will be active as follows:
JD1BNJ - Only RTTY and PSK31.
JD1BNK - Mainly CW on the HF bands.
JD1BNM - Mainly CW on the lower bands.
JD1BNQ - Mainly CW on the HFbands and 6m.
QSL via K8AQM, direct, by the Bureau or LOTW.

KH6BZF PROPAGATION FORECAST/REPORT (For February 15-21st)....
Feb 15 AN SOLAR REFERENCE KEYS
Feb 16 AN-HN --------------------
Feb 17 AN BN - Below Normal
Feb 18 AN AN - Above Normal/Geomagnetic Level is QUIET
Feb 19 AN LN - Low Normal
Feb 20 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Feb 21 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

* PLEASE NOTE (From KH6BZF): THE NEXT 27.5-DAY SOLAR CYCLE IS FORECASTED
FOR 1-6th MARCH, 2010, WITH SFI (SOLAR FLUX INDEX'S) BETWEEN THE HIGH
80'S TO LOW 90'S....

** NEW PROPAGATION WEB PAGE. Juan Carlos, CO8TW, informs OPDX that he has
created a Web page to help some people to understand the propagation,
or just to get up-to-date data (automatically every 15 minutes) at the
following Web page. Check it out at: http://www.qsl.net/co8tw/pro.htm

KP2, U.S. VIRGIN ISLANDS. Operators John/K3CT and John/K3TEJ will be
active as KP2/homecall from St. Croix between February 17-24th. Activity
will be on 160-10 meters using CW, SSB, RTTY and PSK31. Look for KP2M
during the ARRL DX CW Contest (February 20-21st) as a Multi-? entry. QSL
KP2M via AI4U. All other QSLs via their home callsigns.

P2, PAPUA NEW GUINEA. Paju, YO5BIM, will be active as P29VIM until
February 21st. Activity will be on 30-6 meters using CW and SSB. He was
spotted this past weekend mainly on 30 meters. He will be active mostly
during his evenings. QSL via his home callsign or per his instructions.

QSL INFO AND NEWS.....................
It has been reported that as of the beginning of February, Buzz, NI5DX,
is the QSL Manager for Tom/9M6TMT and Abdul/9M6RHM. Buzz states that
he already has the logs for 9M6TMT and is awaiting QSL cards being sent
from Tom to Texas. Tom is very active and can often be found on the
same frequency as John, 9M6JC, one of the other DX stations that Buzz
assists. No log information has been transferred yet for 9M6RHM, but

it will be shortly.

The Algarve STAR DX Team has added the following new logs to their "CT's Logs Online" Web page: CT1FMX, CQ0ODX and CT2GZE. You can find more than 116 logs online from both CT or non-CT Ham radio activities in the Portugal territories. Visit the Web page at:
http://algarvedx.com/logonline
If you did any kind of radio operation in CT, CT3 ou CU (CT8), you can send them your log for "CT's Logs Online".

QSL Z21DXI via SP5UAF, by the Bureau or direct. Operators was Mirek, SP5IXI/VK6DXI. An online log was made available by Tom, SP5UAF, at:
http://www.sp5ixi.dxing.pl/z21dxi

QSLS VIA LoTW: 6W/GM4FDM, 9A5Y, DF4HOA, EA6DX, FM5CD, HB9TQL, IT9MUO, LU7HEO, S52QM, UK/JI2MED, UT2FF/A, UT7UV, UT0EA, VP2MUM, XR0Y and ZF2CE

QSLS RECEIVED VIA MAIL: 5B/HG3IPA, 9M6/JA3AVO, 9N7RB, CE0Z/SM0CUK, GI0KIQ, GM0YDX, GW3YDX, S58N, SU9ZZ, TL0A, TO8YY, TX5C, VK9DNX, VK9DWX, VK9XX, VP2V/KN5H, VP2MNK, VP8SDX, YS4/N0AT, YS4/W0OR and ZB3R

QSLS RECEIVED VIA THE BUREAU: 3DA0VB, 4L0VB, 5H3VMB, 5R8VB, 5X1VB, 5Z4/UA4WHX, 6V7P, 7P8VB, 7Q7VB, 9J2VB, 9U0VB, 9X0VB, A25VB, C91TX, C91VB, D2NX, D20VB, D44TXQ, D60VB, D88S, DE0DKR, E51NOU, EI9JF, FP/KV1J, HB9TST, HS0ZBS, J20VB, JT1CO, KH6/DF8AN, KH8/AI4VU, P40Y, PJ7/K1XM, ST2R, ST2VB, T32OU, T6X, TC57A, TM6I, UK/JI2MED, UU9JX/MM, V51VV, VK9LA, VU7SJ, YL5M, Z2/UA4WHX and ZL7T.

ST2, SUDAN (Top-Band). Robert, S53R, who is on a work assignment here (for UN WFP) since last September, has been active as ST2AR and is showing up on 160 meters but is having problems hearing NA. Look for him just before 0400z (his sunrise is around 0417z). He mentions that he does not even hear the pileup because of the noise and only just a few stations can make it through the noise. Robert adds that he knows there are hundreds calling. He states (edited), "Unfortunately, I have a TX antenna on the RX too, so I am more or less deaf! Putting up a terminated RX loop on February 24th, after I return back from my holidays, I hope will improve the RX. From RX point, from this QTH is a nightmare - S9+10 noise 24/7! Basically, after I apply all the bells and whistles - NB, ATT, NR and fiddling around with the AGC - you need a solid S7 signal to make it through (which is a challenge to say the least) on the path between ST and US. Problem with RX antennas is space. While I have a rather big setup (10 element log periodic 14-28 MHz, full size rotary dipole 30/40m and 80/160m Inverted Vee at 28 meters) there is no space for beverages. I will, however, put up the loop..... I have all the stuff, just need a couple of hours to put it up. I will do it before the weekend February 27-28th (CQ 160m SSB Contest)."

T32, EASTERN KIRIBATI (New IOTAs To Be Activated). A team of operators lead by Nils, SM6CAS, will activate four uninhabited IOTA islands (in the Southern Line Islands Group) that have never been put on the air before between mid-March and early April. Operators mentioned are:

Nils/SM6CAS, Steve/G4EDG, Mike/K9AJ and Derek/G3KHZ. Also a team of 5 Government Kiribati officers will be with them. The team will sail on the "SV Kwai" from Kiritimati (Christmas Island) on approximately March 17th, returning to Kiritimati approximately April 18th. The IOTAs mentioned to be aired are: Malden Island (OC-279), Starbuck Island (OC-280), Caroline Island (OC-281) and Vostok Island (OC-282). Per their Web site (under construction), the team will operate from two sites (two stations each) and will operate on 40-10 meters using a variety of verticals and dipoles. The T32 Southern Line Islands Dxpedition's Web page is at: http://t32line.webnode.com

V2, ANTIGUA & BARBUDA. Alan, N3AD, will be active during the ARRL DX SSB Contest (March 6-7th) as a Single-Op/High-Power entry. Both QSL route and callsign have not yet been announced.

V3, BELIZE. Luise, DL2MLU, is now active as V31MU from Consejo Shores until March 2nd. Activity will be on all HF bands but mainly RTTY. He is using a Kenwood TS-850 w/100 watts into 30m vertical for 80m or a Zepp antenna. QSL via his home callsign, direct or by the Bureau. Look for the log to be uploaded to LoTW sometime after his activity.

VK9X, CHRISTMAS ISLAND. Just a reminder that Phil/G3SWH and Jim/G3RTE will be active as VK9X/G6AY from Christmas Island between February 20-27th. Christmas Island counts as OC-002 for IOTA purposes. The 2009 "Most Wanted" survey by the DX Magazine shows Christmas Island at #68 worldwide for DXCC purposes. Their activity will be on CW only on all bands 80-10 meters. There will be no 160 meters activity. Propagation permitting, they plan to have two stations on the air for as many hours every day as is possible. Their main objective is to work as many European, North American and RoTW stations on as many bands as possible. QSL via G3SWH, either direct with SAE and adequate return postage (recommended), via Phil's Web site for a Bureau reply or by the Bureau. There will be an online log that will be updated daily at:
http:// www.g3swh.org.uk/christmas-island.html

XR2, CHILE (Lighthouse Activity). Operators Hector/CE3FZL, Ricardo/CE3HDI, Hugo/CE3BBC, Cristian/CE3PCN and Esteban/XQ7UP will activate Punta Angeles Lighthouse (ARLHS CHI-001) in Valparaiso harbor as XR2A during the the South American Lighthouse Weekend (February 26-28th). [Details on the LH weekend: http://www.grupodxbb.com.ar/faros2010.htm] Activity will be on 40/20/10 meters using CW and SSB. QSL via CE3BBC direct only (see QRZ.com for details). NO eQSL.

XR9, SOUTH SHETLAND ISLANDS (Update/Delayed). By the time you read this, a team of operators, from the Concepcion Radio Club (CE5JA), should be operating from Arturo Prat Chilean Navy Antarctic Base on Greenwich Island on the South Shetland archipelago (IOTA AN-010, WW Loc. GC07FQ), between now and the end of March. Their callsign will be XR9JA. Activity will be on 160-6 meters using CW, SSB, PSK31 and the AO-51 Satellite. Suggested frequencies are:
CW - 1834, 3504, 7004, 14024, 18074, 21024, 24894 and 28024
SSB - (*), 3780, 7078, 14200, 18145, 21295, 24995 and 28475 kHz

6m - 50115
Please note that ALL CW contact will be done with a PC (due to the absence of their CW operator). They request to: "Be patient with us! Will try to do our best and certainly we will have enough time." QSL via CE5JA. For more information, go to: http://www.ce5ja.cl

XU7, CAMBODIA. Look for Peter, NO2R, to be active as XU7ACY from Sihanouk Ville during the ARRL DX CW Contest (February 20-21st) as a Single-Op/ Lower-Power entry. Peters states that he will be on all bands if he gets the C3 up in time. QSL via W2EN.

YI, IRAQ (Update/Need Ops!). A group of operators called the "YI9PSE DXpedition team" are planning to operate from Kurdistan and be active between April 3-11th. The team will receive a ten day visa issued by the Government of Kurdistan. A band/mode survey is available on their Web site at: http://www.yi9pse.com/survey.html
Suggested frequencies are also published on their Web page and OPDX.937. The current updated YI9PSE Team consists of the following operators: Paul/N6PSE (Team Leader), Bob/N6OX, David/AH6HY, Bill/N2WB, Dave/K3LP, Al/K3VN, Jack/W0UCE, Jun/JH4RHF and Heathem/YI1UNH. Pilot stations are: Don/N1DG (East Coast), Chuck/AA6G (West Coast), Toshikazu/JA1ELY (JA) and Col/MM0NDX (EU). However, they are still looking for two skilled CW operators. The group is also looking for donations to help fund their DXpedition. Donations can be made via PayPal or mail a check to: Kurdistan 2010 DXpedition, 3052 Wetmore Dr., San Jose, CA 95148, USA. Online logs will be available during and after the DXpedition. QSL via N6NKT. For more details and updates, visit: http://www.yi9pse.com

YW0, AVES ISLAND. On the YW0A Web page, it was announced this week that the DXpedition team was invited by the Venezuelan Navy to go to the island between February 17th and March 26th. However, not all of the team members were able to take this time off. They are preparing/planning for the next "operational relief at the beginning of next April". For updates, watch: http://yw0a.4m5dx.info/home.html

ZF, CAYMAN ISLANDS. Jeff, K0UU, will be active as ZF2MN/ZF8 from Little Cayman Island (NA-016) between February 21ï¿½28th. Activity will be on 40-10 meters using CW only. QSL via his home callsign direct.

ZS8M, MARION ISLAND (Update). Last week we mentioned that activity will take place from the #3 "Most Wanted DXCC Entity" (per the 2009 The DX Magazine survey) in April. Pierre, ZS1HF, will activate Marion Island (AF-021) as ZS8M at the end of April. He will be working on the island for one year as a radio/electronics technician once the supply ship "SA Agulha" returns to Cape Town. Pierre announced on February 7th, that he will be (trying) to take an amp. However, he states, "I have weight restrictions of 100kg for the whole year, which includes all my clothing and equipment." He also mentions that his antennas will only be dipoles due to severe winds and prevention of death to the birds. Updates will be forthcoming beginning in March when he does his training, and he will be creating a Web site with more info. Stay tuned!

DXNL 1662 - Feb 17, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

A9 - BAHRAIN
Dave,EI3IO, will show up as A92IO soon. He has only an oral promise
concerning his licence so he still has to be patient. Dave will stay
in Bahrain until August 2011. Usually he is working mostly in CW and
SSB on 80m-10m (including the WARC bands). He also plans to become
active on 6m during the upcoming summer and on 160m during the winter
season 2010/2011. QSL cards should be sent directly to Dave Court,
PO Box 31183, Budaiya, Bahrain, direct to the address of EI3IO (this
mail will be fowarded to him only twice a year) or via bureau to EI3IO.
More information is available online at: http://A92.ath.cx

C6 - BAHAMAS, NA-080
Steve,AK0M, is working as C6ASB from Grand Bahama Island (NA-080)
mostly in CW on 40m-10m with 10 watts from Feb 16-22.
QSLs direct, via bureau or LoTW via AK0M.
See also: http://www.ak0m.com/c6asb/c6asb_feb_2010.htm

CN - MOROCCO
Mat,MJ0ASP, will be active as CN2MR only in CW on 40m-10m (WARC bands
preferred) from Feb 18-26. They also plan to take part in the ARRL
International DX CW Contest. QSLs direct or via RSGB bureau to MJ0ASP.

HI - DOMINICAN REPUBLIC, NA-096
Fabio,HI3/IK4QJF, will be QRV in SSB and digital modes between Feb 20
and Mar 5. Send your QSLs direct or via bureau to IK4QJF.

HK - COLOMBIA
Lothar,DK8LRF, intends to become active as HK3JCL again working in SSB,
Pactor, RTTY and PSK31 mainly on 20m and 40m from Feb 20 until Easter.
His QTH will be the finca Mariposa near Restrepo/Meta, at the foot of
the Eastern Cordillera. His equipment includes a Kenwood TS-50,
an Annecke antenna coupler, PTC II and a Rhombus antenna (4 x 63m)
pointing to Central Europe. QSLs via bureau to DK8LRF.

If you are interested in a sked please e-mail him to: dk8lrf@gmx.de

J8 - ST VINCENT AND GRENADINES, NA-109
Dave,G3TBK, is QRV again as J88DR from St. Vincent (NA-109) working
in CW, SSB and RTTY on 160m-10m from Feb 18 until Mar 15. He plans to
join the upcoming RSGB Commonwealth Contest (BERU) as well.
QSL via his homecall.

KP2 - US VIRGIN ISLANDS, NA-106
KP2/K3CT and KP2/K3TEJ are working in CW, RTTY and PSK31 on all bands
from Feb 17-24. KP2M will be their callsign in the ARRL DX CW Contest.
QSLs for KP2M via AI4U, KP2/K3CT and KP2/K3TEJ via homecalls.

P2 - PAPUA NEW GUINEA
P29VIM is Paju,YO5BIM, who is active in CW and SSB on 30m-6m during
his evening hours until Feb 21. QSL via YO5BIM.

V3 - BELIZE
Wil,AA4NC, is going to hit the airwaves in CW, SSB and RTTY on all
bands signing V31RR from Feb 17-23. He will join the ARRL Contest as
single OP on Feb 20/21. QSLs via his homecall or LoTW.

VK9X - CHRISTMAS ISLAND, OC-002
Phil,G3SWH, and Jim,G3RTE, will activate Christmas Island (OC-002) in
CW on 80m-10m from Feb 20-27. They plan to work with two stations at
the same time signing VK9X/G6AY. The QSL manager is Phil,G3SWH.
Check their website at: http://www.g3swh.org.uk/christmas-island.html
You can also request bureau QSLs there.

YN - NICARAGUA
Eric,K9GY, will be in Nicaragua again from Feb 18-22 and is going to
sign YN2GY from the QTH of Octavio,YN2N. He will join the CW part of
the ARRL Contest and can be found working in CW mainly on the
WARC bands outside of the contest.
QSL via bureau or direct to his homecall or via LoTW.

ZF2 - CAYMAN ISLANDS, NA-016
Jeff,K0UU, will be active in CW on 40m-10m signing ZF2MN/ZF8 from
Little Cayman (NA-016) from Feb 21-28. QSL direct via K0UU or via LoTW.

ZK3 - TOKELAU, OC-048 / 5W - WESTERN SAMOA, OC-097
Bill,N7OU, and Bob,W7YAQ, will show up from Tokelau (OC-048) between
Feb 17 and Mar 10. Since this exotic destination is accessible only
by boat the exact dates may vary a bit. Bill and Bob will be active
mainly in CW but also in SSB and RTTY on 160m-10m running 100 watts
into verticals. They will take part in the ARRL International DX CW
Contest as well. Callsigns from Tokelau will be announced later.
They will be QRV also from Apia on Western Samoa (OC-097) signing
5W0OU and 5W0YA on their way home from Mar 11-15.
The QSL cards should be sent direct or via bureau to their homecalls.

5Z - KENYA
Cato,5Z4/LA9PF, stays in Kenya for three months starting on Feb 11.

He plans to work on all bands with his 100 watts, a 3 ele yagi and a loop antenna. Cato prefers SSB and the digital modes but also works in CW sometimes. During his stay he will visit Malawi from time to time and hopes to become active as 7Q7PF from there.
Direct QSL cards are preferred via PO Box 5642, Malindi, 80200 Malindi, Kenya, via the 5Z4 bureau or via http://www.eQSL.cc

6W - SENEGAL
La Somone will be the QTH of Luc,F5RAV, between Feb 18 and Mar 1.
He will sign 6V7T from the station of Jean-Francois,6W7RV.
QSLs only direct via F5RAV.

Giovanni,I5JHW, is active as 6V7V during his holidays until Feb 23.
He also plans to join the CQ WPX RTTY Contest.
QSLs direct or via bureau to his homecall.

8P - BARBADOS, NA-021
Yuri,VE3DZ, will show up as 8P9AA in CW, SSB and RTTY on all bands from Feb 15-23. He will sign 8P3A in the ARRL DX CW Contest.
QSL via his homecall.

9H - MALTA, EU-023
DL4HG and DL5XAT will be QRV as 9H3TX from Gozo (EU-023, WLOTA LH-0046) from Feb 17-24 (including the ARRL DX CW Contest). They will use 100 watts and vertical antennas. QSLs direct, via bureau or LoTW to DL5XAT.

9U - BURUNDI
Helmut,DL3KBQ as 9UXEV (correct callsign), Henry,DL2RSI as 9U1RSI, Peter,DH2KI as 9U1KI, and Juergen,DJ2VO as 9U1VO, will operate from Burundi from Feb 22 until Mar 6. They will activate up to four stations in CW, SSB and digital modes from the Safari Gate Hotel in Bujumbara.
The QSL cards should be sent via bureau or direct to their homecalls.

9X - RWANDA
9X0CW (DK7PE) and 9X0LX (DK7LX) hit the airwaves last week without any notice in advance. Georg,9X0LX, is focusing on the high bands while Rudi,9X0CW, concentrates his activities on the lowbands. They will stay there until Feb 18. QSLs via homecalls.

SPAIN, SPECIAL EVENT STATION
Javier,EC1KV, Daniel,EB1LA, Jose,EA1CUB,
Jose,EA1CS, Juanjo,EA1WX, Juan,EA1AUM, Gil,EA1HFM, und Fernando,EA1GHT, aktivieren vom 22.-28.Februar anlaesslich der "Seventh Antarctic Week" das Sonderrufzeichen AO1ANT mit der WAP-Referenznummer WAP-180 in SSB, CW, PSK31 und RTTY von 160m-10m. QSL via EA1GHT, direct oder via bureau.
Siehe auch: http://www.qrz.com/db/ao1ant

SPAIN, SPECIAL EVENT STATION
Javier,EC1KV, Daniel,EB1LA, Jose,EA1CUB, Jose,EA1CS, Juanjo,EA1WX, Juan,EA1AUM, Gil,EA1HFM, and Fernando,EA1GHT, will activate the special event station AO1ANT (WAP reference WAP-180) in SSB, CW, PSK31 and RTTY on 160m-10m during the "7th Antarctic Activity Week" from Feb 22-28.

QSL direct or via bureau to EA1GHT. See: http://www.qrz.com/db/ao1ant

SILENT KEYS: Chris Walters,N0HVK, was one of the casualties of the explosion in the Connecticut power plant on Feb 7. More DXers who passed away are Erich Recaen (DL5RBR), Jacky Gargot (F5OIU), Edward R. Hill (W3FEG), Russell Kellam (W4UBC) and Herbert "Pete" Hoover III (W6ZH). He was the great-grandson of Herbert Hoover (31st president of the USA) and the son of the former IARU and ARRL president Herbert Hoover Jr.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
Don,AA5AU, makes another survey about the Most Wanted RTTY countries:
If you like to take part in the survey please click on:

UPCOMING CONTESTS

Feb 20/21: ARRL International DX Contest, CW

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
AS-013, 8Q, Maldive Islands: Joerg,OE6VHF, will be active from Thulhagiri Island from Feb 23 until Mar 5. He will sign 8Q7JK on 40m-10m with emphasis put on 40m and 17m SSB. QSL via his homecall.

AS-127, S2, Chittagong Region Group: Tutul,S21RC, Manjurul,S21AM, Sohel,S21S and Aminul,S21D, will be QRV as S21DX from St. Martin's Island from Feb 21-25. They will work mainly in SSB and some RTTY using a 5 band Spiderbeam, dipoles and vertical antennas. Their power source will be batteries. Unfortunately their QSL manager EB7DX confirms QSLs only direct. Donations are welcome. Their homepage is: http://www.s2dx.org

NA-002, VP5, Caicos Islands: Rick,VP5/K6VVA, will be QRV from Providenciales Island from Feb 18-24 (signing VP5Z during the ARRL DX CW Contest).
QSLs via N6AWD (direct/bureau).

OC-088, V85, Brunei, Borneo (main): Jan,V88/DL7JAN, plans an activity from Bandar Seri Begawan working in CW/SSB/RTTY on 160m-10m between Feb 22 and Mar 3. QSL direct or via bureau to DL7JAN.

Lighthouse activities (WLOTA/ARLHS/ILLW)

EF8N LH 1276 Tenerife Feb 20/21
J88DR LH 0492 St.Vincent Feb 18-Mar 15

**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

February 17, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Dats A Lot of Dits! - ARRL DX CW
- Digital Days - Feld-Hell Sprint, Russian and EPC PSK, NA Digital,
WSJT Sprint
- ARRL Field Day Packet - Get Ready!
- Steampunk and Maker Faires
- Contest Videos from NR5M, ED5M, and VE3CCO
- Updated IARU HF Results and Stew Perry Results
- Contest Prep Checklist
- New 2 Meter Yagi Comparison Report
- Backward and Forward

NEW HF OPERATORS - THINGS TO DO

If you want to add to your CW DXCC totals, there's no better contest
for little pistol North American stations than the ARRL DX CW contest.
Why? Unlike the everybody-works-everybody contests, DX stations must
work W and VE stations - that's you!

BULLETINS

No bulletins in this issue.

BUSTED QSOS

I forgot that the original provocateur for the "how many dits in a row"
puzzle was actually Barry W6YE! Runner-up provocateur, Jerry VE6CNJ, is
still on the job, however, sending in this short slip of an all-dot
sentence: HIS SIS SEES 5 SISSIES. Just in time to practice for those
EE5 stations in this weekend's ARRL DX CW contest.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

February 20-21
```

- ARRL International DX--CW
- Semi-Automatic Key Evening (Feb 17)
- Feld-Hell Super Bowl Sprint
- AM QSO Party
- FM Simplex Contest--Phone

February 27-28

- Russian WW PSK Contest
- CQ WW 160 Meter SSB
- REF Contest
- EPC WW PSK Contest
- UBA Contest--CW
- Mississippi QSO Party
- North American QSO Party--Digital
- WSJT Sprint
- CQC Winter QSO Party
- North Carolina QSO Party
- YL CW Party (Mar 2)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The 2010 ARRL Field Day packet of rules and forms is now available and you can download <http://www.arrl.org/contests/forms/fd-2010-packet.pdf> it as a PDF package. Field Day (June 26-27, always the fourth full weekend in June) is a prime opportunity for recruiting new folks to ham radio and for educating new hams about HF contesting and operating. If your club hasn't selected a site yet, consider locating yourself in a publicly-accessible area and encourage visitors - you can add lots of points from public-exposure bonuses and from your GOTA (Get On The Air) station.

The Milwaukee-area and New Jersey are both host to an FM Simplex contest this coming Sunday especially for Technician licensees and hams that haven't tried contest operation. The original contest was conceived of and run by the Milwaukee Radio Amateurs Club <http://www.w9rh.org/fm_simplex_contest.htm>. Hoping to spread the fun to other areas, the New Providence ARC <http://www.nparc.org/> is hosting an event as well. Encourage your local VHF FMers to give it a try! Or have your club plan and host one!

Bob N6TV writes with a demo of a new Win-Test feature. "Version 4.4 includes an "Audio Recorder" that lets you save an entire contest experience as an MP3 file. A separate free program called wtQsoPlayer enables you to convert your long Win-Test MP3 recordings into short "on demand" audio clips that anyone can access on the Web. All you need is the Web hosting space and basic text editing and file transfer skills. All of instructions and sample PHP scripts <http://download.win-test.com/utils/wtQsoPlayer.zip> are included on the Win-Test Web site." If you worked Bob in the recent NA CW Sprint, you can hear your QSO <http://bit.ly/N6TVSprintAudio201002> recorded with Win-Test. "After you enter your callsign and press [Search],

some "Listen" links will appear at the bottom. If clicking on the link doesn't play the entire MP3 file properly, right click on the link, select "Save Link As" or "Save Target As", and note where your browser has saved the MP3 file. Then double click on the downloaded file to play the QSO directly from your hard disk. The clips are +/- 30 seconds from the time I pressed [Enter] to log the QSO, so you may need to listen for at least 30 seconds before you'll hear yourself in the audio clip."
<http://download.win-test.com/utils/wtQsoPlayer.zip>

With the CQ WW Contest receiving over 10,000 entries, the CQ WPX Contest more than 7,000 entries, and the CQ RTTY Contests with almost 5000 entries, it is becoming increasingly difficult to efficiently parse the free-form mailing addresses that appear in logs from all parts of the world. In response, last year the committee that controls the Cabrillo log format standard <http://www.kkn.net/%7Etrey/cabrillo/> introduced four new tag definitions for entry of postal mailing addresses:
ADDRESS-CITY:
ADDRESS-STATE-PROVINCE:
ADDRESS-POSTALCODE:
ADDRESS-COUNTRY:
These new tags are optional for all contests, but it recommended that logging software authors implement them in the Cabrillo format output utilities so that the program user address is read correctly by the contest sponsors. There is more information on these new tags on the CQ WPX Blog <http://www.cqwpx.com/blog/?p=58> of Contest Director, Randy K5ZD.

Some of the North Carolina counties are fairly remote, nevertheless the North Carolina QSO Party <http://www.w4nc.com/2010ncqsoparty.html> sponsors have been beating the bushes to activate as many as possible. Check out the list to see if any counties on your "Needed" list will be on the air!

The increasing availability of remotely-controllable stations may lead to a careless operator violating local licensing restrictions. For example, you have to hold a valid license in the location from which you are transmitting and follow all local rules and regulations. Don't assume that you can operate from anywhere and just sign your call sign "portable wherever"! For example, CEPT license authority is only granted to "temporary visitors" and it's not at all clear that someone connecting to a station via the Internet is considered to be a visitor. Make sure you know the rules before transmitting!

Steampunk <http://en.wikipedia.org/wiki/Steampunk>, in case you hadn't encountered it before, is a combination of science fiction, fantasy, and antique technology. Aficionados of "steam radio" (a.k.a. vacuum tubes) are natural steampunks! The upcoming Nova Albion steampunk convention <http://www.steampunkexhibition.com/> in California on March 12-14 incorporates elements of Maker Faire <http://www.makerfaire.com/>

(see the next story) and other do-it-yourself activities.

Maker Faires <http://www.makerfaire.com/> are going to be held in three US cities this year - San Mateo, CA (May 22-23), Detroit (July 31-Aug 1), and New York City (Sep 25-26). There is also an upcoming Maker Faire in Newcastle, England on Mar 13-14. The Maker Faire theme this year is the Young Makers, just like many of us when we were getting our start in ham radio. If you are part of a Detroit or NYC area radio club that might like to exhibit, ham radio has been a very popular attraction at past Faires. Contact the organizers via the Maker Faire Web site. (The San Mateo event has ham radio representation lined up!) Imagine thousands of proto-hamsters ready to learn about Amateur Radio!

>From the Jan 20 ARRL E-Letter <http://www.arrl.org/FandES/field/ares-el/>, the IARU Administrative Council noted that all three regions have now reached consensus on three global Center of Activity (CoA) frequencies for use in the event of emergencies: 14.300, 18.160 and 21.360 MHz. When no emergency operations are being conducted, these frequencies are open for normal amateur usage. However, GAREC-09 calls upon IARU member-societies, among others, "whenever emergency communications are being conducted on frequencies that propagate internationally, to use any available real-time communications channels, including but not limited to e-mail bulletins, Web sites, social networking and DX-clusters to draw the attention of the largest possible number of Amateur Radio operators to on-going emergency communications, in order to avoid interference with emergency traffic."

Ken K0PP discovered that the amateur radio articles that appeared in the January 2010 Linux Journal <http://www.linuxjournal.com/> are now available on-line. You can reach them via the Linux Journal "Virtual Ham Shack: or in this online article <http://www.linuxjournal.com/content/amateur-radio-articles-and-newsletter>.

Web Site of the Week - Just what you were asking yourself: "Do Dogs Know Calculus? <http://www.maa.org/features/elvisdog.pdf>" You'll never play ball with your canine companion in the same way ever again. (Thanks, Glenn W0GJ)

WORD TO THE WISE

Ghost code - The random letters and characters that your brain generates from the noise and sounds your ears hear with the headphones off after spending a few hours in a big CW contest. The post-contest shower can be particularly interesting!

==> SIGHTS AND SOUNDS

The ever-evolving NR5M superstation is surveyed in this YouTube video <http://www.youtube.com/watch?v=ASq2cwJLnrI> by W0MM. The comment by Eric NM5M, "This station is Ham Radio Disneyland!" sorta sums it up. (Thanks, Larry K5OT)

If you worked ED5M in the recent CQ WW 160 CW contest, you might be interested in taking a look <http://www.ure.es/foro.html?func=view&catid=4&id=77625> at their station's experimental antenna and mighty nice location. (Thanks, Duncan EA5ON)

Across the Atlantic here are a couple of self-described "little pistol" Canadians having fun <http://www.youtube.com/watch?v=63FMazzRbpc> in CQ WW160 CW as VE3CCO. (Thanks, Stan VE3TW)

Here's a very nice short video <http://blog.makezine.com/archive/2010/02/seeing_radio_waves_with_a_light_bul.html> showing how the reflector and director elements of a Yagi antenna focus radio signals. The demonstration by Diane Eng (KC2UHB, I believe) uses a light bulb and handheld dipole as the receiver. This may be just the thing for teaching a new ham about Yagi antennas. There are complete construction directions on the Web page, as well, and several links to other ham radio videos. The Yagi used for the demonstration is a dual-band "Cheap Yagi <http://www.wa5vjb.com/references.html>" design from WA5VJB. (Thanks, Paul N5IUT)

What's the "best DX"? At about 2:30 in this "cosmic zoom" video <http://www.youtube.com/watch?v=17jymDn0W6U&feature=player_embedded>, you get an interesting perspective on just how far man's first radio signals have traveled in space. If your PC and network can handle the high-definition, full-screen mode, it's even more impressive. (Thanks, Bob N6TV)

Speaking of cosmic zooms, NASA's Earth Observatory page has a nice writeup and video of a coronal mass ejection <http://earthobservatory.nasa.gov/IOTD/view.php?id=42646&src=eoa-iotd> (CME) that occurred in late January as the Sun was coming back to life.

==> RESULTS AND RECORDS

The updated IARU HF Championship results have been prepared and uploaded to the ARRL's temporary contest results Web page <http://aptos.arrl.org/contests/> hosted by the helpful hosts at kkn.net. Click "Initial Results" to download the PDF results writeup by K9LA. (Thanks, ARRL Contest Branch Manager, Sean KX9X)

The results of the 2009 Stew Perry Contest have been published <http://web.jzap.com/k7rat/stew.html>. Next year's contests will be held on Oct 23-24 (warmup contest) and on Dec 18-19, the week before Christmas. (Thanks, Tree N6TR)

Preliminary results for the February CW Sprint have also been published <http://www.ncjweb.com/sprintcwprelim.php>. Congratulations to Trey N5KO on his first win in this high-performance contest! (Thanks, Tree N6TR)

Management and sponsorship of the Frequency Measuring Tests have migrated to a team of amateur time and frequency metrologists led by Connie K5CM, Tom N8ZM and others. A writeup of the latest results

<http://www.mvus.org/> is online and boasts of some pretty impressive measurement capability out there! The next FMT will be held on April 22 (that's the UTC date - April 21st in North America) and will be announced in QST.

The winners of the 2009 PSK DeathMatch have been validated and are listed online <http://www.mdxa1.org/deathmatch.html>! There is no word on the fate of any survivors of the Death Match. (Thanks, Charles W8VOM)

OPERATING TIP

This issue's tip is a lengthy one - a checklist, actually, by Jack WA0RJY, written for little pistols and medium guns in major contests such as this weekend's ARRL DX CW. Food for thought in the contest seasons to come.

Contesting Checklist

One Month prior to the contest
- Join your local contest club
- Talk to other local contesters
- Determine class of operation
- Set goals
- Install any temporary antennas

One Week prior to the contest
- Inform family, do additional chores, clear weekend schedule
- Check out rig
- Check out backup rig
- Check out computer and computer software - be sure to have the most up-to-date country list and have any contest-specific features ready
- Check antenna SWR on all bands for mode of operation
- Buy food and drink for contest
- Locate backup keying cable, computer cable, etc. and be sure they work
- Check over the operating position for comfort - chair, clock, computer screen
- Cruise the Internet for info and inspiration

Two Days prior to the contest
- Read the rules of the contest (even if you know them by heart)
- Print out propagation predictions
- Print out list of DX-peditions that will be active
- Make band plan (when do you plan to operate on each band)
- Practice with contest simulator
- Get plenty of sleep - adjust your pattern to match your operating

Four Hours before the contest
- Arrange food and drink
- Say goodbye to spouse and children
- Synchronize the computer clock to WWV
- Check your computer logging program to be sure it has the correct UTC

time and date
- Take a nap
- Check out the bands to see if your band plan is on target and you have selected the correct starting band

During the contest
- Maximize points
- Stay at the rig!
- Stay fresh
- Follow your band plan
- Pass up easy multipliers on the first day of the contest
- Fight for essential multipliers

==> TECHNICAL TOPICS AND INFORMATION

QRZ.com reports that Lionel VE7BQH has just published his latest 2 meter Yagi performance table <http://www.sm2cew.com/gt.htm> -- an important reference for serious VHF DX'ers. It provides key facts to help operators choose the right antenna for them.

Rovers have to pack a lot of antennas to cover all the bands above 50 MHz! Tim KE3HT confronted the tradeoffs between performance and coverage and mechanical complexity with a log periodic. In this eham article <http://www.eham.net/articles/23290> he discusses his choice and how it affects his roving operation.

The February 2010 issue of Analog Dialogue has an excellent article on PIN diodes <http://www.analog.com/library/analogdialogue/archives/44-02/pin_diode.html> by John Ardizzoni and circuits for controlling them with an op-amp. The article includes background on PIN diodes and how they work as RF switches. There are links to additional application notes at the end of the article.

The January 2010 issue of High-Frequency Electronics <http://www.highfrequencyelectronics.com/Jan2010/Jan10_ONLINE.htm> has a couple of nice articles of interest to high-performance hams: "Make Sub-1dB Noise Figure Measurements - Part 1: Noise Concepts" and "Magnetic Materials in Transmission Line Transformers". The latter "Design Notes" column is dedicated to recent Silent Key, Jerry Sevick W2FMI by publisher Gary K9AY.

Bill W5WVO contributes the URL for a Web page that covers the history and characteristics <http://ecee.colorado.edu/%7Ekuester/Coax/connchart.htm> of most of the RF connector series in use today -- in simple language and photos. Good reference stuff!

Jeff K8ND implemented a system of three on-site CW Skimmers at PJ2T for the CQWW 160 CW contest and has provided a description <http://www.k8nd.com/Radio/Planning/CQWW160/pj2t_cw_skimmer_scheme.pdf> of the system. Each of the three SDR-IQ receiver used a different directive receiving antenna switched periodically depending on the

target areas of interest. The outputs of the CW Skimmers were run through K1TTT's WinTelnetX software to combine them with spots from the spotting networks and provide them directly to the Writelog contest logger's spot window.

An interesting question about antenna construction came in regarding methods to drill sets of holes at right angles to each other along a tube or other round material. After looking around on the 'net and getting nowhere fast, the way I decided that I would go about it is to use a drill press and clamp the tubing to a piece angle iron. Drill one complete line of holes with one face of the angle iron clamped to the press' working surface. Keeping the tube clamped to the angle iron, rotate the angle iron so that its other face is flat against the press' working surface. Drill the remaining holes. If the faces of the angle iron make a right angle, your holes will also be at right angles. This doesn't guarantee your holes are precisely separated by ninety degrees around the pipe's circumference, however.

A bit of hang time in the dentist's office yielded this gem from Woodcraft magazine for Feb/Mar 2010. The "Tips & Tricks" column suggests using the eraser end of a wooden pencil to hold and push small work pieces through a band saw. A slip with that technique only means you have two pencils, not one less fingertip.

Technical Web Site of the Week - Ferreting out articles on RFI, John NU3E came up with the following handful of technical articles from the Embedded.com Web site:

"The elegance of ferrite beads as a circuit design and problem-solving component <http://www.embedded.com/222301322>"

Choosing and Using Bypass Capacitors (Part 1 of 3) <http://www.embedded.com/199905761>

Choosing and Using Bypass Capacitors (Part 2 of 3) <http://www.embedded.com/202403390>

Choosing and Using Bypass Capacitors (Part 3 of 3) <http://www.embedded.com/200001209>

We don't all necessarily need to become design engineers, but having the background information on why certain techniques work better than others and in what applications can be invaluable.

==> CONVERSATION

Backward and Forward

An anonymous contributor sent in this week's Conversation piece. Perhaps you've seen the palindromic video <http://www.youtube.com/watch?v=42E2fAWM6rA> that delivers two very different messages read in different directions. The same is true for the following text - which way of reading it do you prefer?

73, Ward N0AX

Winning contest operators are all cheaters
I refuse to believe
I can win by playing by the rules
I realize this may be a shock but
"Contesting is for fun"
Is a lie, and
"Winning is everything"
So I will tell new operators trying to improve their skills
They are not the most important thing in contesting
Contesters who try to compete against me unfairly will know that
I have my priorities straight because
Winning
Is more important than
Fair play
I tell you this
Once upon a time
Contesters didn't cheat
But this will not be true in the future
This is a win-no-matter-what-it-takes society
Experts tell me
10 years from now every top-scoring station will need an on-site
referee to prevent cheating
I do not believe that
I will be competing against honest operators playing by the rules
In the future
Deliberate QRM, high power, and packet cheating will be the norm
No longer will it be said that
Contesters are the best operators on earth
It will be evident
That contesters are universally ruthless and unsportsmanlike
It is foolish to presume
There is hope

And all of it will come true unless we choose to reverse it

There is hope
It is foolish to presume
That contesters are universally ruthless and unsportsmanlike
It will be evident
Contesters are the best operators on earth
No longer will it be said that
Deliberate QRM, high power, and packet cheating will be the norm
In the future
I will be competing against honest operators playing by the rules
I do not believe that
10 years from no every top-scoring station will need an on-site referee
to prevent cheating
Experts tell me
This is a win-no-matter-what-it-takes society
But this will not be true in the future

Contesters didn't cheat
Once upon a time
I tell you this
Fair play
Is more important than
Winning
I have my priorities straight because
Contesters who try to compete against me unfairly will know that
They are not the most important thing in contesting
So I will tell new operators trying to improve their skills
"Winning is everything"
Is a lie, and
"Contesting is for fun"
I realize this may be a shock but
I can win by playing by the rules
I refuse to believe
Winning contest operators are all cheaters

==> CONTESTS

February 17 through March 2, 2010

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

Semi-Automatic Key Evening--CW, from Feb 17, 1900Z to Feb 17, 2030Z. Bands (MHz): 3.5. Exchange: RST, serial, first year of bug use. Logs due: Mar 15. Rules <http://www.agcw.org/en/?Contests:Straight_Key_Party>

ARRL International DX--CW, from Feb 20, 0000Z to Feb 21, 2400Z. Bands (MHz): 1.8-28. Exchange: RST, state/province or power. Logs due: Mar 22. Rules <http://www.arrl.org/contests>

Feld-Hell Super Bowl Sprint--Digital, from Feb 20, 2000Z to Feb 20, 2200Z. Bands (MHz): 1.8-28. Frequencies: Monthly on 3rd Saturday. Exchange: RST, QTH, Feld-Hell number. Rules <http://www.feldhellclub.org/>

AM QSO Party--Phone, from Feb 20, 2300Z to Feb 21, 2300Z. Bands (MHz): 3.5-14. Exchange: RS, name, and S/P/C. Rules <http://www.antiquewireless.org/pdf/cundall_add_comments.pdf>

Russian WW PSK Contest--Digital, from Feb 26, 2100Z to Feb 27, 2100Z. Bands (MHz): 1.8-28. Exchange: RST and oblast code or serial. Logs due: 15 days. Rules <http://www.qrz.ru/contest/detail/384.html>

CQ WW 160 Meter SSB--Phone, from Feb 26, 2200Z to Feb 28, 2200Z. Bands (MHz): 1.8. Exchange: RST and state/province or CQ zone. Logs due: Mar

31. Rules <http://www.cq160.com/>

REF Contest--Phone,CW, from Feb 27, 0600Z to Feb 28, 1800Z. Bands (MHz): 3.5-28. Exchange: RS and French dept or serial. Logs due: 30 days. Rules <http://www.ref-union.org/concours>

EPC WW PSK Contest--Digital, from Feb 27, 1200Z to Feb 28, 1200Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: 30 days. Rules <http://www.epcwwdx.srars.org/index.php/contest-rules.html>

UBA Contest--CW, from Feb 27, 1300Z to Feb 28, 1300Z. Bands (MHz): 3.5-28. Exchange: RST, serial, and ON province. Logs due: 30 days. Rules <http://www.uba.be/en/hf/contest-rules>

Mississippi QSO Party--Phone,CW, from Feb 27, 1500Z to Feb 28, 0300Z. Bands (MHz): 3.5-28, 50-432, Frequencies: CW 3.545,7.045,14.045,21.045, 28.045;Phone 3.857-862-867,7.238,14.275,21.375,28.375;VHF 50.13,144.22,146.55,446. Exchange: RS(T) and MS county or S/P/C. Logs due: Mar 31. Rules <http://www.arrlmiss.org/>

North American QSO Party--Digital, from Feb 27, 1800Z to Feb 28, 0600Z. Bands (MHz): 3.5-28. Exchange: Name and S/P/C. Logs due: 14 days. Rules <http://www.ncjweb.com/sprintrules.php>

CQC Winter QSO Party--Phone,CW, from Feb 28, 0100Z to Mar 1, 0259Z. Bands (MHz): 3.5-14. Frequencies: 3.560, 7.040, 14.060. Exchange: RS(T), S/P/C, name, CQC nr or power. Logs due: 30 days. Rules <http://www.cqc.org/>

North Carolina QSO Party--Phone,CW, from Feb 28, 1700Z to Mar 1, 0300Z. Bands (MHz): 3.5-28. Frequencies: CW 3.54,3.74,7.04,7.14,14.04,21.04,21.14,28.04,28.14, Phone 3.86,7.26,14.26,21.36,28.36. Exchange: RS(T) and NC county or S/P/C. Logs due: Apr 1. Rules <http://www.w4nc.com/>

YL CW Party--CW, from Mar 2, 1900Z to Mar 2, 2100Z. Bands (MHz): 3.5. Exchange: RST, serial, if YL "YL," name. Logs due: Mar 31. Rules <http://www.agcw.org/en/?Contests:Straight_Key_Party>

VHF+ CONTESTS

FM Simplex Contest--Phone, from Feb 21, 1900Z to Feb 21, 2130Z. Bands (MHz): 50-440. Exchange: Call sign and grid square. Logs due: Mar 21. Rules <http://www.w9rh.org/>

WSJT Sprint--Digital, from Feb 27, see Web to Feb 27, see Web. Bands (MHz): 50,144. Exchange: NA report or NA grid. Logs due: Next Sat. Rules <http://www.ykc.com/wa5ufh/>

Mississippi QSO Party--Phone,CW, from Feb 27, 1500Z to Feb 28, 0300Z. Bands (MHz): 3.5-28, 50-432, Frequencies: CW 3.545,7.045,14.045,21.045, 28.045;Phone 3.857-862-867,7.238,14.275,21.375,28.375;VHF 50.13,144.22,146.55,446. Exchange: RS(T) and MS county or S/P/C. Logs due: Mar 31. Rules <http://www.arrlmiss.org/>

==> LOG DUE DATES

February 17 through March 2, 2010

February 17, RSGB 80m Club Championship, Data, Email logs to: ccdata.logs@rsgbhfcc.org, , upload log at: http://www.vhfcc.org/cgi-bin/hfenter.pl, paper logs and diskettes to: (none). Rules <http://www.rsgbcc.org/hf/rules/2010/r80mcc.shtml>

February 19, SKCC Weekend Sprint, post log summary at: http://www.skccgroup.com/sprint/wes/wes-submit.html, paper logs and diskettes to: (none). Rules <http://www.skccgroup.com/sprint/wes/>

February 20, Asia-Pacific Spring Sprint, CW, Email logs to: apsprint@jsfc.org, paper logs and diskettes to: (none). Rules <http://jsfc.org/apsprint/aprule.txt>

February 20, North American Sprint, SSB, Email logs to: (see rules, web upload preferred), , upload log at: http://www.ncjweb.com/sprintlogsubmit.php, paper logs and diskettes to: Jim Stevens, K4MA, 6609 Vardon Ct., Fuquay-Varina, NC 27526, USA. Rules <http://www.ncjweb.com/sprintrules.php>

February 22, 10-10 Int. Winter Contest, SSB, Email logs to: tentencontest@roadrunner.com, paper logs and diskettes to: Dan Morris, KZ3T, 131 Valencia Lane, Statesville, NC 28625, USA. Rules <http://www.ten-ten.org/Forms/QSOPartyRulesRevised.pdf>

February 25, ARRL January VHF Sweepstakes, Email logs to: JanuaryVHF@arrl.org, paper logs and diskettes to: January VHF, ARRL, 225 Main St., Newington, CT 06111, USA. Rules <http://www.arrl.org/contests/rules/2010/jan-vhf-ss.html>

February 28, SPAR Winter Field Day, Email logs to: winterfd@spar-hams.org, paper logs and diskettes to: (none). Rules <http://www.spar-hams.org/contests/winterfd/index.php?pg=2>

February 28, Hunting Lions in the Air Contest, Email logs to: lions@vsnl.net, paper logs and diskettes to: The HLITA Contest Committee, Lions Club of Bangalore North, C/O Lion Ajoy - VU2JHM, # 9/1, Kshitija, Opp Big Bazaar, 5-Cross, Malleswaram, BANGALORE-560003, India. Rules <http://lionshuntingintheair.lionwap.org/>

February 28, CQ 160-Meter Contest, CW, Email logs to: 160cw@kkn.net, paper logs and diskettes to: CQ 160-Meter Contest, 25 Newbridge Road, Hicksville, NY 11801, USA. Rules <http://cq-amateur-radio.com/160_Rules_2010EmsNov09.pdf>

February 28, Mongolian RTTY DX Contest, Email logs to: jtdxrtty@gmail.com, paper logs and diskettes to: Mongolian RTTY DX Contest, P.O. Box 830, Ulaanbaatar-24, Mongolia. Rules <http://www.hornucopia.com/contestcal/mongoliandxrtty2010.pdf>

February 28, AGCW Straight Key Party, Email logs to: htp@agcw.de, paper logs and diskettes to: Friedrich W. Fabri, DF1OY,

Hermann-Bahner-Strasse 1, D-63225 Langen, Germany. Rules
<http://www.agcw.org/en/?Contests:Straight_Key_Party>

March 1, New Mexico QSO Party, Email logs to: NMqsoparty@yahoo.com,
paper logs and diskettes to: New Mexico QSO Party, c/o Valencia County
ARA, P.O. Box 268, Peralta, NM 87042, USA. Rules
<http://pages.swcp.com/%7En5zgt/nmqsoparty/documents/NMQP_forms.pdf>

March 1, BARTG RTTY Sprint, Email logs to: ska@bartg.org.uk, paper logs
and diskettes to: (none). Rules
<http://www.bartg.org.uk/documents/Contests/Sprint/BARTG%20Sprint%20Rules%202010.pdf>

March 1, AWA Linc Cundall Memorial CW Contest, Email logs to:
mjmurphy45@comcast.net, paper logs and diskettes to: Mike Murphy, 38
North Reading St., Manchester, NH 03104, USA. Rules
<http://www.antiquewireless.org/pdf/cundall_add_comments.pdf>

March 1, CQ WW RTTY WPX Contest, Email logs to: rtty@cqwpx.com, paper
logs and diskettes to: CQ RTTY WPX Contest, 25 Newbridge Road, Suite
405, Hicksville, NY 11801, USA. Rules
<http://www.cqwpxrtty.com/rules.htm>

March 1, RSGB 1st 1.8 MHz Contest, CW, Email logs to:
1st160.logs@rsgbhfcc.org, , upload log at:
http://www.rsgbcc.org/cgi-bin/hfenter.pl?Contest=1st 1.8MHz
Contest&year=2010,
<http://www.rsgbcc.org/cgi-bin/hfenter.pl?Contest=1st%201.8MHz%20Contest&year=2010,>
paper logs and diskettes to: (none). Rules
<http://www.rsgbcc.org/hf/rules/2010/r18mhz.shtml>

March 1, SARL Field Day Contest, Email logs to:
hfcontests@netactive.co.za, paper logs and diskettes to: SARL Field Day
Contest, PO Box 12104, Brandhof, 9324, South Africa. Rules
<http://www.sarl.org.za/public/contests/SARL%202010%20Contest%20Manual.pdf>

March 2, REF Contest, CW, Email logs to: cdfcw@ref-union.org, paper
logs and diskettes to: F6CTT, Cornee Fromy Joseph, Route de Coesmes,
F-35240 Retiers, France. Rules
<http://concours.ref-union.org/reglements/actuels/reg_cdfhfdx.pdf>

March 2, UBA DX Contest, SSB, Email logs to: ubassb@uba.be, paper logs
and diskettes to: UBA HF Manager, Carine Ramon, ON7LX, Bruggesteenweg
77, B-8755 Ruiselede, Belgium. Rules
<http://www.uba.be/sites/default/files/uploads/hf_contests/ubatest_dx.pdf>

==> ACKNOWLEDGEMENTS

ARRL Contest Update wishes to acknowledge information from WA7BNM's
Contest Calendar <http://www.hornucopia.com/contestcal> and SM3CER's
Contest Calendar <http://www.sk3bg.se/contest>.

The ARRL Contest Update is published every other Wednesday (26 times
each year). ARRL members may subscribe at no cost or unsubscribe by
editing their Member Data Page as described at

http://www.arrl.org/contests/update/.

==> ON-THE-AIR : CALLING ALL ROOKIES -- AND NON-ROOKIES, TOO! GET ON
THE AIR FOR THE ARRL ROOKIE ROUNDUP

The ARRL Rookie Roundup is designed to help newly licensed amateurs
build their operating skills on HF. It is a contest specifically for
those new to Amateur Radio, similar to the ARRL Novice Roundup that ran
from 1952 until 1995. The Rookie Roundup brings the fun and Elmering of
the old Novice Roundup into the 21st century. Three Rookie Roundups
will be held each calendar year: SSB in April, RTTY in August and CW in
December. Read more here
<http://www.arrl.org/news/stories/2010/02/18/11349/?nc=1>.

==> ARRL LEADERSHIP : ROD BLOCKSOME, K0DAS, APPOINTED MIDWEST DIVISION
VICE DIRECTOR

ARRL President, Kay Craigie, N3KN, has appointed Rod Blocksome,
K0DAS, of Robins, Iowa, as the new Vice Director in the Midwest
```

Division. The position became vacant when Midwest Division Director Bruce Frahm, K0BJ, was elected ARRL Vice President at the 2010 ARRL Board of Directors Annual Meeting and Vice Director Cliff Ahrens, K0CA, moved into the Director position. "I'm honored to be selected as the Vice-Director of the ARRL Midwest Division and am looking forward to serving the division hams to the best of my ability," Blocksome told the ARRL. "I grew up in Kansas, lived in Iowa and have traveled to more than 50 different countries, so I hope to bring my Midwestern roots - as well as a multi-cultural/international perspective - to this position." Read more about Blocksome here <http://www.arrl.org/news/stories/2010/02/16/11344/?nc=1>.

==> ARRL LEADERSHIP : GRANT HOPPER, KB7WSD, APPOINTED NORTHWESTERN DIVISION VICE DIRECTOR

ARRL President, Kay Craigie, N3KN, has appointed Grant Hopper, KB7WSD, of Everett, Washington, as the new Northwestern Division Vice Director. The position became vacant when no one submitted the necessary election materials needed to run for the Vice Director position. Hopper is an attorney and serves as an ARRL Volunteer Counsel (VC). "I'm excited to serve the Northwest Division," Hopper said. "We have a phenomenal number of talented, innovative, committed, and generous hams here in the Northwestern Division. I look forward to not only doing what I can to support their efforts and the activities within the division, but also representing their interests up at the national level. From my community and volunteer activities -- as well as my law practice -- I tend to think of myself as a 'behind the scenes' sort of person, bringing people together, examining issues and solving problems. I think those skills will serve me well as a Vice Director and I'm glad I can share them for the benefit of Amateur Radio." Read more about Hopper here <http://www.arrl.org/news/stories/2010/02/17/11346/?nc=1>.

==> EYE ON AWARDS : MORE ON THE IARU REGION 2 AWARD

Since the announcement <http://www.arrl.org/news/stories/2010/02/11/11335/?nc=1> on the ARRL Web site of the IARU Region 2 Award <http://www.iaru-r2.org/wp-content/uploads/r2-award.pdf#pdf> last week, Region 2 officials have been busy answering question from amateurs all over the world about this award, first introduced in October 2007. According to IARU Region 2 Secretary RamÃ³n Santoyo, XE1KK, officials have analyzed the questions and have now clarified the rules, making them easier to understand. You can access the newly rewritten rules <http://www.iaru-r2.org/wp-content/uploads/r2-award.pdf#pdf> on the IARU Region 2 Web site <http://www.iaru-r2.org/>.

==> ARRL PUBLICATIONS: CHECK OUT THE MARCH/APRIL 2010 NCJ

The March/April issue of NCJ, The National Contest Journal, is filled with the latest news from the contesting world. Whether you are new to contesting or are a seasoned pro -- or somewhere in the middle

-- you will find something in NCJ just for you. In addition to all of the exciting articles in the March/April issue, you will find all of the regular columns and features that you expect from NCJ: "Workshop Chronicles," by Don Daso, K4ZA; "Contest Tips, Tricks and Techniques," by Gary Sutcliffe, W9XT; "VHF-UHF Contesting," by Jon Jones, N0JK; "RTTY Contesting," by Don Hill, AA5AU; "Propagation," by Carl Luetzelschwab, K9LA; "Contesting on a Budget," by Ralph Bellas, K9ZO; "Software for Contesters" by Pete Smith, N4ZR, and "Contesting 101," by Kirk Pickering, K4RO. NCJ is published six times a year by the ARRL; it is edited by Al Dewey, K0AD. NCJ is what every contester needs in his or her shack -- subscribe today <http://www.arrl.org/ncj/>! Read more here <QEX%20--%20the%20March/April%202010%20Issue>.

==> ARRL PUBLICATIONS: QEX -- THE MARCH/APRIL 2010 ISSUE

The March/April issue of QEX <http://www.arrl.org/qex> is coming soon, and it is full of theoretical and practical technical articles that you won't want to miss. QEX is the ARRL's "Forum for Communications Experimenters." Published bimonthly, it features technical articles, columns and other items of interest to radio amateurs and communications professionals. The mission of QEX is threefold: To provide a medium for the exchange of ideas and information among Amateur Radio experimenters; to document advanced technical work in the Amateur Radio field, and to support efforts to advance the state of the Amateur Radio art. QEX is edited by Larry Wolfgang, WR1B <lwolfgang@arrl.org>. Subscribe to QEX today <http://www.arrl.org/qex>. Read more here <http://www.arrl.org/news/stories/2010/02/16/11345/?nc=1>.

==> W1AW NEWS: W1AW ANNOUNCES NEW SCHEDULE FOR DIGITAL BULLETIN TRANSMISSIONS

Beginning Monday, March 15, W1AW, the Hiram Percy Maxim Memorial Station, will alternate the digital modes used for its digital bulletin transmissions. While Baudot, PSK31 and MFSK16 still make up the digital mode complement, W1AW Station Manager Joe Carcia, NJ1Q, says that the schedule will be altered to give more exposure to PSK31 and MFSK16. "Because of time constraints and the varying lengths of digital bulletins, there were many instances where only Baudot was used," he said. "With the new schedule, amateurs preferring either PSK31 or MFSK16 will no longer find these modes secondary." Read more here <http://www.arrl.org/news/stories/2010/02/16/11343/?nc=1>.

==> SOLAR UPDATE

Tad "The Sun did not shine, it was too wet to play <http://en.wikipedia.org/wiki/The_Cat_in_the_Hat>" Cook, K7RA, reports: We have been seeing improved conditions with moderate sunspot activity, and we should keep seeing these good conditions this weekend for the ARRL International DX Contest (CW) <http://www.arrl.org/contests/rules/2010/intldx.html>. The average daily sunspot number for the past week was 38.7, down 4.6 points from

the prior week, but the average daily solar flux rose 4 points to 90.6. The predicted solar flux for February 18-22 is 88, 88, 86, 85 and 84. The planetary A index for the same period is predicted at 10, 10, 5, 5 and 5. Look for more information on the ARRL Web site on Friday, February 19, including a look at some new resources for grabbing up-to-the-minute data from ionospheric sounders. These are very useful for studying HF propagation paths and understanding phenomena that we recently discussed on 75 meter short-skip propagation. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by Dr Seuss' The Cat in the Hat <http://en.wikipedia.org/wiki/The_Cat_in_the_Hat>.

==> ARRL FIELD DAY : 2010 FIELD DAY PACKETS NOW AVAILABLE

It's that time of year again -- time to start gearing up for ARRL Field Day, June 26-27, 2010! ARRL's flagship operating event -- always held the fourth full weekend in June -- brings together new and experienced hams for 24 hours of operating fun. Field Day packets are now available for download <http://www.arrl.org/contests/forms/fd-2010-packet.pdf> and include the complete rules (including changes for 2010), as well as other reference items such as forms, ARRL Section abbreviation list, entry submission instructions, a Frequently Asked Questions section, guidelines for getting bonus points, instructions for GOTA stations, a kit to publicize your event with the local press and more.

==> W1AW NEWS: MARCH W1AW/WEST COAST QUALIFYING RUN SCHEDULE

The March schedules for the W1AW and West Coast Qualifying Runs were inadvertently left out of the March issue of QST. The March schedules for W1AW are as follows: Friday, March 5 at 10 PM EST (Saturday, March 6 at 0300 UTC) for 10-25 WPM and Tuesday, March 16 at 7 PM EDT (2300 UTC) for 10-40 WPM. The West Coast Qualifying run will be transmitted by station K6KPH on Saturday, March 13 at 2 PM PDT (2200 UTC) for 10-35 WPM. The run will be transmitted simultaneously on 3581.5, 7047.5, 14047.5, 18097.5 and 21067.5 kHz.

==> THIS WEEK ON THE RADIO

This week, the ARRL International DX Contest (CW) <http://www.arrl.org/contests/rules/2010/intldx.html> is February 20-21. There is another NCCC Sprint Ladder on February 19. The Feld Hell Sprint is February 20, the Run for the Bacon QRP Contest is February 22 and the SKCC Sprint is February 24. Next week, look for an NCCC Sprint Ladder on February 26. The Russian PSK WW Contest and the CQ 160 Meter Contest (SSB) are on February 26-27. The REF Contest (SSB), the EPC WW DX Contest, the UBA DX Contest (CW), the Mississippi QSO Party and the North American QSO Party (RTTY) are all on February 27-28. The High Speed Club CW Contest is February 28. The North Carolina QSO Party is February 28-March 1. The ARS Spartan Sprint and

the AGCW YL-CW Party are both on March 2. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> NEW ARRL WEB SITE COMING SOON

After more than two years of planning, designing and writing, we here at the ARRL are eagerly anticipating the launch of the new ARRL Web site. We've been able to make the online experience easier for our members -- from the online store, to registering for a class, to finding a club -- plus we've created a new, enhanced member profile with many more options available. We've made improvements with you in mind, making sure that we've created the easiest, most enjoyable online experience possible. The new Web site will be available at the end of February.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, February 21, 2010, for these online course sessions <http://www.arrl.org/cep/student/> beginning on Friday, March 5, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1697 - February 19, 2010

Amateur Radio Newsline report number 1697 with a release date of
Friday, February 19th, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. The ARRL commits to helping change rule
97:113 so more hams cab take part in disaster drills, the FCC issues a
giant waiver to part 97.113 covering thirty-two licensed ham employees
in Georgia, a California ham solves a Broadcast Remote Pick-up jamming
problem and rare earth is growing a lot rarer. Find out the details
on Amateur Radio Newsline(tm) report number 1697 coming your way right
now.

RADIO LAW: ARRL SAYS VIA QST IT WILL FILE TO REVISE FCC RULE 97.113 TO
PERMIT HAMS TO VOLUNTEER EMCOMM TRAINING SERVICES TO EMPLOYERS

The ARRL appears poised to ask the FCC to liberalize Section 97.113 of
the Amateur Service rules. This to give hams more leeway in taking
part in emergency training drills sponsored by their employer.
Amateur Radio Newsline's Mark Abramowicz, NT3V, has been following
events in this ongoing saga and has the latest:

--

With the arrival of February's QST comes confirmation that the American
Radio Relay League is, indeed, preparing to formally join the call for
change to Section 97.113.

Dave Sumner, K1ZZ, confirmed the issue has been a hot topic ever since the
release of a report from an ARRL board ad-hoc committee regarding the whole
issue of "pecuniary interest" and amateur radio.

Given how much attention the issue has gotten at the FCC - the result of
petitions filed requesting changes in the rule - the ARRL is now ready to
act.

In his editorial in the February QST, Sumner referred to the ARRL's board
motion instructing ARRL staff to "urge the FCC to add an exception to
97.113 of the FCC Rules to permit an amateur station - licensee or control
operator, on behalf of an employer, to 'participate in emergency
preparedness and disaster drills that include amateur operations for the
purpose of emergency response, disaster relief or the testing and
maintenance of equipment used for that purpose. "

Sumner concedes in his editorial that there are a wide range of views from among ARRL's membership ranks with some suggesting there be no change at all in the rule to others saying it's just too limiting.

Sumner says: "Given that the FCC appears to be inclined to consider changes, it behooves the ARRL as the representative of the broadest constituency of radio amateurs to formulate an approach that addresses the bulk of the concerns about the present rules with as little impact as possible on the volunteer character of Amateur Radio."

As we told you a few weeks ago when we reported on a petition on the matter filed by Rich Moseson, W2VU, of CQ Magazine, this isn't going to happen overnight. As Moseson concluded, the FCC is likely to await the ARRL's petition and then put that together with input from some of the other filings before issuing a Notice of Proposed Rulemaking. And, that could take a few months before it comes out for comment.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Along with the filing from educator Gordon West, WB6NOA and his two associates, and the one from CQ Magazine, the rules change petition from the ARRL will make three requests to the FCC with one singular purpose. That of making it possible for hams to volunteer their services when their employer is holding an emergency training exercise and doing so without having to have the employer first file for a waiver from the FCC. (ARNewsline(tm) from QST Editorial)

**

RESCUE RADIO: POSSIBLY THE LARGEST EMCOMM WAIVER YET

Meantime, the FCC continues to quickly grant waivers to governments and emergency providers looking to use ham radio operators in their employ as part of disaster response training exercises. The latest is to Stephens County Emergency Medical Services of Toccoa, Georgia to permit their employees and those of the Stephens County Hospital to transmit communications on behalf of their employers in connection with a twelve hour March 17th exercise.

And in what may be the largest numbers to date, this waiver issued on February 16th from the FCC's Deputy Chief of its Mobility Division covers thirty-two radio amateurs in the employ of the these organizations who have volunteered to take part. The waiver specifically permits transmission of communications by the amateur service employees on behalf of their employers during the exercise, and immediately prior to it for the purpose of operational testing of equipment. You can read the text of this waiver at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-10-246A1.txt (FCC)

**

RADIO WEATHER: WINTER STORM CLOSES FCC

Due to back-to-back major snowstorms in the Washington metropolitan area last week, the Federal Communications Commission was forced to postpone two important meetings. One was the Wednesday, February 10th was to be public forum on creating an emergency response center for pubic safety broadband communications. The other its monthly open public meeting on Thursday the 11th.

The commission's February open monthly meeting was rescheduled for February
18th. Two items on the agenda concern streamlining the agency's processes to make the FCC's work more transparent. One is a Notice of Proposed Rulemaking to enhance the efficiency, openness and transparency of the commission's proceedings by improving and modernizing certain organizational and procedural rules. The concerns the so-called "ex parte"
rules, which govern reports written by those who meet with commission officials to sum up what was discussed. (FCC)

**

HAITI UPDATE: IRESC HAM RADIO RELIEF EFFORTS OVER THE INTERNET

A report from the International Radio Emergency Support Coalition says that its members went into full activation bringing immediately after the earthquake that devastated much of the island nation of Haiti. According to Chris Johnson things on the Echolink based conference net sprang to life when David Farquharson HH2QCS and Jean-Robert Gaillard HH2JR were able to get into contact with the Coalition. They both had rather grim reports. HH2JR noted that he had lost several close family members. He also lost his cousin, Micha Gaillard, the Opposition Leader in Haiti. Jean-Robert himself reported that had been attacked by mobs.

The International Radio Emergency Support Coalition through the Echolink Net and the database on its website says that it was able to help with the limited amount of information coming out of the island, along with collecting information on missing people, coordinating of supplies to people on the ground, along with general inquires. At one point the Coalition says that it had over 200 hams monitoring its net for Haiti operations. It says that this shows the true potential of the use of Echolink along with other amateur radio internet applications for use in the use of emergency communications.

The International Radio Emergency Support Coalition bills itself as an alliance of volunteer communicators spread around the globe. More about this group is on-line at www.iresc.org. (IRESC)

**

MISSING PERSON: UK POLICE SEARCH FOR MISSING RADIO AMATEUR

Police in the United Kingdom are in search of missing radio amateur. The Tamworth Herald reports that police are appealing for help in tracing 43 year old David Andrew Salisbury, M3FDZ, of Newton Regis who not been seen since Friday January 29.

Salisbury, a married father of two disappeared unexpectedly and without a trace. He is described as a white male and around 5 foot 5 inches tall. He has what is described as striking straight white hair and was last seen wearing blue jeans, a gray T-shirt with the words 'Rock and Roll' in red, a blue hooded top and black cap with the letters 'NY' on the front in white lettering.

M3FDZ is a member of Tamworth Amateur Radio Club which is also concerned about his welfare. More details and a photograph of David Salisbury, M3FDZ, can be found at www.thisistamworth.co.uk/news/Appeal-trace-missing-Tamworth-man/article-1823807-detail/article.htm
(Southgate)

ENFORCEMENT: 450 MHZ INTERFERENCE NAILS METRO TRAFFIC IN SAN DIEGO

Ham radio training in direction finding is responsible for bringing a quick end to the jamming of a broadcast repeater run by Metro Traffic in Southern California. Bill Pasternak, WA6ITF, spoke to the ham who solved the problem so that the airborne traffic reports could continue:

--

According to broadcast engineer Matt Lunati, N6OEI, Metro Traffic's voice repeater in San Diego was jammed about a week ago by a large number of simplex hand-held radios that were pressed into service by the near-by La Mesa-Spring Valley School District. The radios were reportedly programmed to transmit on 455.500 MHz and sold to the School District by an equipment dealer that told the district not to worry about licensing.

455.500 MHz is Metro's licensed repeater input frequency and the resulting interference that jammed Metro's helicopter communications.

So N6OEI used his direction finding skills garnered from hid amateur radio training to track down the source of the interference:

--

N6OEI: "I heard children's activities being described on the channel. And the next day I trook a listen after what would be school hours (and) drive time for us when we have our chopper in the air and noticed that the communications came up again on our frequency and tracked it to the elementary school located in the Casa D'Oro area of San Diego County. It took me about 30 minutes. There was a lot of chatter on the frequency so

finding it and DF'ing it was not difficult at all."

--

He then met with the school district staff to explain that 450 to 460 MHz is not a licensee-free band:

--

N6OEI: "To rectify the problem immediately, because obviously they did not know the amount of problems they were causing, I went and made contact with the school principal who was very accommodating and very apologetic and ceased operation right there and assured me this would not happen again."

--

Reportedly, the San Diego FCC field office is now involved in the case. The Commission might only go after the school district for allegedly operating on an unauthorized frequency. However the dealer could also face the Commission's wrath. This is because FCC Rule 90.427(b) states that: "Except for frequencies used in accordance with Section 90.417, no person shall program into a transmitter frequencies for which the licensee using the transmitter is not authorized."

Add to this a report carried in the C-G-C Communicator industry newsletter that quotes an informed stating that once it became obvious that 455.500 MHz was causing interference, the equipment vendor reportedly supplied a list of other frequencies for the district to try. If such a list exists, it would be a smoking gun since the 450 band is not license free.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in the City of Angels.

--

Translated it means that the equipment dealer could conceivably be liable if the FCC decides to press the case. (CGC, ARNewsline(tm))

**

RADIO LAW: CELLPHONE BILLS BEFORE HAWAII HOUSE WILL EXEMPT HAM RADIO

Some good news for hams living on the Island state of Hawaii. It appears as if they will likely be safe from rules to be imposed on the mobile use of cellular telephones.

Pacific ARRL Section Manager Bob Schneider, AH6J, and Bart Aronoff, WH6AA recently testified before a Hawaii house subcommittee on HB 2225 however HB2602 is now before committee in place of 2225. Both measures deal with the use of cellular telephones while driving.

Conferees are now trying to combine HB2602 with SB2755 to come up with a final version. Both of these bills as well as the recently passed Kauai council bill 226 exempt amateur radio operators from the restrictions imposed by what is known as mobile cellphone

prohibitions. (hamradiohawaii via KH6QX)

**

ON LINE: NEW ARRL WEBSITE TO BE ON-LINE BY THE END OF FEBRUARY

The American Radio Relay League says that after more than two years of planning and design that the it is eagerly anticipating the launch of its new Web site. According to a posting at the current site, the new web design will be available at the end of February at the same URL. .

The big change is in overall design that the ARRL says should make the online experience easier for its members. The ARRL says that the improvements were made with visitors in mind to create the easiest, most enjoyable online experience possible.

A preview of the new web design can be found in the latest issue of QST magazine. And for the few of you who may not be aware, the on-line address of the ARRL website is www.arrl.org. (ARRL)

**

THE SOCIAL SCENE: W5KUB WILL AGAIN WEBCAST HAMVENTION

For the 8th consecutive year, Tom Medlin, W5KUB, and his crew of video enthusiasts will be webcasting the Dayton Hamvention. The live broadcast starts approximately 1300 UTC on May 13th and continue through May 17th over Tom's w5kub.com website.

The webcast begins and ends in Tom's driveway in Cordova, Tennessee and includes the scenic trip from Cordova to Dayton. And as last year, Tom plans to give away prizes to some who tune in.

The W5KUB.com website is available 24 hours a day, 7 days a week and 52 weeks a year for you to enjoy. Tom invites everyone to drop by, spend a few minutes and say hello on-line. And for more about Tom and his live roving webcasts look at his profile on qrz.com. (W5KUB)

**

THE SOCIAL SCENE: EASTERN VHF/UHF CONFERENCE IN APRIL

Registration is now open for the 36th Annual Eastern VHF/UHF Conference slated for April 16th to the 18th at the Crowne Plaza Hotel, in Enfield, CT. Also, the NorthEast Weak Signal Group is calling for the submission of papers and presentations on both the technical and operational aspects of VHF, UHF and Microwave weak signal amateur radio. The latest conference news can be found on-line at http://www.newsvhf.com/vhfconf.html (ANS, N2LIV)

**

THE SOCIAL SCENE: NEBRASKA ARRL CONVENTION IN MARCH

The ARRL Nebraska State Convention End of Winter Hamfest will take place on March 20th at the Lancaster Event Center located at 84th and Havelock in Lincoln. Among the featured speakers are Bob Allison, WB1GCM, from ARRL HQ giving a look at the ARRL Lab and how it works and the ARRL Midwest Division Director, Cliff Ahrens, Kï¿½CA,. Ahrens will be bringing attendees up to date happenings at ARRL HQ and within the Division. For more information, please visit the www.lincolnhamfest.org. (Kï¿½AIZ)

**

NAMES IN THE NEWS: K0DAS NAMED NEW ARRL MIDWEST VICE DIRECTOR

ARRL President, Kay Craigie, N3KN, has appointed Rod Blocksome, K0DAS, of Robins, Iowa, as the new Vice Director in the Midwest Division.

Among his many Achievements, Blocksome has been a member of the Central States VHF Society since 1975 and a Charter Life Member since 2001. He has served as President of the organization in 1984, 1991 and 1998, with 21 years on its Board of Directors. He is also the recipient of the Society's 1993 Mel Wilson Award. An avid Collins Radio aficionado, Blocksome has been a member of the Collins Collector Association since 1996 and has served two years on its Board of Directors.

The position of Midwest Division Vice Director became vacant when Director Bruce Frahm, K0BJ, was elected ARRL Vice President at the recent 2010 ARRL Board of Directors Annual Meeting. As a result, then Vice Director Cliff Ahrens, K0CA, moved into the Director seat. (ARRL)

**

NAMES IN THE NEWS: N4KC TO PUBLISH 21st BOOK IN APRIL

Don Keith N4KC will release his twenty-first book titled War Beneath the Waves in early April. This is the non-fiction work that will tell the story of USS Billfish. The Billfish was an American submarine that came under an intense depth-charge attack in the Makassar Strait off Borneo in 1943. And in an interview with Rain's Hap Holly, KC9RP, Don gave a little background on the story:

--

"Well, as it happens the captain of this submarine completely lost it. The second in command was overcome by bad air and couldn't breathe. The third in command had to be sedated and put in his stateroom because he lost it. So the forth in command, a young sub-mariner named Charlie Rush actually took over from the captain. It might be called a mutiny at some points but it had to happen. He took over and (with) a couple of Navy Chiefs just performed miraculous feats that night and saved the boat."

--

N4KC says that this incident brought out the worst but also the best in its crew. It was also a story that was not revealed for sixty years.

War Beneath the Waves will be published in hardback by NAL/Caliber. This is an imprint of Penguin Group USA. Don also maintains a web site devoted to his writings on amateur radio at www dot n4kc dot com. And you can hear the complete interview with Don Keith, N4KC, on-line at www dot therainreport dot com. Its one you will not want to miss. (N4KC, KC9RP)

EMERGING TECHNOLOGY: NEW 100 GHZ TRANSISTOR ANNOUNCED

Its the fastest high frequency transistor ever developed. Amateur Radio Newslines Frank Haas, KB4T, reports:

--

Researchers at IBM have demonstrated a graphene-based radio frequency transistor with a high frequency cut-off of 100 Gigahertz. This new top frequency record was achieved using wafer-scale processing technology comparable to that used in the fabrication of advanced silicon devices

For those who have never heard the term, graphene is described as a single atom-thick layer of carbon atoms bonded in a hexagonal honeycomb-like arrangement. This two-dimensional form of carbon has unique electrical, optical, mechanical and thermal properties and its technological applications are being explored intensely.

The development of this new 100 Gigahertz transistor is considered a key milestone for the use of Carbon Electronics for RF Applications. The development of this new transistor was recently made public in a paper published in the magazine Science.

--

Funding for this project was funded by the Defense Advanced Research Projects Agency in an effort to develop next-generation communication devices. (Science OnLine)

EMERGING TECHNOLOGY: GOOGLE COULD BE YOUR NEXT ISP

Google could become your next Internet Service Provider or ISP. This, according to news reports that say the search engine provider wants to offer super-fast broadband to thousands of US homes.

It the reports are accurate then Google's plan is to build a fiber-optic network offering speeds of up to 1gigabit per second and roll it out in up to 500,000 homes. And to do this at a price point that would compete with other broadband providers offering much slower speeds.

According to Google's on-line blog the plan is to build and test ultra high-speed broadband networks in a small number of trial locations across the United States. The company already has an internal fiber optic network which connects its data centers. This speeds up search functions and lowers the cost of streaming video on YouTube. (BBC, Science Today, others)

**

WORLDBEAT: NEW DRM DISCO STATION ON SHORTWAVE

If you think that shortwave is a dead medium for entertainment then you may be surprised to learn about a Miami-based disco music station can now be heard across North America and Europe. The Disco Palace is using Digital Radio Mondiale or D-R-M technology to broadcast high-quality music programs on shortwave.

Programming for The Disco Palace consists of disco music from the 1970s and 1980s or music closely related to disco. North American broadcasts originate on 17.755 MHz from French Guiana. European transmissions are on 6.015 MHz from France. Transmission services are being provided by Digital Radio Mondiale pioneer TDF of France. (DRM Info)

EMERGING TECHNOLOGY: NEW POWER MANAGEMENT CHIPS FROM TI

Texas Instruments Incorporated has introduced its first dual-output fully synchronous SWIFT(tm) power management integrated circuit. TI says the TPS54290 converter simplifies power design in consumer electronics with a 12 volt power supply. The new device operates from a 4.5V to 18V input supply voltage, and supports output voltages as low as 0.8V with a 90 percent power efficiency rating. More is on the web at www.ti.com (PSD)

**

HAM RADIO IN SPACE: ASTRONAUT RON GARAN TO GET HIS HAM TICKET

Another astronaut is preparing to take his ham radio exam. Ron Garan recently participated in an Amateur Radio on the International Space Station program training session and plans to study for his amateur radio license. Garan is scheduled to fly with the Expedition 27 crew in March of 2011. (ARISS)

**

RADIO IN SPACE: ARECIBO DISH ACTIVE FOR APOLLO EME 2010

Echoes of Apollo EME 2010 or World Moon Bounce Day, is scheduled for the weekend of April 16, 17, and 18. This year, EOA has been given a special opportunity to use the Arecibo Dish in Puerto Rico as the ultimate "big

gun" station on 432 MHz SSB & CW. EME operation on 1296 MHz may also be possible.

Arecibo has more than 50 dbi gain on 432 MHz so the team thinks it can be heard with modest equipment. Listeners with a unique opportunity to utilize modest UHF and 1296 stations to copy EME signals. A large OSCAR-class antenna array equipped station may be able to participate. (Echoes of Apollo)

**

DX

In DX, word that F8ALU is active from Morocco as CN2BG and will be there until the beginning of March. You usually will find him on 14.115 and 14.130 MHz. QSL via his home call.

JT1JC has been very active in RTTY and PSK31 from Mongolia the last few weeks. Listen for her on 20 meters on PSK from 2245 to 0030 UTC and in RTTY from 0700 to 0800 UTC. QSL via PO Box 73, Ulaanbaatar-35, Mongolia.

DL1NL is operating portable OA4 from the Peruvian capital Lima through mid to late February. He is active mostly in CW on HF whenever his time permits. QSL cards should be sent via his home call.

V31RI is the call of DL6RAI, operating in Belize through March 2nd. His QTH is Consejo Beach and you can expect activities mostly in CW and in SSB. QSLs via bureau or direct to his home call. He's also accepting electronic cards via Logbook of the World.

And lastly, NP2OR is active from Uganda and will be there until May. He is on the air as 5X7JD using SSB on 20 and 40 meters daily from 0500 to 1550 UTC. QSLs only direct via Jack Dunigan, Box 100, Masaka, Uganda.

(Above from various DX news sources)

THAT FINAL ITEM: RARE EARTHS GETTING RARER

And finally this week comes word that rare-earth elements such as Europium, Tantalum, Neodymium and countless others that form the backbone of today's modern solid state electronics and ham radio gear could eventually be in short supply. This, according to an article by Jeremy Hsu published by Yahoo On-Line that says China's growing electronic production industry has become the worlds largest user of these rare elements.

According to Hsu, rare earth's often prove irreplaceable in green technologies and high-tech consumer products. Yet the world's production of rare minerals relies mainly upon China, and the Chinese government warned last year that its own rising demand will soon force it to stop exporting the precious elements.

Deposits of rare earth elements exist in the United States, Canada and other countries, but only China's government supports the mining and

refining industries capable of processing the resources from start to finish. And while China has encouraged companies that use rare earths to locate their manufacturing facilities in that nation, some companies fear moving because of concerns about intellectual property protection.

Hsu's article is an insightful look at materials that affect almost everyone's daily life and especially those in ham radio. You can find it on-line

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award is now open. Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www dot arnewsline dot org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening.

*** FY / GJ35 ***

Hermann, DL2NUD, is qrv meantime from French-Guiana (QTH: GJ35SA)
LATEST NEWS from Hermann, FY/DL2NUD, dated 2010-02-18 20UT: After the
crash of the PA past weekend, Hermann started his EME work on 70cm.
Meantime MMMonVHF did start a SPONSORING request at the EME community
(we was happy to see such a good solidarity at the EME-community! In
less than 1 week we did recieve more than 1,5 k Euro for Hermann! Some
of it is used for the transport of the new PA, some is send meantime to
FY to help to orga the back transport of the faulty one! the rest will
be given to hermann when he is back at DL for the repair... the list of
Sponsor (as well all latest News) are available at:
www.mmmonvhf.de/latest.php?id=3064 The new 2m PA (BEKO HLV 750) was

send out at BEKO begin of the week! 2m PA seems to be at customs now and
he will try to get it as soon as possible at FY. So maybe he can be on
19th or after weekend again if all ready again! He did send many thanks
to all the people to make that possible and sure will not forget it!
SOURCE: tnx to Hermann, DL2NUD, direct to MMMonVHF

*** T7 / JN63 ***

DX-pedition to T7 / San Marino (JN63FW) by the PI9CM DX group.
During a very nice dinner last year with Anto, IK4PMB - we talked
about the possibility to activate San Marino in 2010. Well, plans
are made and we hope to become active on VHF; EME/MS/Tropo/ etc.
Calls: T70A via EME and T7/homecall via MS. Dates: 20 - 25 April
More details: http://www.mmmonvhf.de/latest.php?id=3120
SOURCE: tnx to Chris, PA2CHR, direct to MMMonVHF

*** EA8 / IL38 ***

David, G4RGK, will be at EA8 in april (14th until 28th) again and
qrv from IL38BQ. Usual 144m station, hope to have more power on 432
If any tropo I may go /p to IL28. More details and activity info
please do subscribe: http://www.mmmonvhf.de/latest.php?id=3112
SOURCE: tnx to David, G4RGK, direct to MMMonVHF

*** IS / JN41 ***

Members of the F6KOP Team will be active as IS0R from Isola Rossa
Sardinia (Loc. JN41KA), between May 7-15th. Activity will be on
160-6 meters, using 3 stations on HF and 1 station on 6 meters.
They plan to use CW, SSB and RTTY. Each station will be a FT450
with an Acom 1010 using Micro Ham and PC. Antennas include 6m Yagi
Beam, Spider Beam for 30-10m, 4 square for 40m, vertical for 80m
(K9AY) and an Inverted L for 160m plus a beverage. Operators
mentioned are: Team leader Thierry/F4TTR (SSB), Sebastien/F5UFX
(SSB), John/F5VHQ (SSB), Sergio/IS0AWZ (SSB), Norbert/F6AXX (CW)
Maurice/F5NQL (CW), Bruno/F5AGB (CW), Jean-Paul/F8BJI (Digi),
Henri/F1HRE (Digi) and Frank/F4AJQ (Digi). QSL route TBA.

*** JA / QM05 ***

8J1AXA has a plan to operate 1296MHz next weekend, Feb. 20-21.
This time they invites some college students who operate from

their club stations for contests. PSE come and call. TNX & GL
SOURCE: Mike JH1KRC via MoonNet

*** SV5 / KM36 ***

Willi, DJ7RJ will be active from the island of Kos (EU-001, GIOTA DKS-043, MIA MGD-016, WLOTA LH-1730, Grid KM36) as SV5/DJ7RJ from 24 February to 17 March. He will work 160m to 6m using CW and SSB preferably on the low bands. QSL direct to home call.
SOURCE: [NG3K] via ICPO Bulletin (18-25 February 2010)

*** G / IO93 ***

Special event station GG100WD for Wilton Division Guides will be operating in Batley on the weekend of 20 and 21 February. The station will be operational on HF, 2m and 70cm from 11am on Saturday to 2pm on Sunday. QSL via the RSGB Bureau.
SOURCE: [GB2RS] via ICPO Bulletin (11-19 February 2010)

*** E4 ***

Palestine, E4. [Update]. Antonio, EA5RM and the Tifariti Gang (EA2RY EA5FX, EA7AJR, EA7KW, F5CWU, F6ENO, F9IE, IN3ZNR and UT7CR) will be active as E4X from Palestine from 28 May to 6 June. They plan to operate CW, SSB and RTTY on 160-6 metres, with at least three stations active at the same time on different bands and modes. QSL via EA5RM. The website for the expedition is at www.dxfriends.com/e4x/
SOURCE: 425 DX News #980

*** CY0 ***

SABLE ISLAND (CY0) next trial... The scheduled 2009 Operation that was placed on HOLD due to family illness is proceeding with the planning for a Dxpedition in the Sept/Oct 2010 time frame. The web site will be updated as more details are available: http://www.CY0dxpedition.com Operators include: WA4DAN, AA4VK, N0TG AI5P. Operation: 160 - 6 Meters including WARC bands CW SSB RTTY and FM Satellite (tentative). SOURCE: Randy, N0TG via Bill/NG3K DX-News

*** P29 / QI30 ***

Paju, YO5BIM, will be active as P29VIM until February 21st. Activity will be on 30-6 meters using CW and SSB. He was spotted this past weekend mainly on 30 meters. He will be active mostly during his evenings. QSL via his home callsign or per his instructions.
SOURCE: Ohio/Penn DX Bulletin #947

112. GB2RS NEWS Sunday 21st February 2010

Newsgroup: rec.radio.amateur.misc
Date: 2010-02-19 16:36:52 UTC
From: Newsdesk@rsgb.org.uk
Message-ID: <20100219163644.04F2033C45@panix2.panix.com>
Source record: 6081
Cross-posted to: uk.radio.amateur,rec.radio.amateur.misc,rec.radio.info

GB2RS NEWS

Sunday 21st February 2010

The news headlines

* UK CW operators sought for DXpedition

* Changes to the GB2RS news service in the North East

* Worked All Britain Award deadline approaching

Paul Ewing, N6PSE, has several open positions for CW operators on the DXpedition team headed to Kurdistan in April. They would love to have several operators from the UK join the team. The team says that costs for this DXpedition are quite reasonable and they will be operating from a very safe and secure facility. Anyone interested in joining the DXpedition team may contact Paul directly by e-mail to paul@n6pse.com or check out the website at www.yi9pse.com.

Listeners to GB2RS in East Yorkshire need to be aware that the Scarborough two metre repeater GB3YC is to be changed to D-Star operation. This means that the current GB2RS news reading taking place at 1130 hours via the repeater is now being terminated because the news readers are not equipped for D-Star operation. GB2RS coverage for the North East region will, of course, continue on 80 metres on 3640kHz lower sideband at 1100 hours, and this is provided by news readers in Driffield and Hull. The complete GB2RS Broadcast Schedule can be found in the Members' Area of the RSGB website, together with other useful information about the RSGB News Service.

The Worked All Britain Ruby Award has now finished. As trophies will be presented at the Worked All Britain AGM at the Spalding Rally on 6 June, all claims must reach the WAB Awards Manager, G4IAR by 28 February. G4IAR is QTHR. Please note that the Worked All Britain 40m net frequency has moved to 7160kHz in line with the revised band plan.

This year, the 23rd International Marconi Day will take place on the 24 April. Although not a contest, awards can be obtained and full details can be found at www.gb4imd.org.uk. For a station to be counted towards an award by applicants, that station must be registered by contacting the webmaster by e-mail at webmaster@gb4imd.org.uk prior to the event with full details of the station. In order to qualify as an Award Station, operations should take place from a site that either used Marconi equipment prior to his death in 1937 or from which Marconi carried out experiments during the same period.

Repeater keepers and other amateurs interested in repeater operation recently gathered at the Lough Erne ARC for a talk from John McCullagh, GI4BWM, Chairman of the RSGB's Emerging Technologies Coordinating Committee on the technical aspects of building a repeater. It provoked much sharing of experiences among Keepers from Northern Ireland and the Republic. Herbie Graham, GI6JPO gave a demonstration of cavity tuning. He has built the new Fermanagh Repeater GB3CP and changed the coverage to give better coverage east to the Belfast hills but less coverage in West Tyrone, an area well served by GB3WT. The Dutch National Radio Fleamarket takes place on 13 March at Autotron at 's-Hertogenbosch, just off A59 motorway in Holland. It's open from 9am to 3.30pm. Details can be found on the website at www.radiovlooienmarkt.nl.

And now for the details of rallies and events for the coming week

The Radio Active Rally will take place today, 21 February, at Civic Hall, Nantwich, Cheshire CW5 5DG. Doors open at 10.30am and there will be trade stands, a Bring & Buy and catering on site. Details from Simon Chettle, G8ATB, on 01270 841506.

Also today, 21 February, the Swansea ARS Rally will be at a new venue. Following the major fire at the Afan Lido the show has now re-located to the Court Herbert Sports Centre, Neath Abbey SA10 7BE, 2 miles from M4 J43 via A465. Doors open at 10.30am and admission is £2.50. There is a free car park and plenty of trade stands, a Bring & Buy as well as special interest groups. Details from Roger, GW4HSH, on 01792 404422.

On 28 February the Rainham Radio Rally will take place at Rainham School for Girls, Derwent Way, Rainham, Gillingham, Kent ME8 0BX. Full details from Trevor, G6YLW, on 0771 7678 795.

Sadly, we've heard of a cancelled rally. The 4th Chesterfield Rally that was due to be held on 24 April has been cancelled due to the high price of the venue this year. However, the organisers say that if they can find a suitable alternative in the future, they will be back. For their latest activities check out their website at www.m0oct.com.

Now for the news of special events

The 75th anniversary of the Daventry Experiment by Sir Robert Watson Watt, which led to the birth of British Radar as his team at Bawdsey developed the vital Chain Home radar system for the RAF and many others is set to be marked by a trio of special event stations over the weekend of 26 to 28 February. GB75BRS will be on the air from Bawdsey Manor on HF, 6m and VHF, operating CW, SSB and possibly some digital modes too. GB75RDF and GB0RDF will be on the air from the ex- BBC masts at Daventry. GB75CH will be on the air from the Chain Home mast at Great Baddow Details of these special events stations are available on qrz.com.

The multi million pound Thanks for Life campaign is part of a worldwide attempt by Rotary International to rid the world of polio and is supported by the Bill & Melinda Gates Foundation. A radio station will be set-up on a stall in Knaresborough Market place on Wednesday 24

February during market day. There will be a fundraising component to the station, which will use the callsign GB0TFL. The station will be using an FT1000MP running 100W SSB on the 80 and 20m amateur bands and it's hoped that full sized half wave dipoles, 12m high will be erected to radiate a decent signal.

The Newbury & District Amateur Radio Society will be activating GB0VUL next month to promote awareness and publicity on the plight of the Vulcan Bomber. The Trust has until the end of the month to raise £300,000. If they fail to reach this target, the Vulcan will never fly again. Another £350,000 has to be raised in March for the aircraft to appear at air-shows this year. More details can be found at www.vulcantothesky.org.

And now the HF DX news compiled from 425 DX News and other sources.

Art, NN7A will be operating from Belize as V31JZ from 24 February until 3 March. He will be operating from the Turneffe islands, which is IOTA reference NA-123. This will be a one-person operation using a 100 watt transceiver with vertical and wire antennas. Operation will be mostly CW on the 40 to 17m bands including WARC bands, with some 80m and 160m. There may be some SSB on 20m and 15m IOTA frequencies if possible, conditions permitting .QSL to NN7A either direct or via the bureau.

Lothar, DK8LRF, intends to become active as HK3JCL again working in SSB, PACTOR, RTTY and PSK31 mainly on 20m and 40m from 20 February until Easter from Colombia. His equipment includes a Kenwood TS-50, an Annecke antenna coupler, PTC II and a Rhombus antenna pointing to Central Europe. QSLs via the bureau to DK8LRF. If you are interested in a sked please e-mail him at dk8lrf@gmx.de.

Cato, 5Z4/LA9PF, will be staying in Kenya for three months. He plans to work on all bands with his 100 watts, a 3 element Yagi and a loop antenna. Cato prefers SSB and the digital modes but also works in CW sometimes. Direct QSL cards are preferred via PO Box 5642, Malindi, 80200 Malindi, Kenya.

Three Bangladeshi operators, S21RC, S21S and S21D, will operate as (probably) S21DX from St. Martin's Island, AS-127, from 21 to 25 February. Although primarily intended as an IOTA operation, this could well be a good opportunity for country chasers to catch what has once again become quite a rare DXCC entity.

G3SWH and G3RTE will be active as VK9X/G6AY from Christmas Island from 20 to 27 February. It's OC-002 for IOTA and is number 66 on the DX Magazine's 2008 most wanted survey, worldwide. Phil and Jim will be CW only, all bands 80 to 10m, going with the best propagation with two stations on the air as many hours a day as possible. QSL via G3SWH, direct with SAE and return postage or via Phil's website, for a bureau reply, or the regular way with a bureau card.

Now the contest news

The 50MHz UK Activity Contest takes place between 2000 and 2230UTC on Tuesday 23 February. You can use all modes and the exchange is signal report, serial number and locator.

The first of this year's 70MHz Cumulatives takes place on Sunday 28 February between 100 and 1200UTC. The exchange is signal report, serial number and locator. The penultimate event of February is the CQ WW 160m SSB Contest on 26 to 28 February. It takes place between 2200 and 2200UTC. The exchange is signal report and CQ Zone, although Ws send their state and VEs send their Province number.

The month ends with the SSB leg of the REF Contest on 27 and 28 February. Work French stations only. Unlike many international contests, there are only a few categories. Single-op stations can enter single- or multi-band, but for multi-op stations its all-bands and a single-transmitter only. There are no separate categories for different power levels. Send a report and serial number, but expect to receive a report and a Department code (or prefix from French overseas territories). The timing is 0600 and 1800UTC and the exchange is signal report and serial number with French stations sending their department number or overseas prefix.

Now the solar factual data for the period from the 8th to the 14th of February, compiled by Neil Clarke, G0CAS on the 15th of February.

We start this week with the latest smoothed monthly sunspot numbers which are for May, June and July 2009 and are 2.3, 2.7 and 3.6 respectively. Not only is the rise from minimum continuing it is also accelerating.

The solar disc had several sunspot groups visible everyday. Solar activity varied between low and high. Everyday C class solar flares took place but the largest flare of the week was a M8/1N which occurred on the 12th. On the 8th four M class flares took place. Sudden ionospheric disturbances and coronal mass ejections took place with some of the larger flares. There has been more solar flare activity this week alone than what took place in 2008 and 2009 put together. Solar flux levels increased from 91 units on the 10th to 96 by the 12th. The average was 93. The 90 day solar flux average on the 14th was 79, that's one unit up on last week. X-ray flux levels averaged B1.8 units and varied little day to day. Geomagnetic activity was quiet everyday and averaged Ap 4 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 290 kilometres per second on the 9th to 400 by the 12th. Particle densities were low throughout except for a rise to 20 particles per cubic centimetre on the 11th. Bz never varied more than minus and plus 9 nanoTeslas during the period.

The combination of heightened flux levels and continuing quiet geomagnetic conditions resulted in improvements on HF propagation, including the higher bands. 28MHz, contacts were reported from the UK with Malaysia and the eastern Mediterranean, while the Caribbean and the southern United States were among areas worked on 24MHz. 14MHz was

also markedly improved.

And finally the solar forecast. If the present level of solar activity continues then we can expect much of the same for the coming week. Beware though, as quick as this present active spell started it can end just as quick. After months during 2009 when hardly a sunspot was visible, we now have had only three spotless days since the 8th of December. Anyway, this week the quiet side of the Sun is expected to be looking our way. Solar activity should be very low to low. Solar flux levels are expected to be around the 80 mark. Geomagnetic activity should be quiet everyday. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. Darkness hour lows should be about 8MHz. Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of around 26MHz. The optimum working frequency with a 90 per cent success rate should be about 21MHz. The best time to try the path will be between 0900 and 1400UTC.

And that's all for this week from the propagation team.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late ARRL DX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the ARRL DX CW Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 12th-February, through Friday, 19th-February there were 225 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/n, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T30, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9W, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2M, SCOTLAND (Satellite Op). Paul, 2E1EUB, will once again be active as 2M1EUB from March 20th for 7 days. He will be active on all the satellites from northeast Scotland in the Cairngorms National Park. Also, look for him on 160 and 80 meters. Checkout QRZ.com under 2M1EUB for more info.

5H, TANZANIA (Update). Igor, UA3DJY, who was operating as 5I3A in Dar Es Salaam from the DIT Communications Club station, has finally received his own callsign and is now active as 5H3ACR. He will be there until March 1st. He will try to be active on all bands. This past week Igor was on 12/10 meters CW and 15 meters SSB. QSL via RK3AOL.

5K, COLOMBIA. A DXpedition is being planned to operate from the Laguna Grande de la Sierra, from where you get the legendary rock formation called Devil's Pulpit, the peak Sugarloaf Peak and Concave. Callsign will be 5K7SNC. This will be only a two day operation. Announced dates and hours of operation frequency are:
April 1st - 7140 kHz between 1700-2400z
April 2nd - 7140 kHz between 0000-1700z
QSL via HK3OCH. For more details and possible updates, visit QRZ.com under 5K7SNC.

5R, MADAGASCAR (IOTA Op). Michele, IK5ZUI, will be active as 5R8UI from Nosy Be (AF-057) starting early March. He will stay there possibly for one year. More details are forthcoming.

5W, SAMOA (Update/ZK3 Cancelled). Operators Bill/N7OU and Bob/W7YAQ, who are currently active as 5W0OU and 5W0YA, respectively, from Apia, were expected to leave February 18th and set sail for Tokelau (ZK3). However, Bill informs OPDX that the boat trip to Tokelau has been cancelled because of bad weather (a developing tropical depression between Apia and Tokelau, 500 miles to the north). They will wait in Samoa and continue to operate as 5W0OU and 5W0YA. Look for them to be active in the ARRL DX CW Contest (February 20-21st) using the callsign 5W0OU.

7P, LESOTHO. Pista, HA5AO, will once again be active as 7P8AO from the Trading Post Lodge, Roma near Maseru, between March 8-22nd. Activity will be on the HF bands, 80-10 meters using CW, SSB and RTTY. He will be using an ICOM 7000 transceiver w/300 watt amp into a 10.2m wire vertical antenna with a SG-235 automatic antenna coupler. QSL via LoTW, or via HA5AO by the Bureau or direct. An online log search will be available on Pistaï¿½s Web site at: http://ha5ao.novolab.hu

8Q, MALDIVES. Alex, UX4UL, will be active as 8Q7IA from the Maldives (AS-013) between now and May 18th. Activity will be mostly CW and PSK. Currently Alex has antennas installed for 40/20/17 meters. QSL via UY5ZZ.

9M4, WEST MALAYSIA. Members of the Malaysia Amateur Radio Transmitters' Society (MARTS) will activate the "Southern Most Tip of the Asia Mainland" between February 26-28th. QTH will be Tanjung Piai, and their callsign will be 9M4STE. Activity will be on 40/20/15/10/6 meters using CW and SSB. For more details and updates, visit their Web page at:
http://dxpeditionmalaysia.blogspot.com/

9U, BURUNDI. A German team of operators will be active from Safari Gate Hotel in Bujumbara between February 22nd and March 6th. Operators mentioned are as follows with their callsign:
Helmut/DL3KBQ as 9UXEV (Yes, this callsign is correct!)
Henry/DL2RSI as 9U1RSI
Peter/DH2KI as 9U1KI
Jurgen/DJ2VO as 9U1VO
They plan to have 4 stations with 100 watts using vertical or wire antennas. Operations will be on CW, SSB and RTTY. QSL via their home callsigns, by the Bureau or direct.

AAW ANNOUNCEMENT. Gianni, I1HYW, reports that I0METEO will be operating during the 7th Antarctic Activity Week (February 22-28th) from the Italian Air Force Base "Mario De Bernardi" located at Pratica di Mare near Rome. He states, "This is the greatest Italian military airport and the second Base in Europe for largeness. It is a Center of several IAF units, amongst which we cite the most important ones: Experimental Flight Unit (with 311th Flight Group), 14th Flock (with 8th and 71st Flight Groups) and 15th CSAR Flock (combat SAR). On the same IAF Base stands the National Center of METEOROLOGY and AERONAUTICAL CLIMATOLOGY (CNMCA). The weather station of Pratica di Mare is the main reference unit for the IAF Meteorological service and for World-wide Meteorological Organization; and is therefore, the site from where Meteorologists are studying and acquiring practice to leave for Antarctica during the Italian Research expeditions at MZS Station. Thanks to the General Staff of the IAF Gen. BA Daniele Tei, to Col. Costante De Simone Commander of CNMCA and the Official Commanders of Pratica di Mare AFB who granted permission and support. A group of referenced Italian Hams representing WAP-Worldwide Antarctic Program (www.waponline.it), will operate from inside the Base during the 7th AAW using a special callsign II0METEO (WAP-190) just issued by the Ministry of Communications. Operators will be: Carlo/IK2IWU, Gianni/I1HYW, Marcello/IW2MNO, Lorenzo/IK1MDF, Gian-Luigi/IZ8EWB and Maurizio/IK5DEZ. QSL via IK2IWU."

AAW ANNOUNCEMENT. Scotty, WK3N, will operate in this year's Antarctic Activity Week as WK3N/AAW (WAP# 192) from February 22-28th. Just a reminder that the A.A.W. information is available at:
http://www.waponline.it/Default.aspx?tabid3
A WAP A.S.E.A. award is available for working 5 Antarctic Activity Week special event stations. Information is available at:
http://www.dreamingsea.it/diplomaasea.asp

CO6, CUBA. Operators Luis/CO6LP, Orelvis/CO6LC, Yordany/CM6YAC, Carlos/CO6CAC, Jose/CO6EC and CO6YWR will be active as T46A during the ARRL DX SSB Contest (March 6-7th) as a Multi-Single entry. QSL via CO6LC.

CO6, CUBA. Luis, CO6LP, will be active in the ARRL DX CW Contest (February 20-21st) as a Single-Op/Single-Band (15m) entry. QSL via CO6LP direct.

CO8, CUBA. Eduardo, CO8LY, will be in the ARRL DX CW Contest (February 20-21st) as a Single-Op/Single-Band (20m)/Low-Power entry. QSL via EA7ADH. Also, look for Juan Carlos, CO8TW, to be active in the contest as a Single-OP/Single-Band (15m)/Low-Power entry. QSL via HB9SVT. His log will

be on-line at: http://www.qsl.net/co8tw

CY0, SABLE ISLAND. The scheduled 2009 operation that was placed on
HOLD due to a family illness is now proceeding with the planning for a
DXpedition in the September/October 2010 time frame. Operators mentioned
include: Murray/WA4DAN, Ron/AA4VK, Randy/N0TG and Rick/AI5P. Team members
will sign homecall/CY0. Activity will be on 160-6 meters, including the
30/17/12m bands, using CW, SSB, RTTY and the FM Satellite (tentative).
The Web site will be updated as more details are available at:
http://www.CY0dxpedition.com

E2, THAILAND. Operators Dej/E21YDP and Champ/E21EIC will be active during
the ARRL DX CW Contest (February 20-21st) as a Multi-Single entry. QSL
via E21YDP.

IOTA NEWS.....
EU-040. Twelve members of the Portuguese's Algarve Star DX Team will
be active as CQ7OA from Berlenga Island between June 10ï¿½13th.
QSL via CT1FMX.

SA-077. A group of Brazilian scout amateurs will activate Santana Island
(ARLHS BRA-062, DFB RJ-04, DIB RJ-06 and WLOTA-0714) between
February 25th and March 1st, and during the "2010 South American
Lighthouses Weekend". Activity will be on 80-10 meters using CW
and SSB. Their frequencies will be near the usual DX/IOTA fre-
quencies as follows:
CW : 3525, 7020, 10110, 14020, 18070, 21020, 24890 and 28020
SSB : 3795, 7070, 14,260, 18140, 21270, 24960 and 28480 kHz
Operators mentioned are: Orlando/PT2OP, Vieira/PY1LVF and Lima/
PY1NEZ. Look for them to sign PV1S and homecall/p. QSL PV1S and
PT2OP/p via PT2OP. QSL PY1LVF/p and PY1NEZ/p via PY1NEZ. Send
QSLs either direct or by the Bureau.

KH6BZF PROPAGATION FORECAST/REPORT (For February 22-28th)....
Feb 22 AN SOLAR REFERENCE KEYS
Feb 23 AN --------------------
Feb 24 AN BN - Below Normal
Feb 25 AN AN - Above Normal/Geomagnetic Level is QUIET
Feb 26 AN LN - Low Normal
Feb 27 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Feb 28 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

* PLEASE NOTE (From KH6BZF): THE NEXT 27.5-DAY SOLAR CYCLE IS FORECASTED
FOR 1-6th MARCH, 2010, WITH SFI (SOLAR FLUX INDEX'S) BETWEEN THE HIGH

80'S TO LOW 90'S....

LX, LUXEMBOURG. Operators Willfried/DF4PD, Chris/DL7CS, Mike/DF3VM and Philippe/LX2A will be active as LX7I during the ARRL DX CW Contest (February 20-21st) as a Multi-2 entry. QSL via LX2A. Also, operators Frank/DL4VCG and Philippe/LX2A will be active as LX7I during the CQ 160-Meter SSB Contest (February 26-28th) as a Multi-Op entry. QSL via LX2A. Visit the following Web page at: http://www.lx2a.com

LZ123, BULGARIA (Special Event). Members of the Balkan Contest Club (LZ1KZA) will operate with special event callsign LZ132GO between March 1-31st. Activity is to commemorate 132nd anniversary of the liberation of Bulgaria from Ottoman yoke by Russia. QSL via LZ1ZF. Special event station LZ132GO also counts for 10 points towards "St. Teodosii Tyrnovski Award": http://www.balkanclub.org/awards.htm

MM0, SCOTLAND (WFF Activity). Members of the Scottish-Russian ARS will activate MM0DGR/p from the Blawhorn Moss National Nature Reserve (GMFF-009) on Saturday, 20th February, 2010. The portable station will be located at the Langside Wood (southwest corner of the reserve, near small town Blackridge); grid locator IO85CV, WAB NS86, EU Area SC32 (West Lothian), IOTA EU-005. For more info please have a look at: http://www.srars.org/wff-reports/gmff-009.htm
Their equipment: Icom IC-706MKIIG with HLA-300 Plus (300W) HF Power Amplifier. Antenna: 40m long multiband doublet fed with 450-ohm feeder line, and mounted as an inverted "V" on a 15m high escalated fiberglass pole. CG-5000 automatic antenna coupler will be mounted at the bottom of the pole.
Participants of the ARRL International DX CW Contest will occupy all CW and PSK frequencies on Saturday, 20th February, 2010. Therefore, MM0DGR/p will adhere to the following frequencies ï¿½ QRM: 20m (SSB 14.244 MHz); 30m (BPSK63 10.142 MHz, CW 10.124 MHz); 40m (SSB 7.144 MHz). QSL cards via MM0DFV (preferably RSGB QSL-bureau).
Blawhorn Moss National Nature Reserve (NNR) is the largest and least disturbed lowland raised mire or bog in the Lothians. It is situated in the hills northwest of Blackridge, west of Armadale. Peatland was once common in Central Scotland but very little remains today with most bogs being cut for peat, drained for farming or planted for forestry. This makes remaining areas such as Blawhorn Moss very important. This expedition is organized under the WFF award program. If you still don't know about the WFF (World Flora and Fauna) award program, please have a look at the Web page: htt://www.wff44.com

NP4, PUERTO RICO (NA-099). Alfredo, WP3C, will be active as NP4DX in the ARRL DX CW Contest (February 20-21st) as a Single-Op/Single-Band (80m) entry. His activity will also count for the WLOTA as LH-2802. QSL via W3HNK, direct preferred, but Bureau is OK. Visit his web page at: http://www.wp3c.qth.com/np4dx.htm

ON30, BELGIUM (Special Event/Contest). Egbert, ON4CAS, Secretary of the Belgian IARU Society UBA & Award Manager, informs OPDX that special event station ON30ON (Oscar November Thirty Oscar November) will be active

during the months of March, April, September and October of 2010. Activity is to commemorate the 30th edition of the Belgian "ON Contest". The contest was first organized in 1980 to celebrate the 150th anniversary of the Kingdom of Belgium. Since then, the yearly event - lasting just four hours on a local Sunday morning - has become increasingly popular. QSLs for ON30ON go via the UBA bureau or direct to ON4CAS. A special certificate which can be achieved for free has been created in PDF format. Full details are available at: http://users.telenet.be/egbert.hertsen/on30on.html

P4, ARUBA. Andy, K2LE, will be active as P40LE during the ARRL DX CW Contest (February 20-21st) as a Single-Op/All-Band (80-10m)/Lower-Power entry. QSL via K2LE.

PACIFIC TOUR. Hugh, K6HFA, has announced that he will be in the South Pacific from early March until late April and plans to activate the following islands:
Samoa (5W) - March 3ï¿½10th; IOTA OC-097
Tonga (A3) - March 12thï¿½April 2nd; IOTAs include OC-049, OC-064 and OC-123.
Wallis (FW)- April 6ï¿½12th; IOTA OC-054
Tuvalu (T2)- April 13ï¿½21st; IOTA OC-015
Fiji (3D2) - April 23ï¿½26th; IOTA OC-016 or OC-156.
Hugh plans to be on CW, SSB and possibly RTTY using 100 watts into a multi-band vertical antenna (for 80-15m). Look for him on the IOTA frequencies or possibly other frequencies. Hugh plans to call by areas (EU, NA, SA, ASIA... etc..) per propagation. Callsigns are TBA. QSL via K6HFA. Look for more details to be forthcoming.

QSL INFO AND NEWS.....

QSLS VIA LoTW: 4Z4DX, D2QMN, EA1YO, EA6DB, EI9FBB, F5CQ, G3YBY, HB9TQL, HK3GXI, HI8LAM, HK4SAN, HK6P, IZ5HNI, J79XBI, JE1FQV, KL8DX, ON7MV, TX4T, UR5ZVP, UT0EA, VP5T, VX9NC, XE1KK, XE1R, XR0Y and YL3GP

QSLS RECEIVED VIA MAIL: 5H3EE, 6W/EI6DX, CE0Y/SM6CUK, CE0Z/SM6CUK, CP4BT, FK8CP, II1ANT, II1MNA, IR1WAP, T32BJ, TL0A, UA0FO, VK9WBM, YS4/N0AT and YS4U

QSLS RECEIVED VIA THE BUREAU: None reported this week!

RADIO ARCALA NEWS (By Jarmo, OH2BN). "Radio Arcala, OH8X, reports great interest and we have received many applications from younger contesters to travel to 65 degrees North and contest under large frozen antennas at OH8X. < http://www.radioarcala.com > Given the level of interest, the conclusion is that hosting young amateurs at contest stations should be promoted on a broader scale as part of the contesting landscape. The 2010 team will be welcomed to the city of Oulu by OH6KN and OH8NC. < http://www.ouka.fi/english/index.asp >
Marius Hauki, LB3HC, will be heading a group of four and the team includes Andreas Kristiansen (30), LA8AJA, Stein Roar Brobakken (30), LA6FJA and Antti Nevantaus (28), OH7EA. They are experienced CW and contest operators who look forward to putting out big signals from Radio

Arcala. They plan to run M2 in the ARRL DX CW Contest and also to be active the day before the contest. QSL via OH2UA.
By the same token, Radio Arcala's Ville, OH2MM, is moving permanently to Brazil and will soon be QRV as PY2ZEA. His farewell operation from Europe will be in the ARRL DX CW Contest as CR2X. Ville will team up in the Azores with Martti, OH2BH, and Pertti, OH2PM, as a multi-op entry. QSL via OH2BH.
< http://www.cu2a.com >

T32, EASTERN KIRIBATI (Update). Last week we mentioned (in OPDX.947) that a team of operators would activate four uninhabited IOTA islands (in the Southern Line Islands Group) that have never been put on the air before between mid-March and early April. This past week, another operator was added to the team -- Steve, 9M6DXX.

T4, CUBA. Operators Doug/CO8DM and Raul/CO8ZZ will be active from their club's radio contest station as T48K during the ARRL DX CW Contest (February 20-21st) as a Multi-Single entry. QSL via DK1WI.

TC2010, TURKEY (Special Event). All the stations for "Istanbul 2010 Award" (TC2010CCE for Europe; TC2010CCA for Asia and TC2010CCI for the Islands) will be active during the Russian WW PSK Contest on different bands between February 19-20th. The "Application Form for the Istanbul 2010 Award" is now available at the following Web page (PDF or Doc format) at:
http://www.ta0u.com/2010/Award/ApplicationForm.pdf
ADDED NOTE: Activity by TC2010PSG for the "Istanbul 2010 European Capital of Culture Award" will take place between March 20-22nd. For details on this award and the rules, see the following URLs:
http://www.ta0u.com/2010/eng/pdf/TC2010PSG.PDF
http://www.ta0u.com/2010/eng/pdf/2010AWARDCatalogue.pdf
Some pictures from the opening night of the "Istanbul 2010 European Capital of Culture" are available at the following URLs:
http://www.ta0u.com/galeri.asp
http://www.ta0u.com/galeri2.asp?id

TI8, COSTA RICA. Operators Keith/W4KTR, Eddie/K4UN, Bob/W4BW, Lex/W4XO, Carlos/TI2KAC, Juan Carlos/TI2JCY and TI2ZM will be active as TI8M from Costa de Pajaros, during the ARRL DX SSB Contest (March 6-7th) as a Multi-? entry. QSL via TI2KAC, direct preferred but bureau "OK".

TX5SPA/TX5SPM STORY. A story on last year's DXpedition to the Austral and Marquesas Island is now available on the following Web page at:
http://www.strangeradioteam.com

V2, ANTIGUA & BARBUDA (Update). Alan, N3AD, will be active as V26M between March 4-7th. Activity will include the ARRL DX SSB Contest (March 6-7th) as a Single-Op/High-Power entry. Alan informs OPDX that he will definitely be on Thursday afternoon and evening and on Friday before contest. His activity will be on the HF bands only - 160/80/40m in evening and 20/15/10m during daytime. QSL via his home callsign.

V3, BELIZE. Operators John/WC0W, George/K5PI and Mike/K5NZ will be active as V31TP during the ARRL DX CW Contest (February 20-21st) as a Multi-Single

entry. QSL via WC0W.

YI9, IRAQ. Operators Dooley/W4VDW and Louis/KI4VEU will be active from Baghdad as YI9VDW and YI9VEU, respectively. Operations are anticipated to begin in late February or early March. Activity will be on 160-10 meters including the 30/17/12m bands. Plans are to also activate an EchoLink node. QSL YI9VDW to his home callsign W4VDW and YI9VEU via LoTW. UPDATE: Echolink is YI9VDW-R (node # 496161), on daily between 1200-1230z (or when you see it active!). HF activity will take place for YI9VDW between March 1-7th. Suggested frequencies are: 20m: 14125-14300 kHz SSB between 1500-1600z; 40m: 7100-7200 kHz SSB between 1600-1700z.

ZL8, KERMADEC ISLANDS. On February 15th, a team of operators received the final approval from the DoC (Department of Conservation) in New Zealand to land on Raoul Island (OC-039) and stay there for about 18 days. The well-known boat called the "Braveheart" with its captain Nigel Jolly will take a team of operators and their equipment to the island. Expected (preliminary) arrival date is November 18th, and the departure date is December 7th. They plan to be on the air as ZL8X between November 19th and December 5th. Operations are to be on all HF bands, 160-10 meters, with 7 stations - all capable of all modes (CW, SSB and RTTY). The current list of operators are: Gerd/DJ5IW, Markus/DJ7EO, Heye/DJ9RR, Franz/DK1II, Chris/DL1MGB, Dietmar/DL3DXX, Andy/DL5CW, Tom/DL5LYM, Felix/DL5XL, Ben/DL6FBL, Dieter/DL8OH, Joerg/DL8WPX and Robert/SP5XVY. An "Online QSL Request System" (OQRS) will be used for both Bureau QSLs and direct QSLs via their Web page. Also available on their Web page will be Propagation info, an online log search, QSO statistics and pictures of the operation. The team is looking for sponsors to help offset their expenses. This is a very expensive operation, and each operator is paying 100% of their own travel costs, hotel accommodation and food, together with their own contribution towards logistics. Their expenses will be over 140,000 USDs. For more details on becoming a sponsor or information about this DXpedition, visit the ZL8X Web page at: http://www.kermadec.de
Also see their FACEBOOK at:
http://www.facebook.com/group.php?gid39475816412

ZF, CAYMAN ISLANDS (NA-016). John, K6AM, will be active as ZF2AM during the CQ 160 Meter SSB Contest (February 26-28th) as a Single-Op entry. QSL via K6AM, direct or by the Bureau or LoTW.

The following stations are expected to be active in the
ARRL DX CW Contest (February 20-21st, 2010)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2010 ARRL DX CW Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:

WIANEWS FOR WEEK COMMENCING FEB 21 2010.

The news today comes from members of the Central Coast Amateur Radio Club, at the
Kariong club house. Ian VK2HK, Pete VK2TPT, Col VK2ZCO, and Fred VK2FSP.

Next Sunday, 28th February, is the Wyong Field Day, at the Wyong Race Course,
Wyong NSW.

For those travelling to Wyong on Sunday 28th February, and requiring directions,
contact the Central Coast 2 meter repeater, VK2RAG, 146.725 MHz, using 91.5 Hz Tone
access.

We look forward to seeing you there"

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING FEB 21 2010

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Ewan McLeod VK4ERM vk4erm@wia.org.au
Secretary Geoff Atkinson VK3AFA secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

One of the services provided to affiliated clubs, is the WIA/QBE joint Liability Insurance policy.

There are 100 clubs currently participating in this policy. It will be due for renewal April 1 and all participating clubs will receive renewal information within days.

Any affiliated clubs that do not have Liability cover, or wish to change from their existing cover, to the joint policy are welcome to do so.

To find out details of the joint policy, please go to the WIA website, under member services you will find affiliated clubs information.

If your club does wish to join the policy, contact Ted Thrift vk2ara@wia.org.au

Ron Bertrand VK2DQ, who has been a director of the WIA since May 2008, had indicated his intention not to seek re-election this year, and notices calling for nominations were published in the December issue of Amateur Radio.

Ron subsequently indicated that for health reasons he wished to retire earlier, and accordingly the Board has accepted his resignation as a director with effect from 1 February 2010.

In doing so the Board expressed its regret and acknowledged the great contribution that Ron has made to both amateur radio and the WIA, particularly in the examination field, having worked extensively on behalf of the WIA with ACMA in the formulation of the syllabi for the various levels of amateur qualification, and after that as a Nominated Assessor, conducting many special assessments.

The WIA Returning Officer, Chris Chapman VK3QB, has advised the Board that only one new nomination for Director of the WIA was received, namely Christopher Platt VK5CP and accordingly and in accordance with the Election Regulations, he had declared Phil Wait VK2ASD, Bob Bristow VK6POP and Chris Platt VK5CP elected unopposed as Directors of the WIA.

Chris Platt was first licensed as VK3NCP in 1983, and then as VK3KCP in 1994. He moved to South Australia in 1988, and is member of the Adelaide Radio Experimenters Group. He is also a WIA Assessor.

He works as a member of the management team of a mining industry employer organisation, and holds degrees in Law and Arts. He brings to the WIA significant experience in business, law and lobbying.

His term as a Director commences at the conclusion of the WIA's Annual General Meeting, this year on Saturday 29th May 2010

WIA CENTENARY

The VK100WIA roster is full!

Next week we will hear how it will be put to air from more than 50 locations in all states, the Northern Territory and Australian Capital Territory. All in all, the WIA Centenary Committee believes there's a great mix of

activity planned.

HAMS ACROSS AUSTRALIA.

VK0

The annual Antarctic Activity Week takes place between 22 and 28 February.
The organisers say that this year's event could be better than previous years
with many more stations participating.

Yarra Valley Amateur Radio Group Hamfest at Healesville on February the 28th, opens at 10am and runs until 2pm. Entry fee is still $5 and the booking fees are the same as the last 10 years at $15 for an 8 foot table.

Bring the family and you can perhaps visit the Healesville Sanctuary or go to Marysville for afternoon tea and check out how the regeneration of the town and bush is proceeding. Full details are on the Yarra Valley Amateur Radio Group web site http://www.yarravalley.ar.org.au

Next months regular N.E.R.G. meeting is on Thursday 11th March, starting 7:45pm at the Briar Hill Community Hall, 126 Mountain View Rd.

The Centre Victoria RadioFest held on Sunday the 14th of February was an outstanding success.

Almost 600 people attended, including first time visitors from New Zealand and Japan, plus a number from VK2, VK5 and VK7.

This WIA Supported Centenary Event was mounted by Amateur Radio Victoria with the support of 20 enthusiastic volunteers from the Central Goldfields Amateur Radio Club led ably by its President, Peter Rafferty VK3CC.

The Kyneton Country Fire Authority brigade through its event catering raised $2,000 that will buy much needed fire truck equipment and pay for fire-fighter training.

Amateur Radio Victoria President Jim Linton VK3PC said that the state-wide membership organisation is proud to be able to assist the Central Goldfields Club and the CFA volunteers with their major fundraising efforts of the year, and to also run the third RadioFest for the amateur radio community.

Thank you to the event Treasurer and Trader Liaison, Ross Pittard VK3CE, Terry Murphy VK3UP, Peter Mill VK3APO, Barry Robinson VK3PV and their wives and partners.

While fearing to miss someone, Jim VK3PC thanked the Melbourne ATV group for its digital amateur television display, Scout Radio and Electronics Service Unit that ran foxhunting sniffer hunts, Tony Hambling VK3VTH the mini-lecture facilitator and the presenters at these well attended lectures.

Well done to the Bendigo District Astronomical Society and all others in the Club Corner Precinct with a record 14 clubs and organisations putting on displays.

Again it was eagerly supported by all the major commercial traders, specialist traders, and plenty of private second-hand equipment sellers.

And finally, I enjoyed myself immensely as event announcer and meeting so many people. Hope to see you at the Centre Victoria RadioFest No. 4 - I'm Bruce Lees VK3FFF.

"Sounds it was a lot of fun, Bruce, of course, here at Wyong, ours is next weekend, Sunday 28th February. The gates will be opened at 0630, though the Trader / Exhibitor area will be closed to the public until 0900.

Check our website, www.ccarc.org.au and click on 'Field Day' for regularly updated details.

For those travelling to Wyong on Sunday 28th February, and requiring directions, we can be contacted on the Central Coast 2 meter repeater, VK2RAG, 146.725 MHz, using 91.5 Hz Tone access, for assistance."

VKR Roundup
http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to Qnews from VK4WIA.

I'm Geoff Emery VK4ZPP and I have been thinking about the Amateurs Code and our responsibilities within clubs.

We join a hobby to find fulfilment and satisfaction in the pursuit that

is both a learning experience and a recreation. To enhance our enjoyment we find it helps to share our interests with others who share our passion. Just because we happen to be able use a microphone, key or keyboard doesn't necessarily bring that personal involvement. Throughout our communities there are associations, groups and clubs and we may belong to none or several of them already. Most clubs like to have a succinct expression of belief, practice and reason for belonging.

Individually we can describe ourselves as amateurs or hams and agree to

follow the Amateurs Code. When we come together in a club setting we can apply the same standards within our group structure. If our radio club is incorporated, part of it's capacity to act is to do things that are lawful which means that the club must not do anything which is illegal.

One of the benefits of WIA affiliation is that clubs get basic insurance cover at a very competitive premium.

We tend to think of our responsibility and the purpose of insurance as in preventing physical injury and compensating some-one should they be hurt. How many club members consider the requirements of the

anti-discrimination laws? Remember that your club executive and even members may become legally liable for acts that are unconstitutional and/or unlawful and it will also void insurance cover.

Take a hypothetical example - a member who has a medical condition that

causes them to freak out if put under pressure, receives telephone and email contact on behalf of the club. When the person tries to say they cannot deal with this type of confrontation, they find themselves effectively ignored and the terseness of the communications increase until such time as the member resigns and has to undergo continuing treatment because of the incident. The club president follows the resignation with a message that says "I hope you will be happy, now you

have left the club." You may think this could not happen but I know we have many ex-servicemen, veterans who suffer a condition known as post traumatic stress. I know some of my amateur colleagues are war veterans. There are many men and women who have suffered trauma which causes them

to suffer residual effects.

There are many instances of actions which would be classed as discrimination and this is an important point to consider.

When we read the Amateurs Code we see that "the Radio Amateur is considerate and never knowingly operates in such a way as to lessen the

pleasure of others....(and)...is friendly...kindly assistance, cooperation and consideration for the interests of others. These are the hallmarks of the amateur spirit."

If we apply these principles in our club life as well as personally we can be pretty sure that we can never fall foul of anti-discrimination laws or breach our duties as committee members.

Does your club have a policy in place to ensure members follow the Amateurs code? Does this policy give you the steps to follow should an unfortunate event occur?

Remember that we joined AR because we enjoyed it - let's keep the amateur spirit and keep the enjoyment growing in our centenary year.

I'm Geoff Emery VK4ZPP and That's What I think... how about you.....?

March General Meeting
This months meeting is on the 2nd of March and its the AGM.
Nominations are rolling
in for the committee positions so make sure you are at the meeting to vote for who you want to represent the club for the next 12 months. Also there will be voting for the Col McCamley award which is awarded to the member in the previous year that

has gone beyond the call of duty being involved and helping with club activities.

Summer VHF/UHF Field Day
The club again used the Howells Knob site for the Summer VHF UHF Field day and from all accounts it was a great time. Caterer Mike VK4YFL showed us how good he is in the kitchen, I wonder if his wife knows that, however one of the
participants had a nasty
headache the next day. Might have been something he drank.

New Callsign
Just before Christmas last year an exam was held to upgrade Tobi VK4FTTR from his Foundation licence. A little bit of persuasion got him to sit for the Advanced licence and now he is VK4TRA. Congratulations Tobi.

Until next time, this is Gordon VK4VP.

GOOD MORNING AND GREETINGS ! HERE IS DON VK4FNQA FROM NORTH
QUEENSLAND, WITH ALL OF
THE GOOD NEWS AND FUTURE HAPPENINGS.

THIS MORNING, I PASS ON THANKS FROM KEN VK4HAI AND KRISTYL-LEE FOR ALL THE GOOD WISHES AND CONGRATULATION MESSAGES SENT TO THEM ON THEIR WEDDING DAY SUNDAY FEBRUARY 14TH. THEY SAY THEY WILL CHERISH ALL CONGRATS AND MESSAGES FOR EVER MORE.

NOW I MUST TELL YOU ABOUT ONE OF THE FRIENDLIEST RADIO NETS IN THE LAND THAT IS HAPPENING AGAIN THIS TUESDAY EVENING FROM 7-30PM ON THE TOWNSVILLE VHF REPEATER - THE ANN RENTON MEMORIAL LADIES NET ! THE NET IS OPEN TO YOUNG AND OLD, YL OR OM AND IS A GOLDEN OPPORTUNITY FOR ANYONE WHO NEEDS PRACTICE ON-AIR TO GO ONTO THE NET AS SECOND OPERATOR. SO, JOIN THIS TUESDAY EVENINGS NET AND SEE IF THE YLS CAN OUTNUMBER THE OMS.

WATCH OUT BLUEWATER HERE COMES TARC! TARCADIANS AND SUPPORT CREWS WILL BE OPERATING IN THE 2010 JOHN MOYLE FIELD DAY CONTEST WITH A STATION LOCATED AT BLUEWATER SCOUT DEN, JUST A SHORT 20 MINUTES DRIVE NORTH ALONG THE BRUCE HIGHWAY FROM THE THURINGOWA CBD. COME ALONG FOR THE WHOLE WEEKEND OR FOR A DAY OR AN EVENING AND EXPERIENCE FIELD OPERATIONS RUNNING ON EMERGENCY POWER UNDER THE BIG SHELTERED HALL. CAMP OUT OVER THE WEEKEND OR TRUNDLE ALONG IN YOUR MOBILE SHACK CHARIOT OR MANSION WITH WHEELS OR EVEN PITCH THE SWAG OR MATTRESS IN THE HALL.
BRING YOUR BATTERIES, GENERATORS, RADIOS AND FIELD ANTENNAE FOR A GREAT WEEKEND OUT IN THE BUSH SOCIALISING, SWIMMING IN NEARBY BLUEWATER CREEK, CHECKING THE POTS FOR REDCLAW AND, OH - OH - OH YES, DOING SOME RADIO OPERATING DURING THE CONTEST.
VK4WIT WILL BE ON AIR AT THE HALL FROM FRIDAY EVENING MARCH 19TH UNTIL SUNDAY LUNCHTIME MARCH 21ST.
CONTACT TARC CONTEST MANAGER RICHARD VK4FRJG ON MOBILE 0400339543, THAT NUMBER AGAIN, 0400339543 FOR FURTHER DETAILS OR LET HIM KNOW YOU ARE GOING ALONG.

FINALLY, IT IS THAT TIME OF YEAR TO THINK ABOUT HAVING A FRIENDLY RELAXING TIME IN IDYLIC SURROUNDINGS WITH HAM FRIENDS AND SUPPORT CREWS. THAT'S RIGHT, ITS TIME TO BOOK

YOUR SPOT AT FNNQARG ! , THE FAR NORTH AND NORTH QUEENSLAND AMATEUR RADIO GATHERING HAPPENING FROM 11TH TO 14TH JUNE OVER THE LONG WEEKEND AT CARDWELL VILLAGE BEACHCOMBER MOTEL AND TOURIST PARK. IT IS THE YEARLY GATHERING FOR THOSE FROM CAIRNS, ATHERTON TABLELANDS AND TOWNSVILLE REGIONS PLUS LOTS OF PLACES IN BETWEEN AND FAR AWAY. IT IS ADVISABLE TO RING RECEPTION AT THE PARK ON 1800 005633 TO BOOK YOUR ACCOMMODATION AS SOON AS POSSIBLE AS THE LONG WEEKEND IN JUNE IS A VERY POPULAR TIME. A WIDE MIX OF ACCOMMODATION FROM MOTEL TO VILLA TO CAMPING IS AVAILABLE.

WELL THATS ALL FOR THIS WEEK FROM TROPICAL PARADISE. THIS HAS DON VK4FNQA FOR THE TOWNSVILLE AMATEUR RADIO CLUB INC, AND YOU HAVE BEEN LISTENING TO; AND ENJOYING QNEWS FROM VK4WIA.

VK6

Northern Corridor Group Hamfest is Sunday August 1st at Cyril Jackson Sports Centre, Ashfield.

VK9

Phil, G3SWH and Jim, G3RTE are active from Christmas Island, IOTA OC-002, until February 27.

Both will use the callsign VK9X/G6AY with activity on CW only using all

bands between 80 and 10 metres.

QSL via G3SWH.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

The next Foundation Licence training and assessment weekend by Amateur Radio Victoria will be held on the 20th and 21st of March, at Ashburton. For inquiries or to enrol in a quality training experience please contact Barry Robinson VK3PV on 0428 516 001 or email foundation@amateurradio.com.au

Gordon VK4VP from the Sunshine coast of VK4 has told us Tobi VK4FTTR with a little bit of persuasion, sat for the Advanced licence and now is proud owner of callsign VK4TRA, congratulations Tobi.

If you are a non amateur or a short wave listener living in the North West, or West coast of Tasmania, and would like to become a licensed amateur radio operator, then get along to a meeting and find out about this interesting hobby.

If you cannot make the meeting but would like to find out more then contact Keith Winkler VK7KW, or any of the committee members.

Full contact details are available on their club site, as with all official clubs visit wia.org.au and do a search ob the club page.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the World Wide sources of the WIA.

IARU Region 3 adopts Japanese Yen as unit of currency for accounting

At the last IARU Region 3 Conference, it was voted that all accounts of the Region would now be maintained only in Japanese Yen and not in the two currency system of US Dollars and Japanese Yen as has been done for many years.

All subscriptions to Region 3 from member societies will also now be calculated in Japanese Yen only.

The reasoning was that all accounts are maintained in Tokyo and the old system involved a double currency conversion in many cases before it was credited to the IARU Region 3 banks, resulting in losses.

THE GREAT DESERT OF THE WORLD
Djelfa Ham club (7X2VFK)

Under patronage of the governor of the state of Djelfa and the Director of Youth and Sports, "the great Desert of the World" Djelfa radio club (7X2VFK) will organize an international HAM Meeting from 17 to 22 may 2010 with a special call for the event (all modes...), and a diploma instead of a QSL card.

The club will provide transportation from Algiers airport to Djelfa and Djelfa to Algiers airport.

Please contact the president of Djelfa radio club at email

bodil17000@yahoo.fr

The RSGB Convention is moving to a bigger venue for 2010. If you are planning on a trip to the Mother Country later in the year try to take in the RSGB Convention taking place between 8th and 10th October, at Horwood House, near Milton Keynes.

This new venue provides the RSGB Convention with new purpose-built meeting rooms, comfortable lounges and bars, delightful country surroundings and 182 en-suite bedrooms. All bedrooms are within the complex and have easy access to the lecture rooms that we will be using. It is just a short distance from Bletchley and Milton Keynes stations and easily accessible from the M1 motorway.

PETITION FILED FOR CREATION OF U.S. 4 METER BAND

QRZ.com lead moderator Glen Zook, K9STH, of Richardson, Texas has filed a Petition for Rulemaking to the FCC. One aimed at creating a 70.000 MHz to 70.500 MHz amateur radio band in the United States.

According to Zook, the recent migration of broadcast television stations to primarily the UHF frequencies has basically eliminated any probable interference to television channels 4 or 5 which otherwise might have occurred. This is because the 4-meter band is located on frequencies that were allocated to television channel 4. Since the 4-meter amateur radio band does not fall in the 72.0 MHz to 76.0 MHz segment which is allocated to Operational Fixed and various mobile services there would be no potential co-channel or adjacent channel interference.

WEIRD AND WONDERFUL

WiFi Suit: Neighbour Sues Neighbour For Using Electronics

The Santa Fe reporter newspaper reports that a Santa Fe man who alleges he suffers from "electromagnetic allergies" is suing his neighbour because she refuses to turn off her "gadgets".

According to the Santa Fe Reporter, Arthur Firstenberg, the plaintiff, has been sleeping at friends' homes or in his car to avoid the electromagnetic waves created by his neighbour's cell phone, wireless network, computer, compact fluorescent light bulbs and dimmer switches.

When the "new neighbour" moved in next door, she refused to keep her phone, computer and wireless network turned off when not in use.

When asked if she could use a landline instead of her iPhone, Firstenberg says the neighbour "flatly refused without explanation."

The battle against WiFi isn't one Firstenberg is fighting alone. He's part of a group of Santa Fe residents who are pursuing legal means to remove all WiFi hotspots from public locations because they claim the wireless internet waves aggravate their "electromagnetic allergies."

24.890 to 24.990
28.000 to 29.700

I'll go to jail before I pay up, says Chris Wright

That's a quote from Chris attributed to the Port Macquarie News that is
reporting on what began as a hobby has evolved into a nightmare for
amateur radio operator Chris Wright.

Wright said the council had forced him to disassemble the antennas after
receiving a complaint from a neighbour, who said the antennas were
interfering with his radio and he was also slapped with a standard fine for
erecting the antennas without approval.

Mr Wright has vowed not to pay the fine.

Mr Wright and his wife Karen, also an amateur radio enthusiast, have
written to Port Macquarie MP Peter Besseling.

Early listeners to this WIA National News, under the mast head of QNEWS may
remember Chris and Karen often filed stories from the NSW Mid Coast for us.

Back of the throttle!

Participants in a recent SARL President's Net have voiced concern that they feel an abuse of power by ZU license holders is taking place.

ZU licensees who do not adhere to the 20 Watt power limit as specified for their class of license can face fines or even cancellation of their license if they do not adhere to the condition laid down in the regulations.

This and the earlier reported use of bad language will be discussed when the South African Radio League (SARL) Council meets next.

Intruder Watch - a few highlights from recent observation reports

Based on bearings it appears that an Israeli Navy PSK Hybrid Modem System is intruding on to the 40-metre band with a centre frequency of 7001.8 Kilohertz.

Operating continuously it has been reported by the International Amateur Radio Union Region 1 as an intruder to the German Post and Telekom which is making further inquiries.

A Turkish military system is also suspected for another PSK signal on 7090.0 kilohertz.

On 40-meters a weak fax signal has been heard on 7090 and it may be a third harmonic. If that's confirmed though further monitoring then a complaint will be lodged.

On the 20-meter band an over-the-horizon radar signal with a bandwidth of about 83-kiloHertz has been reported from New Zealand. This appeared on 14.124 Megahertz and more reports on this one are needed.

The WIA Intruder Watch Coordinator is WIA Intruder Watch Coordinator is Karl Hennig VK6XW who can be contacted by email on intruders@wia.org.au

VK2BWI Slow Morse broadcast.

The VK2BWI slow morse practice broadcasts have resumed.

Are you interested in rising to the challenge of becoming a proficient morse code operator? Or perhaps just refreshing those rusty skills?

If so then listen in on Thursday evenings on 3550 KHz, at 2000 hours local time.

It starts off at 4 words per minute, increasing in easy increments to about 18 words per minute.

Practice is given in plain text, figure groups, call signs and often a simulated QSO is included.

Call backs follow the broadcast, so give it a go.

Thursday evenings at 2000 hours local, on 3550 KHz, depending on QRN.

Satellites to be built in the UK

Surrey Satellite Technology, which is headed up by Martin Sweeting, G3YJO, has been awarded a contract to build 14 spacecraft for the Galileo Satellite Navigation project.

Plans are to have the satellites coming off the production line in the second half of 2012. Arianespace will use Russian-built Soyuz rockets to launch these global positioning spacecraft in batches of two.

Powering CubeSats

An electric propulsion technology for miniature satellites aims to give them more mobility and may eventually allow them to take on deep-space missions.

CubeSats are relatively cheap to deploy: While launching a rocket may cost between $50 million and $300 million, a CubeSat can "piggyback" onto a large rocket platform at an additional cost of as little as $40,000. But their small size also means they lack on-board propulsion systems, which is why they generally remain locked to a particular Low Earth Orbit.

Research at the Massachusetts Institute of Technology (MIT) could lead to the development of a tiny propulsion system that would enable CubeSats to

travel to far higher orbits which for Radio Amateurs would enable contacts over far greater longer distances.

The propulsion system takes electricity from the CubeSat batteries or a solar panel and applies it to a tiny structure roughly the size of a postage stamp. This thin panel is made of about 1,000 porous metal structures that resemble needles and have several grams of the ionic liquid on them.

By applying voltage to the needles, an electric field is created that extracts the ions from the liquid, accelerates them at very high speeds and forces them to fly away.

This process creates an ionic force strong enough to produce thrust.

Read the MIT article Powering cube satellites at
http://web.mit.edu/newsoffice/2010/cubesat-01115.html

WW SPECIAL INTEREST GROUPS --- Internet Linking of Repeaters

Random Node Call on IRLP Nodes.

A facility known as "Random Node Call" has been reactivated on the North West Tasmanian ATV Group's IRLP Nodes.

By dialling a special DTMF code (in this case 4 x hashes ####) free and idle nodes anywhere in the world can be called by a random selection process.

This required an update in the nodes scripting as the central server had changed it's status page script to a compressed file in lieu of a standard text file to conserve download overheads on the server.

The facility is now again working as normal.

All amateurs are welcome to use the Nodes. Why not give it a try.
The dtmf code again, is 4 hashes.

(73's until next time Tony VK7AX News Officer NWT-ATV Gp).

REWIND - A LOOK BACK IN HISTORY

ITU DIGITIZES HISTORICAL ARCHIVES

The International Telecommunication Union (ITU) announced February 11 that they have launched the History of ITU portal.

This project - the digitising of the ITU's archive of historical documents - aims to improve access to information on the ITU and chart its evolution since its establishment in 1865, while ensuring the long-term preservation of historic documents. The archives will be freely accessible.

It provides background information, key data and links to the documents and other materials for conference's.

The digitisation programme will continue to make available documents of historic significance, including those related to Radio communication Conferences since 1903.

SB QNEWS @ WW $QNEWS100221
QNEWS - Feb 21 - VK4 ON AIR

DID YOU TELL ANYONE ABOUT AMATEUR RADIO THIS WEEK?

Geoff Emery joins us with his segment "That's What I Think".

Welcome to Qnews from VK4WIA. I'm Geoff Emery, VK4ZPP and I have been thinking about the Amateurs Code and our responsibilities within clubs.

We join a hobby to find fulfilment and satisfaction in the pursuit that

is both a learning experience and a recreation. To enhance our enjoyment we find it helps to share our interests with others who share our passion. Just because we happen to be able use a microphone, key or keyboard doesn't necessarily bring that personal involvement. Throughout our communities there are associations, groups and clubs and we may belong to none or several of them already. Most clubs like to have a succinct expression of belief, practice and reason for belonging.

Individually we can describe ourselves as amateurs or hams and agree to

follow the Amateurs Code. When we come together in a club setting we can apply the same standards within our group structure. If our radio club is

incorporated, part of it's capacity to act is to do things that are lawful which means that the club must not do anything which is illegal.

One of the benefits of WIA affiliation is that clubs get basic insurance cover at a very competitive premium.

We tend to think of our responsibility and the purpose of insurance as in preventing physical injury and compensating some-one should they be hurt. How many club members consider the requirements of the anti-discrimination laws? Remember that your club executive and even members may become legally liable for acts that are unconstitutional and/or unlawful and it will also void insurance cover.

Take a hypothetical example - a member who has a medical condition that

causes them to freak out if put under pressure, receives telephone and email contact on behalf of the club. When the person tries to say they cannot deal with this type of confrontation, they find themselves effectively ignored and the terseness of the communications increase until such time as the member resigns and has to undergo continuing treatment because of the incident. The club president follows the resignation with a message that says "I hope you will be happy, now you

have left the club." You may think this could not happen but I know we have many ex-servicemen, veterans who suffer a condition known as post traumatic stress. I know some of my amateur colleagues are war veterans. There are many men and women who have suffered trauma which causes them

to suffer residual effects.

There are many instances of actions which would be classed as discrimination and this is an important point to consider.

When we read the Amateurs Code we see that "the Radio Amateur is considerate and never knowingly operates in such a way as to lessen the

pleasure of others....(and)...is friendly...kindly assistance, cooperation and consideration for the interests of others. These are the hallmarks of the amateur spirit."

If we apply these principles in our club life as well as personally we can be pretty sure that we can never fall foul of anti-discrimination laws or breach our duties as committee members.

Does your club have a policy in place to ensure members follow the Amateurs code? Does this policy give you the steps to follow should an unfortunate event occur?

Remember that we joined AR because we enjoyed it - let's keep the amateur spirit and keep the enjoyment growing in our centenary year.

I'm Geoff Emery VK4ZPP and That's What I think... how about you.....?

This months meeting is on the 2nd of March and its the AGM.
Nominations are rolling
in for the committee positions so make sure you are at the meeting to vote for who you want to represent the club for the next 12 months. Also there will be voting for the Col McCamley award which is awarded to the member in the previous year that has gone beyond the call of duty being involved and helping with club activities.

Summer VHF/UHF Field Day
The club again used the Howells Knob site for the Summer VHF UHF Field day and from all accounts it was a great time. Caterer Mike VK4YFL showed us how good he is in the kitchen, I wonder if his wife knows that, however one of the
participants had a nasty
headache the next day. Might have been something he drank.

New Callsign
Just before Christmas last year an exam was held to upgrade Tobi VK4FTTR from his Foundation licence. A little bit of persuasion got him to sit for the Advanced licence and now he is VK4TRA. Congratulations Tobi.

Until next time, this is Gordon VK4VP.

GOOD MORNING AND GREETINGS ! HERE IS DON VK4FNQA
FROM NORTH QUEENSLAND, WITH ALL OF THE GOOD NEWS
AND FUTURE HAPPENINGS.

THIS MORNING, I PASS ON THANKS FROM KEN VK4HAI AND
KRISTYL-LEE FOR ALL THE GOOD WISHES AND
CONGRATULATION MESSAGES SENT TO THEM ON THEIR
WEDDING DAY SUNDAY FEBRUARY 14TH. THEY SAY THEY
WILL CHERISH ALL CONGRATS AND MESSAGES FOR EVER MORE.

NOW I MUST TELL YOU ABOUT ONE OF THE FRIENDLIEST RADIO
NETS IN THE LAND THAT IS HAPPENING AGAIN THIS TUESDAY
EVENING FROM 7-30PM ON THE TOWNSVILLE VHF REPEATER -
THE ANN RENTON MEMORIAL LADIES NET !
THE NET IS OPEN TO YOUNG AND OLD, YL OR OM AND IS A
GOLDEN OPPORTUNITY FOR ANYONE WHO NEEDS PRACTICE
ON-AIR TO GO ONTO THE NET AS SECOND OPERATOR.
SO, JOIN THIS TUESDAY EVENINGS NET AND SEE IF THE YLS
CAN OUTNUMBER THE OMS.

WATCH OUT BLUEWATER >>> HERE COMES TARC !
TARCADIANS AND SUPPORT CREWS WILL BE OPERATING
IN THE 2010 JOHN MOYLE FIELD DAY CONTEST WITH A

STATION LOCATED AT BLUEWATER SCOUT DEN, JUST A
SHORT 20 MINUTES DRIVE NORTH ALONG THE BRUCE
HIGHWAY FROM THE THURINGOWA CBD.
COME ALONG FOR THE WHOLE WEEKEND OR FOR A
DAY OR AN EVENING AND EXPERIENCE FIELD
OPERATIONS RUNNING ON EMERGENCY POWER
UNDER THE BIG SHELTERED HALL.
CAMP OUT OVER THE WEEKEND OR TRUNDLE ALONG
IN YOUR MOBILE SHACK CHARIOT OR MANSION WITH
WHEELS OR EVEN PITCH THE SWAG OR MATTRESS IN
THE HALL.
BRING YOUR BATTERIES, GENERATORS, RADIOS AND
FIELD ANTENNAE FOR A GREAT WEEKEND OUT IN THE
BUSH SOCIALISING, SWIMMING IN NEARBY BLUEWATER
CREEK, CHECKING THE POTS FOR REDCLAW AND, OH -
OH - OH YES, DOING SOME RADIO OPERATING DURING
THE CONTEST.
VK4WIT WILL BE ON AIR AT THE HALL FROM FRIDAY
EVENING MARCH 19TH UNTIL SUNDAY LUNCHTIME
MARCH 21ST.
CONTACT TARC CONTEST MANAGER RICHARD
VK4FRJG ON MOBILE 0400339543, THAT NUMBER
AGAIN, 0400339543 FOR FURTHER DETAILS OR LET
HIM KNOW YOU ARE GOING ALONG.

FINALLY, IT IS THAT TIME OF YEAR TO THINK ABOUT
HAVING A FRIENDLY RELAXING TIME IN IDYLIC
SURROUNDINGS WITH HAM FRIENDS AND SUPPORT
CREWS.
THAT'S RIGHT, ITS TIME TO BOOK YOUR SPOT AT
FNNQARG ! , THE FAR NORTH AND NORTH
QUEENSLAND AMATEUR RADIO GATHERING
HAPPENING FROM 11TH TO 14TH JUNE OVER THE
LONG WEEKEND AT CARDWELL VILLAGE
BEACHCOMBER MOTEL AND TOURIST PARK.
IT IS THE YEARLY GATHERING FOR THOSE FROM
CAIRNS, ATHERTON TABLELANDS AND TOWNSVILLE
REGIONS PLUS LOTS OF PLACES IN BETWEEN AND
FAR AWAY.
IT IS ADVISABLE TO RING RECEPTION AT THE PARK
ON 1800 005633
TO BOOK YOUR ACCOMMODATION AS SOON AS
POSSIBLE AS THE LONG WEEKEND IN JUNE IS A
VERY POPULAR TIME.
A WIDE MIX OF ACCOMMODATION FROM MOTEL
TO VILLA TO CAMPING IS AVAILABLE.

WELL THATS ALL FOR THIS WEEK FROM TROPICAL
PARADISE. >> THIS HAS DON VK4FNQA FOR THE
TOWNSVILLE AMATEUR RADIO CLUB INC, AND
YOU HAVE BEEN LISTENING TO; AND ENJOYING

QNEWS FROM VK4WIA.

>From The Business Manger ZL2TDM
Debby says...
Council are meeting in Upper Hutt over this weekend. With the considerable number of agenda items that they are faced with, the meeting is likely to last well into Saturday night with a fairly early start.

I need to remind ALL members that a Councilor is your first point of reference, if you or your branch requires assistance or guidance. If you feel you are unable to contact or approach your closest Councilor, then it is imperative you contact the President.

Remember your Executive has been elected by members to work for their specific regions and must avail themselves wherever possible. While I appreciate that you may wish to contact headquarters, in most instances your Councilor can and should be able to help.

Annual reports will be published in the next issue of Break In. I would urge you to pay special attention the drop in membership figures. You can all

help improve this by encouraging others to join or pay their membership as the Association needs their support now more than ever. Remember as a collective we have bargaining power, as an individual we almost fail to be heard.

That's all from me...hopefully you will have an update from Council after this weekend.
Debby...ZL2TDM

FMTAG Notes For February 2010

At its 20th of February 2010 meeting, NZART Council approved the following FMTAG Notes:

FINAL RECOMMENDATION

Previously published on the NZART web site and in HQ Infoline for the information of, and seeking comments from, NZART members. No comments have been received.

Branch 81 Waikato VHF has applied to relocate its Raglan 5675 Repeater, by about 3.4 km, to Te Uku, at map reference NZ260 R15 835684, owing to the construction of a wind farm near the present site. An engineering evaluation confirms that there will be no interference to other stations and that the repeater transmit frequency can remain on 145.675 MHz with the repeater receive frequency remaining on 145.075 MHz.

COMMENTS AND APPLICATIONS

Please send your comments by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:

http://www.nzart.org.nz/nzart/fmtag.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz
****
Digital Aurora Radio Technologies

The mission of Digital Aurora Radio Technologies (DART) is to expand communications across the north by using existing, and exploring new communications technologies.

DART is in the process of testing the potential to broadcast digital radio across Alaska. Uniquely Alaskan, the project presents challenges and opportunities that one might expect in the "Last Frontier."

We are currently testing DRM on 4.85 MHz, 7.505 MHz and 9.295 MHz. In addition, we are broadcasting CW on 4.851 MHz, 7.511 MHz and 9.301 MHz. If you pick up our signal, let us know - we would like to hear from you.

Interesting Web Site For Shortwave Listeners and Intruderwatchers

http://www.shortwavemonitor.com/

The site promotes DX-BUDDY. From the description of DX-BUDDY, all we need to use on HF is DX-BUDDY controlling our rig, and we can do most anything!

A simplified list of DX-BUDDY's features:
*Can act as a universal remote control for your station
*Runs under Windows, OS X and Linux
*Controls your RIG via a CAT-control-port
*Controls your Rotator
*Helps you when listening to broadcast stations with up-to-date frequency-lists
*Shows you what you can hear and what broadcast-stations are on the air
*DX-Cluster working
*Logbook included for ham-amateurs and shortwave listeners
*Intelligent memories
*Descriptive propagation displays
*Beacon clock
*Voice memory for contests
*Helps you to find out what utility station you are listening to
*World map with day and night view

For more information on DX-BUDDY:

2010 Silver Rally 14-20 Nov 2010

http://www.silverfernrally.co.nz

Marlborough Amateur Radio Club, Br 22 has again been asked to co-ordinate the Comms for the 2010 Silver Fern Rally. Although the rally will finish in Queenstown the intention is to have the Radio Base in Blenheim again as in previous rallies.

To assist in progressing plans for the event, early notification is out to give anybody the opportunity to consider participation in any of the following roles;
1. Area or Regional co-ordinators, (not necessarily the person who does everything), obviously somebody prepared to attract volunteers, consider the availability of repeaters and suitable locations for portable repeaters

(includes IRLP kits) and pass on any relevant information,
2. Mobile Operators, either for all of the rally or part of it, with preferably VHF and HF capability and suitable vehicle,
3. Base Operators. Following on from 2008 a minimum of 14 operators (2 shifts) per day is required. If you are outside of Blenheim and would like to spend a week in a sunny location, appropriate expenses are being considered.

If you can assist or participate as local knowledge can only make this event work please contact Chris Grant at chgrant@value.net.nz or Br 22 at zl2ks@nzart.org.nz

The basic route is as follows;
1. Day One, Sunday, 6 stages out on the Peninsular 1st stage starts about 11.00am and the last one about 3.30pm. From this point on all days start from the Parc Ferme no earlier than 8.00am and the last stage ends about 4.00pm
2. Day Two, Monday, 6 stages from Chch to Timaru via Okuku Pass, Lees Valley, Lake Lyndon, Glentunnel and the Geraldine forest (Kakahu)
3. Day Three, Tuesday, 6 stages from Timaru to Dunedin via Fairlie, Black Forest, Duntroon, Herbert Forest, Macraes and Palmerston
4. Day Four, Wednesday, 6 stages has just been changed but basically north of Dunedin then to Middlemarch then the Old Dunstan Rd, a shorter version of Lake Onslow , Lawrence and back to Dunedin
5. Day Five, Thursday, 6 stages from Dunedin to Invercargill generally through areas we have used before around Dunedin, Balclutha and Eastern Southland
6. Day Six, Friday, 6 stages from Invercargill to Alexandra again through much of the area previously used
7. And Day Seven, Saturday, 6 stages from Alexandra to Queenstown via all the stages that surround the general Omakau area
The awards function will be at the Skyline Function Centre
****
EXPO-10

THE COMBINED WELLINGTON AMATEUR RADIO EXPO COMMITTEE advises that the annual Wellington Region EXPO-10 is to be held on Saturday 27th March 2010, again at the Knox Church Hall, 574 High Street Lower Hutt. Doors open to the public at 10am.

Admission is $4. This includes a free drink and entry into the various raffle draws. Listen out for the raffle draws throughout the day by MC ZL2BHF.

Major prize is a dual band handheld - sponsored by Foxtrot Communications

This will be the sixth Wellington Region trading of radio equipment. There will be the usual trade displays, trade sales of new amateur equipment and trading tables of used equipment

SIGNALS NZ (Yaesu/Vertex) and ICOM NZ have confirmed their attendance.

There will be a demonstration of Amateur Digital Television.

Refreshments - coffee, sodas, buns and cakes will be available in the hall.
****
Contest News

VHF/UHF/SHF Contest Notes
The next contest is the Low Band Contest, 50 MHz to 440 MHz, on Saturday the 10th and Sunday the 11th of April 2010. This is the weekend after Easter. The operating times are: Saturday 1700 to 2300 NZT and Sunday 0700 to 1300 NZT.

The rules are available at:
http://www.vhf.org.nz/VHF-UHF-SHF-ContestRules
Logs should be sent within two weeks, to:

117. SARL News - SUNDAY 21 FEBRUARY 2010

Newsgroup: rec.radio.amateur.misc
Date: 2010-02-21 16:18:29 UTC
From: website@sarl.org.za
Message-ID: <20100221161822.A420B33CC1@panix2.panix.com>
Source record: 6086
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL News - SUNDAY 21 FEBRUARY 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

SILENT KEY

It is with regret that we have to announce that Graeme Gathercole, ZS2OD, of Port Elizabeth passed away on Saturday 13th February 2010 after convalescing from a hip operation. We express our sincerest condolences to his two daughters, Dianne and Glynis, other relatives and friends, and in particular, the VHF fraternity.

(PAUSE)

In the news today:

NEXT SUNDAY'S INTECNET TO FOCUS ON SA SATELLITES WHAT IF?

FIRST SOUTH AFRICA / REUNION 70 cm QSO

HOW TO DEAL WITH INTRUDERS ON OUR BANDS

EMC STANDARDS NOW PUBLISHED

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

NEXT SUNDAY'S INTECNET TO FOCUS ON SA SATELLITES WHAT IF?

Next week Sunday the SARL and SA AMSAT are joining forces on INTECNET to discuss what if radio amateurs will get another opportunity to have an amateur payload included in one or more South African satellites?

The Department of Science and Technology is part of the African Constellation of Satellite Projects known as African Resource and Environmental Management Constellation (ARMC). From an African

perspective it would be an excellent opportunity to include an amateur radio payload that would stimulate amateur radio on the continent.

During the discussion you radio amateurs are invited to talk about their ideas what such a payload should be. The satellite is likely to be in a polar low earth orbit similar to SumbandilaSat.

The Cape Peninsula University of Technology is building a 3 tier Cubesat. Can they be persuaded to include an amateur radio payload? And if so what should it be?

You can pre-register your participation by sending a short synopsis about your ideas to armi@sarl.org.za. You will then be called in during the first half of the programme. The second half is an open line and any one can call-in via the local relay stations.

Clubs wishing to link their repeater to the teleconference network should send details to armi@sarl.org.za by not latter than Wednesday 24 February.

Don't miss this interesting discussion next Sunday at 19:30 CAT. The programme will also be available on echolink and webcast.

FIRST SOUTH AFRICA / REUNION 70 cm QSO

At 16:48 UTC on Wednesday 10 February, Derek Gravett, ZS5Y, in Scottburgh and Phil Mondon, FR5DN, completed the first ever Reunion to South Africa QSO on 70 cm. over a distance of 2 655 km, The contact was made using JT65B. After that Derek and Phil made a SSB QSO as well with signal reports of 41 and 55.

Congratulations to Derek, ZS5Y, and Phil, FR5DN, on this achievement.

On the previous evening about an hour after Andre, ZS2ACP, and Phil, FR5DN, made their historic contact of 3 205 km, Dave, ZS5DJ, of Ramsgate, Le&#xFFFD;, ZS5LEE, in Durban and Derek, ZS5Y, also contacted Phil on JT65B. Both Lee and Derek succeeded to also work Phil on SSB. The Hepburn Tropo Index forecasted excellent Tropo conditions over the Indian Ocean for that period.

HOW TO DEAL WITH INTRUDERS ON OUR BANDS

The SARL receives many complaints about people not authorised to use the amateur bands, pirates at sea, truckers and broadcasting stations.

To deal with this effectively the following information is required: times operating, frequency and possible identification. If it is a broadcasting station the name of the station, location etc plus a sound recording on MP3. In other words as much information is needed as possible and a recording is essential.

The IARU has a world wide monitoring systems called IARUMS. The SARL inputs information to the system and where possible several members of IARUMS report these incidences to their national monitoring service

which takes it up on a Government to Government level.

If the instrusion is from a local source the SARL will take it up with ICASA, for example a trucking company operates illegally on the 20 metre amateur band. By listening and recording the conversation we need to learn which company owns the truck to enable action to be taken. We have been successful in the past. It requires lots of monitoring to collect all the information needed.

Report any intrusion to secretary@sarl.org.za but ensure that the required details are included as well as a MP3 recording. Let us keep our bands free from intruders. With your help we can go a long way.

ANOTHER BUMPER EDITION OF RADIO ZS IN THE MAIL

Members will soon be receiving another copy of Radio ZS packed cover to cover with interesting articles. It will also go live on the web this weekend.

Read about "What is D-Star?" an article by Peter Tottle, ZS2ABF, Build your own antenna analyser by John Green, ZS1JHG, Eddie Leighton, ZS6BNE, surveys the satellite scene and Ean Retief, ZS1PR, writes about "die S-meter- 'n groot leuenaar". But that's not all. There also is Amateur Radio - the most versatile hobby on earth, Awesome Amateur Radio by Victor P du Preez, ZS6EA, an article about awards and the regular Museum and amateur radio column by ZS6AAW.

If you not yet a member of the SARL and would like to get a sample copy in your email mail box, send a message to armi@sarl.org.za with the subject line "Radio ZS Feb 2010.

EMC STANDARDS NOW PUBLISHED

ICASA has published a list of EMC standards in the Government Gazette of 22 January 2010. This means that immunity requirements will be mandatory for all electronic products from 22 January 2011.

SARL members can download a copy of the Gazette from the member's section of the SARL web pages. The document is divided into two sections. Sections 1 - 9 dealing with the legal issues and details of the structure while section 10 is the official listing of ICASA Regulated Standards for technical equipment and electronic communication facilities.

In Amateur Radio Mirror International, on the air his morning (Sunday) at 10:00, there will be a discussion with Eric Winter of EMC Assist, a consultancy specializing in EMC issues. Frequencies and rebroadcast times are given at the end of this bulletin, or visit www.sarl.org.za and click on ARMI.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that there were 772 days without sunspots since 2004. Typically there are only 485 days without sunspots

during a solar minimum. We indeed experienced a long and deep solar minimum. During 2010 there were up to now only 2 days without sunspots. The solar activity is still at low levels. Currently sunspot 1 049 is doing its bit for solar activity, although it is only a small sunspot. The effective sunspot number is expected to be around twenty for the coming week.

20 and 15 m will provide the best opportunities for DX. Conditions to India will be good from the afternoons onwards. During the late afternoons and early evenings it will be moderate towards Europa. In the afternoons there are good possibilities for contacts with the USA on 15 m. Contacts with Australia will be possible on 20 m for a short while during the mornings. During the afternoons and evenings 20 and 15 m contacts may also be possible with Brazil.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well during the middle of the day. With summer here 20 m is also once again very useful for contacts over the longer distances, especially up to two o'clock in the afternoons.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 28 February - Intechnet at 19:30 about possible future SA satellite payloads. 28 February - Closing date for the SumbandilaSat essay Competition. 28 February - Final date for entries in the ARRISS-SAT project to be submitted to youth@sarl.org.za. 5 March - Closing date for the Tinus Lange Awards. 31 March - SARL 80 m Club Contest with PSK and RTTY. 17 April - 2010 SA AMSAT Space Symposium. 23-25 April - SARL National Convention, Port Elizabeth.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George, ZS6NE.

Thank you for listening, 73.
/EX

Irish Radio Transmitters Society Radio News Bulletin
Sunday 21st February 2010

Silent Key

We are sorry to tell you of the sudden death on 13 February of Pat Kane EI9GE of Bray Co. Wicklow.

Pat was a great CW man and a keen observer of propagation particularly on 10 metres. His funeral took place on Wednesday last.

To his wife Nora, his daughter Karen, his sons Andrew and Aaron and to his extended family we extend our sincerest sympathy. May he rest in peace.

IRTS 78th AGM

Dundalk Amateur Radio Society shall be hosting the 78th Irish Radio Transmitters Society A.G.M over the weekend of Saturday 24th and Sunday 25th April 2010.

The venue for the event is the Fairways Hotel, Dundalk Co.Louth, a number of rooms have been reserved for anyone staying overnight, however it is advisable to book a room early.

The Annual IRTS Meal will commence on Saturday 24th April 2010 at 8.30pm.The Radio Rally will commence on Sunday 25th April 2010 at 11.00am, followed by the IRTS AGM at 2.00pm.

Further details for booking trader's tables or any other info please e-mail the following Thos EI2JD at email address chairman /at/ ei7dar.com or Peter EI4HX at email address secretary /at/ ei7dar.com

---

Nomination of Awards for IRTS Trophies.

The time is here again for nominations for the several awards for IRTS trophies. When considering your nominations please refer to previous successful nominees as included in www.irts.ie/cgi/awards.cgi

Closing date for nominations is April 2nd 2010

Request for Return of Trophies presented in 2009

It is time once again to recall all trophies presented at the 2009 AGM.

Trophies and cups can be returned to the IRTS stand at the Phoenix Radio Rally, or to any IRTS Committee Member to arrive to Peter EI4HX on or before the IRTS committee meeting in early March 2010. This will allow time for engraving to be done, and also any small repairs.

AREN Voice Net

AREN will be holding a voice net tonight at 19:30. Net participants are requested to generate suitable IARU messages for the exercise.

Also, a reminder to those members who have not moved over the google group yet, to do so.

EchoLink for iPhone

A new app is now available that allows radio amateurs to use the EchoLink system from their iPhone or iPod.

iPhone users can use either a WiFi or 3G (cellular) Internet connection.

Move of GB3VHF beacon

After 50 years at Wrotham, the GB3VHF 144 MHz beacon will be moving to a new site at Fairseat in Kent (JO01EH).

The Ofcom license for the beacon at the new site has already been obtained, so once the antennas at Fairseat are rigged, the beacon will appear on the air shortly afterwards once schedueling and suitable weather are available. We hope to bring further updates on this beacon when available.

Repeater Success GB3CP

Brendan Rooney EI6CS, Keeper of the Sligo Repeater said "thank you for bringing us together for a very useful evening". His was a typical comment among a strong gathering of 30 radio amateurs and experimenters convened by Lough Erne Amateur Radio Club to thank those who provide Repeaters and encourage greater use of Repeaters. The meeting was in the SHARE centre which is also the venue for the Club's rally on Sunday 11 April.

John McCullagh GI4BWM, Chairman of RSGB's Emerging Technologies Coordinating Committee gave an excellent exposition on the design and building of Repeaters. There followed much sharing of experiences among Keepers, including Billy Pollock GI3NVW Keeper of the West Tyrone Repeater, GB3WT.

More Information, Michael Clarke, MI5MTC, Chairman Lough Erne AARC, Email mi5mtc /at/ learc.eu

---

Sardinia DXpedition

Members of the F6KOP Team will be active as IS0R from Isola Rossa, Sardinia (EU-024, Loc. JN41ka), between May 7-15th. Activity will be on 160-6 meters, using 3 stations on HF and 1 station on 6 meters.

They plan to use CW, SSB and RTTY. Each station will be a FT450 with an Acom 1010 using Micro Ham and PC.

Antennas include 6m Yagi Beam, Spider Beam for 30-10m, 4 square for 40m, vertical for 80m (K9AY) and an Inverted L for 160m plus a Beverage.

QSO Route to be arranged

AS-127 St Martin's Island DXpedition postponed

Due to not getting a license and operating permission from the island in time, the S2DX team has had to postpone the IOTA which was scheduled for this week.

The team still hopes to receive permission and a licence to operate however they would like to apologise for any inconvenience caused.

The S2DX team hopes to have permission and documents in order ASAP and will advise if possible the new operational schedule.

Updates will also appear on the Teams Website www.s2dx.org

The Royal Signals Amateur Radio Society e-Library

The Royal Signals Amateur Radio Society (RSARS) has made a number of its technical documents available for download. Included in the collection are a number of very interesting HF antenna designs and related projects.

The files, which are in .PDF format, are available for all to download.

You'll find the collection at:
http://www.rsars.org.uk/ELIBRARY/docsants.htm

SEARG AGM Change of Venue

Attention, the south eastern amateur radio group wishes to inform all radio amateurs and SWL's that there is a change of venue for the AGM this Monday night the 22nd of Feb.

The new venue is the tssg west campus, carriganore, Waterford city and not the Roanmore social center as previously advertised. There is a link containing a map of the new venue can it can be found on the searg web site at (www.searg.com) or alternatively you can call on the south

eastern repeater network for directions on the evening.

All members are asked to attend and visitors arewelcome.

Limerick Radio Club

The AGM of the Club will be held on Thursday 25th February 2010 at the Limerick Institute of Technology at 7:30 pm. All members of the Club are requested to attend.

The regular monthly meeting on the 2nd Thursday of the month (11th February) has been cancelled to facilitate the AGM later in the month.

South Dublin Radio Club

The South Dublin Radio Club annual general meeting (AGM) will take place on Tuesday 2nd of March.

Classes are still being run every Tuesday evening and

Visitors are always welcome.

Rallies

Please check IRTS website for Rally listings, new listings will be mentioned on the Radio News to facilitate scheduling and travel arrangements

Bangor & District Amateur Radio Society

The BDARS 2010 rally is being held on Saturday 3rd July 2010 at 11:30 AM. This year the Rally is being held in a new location and its also being held on a Saturday. The new location is "Donaghadee community centre".

Postcode is BT21 0HE if you need to use your satnav.

More details(and a map) on the website www.bdars.com

For Rally info and contact details please check out the IRTS Website at http://www.irts.ie/cgi/rallies.cgi

---

This week in History

1878 Edison patents his Phonograph.

1893 Tesla describes his wireless radiation system.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via

e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

119. [RAC-Bulletin] RAC Bulletin 2010-004E - New Manager NARED – Mervyn Halvorsen, VA3TSA

Newsgroup: rec.radio.amateur.misc
Date: 2010-02-22 03:59:56 UTC
From: rac-bulletins@eton.ca
Message-ID: <4B820132.6040501@rac.ca>

RAC Bulletin 2010-004E - New Manager NARED ï¿½ Mervyn Halvorsen, VA3TSA
February 19, 2010

RAC Vice President Field Services Doug Mercer, VO1DTM is pleased
to announce the appointment of Mervyn Halvorsen,VA3TSA/VO1TSA as
our new NARED Manager effective immediately.

Merv has many years of ARES experience, has worked in support of
ARES during the BC fires while he lived there, has worked closely
with me in support of the Newfoundland and Labrador EMO at the
Provincial EOC. Merv was active ï¿½on the groundï¿½ following
Hurricane Katrina in Biloxi, Mississippi and while in
Newfoundland was in charge of Emergency Services for the
Salvation Army, Critical Incident Stress Trainer, as well as
Chaplain for the St. Johnï¿½s Regional Fire Department.

Merv and family now reside in Thunder Bay, Ontario. Welcome aboard!
It will be great working with you again.

Doug Mercer VO1DTM CEC
Vice President Field Services

Changes followed by "|".

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

121. rec.radio.info Posting Guidelines

Newsgroup: rec.radio.amateur.misc
Date: 2010-02-22 07:05:01 UTC
From: rram@panix.com
Message-ID: <radio/rec-radio-info/guidelines-1-1266822301@panix.com>
Source record: 6090

Archive-name: radio/rec-radio-info/guidelines
Revision: 1.5 2007/03/22 16:30:49
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rri/index.html

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

122. Nominating Period Open For 2010 Amateur Radio Newsline Young Ham Of the Year Award

Newsgroup: rec.radio.amateur.misc

Nominating Period Open For 2010 Amateur Radio Newsline Young Ham Of the Year Award

Los Angeles, CA. (February 15, 2010) - If you know a young radio amateur age 18 or younger who has done something very special in the Amateur Radio hobby, or if you know of one who fits this description, now is the time to consider nominating him or her for the 2010 Amateur Radio Newsline Young Ham of the Year Award.

HOW THE YHOTY AWARD WORKS

The "Young Ham of the Year Award" -- better known by the acronym "YHOTY"
-- is presented annually to a licensed Radio Amateur (Ham) who is 18 years of age or younger, is a resident of the 50 United States, Puerto Rico and the Canada provinces, and who has provided outstanding service to the nation, the community or the betterment of the state of the art in communications through the Amateur Radio hobby/service.

All nominations must be received by May 30 of any given calendar year on an official application and accompanied by verification materials. Applications forms are available for a self addressed stamped envelope mailed to the Young Ham of the Year Award c/o Newsline, 28197 Robin Avenue Santa Clarita California 91350. These nominating applications are also available for electronic download or on-line submission from our website at http://www.arnewsline.org

WHOM TO NOMINATE

Here are some of the things you should be thinking about it in a nominee. First off, as noted above, the nominee must be age 18 or younger and a resident of the United States, Canada or Puerto Rico. He or she must

hold a valid Amateur service license issued by the United States FCC or Canadian telecommunications regulator Industry Canada.

Also, your nominee should be someone who has done something outstanding as an Amateur Radio operator. Perhaps it was something special he or she did for his community through the Amateur service. Maybe it was some outstanding achievement that led to an improvement in amateur radio in his or her area. Or perhaps he or she was successful in recruiting a lot of new hams. Whatever it was or is, we want to hear about it.

If you're looking at what makes a good candidate, we suggest you do an Internet search using the search argument "Young Ham of the Year Award Winners" and look at the credentials of past award recipients.

HOW TO FILE A NOMINATION

Printable nominating forms are available at our website: www.arnewsline.org. Simply scroll down to the bottom of the page and click on the words: "2010 Young Ham of the Year Nominations Now Being Accepted" You can then download the Nomination Form" by simply clicking on the word "HERE." The nomination is in Microsoft Word format.

It is very important that you, as a nominator, fill out the downloadable and printable application as required. If you're sending it by way of the regular mail, please make sure it reaches us at Amateur Radio Newsline, 28197 Robin Ave., Saugus CA. 91350 by May 30 2010. That's the deadline for all applications. Or you can scan and e-mail in the nomination in either Microsoft Word (.doc) or Adobe (.pdf) to us at newsline@arnewsline.org. (Please be certain to use one of these two common format that can be opened by those with both PC and Mac computers.)

In addition to the completed nominating form, we need as much documentation as you can give us so the committee can carefully evaluate each nominee. When we say documentation, we are talking about letters, e-mails, magazine articles, videos and other kinds of endorsements that would accompany the application. In the past, we've even had photos e-mailed in with some of the applications. Please be aware that any materials sent to us become the property of Amateur Radio Newsline, Inc. and cannot be returned. As such we advise to send copies only rather than original documentation.

THE AWARD PRESENTATION

As in years past, the 2010 Young Ham of the Year will likely receive an expense paid trip to the Huntsville Hamfest in Alabama and a gift of Amateur Radio gear compliments of Vertex-Standard Corporation. Those are the wonderful folks who manufacture the famed Yaesu line of ham radio gear.

From our other primary corporate sponsor -- CQ Magazine -- which in 2010 is celebrating its 65th year of service to the world-wide ham radio community -- the winner gets a week at Spacecamp Huntsville, where he or she can learn first-hand about man's conquest of the final frontier.

But none of this can happen without you. Now is the time to get on line, go to http://www.arnewsline.org to download a nominating form, print it and send it in. That way, you and some worthy young ham radio operator will be glad that you did.

SOME BACKGROUND ON THE PRIMARY AWARD SPONSORS

The Young Ham of the Year Award program was created in 1986 by Bill Pasternak, (WA6ITF) and is sponsored by the Amateur Radio Newsline, Inc.. Better known as "ARNewsline(tm) it is the world's largest not for profit (501(c)(3), all-volunteer and totally independent ham radio broadcast news and data information service. It was organized in 1976 as the Westlink Radio Network by Jim Hendershot (WA6VQP) and Bill Pasternak (WA6ITF). Since that time it has produced and aired over 1640 consecutive weeks (31 years) of free news bulletin programming dealing with Amateur Radio and related personal communications issues.

Primary corporate underwriting of the "Young Ham of the Year Award" program is supplied by Vertex-Standard Corporation (Yaesu U.S.A.) and CQ Magazine. Vertex-Standard is a world leader in the design, manufacture and distribution of Yaesu brand high quality Amateur Radio and Vertex brand commercial two-way radio equipment. Since the inception of the award in 1986, this company has been its corporate underwriter.

As of 1995, CQ Publishing has been an additional corporate underwriter. CQ Magazine and its sister publications are owned by CQ Communications and are considered the trend-setting publications serving today's modern radio amateur.

Past recipients of the Young Ham of the Year award are:

Shawn Alan Wakefield, WK5P, of Bartlesville, Oklahoma (1986)
David Rosenman, KA9PMK, of Muncie, Indiana (1987)
Jonathan Binstock, NK3D, of Potomac, Maryland (1988)
Erin McGinnis, KAOWTE, of Topeka, Kansas (1989)
Mary Alestra, KB2IGG, of Staten Island, New York (1990)
Richard S. "Sammy" Garrett, AAOCR, of St. Louis, Missouri (1991)
Angela (Angie) Fischer, KBOHXY, of St. Louis, Missouri (1992)
Kevin Boudreaux, N5XMH, of New Orleans, Louisiana (1993)
Allison Zettwoch, KD4CKP, of Louisville, Kentucky (1994)
Adam Weyhaupt, N9MEZ, of Alton, Illinois (1995)
Toby Metz, KB7UIM, of Boise, Idaho (1996)
Brian Mileshosky, N5ZGT, of Albuquerque New Mexico (1997)
Richard Paczkowski, Jr., KF4BIA, of Edgewater Florida (1998)
Michelle Swann, KE4EZI, of Warner-Robins, GA (1999)
Christopher Arthur, KT4XA, of Russellville, AL (2000)
Patrick Clark, KC8BFD, of Charleston W. VA. (2001)
Josh Abramowicz, KB3GWY, of Reading PA (2002)
Jay Thompson, W6JAY, of Santa Ana CA (2003)
Andrea Hartlage, KB4IUM, of Grayson GA (2004)
Rebekah Dorff, WG4Y, of Birmingham AL (2005)
Catherine Ferry, NC8F, of Silver Lake, OH (2006)
Grant Morine, W4GHM, of Wilmington N.C. (2007)

Emily Stewart, KC0PTL, of Topeka, KS. (2008)
Andrew Koenig, KE5GDB, Houston, TX (2009)

ABOUT THE UNITED STATES AMATEUR RADIO SERVICE

The United States Amateur Radio service is force of over a 600,000 publicly spirited personal radio operators who are licensed and regulated by the Federal Communications Commission. They provide the nation with a pool of trained radio operators and technicians to assist the United States in improving international relations. They are also available as a voluntary group of skilled public service-oriented individuals with their own radio equipment who are available to provide emergency communications in times of disaster. In the moments immediately following the 911 terror attacks, Amateur Radio volunteers became the first-response communicators in New York City after a major portion of that city's radio system was destroyed. Hams also provided life-saving communications along the U.S. Gulf Coast during and after Hurricane Katrina made landfall in 2005.

DXNL 1664 - Feb 24, 2010
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

C6 - BAHAMAS, NA-001
Marc,K1CTT, will be visiting Eleuthera Island (NA-001) while being on holiday with his XYL. Listen for C6ALT in SSB on 40m-15m between Feb 26 and Mar 10. QSL via homecall.

D4 - CAPE VERDE, AF-086
Massimo,IZ4DPV, is working as D44AC from Vicente Island (AF-086) from Feb 21 until Mar 9. He will sign D4C in SSB in the 160m CQWW Contest. QSLs for both calls only direct via IZ4DPV.

J6 - ST LUCIA, NA-108
John,W5JON, will be QRV again from his mountain QTH viewing over the Caribbean Sea and Marigot Bay from Mar 2-11. He will be active as J68JA in SSB on 160m-6m (including 60m). John will use an ICOM IC-7000, a small amplifier with 350 watts, a ZS6BKW multiband dipole and a 3ele yagi for 6m. He also plans to join the ARRL International DX Phone Contest (Mar 6/7) in the single OP/allband category. QSL via W5JON. John will be accompanied by his XYL Cathy,W5HAM, who prefers the swimming pool.

J7 - DOMINICA, NA-101
John,K3TEJ, is staying on Dominica (NA-101) from Feb 24 until Mar 11. He will sign J7N mainly in CW and RTTY. He will work in SSB in the 160m SSB Contest (Feb 26-28) and the ARRL International DX SSB Contest (Mar 6/7). QSL via K3TEJ, only direct.

KH2 - GUAM, OC-026
Yoshiyuki,AB2ST/KH2, Ken,K0EN/KH2, and Toshio,KG6WTW/KH2, members of the TIARA (Tokyo International Amateur Radio Association) will be QRV on all bands from Guam (OC-026) between Feb 25 and Mar 1. They hope to make many QSOs especially with Europe.QSL via buro or direct to JF1TEU.

P4 - ARUBA, SA-036
John,KK9A, is expected to show up as P40A from Feb 28 until Mar 14. He will work in CW and SSB on 160m-10m and joins the ARRL DX SSB Contest. QSL via Tim, WD9DZV. His QSL manager will visit John from Mar 7-14. Tim will be QRV mainly in CW.

Another operation from Aruba will be conducted by Howard,P4/WA2NHA, from Feb 28 until Mar 14. Howard is working mainly in CW on 10m-80m. QSLs via his homecall.

PZ - SURINAME
Peter,PA1LP, will be QRV as PZ5LP from Nieuw Nickeriebe/Suriname from Feb 26 until Mar 26. He will use a FT-857w withh 100 watts and a G5RV. QSL via eQSL.

SV5 - DODEKANESE, EU-001
Willi,SV5/DJ7RJ, is spending his holidays on Kos (EU-001/GIOTA DKS 043) from Feb 24 until Mar 17. He prefers the lowbands but can be found working in CW and SSB on all bands from 160m-6m.
QSLs -also via bureau- bis his homecall.

V3 - BELIZE, NA-123
Art Phillips,NN7A, is staying on the Turneffe Islands (NA-123) between Feb 24 and Mar 3. His callsign will be V31JZ/p when working mostly in CW on 40m-17m with 100 watts, wires and verticals (if conditions permit also on 80m/160m). Listen for him especially on the IOTA frequencies. The Turneffe Islands are lying in the Caribbean Sea about 40 km east of Belize City. The QSL cards should be sent via the ARRL bureau to NN7A or direct to Art Phillips, PO Box 73, Eckert, CO 81418, USA.

VP2M - MONTSERRAT, NA-103
Once again Mike,W1USN/VP2MPR, will be QRV from Montserrat from Feb 28 until Mar 13. Mike prefers working in SSB and PSK31. QSL via homecall.

ZL8 - KERMADEC ISLANDS, OC-039
After very successful activities from Norfolk Island (VK9DNX 2007, over 60.000 QSOs) and Willis Island (VK9DWX 2008, 95.000 QSOs) the team of ZL8X announces a new DXpedition to Kermadec Island (ZL8) in Nov 2010. The core team from VK9D*X plus additional high experienced operators (DJ5IW, DJ7EO, DJ9RR, DK1II, DL1MGB, DL3DXX, DL5CW, DL5LYM, DL5XL, DL6FBL, DL8OH, DL8WPX, SP5XVY) will operate seven high power stations from 160m-10m in CW, SSB and RTTY for about 17 days.
More information can be found on: http://www.kermadec.de
Besides a newsletter and a RSS feed they have also installed a Facebook group to inform about the latest news. On Feb 15 the team received permission from the Department of Conservation (DoC) to land on Raoul Island (OC-039) - the northernmost island of the Kermadec group. The ZL8X DXpedition is scheduled to take place from Nov 19 until Dec 5. More information will follow shortly before the DXpedition starts.

5H - TANZANIA
Igor,UA3DJY, who was signing 5I3A from a clubstation has now received his own callsign 5H3ACR. He is working on all bands until Mar 1.

His QSL manager is RK3AOL.

5R - MADAGASCAR, AF-057
Michele,IK5ZUI, moved to his new home on Nosy Be Island (AF-057) and
will be QRV from there as 5R8UI for about one year.

7X - ALGERIA
Yue,BD1GT, has a new job in Algeria for the next year. He has received
his licence with the call 7X0GT now. OM Yue is working in all modes on
160m-10m. QSL only direct via Ma Yue, Box 1032, Beijing 102209, China.

8Q - MALEDIVES, AS-013
Alex,UX4UL, is spending his holidays on the Maledives (AS-013) from
Feb 18 till May 18. Listen for 8Q7IA in CW/SSB/BPSK on 40m, 20m and 17m
His QSL manager is UY5ZZ.

9M - WEST MALAYSIA
Tanjung Piai is the southernmost point of the Asiatic mainland. Members
of the Malaysia Amateur Radio Transmitters' Society (MARTS) will show
up as 9M4STE in CW and SSB on 40m/20m/15m/10m/6m from Feb 26-28.
The team has an own website at: http://dxpeditionmalaysia.blogspot.com

BELGIUM, SPECIAL EVENT STATION
The special event station ON30ON will be active to commemorate the
30th edition of the Belgian "ON Contest" during the months of March,
April, September and October 2010. The contest was first organized in
1980 to celebrate the 150th anniversary of the Kingdom of Belgium.
QSLs for ON30ON go via the UBA bureau or direct to ON4CAS.
A special free certificate is available in the PDF format. Full details
are available at: http://users.telenet.be/egbert.hertsen/on30on.html

Island activities:
NA-066, W6, California State South: The Palos Verdes Amateur R.C. plans
an activity as K6PV from Santa Catalina Island from Feb 25-28.
QSL via K6PV (direct/bureau).

SA-019, PY6, Abrolhos Archipelago: PY6HD, PY6RT and PY6AWU are going to be
QRV as ZZ6Z from Santa Barbara (DIB BA-01, DFB BA-014) from Feb 25-28.
QSL via PY6HD direct (see QRZ.com).

SA-077, PY1, Rio de Janeiro State East Group: A group of Brazilian scout
amateurs will be active as PV1S, PT2OP/p, PY1LVF/p and PY1NEZ from
Santana Island (ARLHS BRA-062, DFB RJ-04) between Feb 25 and Mar 1.
QSL PV1S and PT2OP/p via PT2OP, PY1LVF/p and PY1NEZ/p via PY1NEZ (d/B).

Lighthouse activities (WLOTA/ARLHS/ILLW)

K6PV LH 2912 St.Catalina Feb 25-28
PT2OP/p LH 0714 Santana Feb 25-Mar 1
SV5/DJ7RJ LH 1730 Kos Feb 24-Mar 17
TO2T LH 0644 Guadeloupe Feb 24-Mar 8
ZF2MN/ZF8 LH 1490 Little Cayman Feb 21-28
ZZ6Z LH 0463 Sta.Barbara Feb 25-28
8Q7JK LH 3911 Thulhagiri Feb 23-Mar 5
9M2/OE1WWL LH 2020 Langkawi Feb 24-28

The "Radio Club URUGUAYO" will be QRV as CW3R from the Punta Negra Light-
house (ARLHS URU 015) during the "South American Lighthouses Weekend" on
Feb 26-28. They will work with two stations in CW, SSB and Digital modes
on 80m-10m. QSLs direct via : Radio Club Uruguayo, PO Box 37, 11000,
Montevideo, Urugay.

DARC DX and HF Contesting Committee and eQSL.cc start a new partnership
---
The DX and HF Contesting Committee of the DARC and the operators of the
Electronic QSL Card Centre (www.eQSL.cc) agreed upon setting up a develop-
ment partnership. The goal is to create an electronic server-to-server
transmission system for submission of electronic QSLs (eQSLs) to the online
DARC Contest Logbook (DCL). eQSL is the leading electronic QSL card system
with over 150.000 users who have uploaded over 150 million QSLs. Users can
upload their logs in ADIF format, where they will be cross checked with
other logs. Soon eQSL users will be able to transmit their eQSLs
electronically into the DCL for application of various DARC awards. In this
way, the DARC hopes to expand its user base of the DCL, even amongst amateur
radio operators who does not belong to the group fo active contesters.

No licence for YT1AD in Yemen

Hrane,YT1AD, was in Yemen recently and visited the Ministry for telecommu-
nication. While speaking to the director of frequency and regulations Hrane
learned that no valid license has been issued by the Yemen Government and
Ministry for telecommunication during the last 20 years. Even King Hussein
from Jordan visited Yemen but was denied a licence for security reasons!
However following DXpeditions were approved for DXCC credit:
7O1AA by 9K2DR and 9K2EC May/June 1990,
7O8AA by F2VX and F6EXV July/August 1990,
7O1YGF by DLs in April 2000 and
7O/OH2YY in May 2002.

TF HAMs get permission to work on 160m event outside of contests:

The national association of Icelandic Radio Amateurs (IRA) received a
favorable response from the Post and Telecom Administration in Iceland (PTA)
on Jan 25,2010, for granting access for Icelandic radio amateurs to the
frequency span of 1850-1900 kHz in international contests during the year
of 2010. The permit from the Icelandic PTA for the current calendar year for
1810-1850 kHz came with a permit for maximum of allowed output power of 10w.
The Icelandic HAMS are now allowed to join other major contests like the
ARRL International DX Contest, CQWW DX Contest, CQ WPX Contest or the
IARU HF Worldchampionship.

Editor: Rick Palm, K1CE <k1ce@arrl.net>

==> THE VIEW FROM FLAGLER COUNTY

After almost a year without an Emergency Coordinator (EC) and no ARESï¿½ organization here in the county, I am excited about a revitalization effort currently underway. We have a new District Emergency Coordinator (DEC), and I am hopeful that we will also have a new EC shortly. And that's only half of the breaking news: We are also securing new hardware/software in the county for access to the emerging digital voice and data network that offers unlimited opportunity for emergency communications. We are seeing a new dawn here under a D-STAR-lit sky.

The KA4RES D-STAR repeater project in Flagler is nearing completion and is expected to be operational (without Gateway) by the time you read this. Gateway access is expected soon. It's a "Two-Stack System" with two-meter and 440 MHz modules. System designer, owner and implementer Mike Lee, WB6RTH, reported that we will have full digital voice (DV) and slow-speed data capabilities, which includes simultaneous 1200 bps data transfer on the same frequency at the same time.

KJ4RJN is the club call sign of the new Flagler D-STAR Users Group and is open to all licensed hams interested in D-STAR. The equipment is owned by Lee, and is privately funded and operated for the benefit of all licensed hams in the Flagler, Volusia and St. Johns county areas here on the upper east coast of Florida.

The goal is to close the gap between Jacksonville and the Orlando area with multiple D-STAR systems so as to provide continuous coverage in the I-95 corridor. There is no membership in the Flagler D-STAR group: no dues, no roster, and no commitment. "This is a 100% privately funded effort to promote D-STAR in the area," said Lee.

D-STAR hands-on workshops are planned for introduction of the ICOM models IC-92AD, IC-91AD (both handhelds), IC-2820, IC-2200H and ID-880H (mobiles). Lee said "we want to ensure that there is sufficient infrastructure on the ground as well as ample "Elmers" to handle the training needs of the expected influx of new D-STAR users."

D-STAR has numerous advantages over traditional repeater systems: it is not dependent on its weakest link. If one part of the D-STAR network is taken out by a storm, for example, collateral circulation is quickly established for seamless communication continuity across town or across the country. With a traditional repeater system, an antenna on top of a 1,000-foot tower may sound good on paper, but would be the first to come down in a hurricane. Even if the tower survived, it's not easy to get an antenna re-installed quickly (or cheaply at more than a $1,000 for a licensed and insured tower climber to put it back in place).

It would not be credible to tell you all of this if I didn't try the D-STAR technology myself, so I bought the expensive digital board (UT-118) and had the staff at AES in Orlando install it in my pre-existing IC-2200H. See "K1CE For a Final" at the end of this newsletter for my early experiences with digital voice and this exciting new technology and opportunity for not only Flagler county, but everywhere.

"Service Over Self," Goals for a New ARESï¿½ Program

Embracing a policy of inclusion of all radio amateurs in the county is a priority for the new ARESï¿½ program. The goals are to (1) enfranchise the entire amateur community here for a truly robust Amateur Radio emergency communications asset that can provide meaningful support to the Emergency Operations Center (EOC); (2) re-establish a trustworthy working relationship with EOC personnel under the important principle that Amateur Radio serves the EOC and not the other way around; (3) re-establish trust and mutual assistance protocols with our neighboring counties' ARESï¿½ personnel and programs; (4) develop the new D-STAR digital system as a key emcomm asset and get local amateurs up to speed on it as a platform for ARESï¿½ operations; and (5) training, training, and more training. We will work towards all of these goals under one overriding philosophy: Service over Self. We will work as a team. Decisions will be made in an open manner, with input from all. The program will be designed to hinge on the collective efforts of all, not just one or two individuals.

The leadership team is attending meetings of Flagler Amateur Radio associations to present plans, and to invite their participation. By the time you read this, an MOU should be in place between the new Flagler ARES and the county EOC. A meeting in Jacksonville last night was held for the purpose of cementing new relations with Clay and Duval county ARESï¿½ for digital network and mutual assistance planning.

I am delighted with the pick of Mike Lee, WB6RTH, as our new DEC. He is an IT consultant and a self-described "change agent," an asset that has been desperately needed here on a number of levels. He is a veteran radio amateur with a long history of public service through ARESï¿½, including an all-nighter in front of a 220 MHz FM rig handling hundreds of frantic health-and-welfare inquiries in the immediate aftermath of the Loma Prieta major earthquake that struck the San Francisco area in 1989. Lee relayed messages up and down the famous Condor repeater system. Tears still come to his eyes when he talks about it. Lee

convinced me that he is in this for the right reasons: service to his fellow citizens in need during emergencies and disasters. I quickly discerned that he has absolutely no ego, and is the right person for the job. I know I will give him 100% support as we try to gain traction for a new ARESï¿½ program here in Flagler county, a potential ground zero for Florida's nemesis - hurricanes.

==> ARRL BOARD DECIDES EMCOMM ISSUES

The Board of Directors of the ARRL concentrated much of its deliberations on major emergency communications issues when it met in Hartford, Connecticut last month.

The Board approved the signing of a Memorandum of Understanding (MoU) with the American Red Cross (ARC <http://www.redcross.org/>). The ARC has agreed to permit ARESï¿½ volunteers to meet its requirement for a criminal background check by obtaining such a check, at their own expense, through a law enforcement entity rather than through the ARC process. ARRL members will be given information to permit them to make a fully informed decision with regard to volunteering with ARC.

The Board also instructed the ARRL staff to seek a change in Section 97.113(a)(3) of the FCC rules to permit amateurs, on behalf of an employer, to participate in emergency preparedness and disaster drills that include Amateur operations. There is an extensive discussion of this action on page nine of the March issue of QST.

==> "QUAKENET" 2010 EXERCISE SERIES

QuakeNet is an emergency preparedness exercise involving two-meter simplex operation around San Diego County, California. It is designed to provide the opportunity for licensees to use their two-meter gear to get to know it, learn limiting factors in their equipment, locations, output power, antenna and terrain, and become knowledgeable of the two-meter systems and environment in San Diego County. A goal is to keep the operation simple enough to encourage everyone to participate -- veteran amateurs, new hams and NBOAs (Never Been On the Air).

The QuakeNet 2 series for 2010 involves monthly exercises that are named after infamous earthquakes of the past. It began with an idea that Joseph Matterson, KI6TTF, had while attending a Communications Summit last September. The summit was a meeting held at the San Diego Salvation Army Headquarters that included local emergency response organizations and California OES as well as some fire districts. The summit covered the spectrum of radio operations in an emergency. There was a unanimous understanding of the need to exercise two meter simplex operation as the most viable lowest common denominator in an emergency or disaster.

Another topic was outreach to the "never been on the air" (NBOA) licensed Amateur Radio operators in the San Diego area. The estimate provided was that of the approximately 8,800 licensed operators in San Diego, 25% or 2,200 of them have never been on the air.

ARRL Southwestern Division Director Marty Woll, N6VI, added "KI6TTF is the driving force behind this exercise, and it turned out to be very popular, with demand for more in the future. It's worth emulating, assuming operators have an acessible mountaintop that sees the entire region involved, or other suitable radio vantage point for net control functioning. We include simplex and NVIS HF in nearly all of our drills for both ARES LAX and LAFD ACS in order to wean hams from the notion that all they need is to be able to hit a repeater." [Woll is also Assistant DEC for ARESLAX, and Training Officer for the LAFD ACS, CERT III -- ed.]

For more information, see the QuakeNet <http://quakenet.angelfire.com/>page of the ARRL-affiliated El Cajon Amateur Radio Club <http://www.wa6bgs.org/index.html> Web site.

==> DISASTER PREP TIPS

As we start a new decade, let's review some of the basics of Amateur Radio disaster preparedness. The following are tips from John Covington, W4CC, of Dallas, North Carolina.

You must make sure you're personally prepared for a disaster before you can even consider helping with Amateur Radio. If you are preoccupied with personal matters, you won't be able to help ARESï¿½. To be ready for disaster communications, do the following: Train regularly with your local ARESï¿½ group.

Think about how you might best be able to help during a disaster. Some of us are good at installing antennas and equipment, others of us are better at operating on the air. Not everyone is suited to doing every job. Sometimes just having helping hands, spare equipment or supplies can be helpful even if you cannot operate the radios yourself. Generators need fuel, operators need coffee, and stations need to be set up. Figure out where you best fit in. Decide how you can help out if you stay home: Can you deploy at a shelter or EOC for a few hours? Operate from home?

If you must evacuate, can you deploy from where you have evacuated to, such as a shelter?

Have all resource materials you need in printed form. Don't depend on computers, PDAs and so forth as they may not work in a disaster, require electricity and are relatively fragile.

If you use a computer regularly in your on-the-air operations, make sure you practice doing things such as calling nets and handling traffic the pencil-and-paper way once in a while. Remember, you may not be able to spare the amp-hours or the table space to run a computer.

Have an Amateur Radio ready-kit to supplement your personal ready kit. Some items to include:

*Portable radio, antenna and power supply or batteries (2 sets)

*Headset or earphones (you may be operating in a noisy area)

*Any cables you could possibly need

*Pencils and Paper

*Clipboard (firm writing surface, you may not have one otherwise)

*Radiogram forms (helpful but not absolutely required)

*Operating aids (pink card, Field Resources Manual, list of ARRL numbered radiograms, and anything appropriate for your local area)

*Small tools (multi-tip screwdriver, multitools, etc.)

*ARESï¿½ Identification Card, if appropriate

*Important phone numbers and frequencies

*Map of the area

*Flashlight

*Poncho - very small to store, only around $2 and can be useful when you least expect

If carried in lieu of a personal ready kit, a few other items may be helpful:

*For a short deployment, a bottle of water plus some crackers or something to eat requiring no preparation could make things much more bearable for you

*Medicine

*Toilet paper - small packets from MRE kits are very handy and don't take up much room

*Moist towelettes

Here are a few other suggestions from your editor based on his perspective as a Registered Nurse:

*Know CPR.

*Know the location of the Automated External Defibrillator (AED), and how to use it.

*Know the signs/symptoms of a heart attack and stroke.

Also, be prepared physically, mentally and emotionally for the sometimes overwhelming demands of a disaster or emergency environment. Hope for the best, but expect the worst. You are at risk for witnessing horrific scenes. Protect your self and especially young hams; participate in psychological and grief counseling, if necessary. Your mental health is just as important as your physical health.

==> OP-ED: NEW MODES

The Pony Express is perhaps one of the most iconic Old West symbols of American ingenuity, initiative and enterprise. Many of us grew up reading stories or watching television shows about the heroic adventures of the fearless Pony Express rider who grabbed a saddlebag of mail, flung it over his horse and then tore out of town. With a fresh horse every ten miles or so and a new rider every hundred, the nearly two thousand mile route could be covered in ten days instead of thirty by an overland stage.

Their motto was "The Mail Must Go Through" and they played a vital role in how the West was won. As a kid it was easy to imagine that the Pony Express pursued its mission for years, if not decades, as the vital communications link to the frontier and all the way to Sacramento, California.

But such was not the case. In reality it was a short-lived money losing venture. Although they delivered over 34,000 pieces of mail and only lost one delivery, the completion of the transcontinental telegraph immediately spelled the end of the Pony Express. Instead of a ten day ride, messages could be routed across the country by wire. Delivery time could now be measured in minutes.

Nineteen months after it started the Pony Express rode off into the sunset of obsolescence, replaced by a technology that was faster and could handle a much greater volume of messages.

What's the lesson in this for the Amateur Radio emcomm community? Well, if you have a horse and saddle you can still climb aboard and ride to the next county or wherever to deliver a message. If the message's destination is farther than you can ride, how many relays will it take for the message to be delivered? How reliable will each leg be along the entire route? By the time the message reaches the recipient will it already be outdated? Sure, the means of delivery may still work but does it meet the true needs of those who are relying on it or simply keeping you and your pony in shape?

The point is that even tried and true methods of wireless communication that have near iconic status may not have either the relevance or utility that potential consumers may require. Yes, it may be the manner and mode of communication that the operators are accustomed to, but will it meet the actual need?

This is not meant to be a particular criticism of any particular national system because it can apply just as well to local operations, too. Do the people and agencies that we serve need a capacity for more lengthy and detailed messages? Rapid delivery to multiple recipients? Message attachments? Images as well as text? Inter-modal movement of messages? Some may disparage services such as Twitter, but is a twenty-five word limit for a Radiogram all that different from the 140 character limit for a tweet?

It seems that every few months we are reading about some new digital mode for Amateur Radio, many of them sound card-based freeware. Sure it is difficult to keep up with all of them and none has become a standard, but it is easy to begin sampling them and seeing what works.

We all have an obligation to expand our communication horizons by acquiring new skills and exploring new modes and technologies that we can interface with traditional modes. Otherwise we run the risk of standing around holding the reins on our pony waiting for someone to ask us to help. -- Jim Aylward, KC8PD/AAM5EOH, EC, ARESï¿½ of Portage County; Radio Officer, Portage County EMA/RACES Emergency Operations Officer, Ohio Army MARS

==> LETTERS

Diamond X-30 Antenna

In the last issue, you discussed your experience with the Diamond X-30 antenna. I've been using a Diamond X-30 antenna as a temporary base antenna. I'd previously used an X-50, which worked very well, but was less convenient to transport due to its additional length.

I replaced the jam nuts on the radials with stainless wing nuts to eliminate the need for a separate wrench for those nuts. Unless you keep coax permanently attached to the antenna, it will be necessary to carry a 10 mm wrench for the antenna mounting bolt. I am searching for a thumbscrew or wing bolt replacement.

Based on my MFJ analyzer, the real-world two-meter band SWR of both of these antennas is as flat as a dead man's EKG. 70 cm band SWR is 1.5:1 or less across the entire band.

I run an X-50 with an N connector at home. I am very pleased with its performance, and its clean silhouette pleases my XYL. A happy wife equals a happy life. -- Dan Thayer, W1CDT, Somers, Connecticut

220 MHz Radios

In the January issue, a reader lamented the lack of 220 MHz multi-band radios on the market. The Kenwood TH-F6A is a good 144/220/440MHz tri-bander hand held with 5W output. Check it out. -- John Meyers, WA4GPS

On Power Inverters

I enjoyed your comments in the December 2009 issue of the ARESï¿½ E-Letter about using an inverter to get 120 volts from batteries. New hams might benefit from an expanded discussion.

A cheap Wal-Mart inverter is very likely a modified sine wave generator. It could be a square wave or a semi-saw tooth, or even a crude saw tooth generator. Concerning square waves, much equipment, as you noted about motors, does not like square waves. The higher RMS value of the square wave and the lack of a rising waveform can damage resistive and other loads. Sharp-cornered waveform generators suffer similar problems, and create interference.

Inverters also lose some power to the inefficiency of the conversion machine. The quality of the machine will determine how much is lost. In addition, the input-output ratings of cheap inverters are subject to question, and the device could fail and leave the emcomm operation stranded. Always ask for a detailed description of the output waveform. One work-around is to connect whatever dc power source you use, such as batteries, as directly as possible to equipment that use the same dc voltage. Avoid conversion where possible. For lighting, efficient 12 vdc auxiliary lights such as LEDs are also available at the cost of more money and trouble, of course. A pure sine wave generator is always a good source, and today they are not as expensive as in years past. The ratings may be more reliable from a manufacturer that engineers a pure sine wave generator. Better units have voltage and other parameter monitors.

Side note: When Hamilton County, TN ARESï¿½ drills with nets and requests all who can to use something other than "shore power," we avoid the use of the word "emergency" when describing the type of source we are using as the net is polled. The reason for the word choice is that a ham in an adjacent area with fringe reception was monitoring and only heard the word "emergency," and he began to try to help with getting an emergency response together.

His reaction was natural and appreciated, but it caused us to revise our descriptions to "battery power" or "solar power" or "propane generator" power when we describe how we are avoiding the use of house outlets to power our rigs. It is also more beneficial for learners if the actual method is described. -- Robert Berman, W4SET, Hamilton County, Tennessee ARESï¿½

==> FLORIDA "OPERATION RADAR" COMMUNICATIONS EXERCISE

The Florida Division of Emergency Management (DEM) and Florida National Guard (FLNG) hosted "Operation Radar," the largest assembly and evaluation of communications systems in the Southeast at the Camp Blanding Joint Training Center, Camp Blanding, Florida on January 25-29, 2010.

The media day allowed reporters to interview local, state and federal officials, technicians, and tour communications equipment from all seven domestic security regions in Florida that were staged across the grounds of the Florida National Guard's training site.

Since 2001, the state of Florida, Regional Domestic Security Task Forces and local agencies have been working on the development, implementation and rollout of a variety of systems in order to provide interoperable communications among response agencies for day-to-day and emergency operations.

Examples of communications systems tested during the week were: The Florida Interoperability Network (FIN), Statewide Law Enforcement Radio System (SLERS), Emergency Deployable Interoperable Communications (EDICS), Emergency Deployable, Wide Area Remote Data Systems (EDWARDS) and trailers, Mutual Aid Radio communications systems, Regional Emergency Response Network (RERNs) and Mobile Command Vehicles.

Click here <http://www.floridaguard.army.mil/news/read.aspx?id=1533> for an after-action report.

For more information on the Florida Division of Emergency Management and to "GET A PLAN!" click here <http://www.floridadisaster.org/>. Daily Florida State Emergency Response Team (SERT) situation and flash reports here <http://www.floridadisaster.org/index.asp>.

==> K1CE FOR A FINAL

As mentioned at the outset of this issue, I had AES install the digital board on my IC-2200H two-meter mobile radio so that I could try the digital voice mode and especially the evolving D-STAR network. D-STAR

development reminds me of the early packet radio phenomenon back in the early '80s. A few tinkerers exploded into an enormous fireball of activity across the country. I think we have lit the D-STAR fuse and it is the "Next Big Thing." I wanted to get in early, just like I did with packet. (I put up the first PBBS in Connecticut back in the day).

There are four basic pieces of programming to start with: "My Call" (K1CE), "Your Call" (the call sign of the station you want to communicate with), "Repeater Call 1" (your local digital repeater and Internet gateway into the nationwide network), and "Repeater Call 2" (the distant, network-linked repeater that is the local repeater of the end user you want to talk to). With this programming done, it is a simple matter of pushing the talk button on your microphone and communicating with the other station in almost the same manner as you would in a traditional FM set-up.

On my very first contact, I almost fell out of my chair at the unbelievable audio quality. It was one of those "first times" in ham radio that you never forget, like your First Contact, your First DX, your First Space Shuttle Contact, etc. There is absolutely zero noise on the audio, and voice sounds are of high fidelity. It was a joy to operate digital voice purely for the audio quality experience alone. (It was also nice to pick up a couple of new ham friends who were already devotees, like Mike Lee, WB6RTH).

A repeater/gateway system is soon to be operational here in the county, and I can't wait to try my new digital voice capabilities on some long-haul D-STAR circuits. I'll report back with my discoveries next month. In the meantime, check out these D-STAR resources that I've found so far: D-STAR Users.org <http://www.dstarusers.org/> and ICOM D-STAR Page <http://www.icomamerica.com/en/products/amateur/dstar/dstar/default.aspx>. See you next month! 73, Rick K1CE

The ARES E-Letter is published on the third Wednesday of each month. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/FandES/field/ares-el/.

126. PSU problem help needed

Newsgroup: rec.radio.amateur.misc
Date: 2010-02-24 09:23:45 UTC
From: Barett <barett@blueyonder.co.uk>
Message-ID: <re6hn.196050$0M5.175071@newsfe23.ams2>
Source record: 6095

Hi

I have a Watson W-30am 30-35 Amp peak power supply.

After using an IC-706 running 30-40 Watts on PSK31 for a few hours the power supply starts making a very load buzz/hum on keying the radio. The noise decrease's and increases turning the power up and down on the radio itself.

I have also notice the buzz/hum is still there when the radio is disconnected and a small load say 1 Amp connected to the PSU, although the noise is a lot quieter. So I don't think that the radio causing it.

When I start it all up the next morning the power supply is running fine again, no noise until I have been keying the radio in PSK31 mode for several hours when the very load concerning buzz/hum starts again.

The power supply has a top case fan that draws the heat out of the case and the power supply case doesn't feel hot to the touch. When the load noise occurs

Does anyone have any thoughts what could be causing this?

Thanks for any advise or help in advance.

127. NZART Headquarters Infoline Issue 23S

Newsgroup: rec.radio.amateur.misc
Date: 2010-02-25 07:26:08 UTC

NZART Headquarters Infoline Issue 23S
26-February-2010
NZART Website: http://www.nzart.org.nz/

Greetings
Welcome to Headquarters-Infoline Special covering the failure to get fully funded annual Kordia accounts for site leases.

Find HQ Infoline on the Web at:
http://www.nzart.org.nz/infoline/index.html

*Attachment for Branches:
==NZART Headquarters Infoline 23S.doc
----Next Official Broadcast is on SUNDAY 28-FEBRUARY-2010
----Next Infoline is to be e-mailed on SUNDAY 07-MARCH-2010
****
Kordia Co-Location Agreement

I regret to report that negotiations with respect to fully funding the annual Kordia account for site leases have been unsuccessful. A change late last year to the Equipment Schedule introduced by Kordia, charging for rack space as well as the antennas, has almost doubled the annual fees payable.

Negotiations over the last two years have seen the annual amount payable reduce from over $27,000 per annum ($27,350), down to a total of just under $10,000 per year ($9966.00). Despite offers of financial help from Branches with equipment in Kordia sites, totaling $3966, the shortfall which would be a debt your Association would have to pay, is $6000 per annum. Council, at its face-to-face meeting in Wellington over the weekend of February 20/21 concluded that this was unsustainable.

There are a total of 11 Kordia sites around New Zealand where we have repeater equipment located: Te Aroha, Mt Egmont, Wharitie, Mt Erin, Mt. Grey, Blue Duck, Fitzherbert, Whakapunake, Kuriwao, Mt Murchison and Mt Cargill. The negotiations with Kordia resulted in the offer to "pay for some" and stay at the rest for free, provided that the space is not required for future Kordia equipment and systems. Arising from this offer, it was determined that there were three sites we could not do without in order to keep the National System going: Mt Egmont (Taranaki), Blue Duck and Mt. Cargill. These three sites do not have any viable alternative site which equipment could be relocated to without major re-engineering of the National System.

For the three sites we need to keep the National System viable in its present form (Mt. Egmont, Blue Duck and Mt. Cargill), the annual cost is

$9206 including GST. This does not include power which paid for all 11 sites which is currently another $760 per annum incl. GST.

As a result, I regret I have had to advise Kordia that NZART is unable to sign the Co-Location Agreement. The consequence of this is that we will have to shut down and remove the amateur radio equipment from all 11 sites at the earliest opportunity unless your Branch can meet the on-going cost - see 1 below.

Where to From Here

1. Kordia are willing to enter into individual site agreements with Branches who want to retain their repeater site and can afford to meet all the costs. If your Branch wants to do this, please contact me for details of the person in Kordia to make contact with.

2. Kordia have agreed to a six month time frame in which all amateur equipment is to be removed. This is effective from 28 February 2010.

3. NZART has received an offer from TeamTalk to host amateur repeaters at their sites at no charge where possible. If your Branch has a repeater in a Kordia site, and can relocate to a nearby Teamtalk site, then this may offer a solution. If this is a solution in your area, I can provide contact details for TeamTalk . Note that TeamTalk are already hosting amateur repeaters at several locations throughout New Zealand and we are grateful for this excellent cooperation.

4. In the longer term, we have the possibility to re-engineer the National System to totally bypass Kordia owned and operated sites by making use of TeamTalk and other sites. This involves more equipment, shorter links between nodes, and some use of higher frequencies (23cm and up) and a considerable amount of re-engineering. However it is achievable and should be a goal to work towards.

If I can provide more information, please do not hesitate to contact me.

Vaughan Henderson ZL1TGC

==> FCC NEWS: FCC ALLOWS ROBOTIC DEVICE IN AMATEUR BAND

In January 2008, a company called ReconRobotics filed a request with
the FCC for a waiver of Part 90 of the Commission's Rules with respect
to the Recon Scout -- a remote-controlled, maneuverable surveillance
robot designed for use in areas that may be too hazardous for human
entry. A waiver is required to permit licensing of the Recon Scout
because the device operates in the 430-448 MHz band, which is allocated
to the Federal Government Radiolocation service on a primary basis, as
well as the Amateur Radio Service and certain non-federal radiolocation
systems on a secondary basis. More than two years later, the FCC
granted the waiver request in the form of an Order (WP Docket No
08-63), subject to certain conditions.

In its comments filed in May 2008, the ARRL called on the FCC to deny
ReconRobotics waiver request, "either permanently or even temporarily."
The FCC noted in the waiver that they had received more than 70
comments "generally consist[ing] of public safety and law enforcement
entities supporting the waiver request, and amateur radio operators
opposing it." In their initial waiver request, ReconRobotics asserted
that even thought the device operates in a in an area allocated to
```

other services, including Amateur Radio, the Recon Scout operates with only 1 W peak power and it is "unlikely to cause interference to these services."

The FCC noted in the Order that they had received more than 70 comments "generally consist[ing] of public safety and law enforcement entities supporting the waiver request, and amateur radio operators opposing it." In their initial waiver request, ReconRobotics asserted that even though the device operates in an area allocated to other services, including Amateur Radio, the Recon Scout operates with only 1 W peak power and it is "unlikely to cause interference to these services." Read more here <http://www.arrl.org/news/stories/2010/02/25/11361/?nc=1>.

==> PUBLIC SERVICE: INJURED COLORADO SKIER USES AMATEUR RADIO TO SUMMON HELP

<http://www.arrl.org/news/images/nms/fullsized/1418.jpg> When Steve Priem, N0YIV, of Boulder, Colorado, decided to go backcountry skiing near Yankee Doodle Lake in the Guinn Mountain area of Colorado's Roosevelt National Forest on Friday, February 19, the 60 year old ham made sure he was well prepared: Not only did he take along a rescue whistle, he made sure his handheld transceiver was fully charged and in his pack.

It's a good thing he did: When Priem was injured while skiing, he used his radio to summon help. According to ARRL Colorado Section Manager Jeff Ryan, K0RM, a ham more than 100 miles away in Colorado Springs answered Priem's call for help and called 911. Priem was able to provide GPS coordinates for his position. Read more here <http://www.arrl.org/news/stories/2010/02/22/11353/?nc=1>.

==> LAUNCH OF NEW ARRL WEB SITE DELAYED TO "GET IT RIGHT"

After meeting with ARRL staff on February 23 -- two days before the new ARRL Web site was to launch -- ARRL Chief Operating Officer Harold Kramer, WJ1B, made the decision to delay the unveiling of the Web site until late March. "Work on the new ARRL Web site has progressed at a frantic pace but there are still some potential 'bugs' that could affect members. We need to be sure we get it right," Kramer said. "Our members' security, information and ability to actually use of all the options on the new site outweigh any rush to meet an artificial deadline. It's just good customer service."

The new Web site -- which will contain the online store, class registrations, audio, video, DXCC information, contest data, individualized member options and other 21st century opportunities for members -- is one of the largest technology upgrade activities that ARRL and Fathom, the company programming the site, have ever undertaken. "Reviewers have been unanimously impressed and are helping make sure we create the easiest, most enjoyable online experience possible," Kramer explained.

According to ARRL Media and Public Relations Manager Allen Pitts, W1AGP, the current ARRL Web site is not only used by ARRL members, but is a prime reference source for engineers, hams and wireless technicians around the world, making it the premier place to find information about Amateur Radio, its activities and the sciences behind it. "The Web is our main face to the world, and the new Web site will be fantastic," he said. "Although we all regret the delay, I believe our members will appreciate our diligence about the ease of use, security and navigation for the new site."

==> ON THE AIR: ARRL DX PHONE CONTEST BRINGS DX IN FULL FORCE TO THE HF BANDS!

<http://www.arrl.org/news/images/nms/fullsized/1419.jpg> With the 2010 ARRL International DX CW Contest now history, the first weekend in March brings the next round of competition: the 2010 ARRL International DX Phone Contest. Like its CW predecessor, this event focuses on DX stations working all US states and Canadian provinces, while US and Canadian amateurs try to work as many DX countries as possible over the 48 hour contest period. Read more here <http://www.arrl.org/news/stories/2010/02/24/11356/?nc=1>.

==> SECTION NEWS: ARRL VIRGINIA SECTION MANAGER ELECTION RESULTS

In the only Section Manager race this winter, Carl Clements, W4CAC, was re-elected as the ARRL Virginia Section Manager. He received 855 votes; his opponent, Glen Sage, W4GHS, received 511 votes. Election ballots were counted February 23 at ARRL Headquarters. Clements, of Portsmouth, starts his new two year term of office on April 1, 2010. In North Carolina, Bill Morine, N2COP, of Wilmington begins his first term as Section Manager on April 1. Section Manager Tim Slay, N4IB, decided not to run again for another term of office, and Morine was the only nominee. Slay has served two terms as North Carolina's Section Manager.

The following incumbent ARRL Section Managers did not face opposition and were declared elected for their next terms of office beginning April 1: Pete Cecere, N2YJZ, Eastern New York; Eric Olena, WB3FPL, Eastern Pennsylvania; Gary Stratton, K5GLS, Louisiana; Bob Schneider, AH6J, Pacific; Steve Early, AD6VI, San Diego, and Scott Rausch, WA0VKC, South Dakota.

==> AMATEUR RADIO DIRECTION FINDING: FOXES, FITNESS AND FUN IN 2010

By ARRL ARDF Coordinator Joe Moell, K0OV

<http://www.arrl.org/news/features/2010/02/24/11358/?nc=1> "Geeks in the woods!" That's how Jay Hennigan, WB6RDV, of Goleta, California, describes Amateur Radio Direction Finding (ARDF). Several times a year, Jay gets together with friends for a session of this international Amateur Radio sport -- also called foxtailing and radio-orienteering. As they set out, five 2 meter "foxes" are somewhere in the woods, transmitting for one minute each in sequence. Armed with a special ARDF set or just a handheld transceiver with a measuring-tape Yagi and attenuator, they see how fast they can run or walk from the start to

each transmitter in optimum order and then back to the start, or perhaps to a separate finish point. To help them navigate, they carry compasses and special orienteering maps, but they aren't allowed to have GPS displays or other high-tech navigation aids. Standardized ARDF courses provide a good test of equipment performance and hunter skill. It's friendly competition combined with great exercise. It attracts "techies" and "jocks" of all ages who don't need a ham license to get started. And for some, it leads to medals at national and international competitions. Read more here <http://www.arrl.org/news/features/2010/02/24/11358/?nc=1>.

==> INTERNATIONAL NEWS: ICELAND AMATEURS RECEIVE NEW PRIVILEGES

As of Friday, February 19, Iceland's Post and Telecom Administration (PTA <http://www.pta.is/Default.aspx?cat_id=101>) granted temporary experimental access to the 4 and 600 meter bands at least through the end of 2010, according to Islenzkir Radioamatorar (IRA <http://www.ira.is/pages/viewpage.action?pageId=4194372>) President Jonas Bjarnason, TF2JB; the ITA is Iceland's IARU <http://www.iaru.org/> Member-Society. After obtaining a special license from the PTA, Bjarnason said that TF stations with "N" or "G" class licenses may now operate between 493-510 kHz and 70.000-70.200 MHz running 100 W. Amateur operations on both bands are granted on a secondary basis.

==> W1AW ANNOUNCES NEW SCHEDULE FOR DIGITAL BULLETIN TRANSMISSIONS

Beginning Monday, March 15, W1AW <http://www.arrl.org/w1aw.html>, the Hiram Percy Maxim Memorial Station, will alternate the digital modes used for its digital bulletin transmissions. While Baudot, PSK31 and MFSK16 still make up the digital mode complement, W1AW Station Manager Joe Carcia, NJ1Q, says that the schedule will be altered to give more exposure to PSK31 and MFSK16. "Because of time constraints and the varying lengths of digital bulletins, there were many instances where only Baudot was used," he said. "With the new schedule, amateurs preferring either PSK31 or MFSK16 will no longer find these modes secondary." Read more here <http://www.arrl.org/news/stories/2010/02/16/11343/?nc=1>.

==> SOLAR UPDATE

Tad "Late lies the wintry Sun a-bed <http://www.poemhunter.com/poem/winter-time/>" Cook, K7RA, reports: The unbroken string of sunspots continues. Two new groups -- 1050 and 1051 -- appeared in the past two days, and we've now had 36 continuous days with sunspots. Prior to that, there is just a single day once in a while with no spots. The last time we had more than one day of no sunspots was a few months ago, November 23 through December 8. Look for more information on the ARRL Web site on Friday, February 26, including a discussion about an increase in reports of 10 meter activity, and a "reverse beacon network" that uses CW skimmers to automatically check many frequencies from many locations, and then list the calls heard on

a Web site. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by Robert Louis Stevenson's Winter Time <http://www.poemhunter.com/poem/winter-time/>.

==> ARRL FIELD DAY : 2010 FIELD DAY PACKETS NOW AVAILABLE

It's that time of year again -- time to start gearing up for ARRL Field Day, June 26-27, 2010! ARRL's flagship operating event -- always held the fourth full weekend in June -- brings together new and experienced hams for 24 hours of operating fun. Field Day packets are now available for download <http://www.arrl.org/contests/forms/fd-2010-packet.pdf> and include the complete rules (including changes for 2010), as well as other reference items such as forms, ARRL Section abbreviation list, entry submission instructions, a Frequently Asked Questions section, guidelines for getting bonus points, instructions for GOTA stations, a kit to publicize your event with the local press and more.

==> W1AW NEWS: MARCH W1AW/WEST COAST QUALIFYING RUN SCHEDULE

The March schedules for the W1AW and West Coast Qualifying Runs were inadvertently left out of the March issue of QST. The March schedules for W1AW are as follows: Friday, March 5 at 10 PM EST (Saturday, March 6 at 0300 UTC) for 10-25 WPM and Tuesday, March 16 at 7 PM EDT (2300 UTC) for 10-40 WPM. The West Coast Qualifying run will be transmitted by station K6KPH on Saturday, March 13 at 2 PM PDT (2200 UTC) for 10-35 WPM. The run will be transmitted simultaneously on 3581.5, 7047.5, 14047.5, 18097.5 and 21067.5 kHz.

==> THIS WEEK ON THE RADIO

This week, look for an NCCC Sprint Ladder on February 26. The Russian PSK WW Contest and the CQ 160 Meter Contest (SSB) are on February 26-27. The REF Contest (SSB), the EPC WW DX Contest, the UBA DX Contest (CW), the Mississippi QSO Party and the North American QSO Party (RTTY) are all on February 27-28. The High Speed Club CW Contest is February 28. The North Carolina QSO Party is February 28-March 1. The ARS Spartan Sprint and the AGCW YL-CW Party are both on March 2. Next week, look for the ARRL International DX Contest (SSB) <http://www.arrl.org/contests/rules/2010/intldx.html> on March 6-7. The Wake-Up! QRP Sprint is March 6 and the DARC 10 Meter Digital Contest is March 7. The CLARA HF Contest is March 9-10 (continuing on March 13-14) and the CWops Mini-CWT Test is March 10-11. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, March 21, 2010, for these online course sessions <http://www.arrl.org/cep/student/> beginning on Friday, April 2, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1698 - February 26, 2010

Amateur Radio Newsline report number 1698 with a release date of
Friday, February 26th, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. RACES is reborn in Illinois, the FCC puts a
rescue radio robot right in the middle of the 70cm ham band, an HT call
leads to a rescue in a skiing accident, a ham radio hero from India to
meet with the United Kingdom's Royal Family, Iceland gives its hams 4
meters and I-A-R-U Region 3 decides to adopt the Japanese Yen as its
only exchange currency. Find out the reason why on Amateur Radio
Newsline(tm) report number 1698 coming your way right now.

(Billboard Cart Here)

RESCUE RADIO: RACES IS REBORN IN ILLINOIS

Rescue radio using ham operators has been given a new lease on life in
Illinois. This, with a compact between the Illinois Emergency
Management Agency and amateur radio operators throughout the state for
them to provide an additional layer of emergency communications during
disasters. Amateur Radio Newsline's Mark Abramowicz, NT3V, has the
details:

--

Illinois Emergency Management Agency director Andrew Velasquez III is
praising the agreement and those who will become part of it. Velasquez,
quoted in a news release issued jointly by Governor Patrick Quinn's office
and the IEMA, says the state is "very fortunate to have a dedicated group
of volunteer amateur radio operators who are willing to donate their time
and expertise to help make Illinois safer." Velasquez noted the agreement
will further strengthen the state's communications interoperability plan -
which includes layers of redundant communications.

Brad Pioveson, W9FX, of Benton, has been appointed volunteer state officer
for the reconstituted Radio Amateur Civil Emergency Services program.
According to the IEMA, he'll be serving as a single point of contact
between the state office and the state's amateur radio community.

In addition to throwing its support behind amateur radio as an integral
part of emergency communications in Illinois, the state EMA also agreed to
equip a RACES station with equipment and resources needed to maintain both
wired and wireless communications with the state emergency operations

center in Springfield - this during emergencies. Pioveson says there are some 20-thousand licensed hams in the state, many of whom are part of what he called "a very rich history of providing emergency communications" for Illinois.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Illinois ARRL Section Manager Thomas Ciciora, KA9QPN, gave his personal thanks to W9FX, K9DUE, N9LQF, and the other folks whom he may have inadvertently forgotten but who helped to make this dream into a reality. (KA9QPN)

**

RADIO LAW: FCC TO PERMIT RESCUE RADIO ROBOT IN THE 430 TO 450 MHz BAND

The FCC has issued a waiver of the Part 90 rules to permit a company called Reconrobotics Incorporated to sell a remote controlled security robot that will operate in the 430 to 448 MHz band. This is spectrum that is primary to the Federal Radiolocation Service but also encompasses the Amateur Service weak signal, satellite and repeater subbands.

The waiver permits Reconrobitics to manufacture and sell a device called the Recon Scout. This is described as a device designed for state and local law enforcement and firefighting agencies, and security personnel in critical infrastructure industries. The Recon Scout can be thrown, dropped, or launched into potentially hazardous areas and can provide real-time video to an operator located a safe distance away. Typical applications will include such things as checking a building prior to forced entry, searching vehicle undercarriages for explosives and searching for survivors in a burning structure.

The Recon Scout transmits the analog video signal to the operator on one of three six megahertz channels. These are 430 to 436 MHz, 436 to 442 MHz, and 442 to 448 MHz. Reconrobotics says that multiple channels are necessary in order to avoid interference during incidents where multiple Recon Scouts are in use, but that such situations should be rare.

The company's now approved proposal is that the first unit sold to a responding organization would operate on 442 to 448 MHz. That happens to be where thousands of ham radio repeaters operate. The 436 to 442 MHz version being sold only to entities that already own the 442 to 448 MHz version, and the 430 to 436 MHz version being sold only to entities that already own both of the others.

In approving the waiver, the FCC told Reconrobotics . the Recon Scout will have to operate on a secondary basis where it cannot cause interference and is not protected from interference to all Federal users and licensed non-Federal users including radio amateurs. The FCC also warned prospective users that operation of the Recon Scout in an unauthorized manner will subject licensees to Commission enforcement action and license

revocation. It also said that widespread improper use of the device could lead the Commission to stop granting or renewing Recon Scout authorizations. More on this next week.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles. (FCC, QRZ.com)

**

RESCUE RADIO: HT CALL BRINGS HELP TO DOWNED SKIIER

A Colorado backcountry skier who injured himself in a fall west of Eldora Mountain Resort was rescued. This, after using a handheld amateur radio transceiver to call for help.

Boulder County sheriff's officials say 60-year-old Steve Priem, N0YIV, of Boulder used the radio after falling Friday afternoon, Friday, February 19th. According to the on-line Colorado Connection, another unidentified ham radio operator about 120 miles away heard Priem's request for assistance and called 911. Rescue teams were dispatched with part of the coordination taking place using amateur radio simplex frequencies and area repeaters.

N0YIV was able to provide rescuers with GPS coordinates for his position and had with him a rescue whistle. He was treated at a hospital for non-life-threatening injuries. Sheriff's officials described Priem as an experienced backcountry skier who was well prepared for almost any emergency. (ColoradoConnection, ARNewsline(tm))

**

RESCUE RADIO: HAM HERO VU2RBI TO MEET WITH UK ROYAL FAMILY

One of the worlds most decorated hams has been invited to meet with the British Royal Family. Steve Herman, W7VOA, is in New Deli, with the details:

--

VU2RBI, Bharathi Devulapalli Prasad, announced on her Facebook page (Feb. 22) that she has been invited to speak at the Commonwealth Day Observance in London in March 8th in the presence of HM The Queen, HRH Duke of Edinburgh, the Prince of Wales, the Duchess of Cornwall and all Commonwealth High Commissioners. She says she will be talking to the distinguished group about science technology and society, which she says will include her personal experiences on ham radio.

Bharati, one of ham radio's most prominent YL's, has won several significant international awards related to her service to society by using amateur radio. She was part of the Andaman DX'pedition team that won the ARRL's 2005 International Humanitarian Award. The December 2004 earthquake and resulting tsunami that devastated South Asia coastal areas swiftly shifted the role of the DX operation into an emergency communication link with India's mainland.

For the Amateur Radio Newsline, I'm Steve Herman, W7VOA, in New Deli.

--

VU2RBI is active on HF CW and SSB from her shack in New Delhi. Her husband and two children are also licensed radio amateurs as well. (W7VOA)

**

RESTRUCTURING: ICELAND ON 4 METERS AND 600 METERS

Hams in Iceland now have access to both the 4 meter and 600 meter bands. On February 19th the Icelandic Post and Telecom Administration granted a temporary experimental access to the 70.000 to 70.200 MHz through December 31st. Access is on secondary basis with a maximum bandwidth is 16 kHz and power limit is 100 watts.

At the same time, the Post and Telecom Administration granted a temporary experimental access to the 600 meter band also valid until December 31st. The allotted frequency span is 493 to 510 kHz. On a secondary basis using CW only at a power limit of 100 watts.

In both cases current amateur licensees need to apply to the Post and Telecom Administration for a special experimental permit. This is open to both Icelandic "N" and "G" license classes. (TF2JB)

**

BREAK 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W9ELK repeater serving Elkhorn, Wisconsin.

**

WORLDBEAT: IARU REGION 3 ADOPTS YEN ONLY ACCOUNTING

No more US dollars for International Amateur Radio Union Region 3. At the last IARU Region 3 Conference, it was voted that all accounts of the Region would now be maintained only in Japanese Yen and not in the two currency system of US Dollars and Japanese Yen as has been done for many years. The reasoning was that all accounts are maintained in Tokyo and the old system involved a double currency conversion that in many cases resulted in losses before it was credited to the IARU Region 3 banks. All subscriptions to Region 3 from member societies will also now be calculated in Japanese Yen only. (Southgate)

**

RADIO LAW: STUDY SAYS MOBILE CELLPHONE BANS WORK BEST IN URBAN AREAS

A new study on the effectiveness of banning mobile operation of non hands free cellphone use has concluded that they work best in urban areas. Bruce Tennant, K6PZW, has more:

--

A new investigation aimed at analyzing the impact of hand-held cell phone legislation on driving safety concludes that usage ban laws are having more of an impact in densely populated urban areas with a higher number of licensed drivers than in rural areas where there are fewer licensed drivers.

The study, conducted by Sheldon Jacobson, a professor of computer science and the director of the simulation and optimization laboratory in Illinois, analyzed the relationship between pre- and post-law automobile accident rates using public data from 62 counties in New York. He and his team found that after banning hand-held cell phone use while driving, 46 counties in New York experienced lower fatal accident rates. 10 of these did so at a statistically significant level, while all 62 counties experienced lower personal injury accident rates.

Jacobson and his team of researchers also discovered that the personal injury accident rate decrease was more substantive in counties such as Bronx and Queens New York. These are also boroughs in New York City proper where there was a high density of licensed drivers rather than in sparsely populated areas of upstate New York.

Jacobson and co-researchers published their results in an article titled "Evaluating the Impact of Legislation Prohibiting Hand-Held Cell Phone Use While Driving," which will appear in a forthcoming issue of the journal Transportation Research Part A: Policy and Practice.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Now, we do not want to sound like know it all's nor belittle the word of these researchers, but it does seem reasonable to assume that where there are more people using cellphones that banning their hand held use while in motion will result in fewer accidents. Also that the rates of decrease would be greater where there are more cars, more cellphones and more people using both. (Science OnLine)

**

RESCUE RADIO: FCC SAYS YES TO 97:113 WAIVER REQUEST FROM SONAMA COUNTY HEALTH SERVICES

The waivers to Section 97:113 of the Amateur Service rules to permit paid employees to take part in disaster training exercises continues. This with a February 16th letter from the FCC granting a request from the County of Sonoma Department of Health Services in Santa Rosa, California to utilize about a half dozen hams in its employ to take part in monthly radio-check disaster preparedness drills. Specifically, the FCC says that the County of Sonoma Department of Health Services can use the services of the ham radio volunteers in its employ. This for events slated for on March 10, April 14, May 12, June 9, July 14, August 11, September 8, October 13, November 10, and December 8th of this year.

The County of Sonoma Department of Health Services filed the waiver request for these exercises back on November 25th, 2009. In granting the request the Scot Stone, who is the Deputy Chief of the FCC's Mobility Division concluded that the waiver request was appropriate under the circumstances presented. Each drill is scheduled to last two hours. (FCC)

**

ENFORCEMENT: COURT TO RE-EXAMINE WARDROBE MALFUNCTION FINE

A federal appeals court says that it will re-examine the FCC fine it threw out against CBS over Janet Jackson's "wardrobe malfunction" during the 2004 Super Bowl halftime show. The 3rd U.S. Circuit Court of Appeals in Philadelphia issued a statement on Tuesday, February 23rd saying that it will consider whether the FCC's $550,000 fine against the broadcaster over the breast-baring performance was a punishable violation of the Commissions rules.

In 2008 the lower court threw out the penalty saying the FCC acted arbitrarily and capriciously in issuing the fine for the half-second of nudity. However in 2009 the Supreme Court on appeal from the FCC ordered the lower court to consider reinstating the fine, following a ruling in another case that said the FCC could threaten fines even for fleeting profanity. (Published news reports)

**

RESTRUCTURING: A SNEAK PEAK AT THE FCC NATIONAL BROADBAND PLAN

With the FCC scheduled to deliver its long awaited National Broadband Plan to Congress next month, the FCC released a sneak preview of the plan. It reveals what can best be described as a group of sweeping and ambitious proposals it hopes Congress will support.

The recommendations released in a 56 page report cover a variety of proposals ranging from efforts to spur job creation and improve energy independence to improving healthcare and controlling its costs. The plan also calls for constructing an interoperable nationwide wireless public safety network.

Other proposals seek to improve the delivery of education services and enhance government performance. The preview document provides details of what may be included in the massive report the FCC plans to deliver to Congress on March 17th. (Information Week)

**

ELECTRONIC HAPPENINGS: ALL LION BATTERIES MAY BE BANNED FROM CHECKED AIRLINE BAGGAGE

Traveling by air with spare Lithium Ion batteries for your H-T could soon become impossible. This as Computer World reports that the United States Department of Transportation may prohibit the transport of all spare batteries in checked luggage, regardless of their physical size or capacity.

Lithium-ion cells rated at 100 watt-hours and smaller were previously exempt, but new proposed rules would eliminate the exception. The tighter rules would affect smaller professional video cameras along with a host of consumer electronics devices, from the P-D-A's to audio players and even some hearing aides. Basically any device that uses Lithium Ion cells as a power source.

Computer World dug further into incidents of Lithium Ion battery-related accidents reported on aircraft. It found that based on the number of batteries shipped, injuries during a flight due to battery-related accidents were about one in 28 million in 2008. While not very many in number, still enough percentage wise to concern the Department of Transportation and likely prompt the proposed ban. (Computer World, TV Business, others)

**

NAMES IN THE NEWS: KURDISTAN DXPEDITION NEEDS MORSE OPS

Some names in the news. First up is Paul Ewing, N6PSE, who says that he has several open positions for C-W operators on the DXpedition team headed to Kurdistan in April. Ewing says that costs for this DXpedition are quite reasonable and they will be operating from a very safe and secure facility. Anyone interested in joining the DXpedition team may contact Ewing directly by e-mail to paul (at) n6pse (dot) com or check out the website at www.yi9pse.com. (GB2RS)

**

NAMES IN THE NEWS: W1RFI TO SPEAK IN MASSACHUSETTS

Ed Hare, W1RFI, will be making a trip to Massachusetts on March 24th to do a special presentation before the Minute Man Repeater Association. Hare, who heads up the ARRL lab will do a presentation on the work performed there. The gathering will take place at the Massachusetts Emergency Management headquarters building on route 9 in the city of Framingham. (K1IW)

**

NAMES IN THE NEWS: RANT HOPPER, KB7WSD, APPOINTED NORTHWESTERN DIVISION VICE DIRECTOR

And ARRL President, Kay Craigie, N3KN, has appointed Grant Hopper, KB7WSD, as the new Northwestern Division Vice Director. Hopper of Everett, Washington, is an attorney and serves as an ARRL Volunteer Counsel. He and his father both received their licenses as the result of attending a license class put on by the Boeing Employees Amateur Radio Operators North. Society. The Vice Directors position became vacant when no one submitted the necessary election materials needed to run for that position. (ARRL)

**

THE SOCIAL SCENE: RADIO EXPO 10 IN NEEW ZEALAND

And turning to the ham radio social scene, this for our listeners down-under. The annual Wellington Region EXPO-10 is to be held on Saturday March 27th at the Knox Church Hall, in Lower Hutt. Top line exhibitors include Icom along with Signals New Zealand which represents Yaesu Vertex Standard. Doors open to the public at 10am. Admission is $4 New Zealand and includes a free drink and entry into the various raffle draws. The major prize is a dual band handheld supplied by by Foxtrot Communications. This years emcee is none other than Amateur Radio Newsline's own Jim Meachen, ZL2BHF. Reservation information is on-line at www.nzart.org. (NZART)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE CHANGING OF THE GUARD: BILL GORDON -DESIGNER OF ARECIBO RADIO TELESCOPE - SK

The designer of the giant radio-telescope at Arecibo, Puerto Rico, has passed away. This with word that astronomer and engineer who Bill Gordon, who designed the array that spotted the first planets beyond our solar system and lakes on one of Saturn's moons died February 16th in Ithica, New York, at age 92.

Gordon designed the Arecibo Observatory's radio telescope in the 1950's as a 1,000-foot-wide dish set in a sinkhole surrounded by forested hills. Within a year of opening, it was used to determine the planet Mercury's period of rotation.

After radio pulsars were discovered in 1967 the observatory played a prominent role in studying their properties Astronomers Joseph Taylor, K1JT, and Russell Hulse used the Arecibo telescope to discover the first binary pulsar in 1974 and leading to their 1993 Nobel Prize in physics. In 1990, Polish astronomer Aleksander Wolszczan used the telescope in the discovery of a pulsar in the constellation Virgo that was shown to be orbited by the first known planets beyond Earth's solar system.

Bill Gordon was born in Paterson, New Jersey. He earned a bachelor's degree from Montclair State Teacher's College, a master's degree from New York University and his doctorate at Cornell. He was a professor and administrator at Rice University in Texas from 1966 until his retirement in 1985. (Southgate, others)

**

EMERGING TECHNOLOGY: HIGH EFFICIENCY ORGANIC SOLAR CELLS DEVELOPED

Scientists at the Department of Microsystems Engineering and the Freiburg Materials Research Center have succeeded in developing a method for treating the surface of nanoparticles which greatly improves the efficiency of organic solar cells. The researchers were able to attain an efficiency of 2 percent higher than previously expected by using so-called quantum dots composed of cadmium selenide.

Organic solar cells belong to the so-called third generation of solar cells and are still in the developmental stage. The world record for purely organic solar cells in which both components of the photoactive layer consist of organic materials is currently at 7 percent through wet chemical methods.

Organic solar cells have many advantages over the conventional silicon cells typically used for large-scale energy production. Not only are they are considerably thinner and more flexible but are also less expensive and quicker to produce. As such, they are well suited for powering everyday devices which are not in constant use such as sensors or electrical appliances.

The procedure to produce these new cells has been patented and the results were published in a recent issue of the journal Applied Physics Letters. (ScienceDaily)

**

WORLDBEAT - USA: W1AW ANNOUNCES NEW SCHEDULE FOR DIGITAL BULLETIN TRANSMISSIONS

The ARRL says that beginning Monday, March 15th tat its W1AW digital bulletin transmissions will alternate the modes used. While Baudot, PSK31 and MFSK16 still make up the digital mode complement, Station Manager Joe Carcia, NJ1Q, says that the schedule will be altered to give more exposure to PSK31 and MFSK16.

The digital bulletin times remain at 6 and 9 p.m. daily Eastern Time. More on this change is on-line at www.arrl.org/news/stories/2010/02/16/11343/?nc=1 (ARRL)

**

HAM RADIO IN SPACE: ARRISAT DESIGN MEETING HELD IN ORLANDO

Turning to ham radio space related news, word that an ARISSat Design Review meeting was held in Orlando, Florida on February 15th and 16th. The gathering was reportedly successful in identifying areas that need additional work and definition. The major items are the Max Power Point Tracker, the interconnect board, finding ways of creating a warmer environment for the battery and power management software and internal housekeeping software. Thirteen members attended the meeting and gave 23 presentations concerning the status of ARISSat-1. Links to the presentations will be posted soon. See: http://www.amsat.org/amsat-new/index.php (ARISS)

**

HAM RADIO IN SPACE: COLLEGE SATELLITE NIGHT

Something new on the ham sats for those in institutions of higher learning. College Satellite Night is planned for all available satellites on the first Thursday of each month. College club stations should consider on being on AO51, SO50, AO7, VO52, HO-68 and FO-29 to welcome student operators and enjoy QSO's with them. It's a great way to introduce newcomers to the fun of working the ham radio birds.
(ANS)

**

HAM RADIO IN SPACE: SCOTLAND ON ALL THE HAMSATS

Scotland is going to the birds, at least figuratively speaking. This as 2E1EUB will once again be active as 2M1EUB from March 20th to the 27th operating every ham radio satellite that he can reach from the Cairngorms National Park. Also, look for him on 160 and 80 meters. Checkout QRZ.com under 2M1EUB for more information on this high in the sky operating event. (OPDX)

**

HAM RADIO IN SPACE: SATELLITE OPERATION FROM THE DRY TORTUGAS

And still with our eyes to the sky, word that the upcoming K4T DXpedtion to the Dry Tortugas web page says the team plans to include satellite operations. Team leader Mike Forsythe, AC2V says that one of the primary stations will be dedicated to satellite operations on a 24 hour basis. Mark Hammond, N8MH will be heading up K4T satellite operations. The The DXpedition is slated for March 11th to the 15th. More information and QSL routing is at aroadventures.org. (via e-mail)

**

ON THE AIR: THE REVERSE BEACON NETWORK

More down to Earth, a new amateur radio reverse beacon network has been established as a new way to observe and report on propagation conditions world-wide. Unlike the most DX alerting beacons that transmit at set time intervals the reverse beacon network relies on volunteer stations to monitor various bands and report what they hear over the groups website.

Currently, there are a few dozen stations involved. Some monitor around the clock while others up only occasionally. More on the network, how it operates and how you can become a part of it is on line at www dot reversebeacon dot net. (Southgate)

**

ON THE AIR: A FERRY GOOD IDEA

And you might also want to listen out for special event call GB2EI standing for Great Britain to Ireland. Its on the air to celebrate the reintroduction of the Swansea to Cork Ferry service. The original service

commenced in 1896. A similar station, EI2GBW, will also be operating from Cork. Both special event callsigns will be operational until March 31st of 2010. QSL details are available at qrz.com. (Southgate)

**

DX

In DX, word that UA3DJY, who was has been operating as 5I3A from the DIT Communications Club station in Dar Es Salaam, Tanzania, has finally received his own callsign. He is now active as 5H3ACR and will be there until March 1st and says that he will try to be active on all bands. QSL via RK3AOL.

A DXpedition is being planned to operate from the Laguna Grande de la Sierra, Columbia. The callsign will be 5K7SNC. Announced dates are April 1st and 2nd on 7140 kHz only. QSL via HK3OCH. For more details and possible updates please visit QRZ.com under the callsign 5K7SNC.

IK5ZUI, will be active as 5R8UI from Nosy Be Madagascar starting early March. He will be there up to a year. No QSL information as we go to air.

DJ7RJ will be active portable SV5 from the island of Kos through March 17th, He is operating 160 through 6 meters using CW and SSB, QSL direct to his home call.

HA5AO, will once again be active as 7P8AO from Lesotho between March 8th and the 22nd. His operation
will be on 80 through 10 meters using CW, SSB and RTTY. QSL electronically via Logbook of the World or via HA5AO direct or through the bureau.

UX4UL will be active as 8Q7IA from the Maldives through May 18th. Activity is mostly CW and PSK.. QSL via UY5ZZ.

A German team of operators will be active from Burundi through March 6th. Operations will be on CW, SSB and RTTY. QSL as directed on the air.

Lastly, members of the Malaysia Amateur Radio Transmitters Society will activate the "Southern Most Tip of the Asia Mainland" between February 26th and the 28th using the call 9M4STE. Activity will be on 40 through 6 meters using CW and SSB. For more details and updates, visit their Web page at dxpeditionmalaysia.blogspot.com.

THE SOCIAL SCENE: A HAM RADIO FAS-DO-DO IN LOUISIANA IN MARCH

And speaking of true ham radio social events, there's one coming soon to Louisiana that you will not want to miss. Newsline's Don Wilbanks, AE5DW, lives near-by and tells us why:

--

It's party time down the bayou! The combined ARRL Louisiana State Convention and 50th Acadiana Amateur Radio Association Hamfest is slated for Friday and Saturday, March 12th and 13th at the Rayne Civic Center in Rayne, LA.. This years special guest is ARRL Headquarters Club Coordinator Norm Fusaro, W3IZ. And as always this event will host the annual Friday Crawfish Boil with the popular Fais-Do-Do and dancing afterwards.

For those who've never been to South Louisiana, a Fais-Do-Do is a party held in the evening after the kids go to bed. "Do do" is Cajun French slang
for sleep, as in telling the kids to "go do do" and "fais" is a negative in
Cajun French, so Fais-Do-Do literally means "no sleep".

As the locals say, "you'll pass a good time, cher!"

More on this Louisiana style fun ham radio event is on-line at www dot w5ddl dot org slash hamfest.

From bayou country I'm Don Wilbanks, AE5DW for the Amateur Radio Newsline.

--

Now this sounds like the kind of ham radio gathering that should be fun all day and all night long. (NA5Q, AE5DW)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award is now open. Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www dot arnewsline dot org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot

com.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Carlson,
KQ6FM, saying 73 and we thank you for listening.

1st 50 MHz Marathon - Memorial "Roberto Rossi" I5RRE

The Florence Section of ARI organizes the first edition of "50 Mhz
Marathon - Memorial Roberto Rossi I5RRE". Participation is open to
all amateur radio operators resident in Italy. The purpose is to
contact as many squares as possible in the 50 MHz band. Participants
are requested to operate respecting to the letter the spirit of the
competition and the frequency allocations of IARU Region 1 Band Plan.
>From 00.00 UTC of 01 May 2010 until 23.59 UTC of 31 Aug 2010 - DETAIL:

New Digital Mode (30 January, 2010 by Jose Alberto Nieto Ros):

ROS is a digital communications software based on Spread Spectrum
techniques. It is designed to fully optimize the power available and
make contacts in the toughest conditions, for HF, EME or Meteor Scatter
The software has two Symbol Rates: 16 and 1 baud (the latter aimed at
weak signals until -35 dbs of S/N) and can automatically synchronize
any Symbol Rate. ROS also automatically reply to the operators that
include an email in any of your messages, reporting on the parameters
of the received signal. Read more: http://rosmodem.wordpress.com/
SOURCE: Derek, ZS5Y at ZS-VHF-Reflector

First test and signals via Moon (EME):
21 Feb 2010 at 21:36 z SV8CS made the first ever reflection of the MOON
with this new ROS digital program. FRANK, PA4EME has RX my signal via
moon reflection, as well my e-mail also, with 1 baud rate at the 144 Mhz
Unfortunately we have NOT complete a 2-way QSO, but...
February 21 at 21:25, SV8CS and DL8EBW did make the first 2m EME qso with
the new ROS mode by Jose - all details as well on the FORUM at:

http://www.mmmonvhf.de/minibb/index.php?action=vthread&forum=9&topic=103#msg285

WAS-EME:

Dear Moonnet, I have updated my website listing the biggest 2M EME
stations, CW and WSJT, from each state. I am happy to include the first
Nevada station on the site, W7OJT. He has a good signal off the moon.
4 nine element yagis, 350 watts, with elevation.
http://home.comcast.net/~kd3uy/site/?/page/2M_EME_WAS/
This site is a perpetual work in progress. If you spot any errors or
omissions, please email me off list. I would particularly appreciate
it if an experienced CW operator could review the CW information.
Hope some of you find this helpful. 73

*** JD1 ***

Operators Stan/AC8W (JD1BNK), Ted/K8AQM (JD1BNM), Steve/K8QKY
(JD1BNQ) and Brian/KG8CO (JD1BNJ) will be active from Chichijima
Island as part of the "JD1 Project 2010" between March 28th and
April 12th. Activity will be on 160-10 meters using CW, SSB and
RTTY. Each operator will be active as follows:

JD1BNJ - Only RTTY and PSK31.
JD1BNK - Mainly CW on the HF bands.
JD1BNM - Mainly CW on the lower bands.
JD1BNQ - Mainly CW on the HFbands and 6m.
QSL via K8AQM, direct, by the Bureau or LOTW.
SOURCE: Ohio/Penn DX Bulletin #947

*** JD1 ***

As well Kirk, JF3MYU, will be active as JD1BNN between March
28-31st. He is part of the "JD1 Project 2010" and is expected
to be there with four other operators who will be staying long.
Kirk's activity will be focused on the 30/17/12m bands, SSB, some
CW and 6 meters. QSL is "OK" via the JARL Bureau but write JD1BNN
on your QSL (so it can be sorted easily). Also, you can receive
his QSL direct if you send your QSL to his address in Kobe,
Japan: Kirk Itaya, 5-1-35, Daikaidori, Kobe, 652-0803 Japan.
Please enclose SAE plus sufficient return postage. For JA stations
SASE, please. For NA, SA, EU and AF include one new IRC or 2 USDs
For Asia, one IRC or 1 USD. SOURCE: Ohio/Penn DX Bulletin#947

*** A9 ***

Dave EI3IO, will show up as A92IO soon. He has only an oral promise
concerning his licence so he still has to be patient. Dave will stay
in Bahrain until August 2011. Usually he is working mostly in CW and
SSB on 80m-10m (including the WARC bands). He also plans to become
active on 6m during the upcoming summer and on 160m during the winter
season 2010/2011. QSL cards should be sent directly to Dave Court,
PO Box 31183, Budaiya, Bahrain, direct to the address of EI3IO (this
mail will be fowarded to him only twice a year) or via bureau to
EI3IO. More information is available online at: http://A92.ath.cx

GB2RS NEWS

Sunday 28th February 2010

The news headlines

* RSGB secures the use of short form contest calls

* Iceland gains access to 500kHz and 70MHz amateur bands

* Royal Signals Amateur Radio Society e-library documents available

Following long and detailed discussions with the Radio Society of Great Britain, Ofcom have announced the availability of special short form contest callsigns for certain amateur full and reciprocal licensees. Ofcom has considered the request from the RSGB for the use of special contests callsigns for amateurs who can demonstrate previous regular participation and achievement in special contests. As a result, subject to availability, Ofcom has decided to make available 520 callsigns from the limited number available, to such successful applicants. The callsign will consist of G or M, a regional locator if applicable, a chosen digit and a chosen suffix letter. For example G8Z or GW8Z. Ofcom has amended the application form to enable applications from such licensees. Special contests callsigns for Amateur Full Club licensees will continue to be issued for Clubs under existing arrangements, but from 1 January 2011 the criteria for licences currently applying to individuals will also apply to clubs. Further detail is available in the amended application form, which is available at on the Ofcom website, just type ofw286.pdf into your favourite search engine.

On 19 February, The Post and Telecom Administration in Iceland granted a temporary experimental access to the 4m meter band between 70 and 70.2MHz. The permit is valid until 31 December. Access is granted on secondary basis with a maximum bandwidth of 16kHz and a power limit is 100 watts. Icelandic N and G licensees will need to apply for a special licence. At the same time, they were also granted temporary experimental access to the 600m band between 493 and 510kHz CW only. Again access is on a secondary basis and the power limit is 100 watts.

The Royal Signals Amateur Radio Society has made a number of its technical documents available for download. Included in the collection are a number of very interesting HF antenna designs and related projects. The files, which are in PDF format, are available for all to download. You'll find the collection at www.rsars.org.uk/ELIBRARY/docsants.htm.

The Bury Radio Society is running a Foundation course starting on 16 March. Anyone interested please contact: Norman, G1HHU on 0752 593 2729 or by e-mail to g1hhu.norman@googlemail.com for further details.

On 17 and 24 April, Bracknell Amateur Radio Club is running a Foundation licence course. To book or for more information please contact David, M0XDF by e-mail at M0XDF@Alphadene.co.uk. And now for the details of rallies and events for the coming week

Today, 28 February, the Rainham Radio Rally will take place at Rainham School for Girls, Derwent Way, Rainham, Gillingham, Kent ME8 0BX. Full details from Trevor, G6YLW, on 0771 7678 795.

Bournemouth Radio Society will be holding its 22nd annual sale on Sunday 7 March at the Kinson Community Centre, Pelhams Park, Millhams Road, Bournemouth BH10 7LH. Doors open at 9.30am and admission is £1.50 per visitor. All are welcome. Further details from John, G0HAT on 07719 700 771.

Also on 7 March, the Exeter Radio & Electronics Rally takes places in America Hall, De la Rue Way, Pinhoe, Exeter EX4 8PW, Doors open at 10.30am and admission is £2. There will be trade stands, a Bring & Buy and catering on site. Details from Pete, G3ZVI on 0771 419 8374.

Sunday, 7 March, sees the Cambridge & District ARC Rally opening at 10am from the Wood Green Animal Shelter, King's Bush Farm, A1198 London Road, Godmanchester PE29 2NH. Entry is £3 and there will be trade stands, a Bring & Buy, special interest groups and activities for the whole family. Contact David, M0GUM, on 01954 203080.

Now for the news of special events

The Newbury & District Amateur Radio Society will be activating GB0VUL next month to promote awareness and publicity on the plight of the Vulcan Bomber. The Trust has until the end of the month to raise £300,000. If they fail to reach this target, the Vulcan will never fly again. Another £350,000 has to be raised in March for the aircraft to appear at air-shows this year. More details can be found at www.vulcantothesky.org.

The landmark 365ft mast at Great Baddow, Chelmsford Essex is the last wholly intact example from the original HF Chain Home radar system that was developed by Sir Robert Watson-Watt and his team at Bawdsey Manor following the Daventry Experiment 75 years ago. GB75CH will be on the air from Great Baddow to mark the birth of British Radar from 11am Friday 26 through to Sunday 28 February in conjunction with GB75RDF at Daventry and GB75BRS at Bawdsey Manor. Details are on www.chainhome.org.uk

GB50ATG has been on the air to celebrate the 50th anniversary of the British Amateur Radio Teledata Group. Graeme, G6CSY, will take over the operator's chair for March. He will be using BPSK 31, BPSK 63 and BPSK125 as well as QPSK31 QPSK63 and QPSK125. Olivia and Feld-Hell will also be available on request. Needless to say RTTY is also on the list.

Further information can be found on www.G6CSY.Net/ham. The BARTG Golden Jubilee year runs until the end of July and full details of the award scheme can be found on the BARTG website www.bartg.org.uk.

The planned maritime mobile station G2YC/MM from cruise ferry MV Julia on the Irish Sea between 1 and 4 March has been cancelled. Unfortunately the passenger licence was withheld by the authorities due to the proposed amateur station despite permission from the master and the ship's owners. The ongoing special event with GB2EI and EI2GBW celebrating the return of the ferry link between Ireland and Wales are still going ahead. On 7 March, listen out for GB4BAR for Brickfields Amateur Radio. It will be on the air from Binstead.

And now the HF DX news compiled from 425 DX News and other sources.

VP2MCC will be on the air during March, including the British Commonwealth Contest, from Montserrat. During the contest, contacts will only be with other British Commonwealth Call areas but outside the contest he will try to work other countries as a priority. All VP2MCC contacts will be uploaded to Logbook of the world so do not send a paper QSL if you only want a card for DXCC. QSL to the home call of G4FAL.

DJ2VO, and three friends plan to activate Burundi, 9U, as 9U1VO, 9UXEV, 9U1RSI and 9U1KI until 6 March. They will be using CW, SSB and RTTY with four 100 watt stations to vertical and wire antennas. QSL to the operator's home call, bureau or direct. They will be at the Safari Gate Hotel in Bujumbura.

Tim, NL8F (ex VK4COF) will be on Cocos Keeling Islands, which is IOTA reference OC-003 from 2 to 10 March. He hopes to get the callsign VK9COF. After operating from Cocos, his plans are to go to the South Cook Islands where he will be active as E51COF from 20 to 30 March. Activity is expected on 80 though 10 but mostly on his favourite band, 40m.

Now the contest news

On HF, the data session of the 80m Club Championships is what starts the month on 1 March from 2000 to 2130UTC. The exchange is signal report and serial number.

2 March sees the 144MHz UK Activity Contest and Club Championship between 2000 and 2230UTC. All modes can be used and the exchange is signal report, serial number and locator.

The 144/432MHz Contest takes place on 6 and 7 March from 1400 to 1400UTC. The weather often makes portable activity a real challenge for this event, but the hardiest of souls will always find a way of getting on the air from a hilltop, in spite of snow or gales. The exchange is signal report, serial number and locator.

The SSB leg of the ARRL International Contest is also on 6 and 7 March from 0000 to 2350UTC. On the 1.8 to 28MHz the exchange is signal report and transmitter power. W stations send their State and VE stations send their Province.

Now the solar factual data for the period from the 15th to the 21st of February, compiled by Neil Clarke, G0CAS on the 22nd of February.

The latest spacecraft to study the Sun had a trouble free lift-off on the 11th of February. The latest news from the `Solar Dynamics Observatory' team is that "it is in good shape" as the post-launch checkout of spacecraft systems continues. The first images are expected sometime in April. Meanwhile, together with SOHO and the STEREO spacecraft we can now see 88 per cent of the solar surface continuously.

The solar disc had sunspots visible everyday, on the 17th three groups were visible. However, solar activity was at very low levels except for the 15th which was low. The largest solar flare of the week was a C1 on the 15th. Solar flux levels declined slightly from 88 units on the 15th to 84 by the 19th. The average was 86. The 90 day solar flux average on the 21st was 80 units, that's one unit up on last week. X-ray flux levels declined from A9.6 units on the 15th to A4.4 by the 21st. The average was A6.2. Geomagnetic activity started at unsettled levels due to a coronal mass ejection which was associated with the M8 solar flare which occurred on the 12th. The Ap index was 14 units, the remaining days activity was quiet and the average was Ap 5 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 280 kilometres per second on the 15th to 550 by the 19th. Particle densities were low everyday. Bz remained mostly negative on the 15th with variations up to minus 13 and only plus 2 nanoTeslas. The remaining days saw fluctuations of up to minus and plus 7 nanoTeslas.

On the 15th a pre-auroral enhancement of HF conditions took place, something we had not seen for quite a while. Later on the 15th auroral propagation was reported from mid afternoon until after midnight. Most occurred at high latitudes but the event extended to parts of Scotland. HF propagation remained relatively good for the rest of the week, with trans-Atlantic contacts on 24MHz and openings to the eastern Mediterranean, West and southern Africa and even, occasionally, with North America, on 28MHz.

And finally the solar forecast. This week the slightly more active side of the Sun is expected to be rotating into view. The sunspot region the produced the 8 M class solar flares on its last rotation could return today or tomorrow if it as survived its passage on the far side of the Sun. However, the group was in decay as it rotated out of view. Solar flux levels should be around the 80 mark or even higher if any sizable spots do appear. Geomagnetic activity is expected to be quiet everyday. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. Darkness hour lows should be about 8MHz. Paths this week to Western Australia should have a maximum usable frequency with a 50 per success rate of around 23MHz. The

optimum working frequency with a 90 per cent success rate will be around 18MHz. The best time to try this path will be between 0900 and 1300UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS

On Monday 1 March, Gloucester Amateur Radio & Electronics Society will have a talk by Les, G0ULH on the new Tornado engine. Contact Anne, 2E1GKY, on 01452 548478, daytime. On Monday 1 March, South Birmingham Radio Society put the shack on the air and enjoy a natter night. Contact Don, on 0121 458 1603. On Tuesday 2 March, Friskney and East Lincolnshire Communications Club data modes by 2E0BDS. Details from Chris, M0MFP, on 01507 442240. On Tuesday 2 March, Kidderminster & District Amateur Radio Society will have a talk on VHF on the Severn Estuary by G0TUW. Contact G4CTU, on 01562 823966 for more details. On Tuesday 2 March, Loughborough & District Amateur Radio Club will be enjoying the Annual Dinner at The Griffin Inn, Swithland. More information from Chris, G1ETZ, on 01509 504 319. On Tuesday 2 March, South Notts Amateur Radio Club will be taking part in the 144 UK Activity Contest. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc. On Tuesday 2 March, Spalding & District Amateur Radio Society will be taking part in the 144 UK Activity Contest. Details from Graham Boor G8NWC, 07947 764481. On Wednesday 3 March, Bolsover Amateur Radio Society members are invited to operate the club station using VHF weather permitting. For details, send an e-mail to postmaster@g4rsb.org.uk. On Wednesday 3 March, Hinkley Amateur Radio Society will be enjoying a social evening. Details from John, M0JAV, on 07836 731544. On Wednesday 3 March, Lincoln Short-Wave Club will be taking part in a shack activity and natter night. For more information contact Pam Rose, G4STO, on 01427 788356. On Wednesday 3 March, Midland Amateur Radio Society is having general meeting with the shack on the air and training classes. Details from Norman, G8BHE, on 01214 229 787. On Wednesday 3 March, South Birmingham Radio Society is having a lecture in the main hall. Contact Don, on 0121 458 1603. On Wednesday 3 March, South Notts Amateur Radio Club is holding a talk on component theory with resistors with G4EDX. Details from Terry, M0RIA, via the web at www.radioclubs.net/snarc. On Wednesday 3 March, Telford

& District Amateur Radio Society is holding an open house with the HF station on the air whilst the committee meeting takes place. Contact Mike, G3JKX, on 01952 299 677. ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING FEB 28 2010

WIA CENTENARY

The VK100WIA roster is full

Thank you to those WIA affiliated clubs who were able to take up the WIA offer of a rostered 3-day slot to use the special callsign VK100WIA.

It will be put on air from more than 50 locations right around the nation, in all states, the Northern Territory and Australian Capital Territory.

Many of the participating clubs have advised that the callsign will be used at public events, in shopping areas, parks, scout halls, schools, museums and historical sites. Others will be using their club station to try and make as many on air contacts as possible.

In VK3 the Gippsland Gate Radio and Electronics Club will be re-enacting the reception in 1921 of the very first direct press message sent from the Britain to Australia.

The West Australian VHF Group will be operating at the Wireless Hill Museum, the Geelong Radio and Electronics Society are setting up at the Geelong Maritime Museum, while the Radio Amateur Old Timers Club will have the Moorabbin and District Radio Club Museum.

A few clubs have stated that they will actively encourage Foundation Licensee involvement in their activity. The Yarra Valley Amateur Radio Group event is also to celebrate the 5th anniversary of licence restructure which saw the introduction of the Foundation Licence.

In VK6 both WICEN and the Western Australia Repeater Group will be operating at the Royal Perth Show.

All in all, the WIA Centenary Committee believes there's a great mix of activity planned.

(Studio) Details will appear on this VK1WIA broadcast each week during May through to October, or you can check them out now on the WIA website.

The Centenary date of the formation of our organization is only days away and there are celebrations this weekend with the annual VK2 Central Coast field day at Wyong.

Next Sunday members of the VK2WI News team will be presenting this VK1WIA bulletin.

Then on Thursday the 11th there is to be a gathering at the old "Hotel Australia" site - in the Sydney CBD - which was where the first meeting was held.

On Sunday 14th Amateur Radio New South Wales will be opening its new building at the VK2WI site at Dural. There will be further details in next weeks bulletins.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Ewan McLeod VK4ERM vk4erm@wia.org.au
Secretary Geoff Atkinson VK3AFA secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Each year the WIA hosts its "WIA AGM Weekend Of Activities" a special weekend event aimed at providing a range of special activities that are of particular interest to radio amateurs.

This years event is dedicated to celebrating The Centenary of Organised Amateur Radio in Australia.

This not to be missed weekend commences Friday evening the 28th of May and runs through to the afternoon of Sunday the 30th. There will be a range of special activities for members and partners in addition to the WIA AGM and Open Forum meetings.

Activities will include a series of highly informative historical presentations on the early days of radio, the VK100WIA special event station calling CQ from the weekend venue, a Centenary dinner with local and international dignitaries and a planned ARISS contact with International Space Station.

The AGM Weekend Of Activities will conclude on Sunday the 30th with a live outside broadcast of the VK1WIA national news, a public display of Amateur Radio and a special BBQ in the local park sponsored by Yaesu.

I'll be delivering a short talk

"RADIO, Always has been, Always will be, the Cats Whisker"

What I desperatley need and need NOW! is a short history on each of the old divisional news broadcasts. I just need the absolute highlights and dates, all up for all divisions I am looking at 3 minutes maximum! BUT I figure that info should be preserved anyhow, and I aim to use lots of what you send me in future REWIND segments in these newscasts!

send to nationalnews@wia.org.au

WIA PRESIDENT VK3KI MICHAEL OWEN

"On a number of occasions I have made the point that if the WIA was to continue to grow in a way that would continue to attract new members it had to reduce its reliance on volunteers for the provision of an administrative core which provides many of services it offers to members and supports those offering other services.

While we now have the security of a contract with ACMA for the WIA to manage the examinations, the issue of certificates of proficiency and the management of callsigns it means that the WIA office has to devote a significant part of its present resources to those tasks.

The Board met in Melbourne over the weekend of 20/21 February 2010. Much of the time was spent considering the financial position, and the provision of services for our members and the future.

The Board resolved to engage a manager.

The Board believes that the current office workload justifies additional staff, a manager will provide continuity, and our ability to provide services to members will be enhanced.

Finding the right candidate was not hard. As it happens for some months the WIA had been employing someone on a part time basis to provide assistance in the office, as without that help we were going to continue falling behind on tasks that really matter, such as processing credit cards, banking, processing book orders and membership.

That person was Mal Brooks.

Because he has been working with us, we knew him. Equally important, Mal knows us, and believes that he can contribute to the WIA.

So, now the WIA has a new manager. Whilst Mal is not yet an amateur, he comes with a background and experience, including experience as the Executive Officer of a not for profit industry association and briefly the WIA, that is totally relevant.

Our object has been for the WIA to be seen as a truly effective advocate for amateur radio, and to provide services for its members that make it attractive to be a member and to be seen as an effective organisation without conflict.

We will never be able to do the many things that are part of the WIA without the support of many dedicated and skilled volunteers.

But at the heart of the organisation must be an administration that is effective, efficient, responsive and friendly.

We believe that Mal will be a meaningful part of that administrative heart.

So, let us all welcome Mal Brooks and wish him the very best in his new role".

HAMS ACROSS AUSTRALIA.

VKR Roundup
http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP with a reflection

on the Amateurs Code.

A word that isn't used in the Amateurs Code, printed in the Centenary 2010 Callbook, is generous. However if you read the words, you see the Radio Amateur is Loyal and Friendly....."/the radio amateur offers loyalty, encouragement and support to other amateurs....(with) kindly assistance. These are the hallmarks of the amateur spirit." /When you combine these two characteristics you come close to a dictionary definition of generosity.

Way back when I was still in short pants and most QSO's were still conducted in amplitude modulation, home brewing was the order of the day. Often I would hear discussions of individual projects when the junk box just didn't have a vital component. Some days later, I would hear the thanks for the parcel that the postman had delivered, at no cost and often done anonymously. This sharing has been something that I have witnessed and experienced from time to time and have tried to continue.

Recently, it was mentioned on the local repeater system that we could not source a short piece of miniature coaxial cable for a project. From

a couple of hundred kilometres away, the postman delivered about a metre of cable. Many thanks OM.

Yes the amateur is generous; another part of the tradition we continue in our centenary year.

I'm Geoff Emery VK4ZPP and That's What I think... how about you.....?

Gold Coast Radio Club are holding a General Meeting Saturday 6th March. They look forward to as many as possible attending and to organize some activities for coming months.

GYMPIE
www.gceginc.org.au
Trevor Taege, VK4BAT

I'm Trevor Taege, VK4BAT with the news from the Gympie Communications & Electronics Group:

Another fun social get together had several members and their partners enjoy an evening at the Gympie RSL. The evening of dining and entertainment was mixed with a light discussion of who was bringing what to the John Moyle Field Day. It was decided that if the weather was a little kinder than last year, a few members would rough it and camp at the site.

Gympie 2 metre repeater update: The Gympie Communications & Electronics Group will be purchasing most of the current repeater equipment from Jason VK4MIH. This means that the club will only need to sort out new battery and solar power and relocation to Mt. Boulder. The repeater was decommissioned yesterday (that was the plan as this report was written). The Club is planning to set up the device temporarily at Chatsworth to fine tune the new power supply and to provide the area with continued service. Jason has kindly offered to loan us the IRLP equipment until we are able to purchase and build our own system so the node should suffer only a short downtime.

The EasyPal Digital SSTV repeater will during this time, be moved from Chatsworth to Lagoon Pocket. After the 2 metre repeater moves to Mt.Boulder, it will be returned back to Chatsworth. The Gympie Group also wishes to thank the Sunshine Coast Amateur Radio Club for their help with tower equipment, solar panel bracket and general support of our Club and both repeater projects.

The Club currently has a request with Local Council to re-locate our 70cm repeater to the water tower radio site in Gympie. The request is due to go before Council shortly.

So for a small growing Club, we have plenty to keep us busy. As they say, watch this space for further updates.

For Gympie Area News, I'm Trevor Taege, VK4BAT.

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au
Secretary Clive 4928 1173
http://www.radarc.cjb.net/

This is Doug VK4DUG from the Rockhampton and District Amateur Radio Club.

It's encouraging seeing that some amateurs are still getting their hands dirty, so to speak, and doing a bit of home brewing. Garry VK4FGZA has recently assembled a dummy load and antenna analyzer. I expect that Garry has a lot more building and fun planned for the future.

The other major project for club members, at the present time, at least for Mike LMB, Ray HOT and Bob HRC (with a little supervision and help from Jeff 4JAB), is the construction (and it's almost finished) of a secure operating room at the Heritage Village site. You may remember mention of the Club's involvement with the village on a previous occasion.

It is expected that one of the recently donated 'winch-up' towers will be put to good use at this site.

It must be an opportune time for the RADAR Club to purchase a casket ticket. After receiving the previous donation of towers etc, the Club, with the help of Don 4BY, has been awarded 2 secondhand Main Roads cast-off laptop computers. With the many Digital Modes now available these will be put to good use in club activities. The hand-over to club members was made by the local Minister for Main Roads Robert Schwarten. (Can't miss a chance of a photo shoot), but never the less we are most grateful for this presentation.

Clareview Gathering

The Clareview Gathering is a yearly event where Radio Amateurs meet at a spot on the coast between Rockhampton and Mackay to relax, talk radio, re-establish acquaintances and participate in the world renown Saturday Night Mega-Auction.

It is also one of the main revenue raisers for the Rockhampton and District Amateur Radio Club and Mackay Amateur Radio Club.

It happens during a VK4 Long Weekend, 1st and 2nd of May.

For further details contact Don Wilchefski VK4BY of the RADAR Club
vk4by@wia.org.au

Once there was Carnivale, then Festivale, now there's Penguinale.

The Penguin Lions Club in north-west Tasmania is holding a community fun day Sunday 7th of March at Hiscutt Park in Penguin.

Celebrating the Penguin-ness of Penguin, there will be games for the kids, a 'Penguin Performs' talent quest, Penguinalia displays, Penguin Polish car and bike display, a model boat regatta, Devonshire teas, hot food and refreshments and 'Penguins On The Air' because Amateur Radio will be there.

Winston VK7EM will be operating throughout the day portable from near the windmill beside the lake and frequently calling on 7090, 14190 and 28490 KHz.

Operating times are from 2300 to 0500 UTC.

Listen out and join in the fun.

Club Archive Proposals

It has been proposed to build an archive of NWT-ATV Group history, activity and involvement over the last 35 or so years since the North West ATV Group first became active early in the 1970's.

Some of the activities were installation of the Solar Powered ATV Repeater on Mt. Duncan, The 1990 World Rowing championships and 2 subsequent National Rowing Championships, ATV at HamFests, through to some recent events such as The Marconi Centenary and the International Space Station communications with the Devonport High Schools in 2007.

Wordware Pty Ltd
Level 1, 321 Whitehorse Rd Nunawading.

The course is FREE of charge.

just e-mail vk3ark@wia.org.au

The course will run 9:30am ---3pm on Saturday and 10am --2pm Sunday

(John Fisher VK3DQ / VK3ARK)

VK4

Living around the Gold Coast?
If you would like to upgrade from Standard to Advanced then please contact Roy VK4IG by phone 5539-3530. He needs at least 10 participants to get the course underway.

VK7

If you are a non amateur or a short wave listener living in the North West, or West coast of Tasmania, and would like to become a licensed amateur radio operator, then get along to a CCARC meeting and find out about this interesting hobby.

If you cannot make a meeting but would like to find out more about the hobby then contact the learning facilitator, Keith Winkler VK7KW, or any of the committee members.

Full contact details are available when you visit the club pages on wia.org.au

(visit vk7 clubs and look for CCARC TASMANIA)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Wellington Amateur Radio Expo-10

The Combined Wellington Amateur Radio Expo Committee advises that the annual Wellington Region EXPO-10 is to be held on Saturday 27th March again at the Knox Church Hall, 574 High Street, Lower Hutt, New Zealand.

Doors open to the public at 10am.

Admission is $4. This includes a free drink and entry into the various raffle draws. Listen out for the raffle draws throughout the day by MC ZL2BHF.

Refreshments - coffee, sodas, buns and cakes will be available in the hall.

Iceland's radio hams get access to 70 MHz and 500 KHz

On February 19, Radio Amateurs in Iceland were granted temporary experimental access to the 70 MHz and 500 kHz bands.

Licensees holding "N" and "G" class licences can apply to the Icelandic Post and Telecom Administration for a special permit for 70 MHz which is valid until December 31, 2010 and gives access to 70.000-70.200 MHz.

Access is secondary with a 100 watt power limit and a maximum bandwidth of 16 kHz.

Permits are also available for the 493-510 kHz band, only A1A is allowed with up to 100 watts.

(Icelandic radï¿½ï¿½amatï¿½rar (IRA) http://tinyurl.com/IcelandIRA)

APOLLO EME 2010

Echoes of Apollo EME 2010 or World Moon Bounce Day, is scheduled for the weekend of April 16, 17, and 18. This year, EOA has been given a special opportunity to use the Arecibo Dish in Puerto Rico as the ultimate "big

gun" station on 432 MHz SSB & CW. EME operation on 1296 MHz may also be

possible.

Arecibo has more than 50 dbi gain on 432 MHz so the team thinks it can be heard with modest equipment. Listeners with a unique opportunity to utilize modest UHF and 1296 stations to copy EME signals. A large OSCAR-class antenna array equipped station may be able to participate.

(ARNewsLine)

International Marconi Day

The 23rd International Marconi Day will take place on 24th April.

Although not a contest, awards can be obtained and full details can be found at www.gb4imd.org.uk. For a station to be counted towards an award by applicants, that station must be registered by contacting the webmaster by e-mail at webmaster@gb4imd.org.uk prior to the event with full details of the station.

In order to qualify as an Award Station, operations should take place from a site that either used Marconi equipment prior to his death in 1937 or from which Marconi carried out experiments during the same period.

(rsgb)

MISSING PERSON: UK POLICE SEARCH FOR MISSING RADIO AMATEUR

Police in the United Kingdom are in search of missing radio amateur. The Tamworth Herald reports that police are appealing for help in tracing 43 year old David Andrew Salisbury, M3FDZ, of Newton Regis who not been seen since Friday January 29.

Salisbury, a married father of two disappeared unexpectedly and without a trace. He is described as a white male and around 5 foot 5 inches tall. He has what is described as striking straight white hair and was

last seen wearing blue jeans, a gray T-shirt with the words 'Rock and Roll' in red, a blue hooded top and black cap with the letters 'NY' on the front in white lettering.

M3FDZ is a member of Tamworth Amateur Radio Club which is also concerned about his welfare. More details and a photograph of David Salisbury, M3FDZ, can be found at

www.thisistamworth.co.uk/news/Appeal-trace-missing-Tamworth-man/article-1823807-detail/article.htm

==========

WEIRD AND WONDERFUL

Aviators have Morse code all tied up

How? Well you might ask.

Well it's a neck tie that has the code printed on it. Presumably pilots can check their tie if they're a bit rusty on the code and want to verify what beacon they're receiving.

These beacons transmit a two to five letter callsigns at 5-words per minute.

Lets hope that coffee stains do not obliterate too many dits and dahs.

(VK2FJL)

Remembering the unit men - Bell

Hello I'm Jim Linton VK3PC with another in a series of brief looks at those who made discoveries and have their names as units of measurement.

Scottish born Alexander Graham Bell is best known for the first practical telephone.

A strong influence on him was that both his mother and wife were deaf, leading him into research on hearing and speech, engaging in the emerging art and science of elocution and being a teacher of the deaf.

After reading a book about electromagnetism and electricity he was inspired, setting the scene for his later work on a speaking telegraph - the telephone.

Bell moved to Quebec Canada with his family as a young man, but in 1871 he relocated to Boston to teach deaf children, and overturned the notion of the era in North America that people who could not hear had no place in normal society.

Then he was appointed as professor of vocal physiology and elocution at the Boston University, while still maintaining his experimental telegraph work after hours.

Apart from the telephone, he achieved breakthroughs later in life in optical telecommunications, hydrofoils and aeronautics.

Bell was an advanced thinker. For example, in 1917 he wrote about the depletion of natural resources, and stated that the unchecked burning of fossil fuels would lead to a sort of greenhouse effect and global warming.

The logarithmic measurement of sound has the international unit of the Bel, which is too large for practical use resulting one tenth of a Bel, or the Decibel, being commonly used.

GB2EI, Great Britain to Ireland Ferry Celebrations ends March 31 2010

New D-Star repeater for the Geelong area.

A new 70cm D-Star repeater has recently been established by Nik VK3BA in
Geelong.

The callsign of this repeater is VK3RNP-B. It has an output of 438.175MHz
with a negative 5.4MHz offset.

Whilst an internet gateway connection to this D-Star repeater hasn't yet
been established, it is anticipated that this will completed in coming months.

Nik VK3BA invites all D-Star operators travelling through the Geelong area to
make use of this new repeater.

Further information and updates can be acquired by visiting Nik's webpage
www.qrz.com/callsign/vk3ba

(Nik Presser VK3BA Geelong)

Northern Ireland has its first D-STAR 'hot spot' - Belfast simplex node MB6NI.

A hot spot provides access onto the D-Star network and MB6NI is located in Carrickfergus and was a project of GEARS to get more D-Star access in the Greater Belfast, Belfast Lough areas.

The spot is run by Brian GI6DKQ and the plan is to try and get more amateur radio clubs or individuals to put up their own spot and create a hot spot network covering Northern Ireland.

Special Event Stations

The 75th anniversary of the Daventry Experiment by Sir Robert Watson Watt, which led to the birth of British Radar as his team at Bawdsey developed the vital Chain Home radar system for the RAF and many others is set to be marked by a trio of special event stations over the this weekend, 26th to 28th February.

GB75BRS will be on the air from Bawdsey Manor on HF, 6m and VHF, operating CW, SSB and possibly some digital modes.

GB75RDF and GB0RDF will be on the air from the ex-BBC masts at Daventry.

GB75CH will be on the air from the Chain Home mast at Great Baddow

(Details of these special events stations are available on qrz.com)

'G'day it's Felix vk4fuq and i must tell you all about a friendly afternoon 40 m net held on 7.098 MHz every afternoon starting at 0600 hrs utc or 4 pm local vk4 time. It's a small net where we discuss everything from technical stuff to the weather and everything in between, but especially technical discussion!

We have regular participants from the Cairns, Ingham and Townsville areas as well as places further afield, and all Amateurs are welcome to call in and say g'day starting at 0600 hrs utc on 7.098 MHz every afternoon!'

FIRST SOUTH AFRICA / REUNION 70 cm QSO

Wednesday 10 February, Derek Gravett, ZS5Y, in Scottburgh and Phil Mondon, FR5DN, completed the first ever Reunion to South Africa QSO on 70 cm. over a distance of 2,655 km.

The contact was made using JT65B.

After that Derek and Phil made a SSB QSO as well with signal reports of 41 and 55.

Geopark Weekend

This years Geopark Communication weekend takes place over the weekend of 22 May - 23 May.

Radio stations from around the world will be exchanging greetings over the airwaves with Radio Operators operating special event stations from Geoparks of which there are 53 Parks of this status worldwide.

AWARDS

VK7 award

The Tassie Devil Award is available for any amateur who meet the following requirements

HF in Australia - 50 Contacts,
in Oceania and Antarctica - 30 Contacts,
in North America and Asia - 20 Contacts,
Europe and South America - 10 Contacts and
Africa - 7 Contacts.

On VHF/UHF you need 20 VK7 stations with at least one contact made in each of the Southern, Northern and North Western regions. Repeaters may be utilised.

On IRLP - contact with 30 VK7 stations.

SB QNEWS @ WW $QNEWS100228
QNEWS - Feb 28 - VK4 ON AIR

DID YOU TELL ANYONE ABOUT AMATEUR RADIO THIS WEEK?

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP with a reflection

on the Amateurs Code.

A word that isn't used in the Amateurs Code, printed in the Centenary 2010 Callbook, is generous. However if you read the words, you see the Radio Amateur is Loyal and Friendly....."/the radio amateur offers loyalty, encouragement and support to other amateurs....(with) kindly assistance. These are the hallmarks of the amateur spirit." /When you combine these two characteristics you come close to a dictionary definition of generosity.

Way back when I was still in short pants and most QSO's were still conducted in amplitude modulation, home brewing was the order of the day. Often I would hear discussions of individual projects when the junk box just didn't have a vital component. Some days later, I would hear the thanks for the parcel that the postman had delivered, at no cost and often done anonymously. This sharing has been something that I have witnessed and experienced from time to time and have tried to continue.

Recently, it was mentioned on the local repeater system that we could not source a short piece of miniature coaxial cable for a project. From

a couple of hundred kilometres away, the postman delivered about a metre of cable. Many thanks OM.

Yes the amateur is generous; another part of the tradition we continue in our centenary year.

I'm Geoff Emery VK4ZPP and That's What I think... how about you.....?

GYMPIE
www.gceginc.org.au
Trevor Taege, VK4BAT

I'm Trevor Taege, VK4BAT with the news from the Gympie Communications & Electronics Group:

Another fun social get together had several members and their partners enjoy an evening at the Gympie RSL. The evening of dining and entertainment was mixed with a light discussion of who was bringing what to the John Moyle Field Day. It was decided that if the weather was a little kinder than last

year, a few members would rough it and camp at the site.

Gympie 2 metre repeater update: The Gympie Communications & Electronics Group will be purchasing most of the current repeater equipment from Jason VK4MIH. This means that the club will only need to sort out new battery and solar power and relocation to Mt. Boulder. The repeater was decommissioned yesterday (that was the plan as this report was written). The Club is planning to set up the device temporarily at Chatsworth to fine tune the new power supply and to provide the area with continued service. Jason has kindly offered to loan us the IRLP equipment until we are able to purchase and build our own system so the node should suffer only a short downtime.

The EasyPal Digital SSTV repeater will during this time, be moved from Chatsworth to Lagoon Pocket. After the 2 metre repeater moves to Mt.Boulder, it will be returned back to Chatsworth. The Gympie Group also wishes to thank the Sunshine Coast Amateur Radio Club for their help with tower equipment, solar panel bracket and general support of our Club and both repeater projects.

The Club currently has a request with Local Council to re-locate our 70cm repeater to the water tower radio site in Gympie. The request is due to go before Council shortly.

So for a small growing Club, we have plenty to keep us busy. As they say, watch this space for further updates.

For Gympie Area News, I'm Trevor Taege, VK4BAT.

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au
Secretary Clive 4928 1173
http://www.radarc.cjb.net/

This is Doug VK4DUG from the Rockhampton and District Amateur Radio Club.

It's encouraging seeing that some amateurs are still getting their hands dirty, so to speak, and doing a bit of home brewing. Garry VK4FGZA has recently assembled a dummy load and antenna analyzer. I expect that Garry has a lot more building and fun planned for the future.

The other major project for club members, at the present time, at least for Mike LMB, Ray HOT and Bob HRC (with a little supervision and help from Jeff 4JAB), is the construction (and it's almost finished) of a secure operating room at the Heritage Village site. You may remember mention of the Club's involvement with the village on a previous occasion.

It is expected that one of the recently donated 'winch-up' towers will be put to good use at this site.

It must be an opportune time for the RADAR Club to purchase a casket ticket. After receiving the previous donation of towers etc, the Club, with the help of Don 4BY, has been awarded 2 secondhand Main Roads cast-off laptop computers. With the many Digital Modes now available these will be put to

good use in club activities. The hand-over to club members was made by the local Minister for Main Roads Robert Schwarten. (Can't miss a chance of a photo shoot), but never the less we are most grateful for this presentation.

73 from Doug.

SARL News - SUNDAY 28 FEBRUARY 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

In the news today:

WIN A MICROCHIP PICDEM TOUCH SENSE 1 DEVELOPMENT BOARD AND DIAGNOSTIC TOOL IN THE 2010 CONSTRUCTION COMPETITION

LEARN TO PROGRAM A PIC MICRO-CONTROLLER IN FOUR HOURS

ONLY 5 DAYS LEFT TO ENTER FOR TINUS LANGE AWARDS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

WIN A MICROCHIP PICDEM TOUCH SENSE 1 DEVELOPMENT BOARD AND DIAGNOSTIC TOOL IN THE 2010 CONSTRUCTION COMPETITION

The South African Amateur Radio Development Trust is inviting entries in the 2010 construction competition which this year is a competition with a difference. We are looking for an innovative approach to a construction project that has application in Amateur Radio but based on microchip technology.

The overall winner will be awarded a PICDEMT Touch Sense 1 Development Board and Diagnostic Tool and a PICkit 2 Kit from Microchip as well as an ARRL handbook.

The competition is run in three stages. Stage one is a paper design stage in which the participant in the competition must develop a project of his or her choice using a microchip and submit a short write up of the project including a circuit diagram and description of operation. The closing date for stage one is 31 March 2010.

Three entries, which in the opinion of the judges are the most original coupled with their usefulness in Amateur Radio, will receive R500 to build a proto-type for entry in the second stage of the competition.

The second stage entry must be a complete, suitably packaged and operating unit. The entry must be accompanied by all the necessary paperwork as well as an article with circuit and illustrations for publication in Radio ZS.

The closing date for stage 2 is 7 May 2010. Full details and the stage one entry form can be found on www.amateurradio.org.za

LEARN TO PROGRAM A PIC MICRO-CONTROLLER IN FOUR HOURS

Staying with PIC Micro-controllers, the SARL PIC course has been fully revised and updated and will be presented in Gauteng, Port Elizabeth, Durban and Cape Town. The revised course is great for newcomers to micro-controller programming and also an ideal refresher course for those who are already constructing with PICs.

The course fee includes tuition, required software on a CD, a demonstration board with a PIC, a programmer to download your programs to the PIC and 2 project boards which can be selected when booking for the course. A USB programmer is available to course participants at a small additional charge.

The first course will be held at the NARC on 13 March 2010. Bookings are now open. Only a maximum of 20 persons can be accommodated on each course so don't delay.

Get full details and a booking form on www.sarl.org.za, click on RTA and follow the links.

INTECNET THIS EVENING

The first Intecnet for 2010 will be on the air this evening (Sunday 28 February 2010) at 19:30. The discussion will be about what if there is another opportunity to include an amateur payload in future South African satellites what should it be? Join the discussion on one of the repeaters or listen to the net on echolink or the webcast by Chris Smit, ZS6FCS. Get all the details on www.sarl.org.za and click on armi.

ONLY 5 DAYS LEFT TO ENTER FOR TINUS LANGE AWARDS

The SARL Tinus Lange 7066 Technical Excellence Award and Tinus Lange 7066 Junior Technical Excellence Award is bestowed annually on the persons who submit a technical project in any of the following categories:

Design and/or construction of projects such as a pre-amp, SWR bridge, patching unit, automatic ID-er, practical antenna ideas, mast, portable gear, power supplies etc.

The project that you may have built for your own shack will be a good entry.

OR

Any software for use in Amateur Radio.

The submission must include the following: - the actual items (if size and mass allows it) or photographs (particularly in the case of antennas/mast etc) and a complete write-up in article form with illustrations/pictures ready for publication in Radio ZS. Entries must be in MSWord.

The actual entry and the supporting documentation - i.e. a press ready article for Radio ZS plus any other documents must be delivered and mailed to the NARC to arrive not later than Friday 5 March 2010. Judging will take place on the morning of 6 March.

All entries will be displayed (where practical, otherwise photographs) at the AGM and the awards will be presented at the annual dinner to be held in Port Elizabeth on Saturday 24 April 2010.

The two awards made are the Junior Technical Achievement Award (Under 25 years of age), a framed certificate and a cash award of R500, and the Technical Achievement Award, a framed certificate and a cash award of R500. In addition the winners will each receive an ARRL Logbook valued at R75 sponsored by the SA Amateur Radio Development Trust and a complimentary invitation for one person to attend the awards dinner (Transport not included.)

CONTEST NEWS

Congratulations to Pierre, ZS6BB, on scoring the most points again in the Antique Wireless Association CW activity day. Once again, Pierre showed his prowess not by making the most QSO's but by using QRP to score the most points.

The following are the results: ZS6BB, Pierre - 48 points ZS4JAN, Jan - 34 points ZS1TTZ, Adrian -11 points

There were a total of 27 stations recorded in the activity. Congratulations and thanks to all who took part.

The annual SARL HAMNET 40 Metre Simulated Emergency Contest will be run from 12:00 to 14:00 UTC on Sunday 7 March. It is a phone only contest using the band segment 7,060 to 7,100 MHz.

Radio amateurs in Southern Africa are invited to participate as a single operator stationary mobile, a single operator portable, a multi-operator portable or a single operator base station. The exchange is a RS report and a serial number determined by the class of participation.

The RSGB Commonwealth Contest is on the air on the weekend of 13 and 14 March and is a CW only contest.

The SARL VHF/UHF Digital Contest starts at 16:00 UTC on Friday 19 March with the first session ending at 12:59 UTC on Saturday 20 March. The

second session starts at 13:00 UTC on Saturday and ends at 12:00 UTC on Sunday 21 March.

The SARL VHF/UHF Analogue Contest starts at 10:00 UTC on 20 March and ends at 10:00 UTC on 21 March.

The rules for the Hamnet 40 Metre contest and the SARL VHF/UHF Contests are to be found in the 2010 SARL Contest Manual.

CLUB NEWS

The next ZS6PTA Pretoria Amateur Radio Club Fleamarket will be held on Saturday 27 March 2010 at the Pretoria Motorclub in Silverton. The starting time is 08:00 and it may last until approximately 11:00. For further information or to book a table, Contact Almero du Pisani on cell number 082 908 3359 or send an email to almero@up.ac.za.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that there were 260 days without sunspots in 2009 and only 2 since 2010. The solar activity is still at low levels. Currently sunspots 1 050 and 1 051 are doing their bit for solar activity although they are fairly moderate sunspots. The effective sunspot number is expected to be less than twenty for the coming week.

20 and 15 m will provide the best opportunities for DX. Conditions to India will be good from the afternoons onwards. During the late afternoons and early evenings it will be fair towards Europa. In the afternoons there are good possibilities for contacts with the USA on 15 m. Contacts with Australia will be possible on 20 m for a short while during the mornings. During the afternoons and evenings good 20 and 15 m contacts may also be possible with Brazil.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well during the middle of the day. With summer here 20 m is very useful for contacts over the longer distances during the majority of the day.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 28 February - Tonight at 19:30 Intechnet about possible future SA satellite payloads. 28 February - Closing date for the SumbandilaSat essay Competition. 28 February - Final date for entries in the ARRISS-SAT project to be submitted to youth@sarl.org.za. 5 March - Last day to enter for the Tinus Lange Awards. 7 March - SARL HAMNET 40 Metre Simulated Emergency Contest from 12:00 to 14:00 UTC. 13/14 March - RSGB Commonwealth CW only Contest. 19/21 March - SARL VHF/UHF Digital Contest. 20/21 March - SARL VHF/UHF Analogue Contest. 27 March - Pretoria Amateur Radio Club Fleamarket at 08:00. 31 March - SARL 80 m Club Contest with PSK and RTTY. 31 March - Closing date for stage 1 of

the Construction Competition. 17 April - 2010 SA AMSAT Space Symposium. 23-25 April - SARL National Convention, Port Elizabeth. 7 May - Closing dat for stage 2 of the Construction Competition.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George, ZS6NE.

Thank you for listening, 73.

135. [RAC-Bulletin] RAC Bulletin 2010-005E : Earthquake in Chile

Newsgroup: rec.radio.amateur.misc
Date: 2010-02-28 15:34:44 UTC
From: rac-bulletins@eton.ca
Message-ID: <4B8A8D05.9050708@rac.ca>
Source record: 5854
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

```
Earthquake in Chile

At the request of the International Amateur Radio Union (IARU) and the
Red Chilena Nor Austral Servicio (RECNA), all Amateurs are requested
+to keep all IARU Center of Activity Frequencies clear until further
notice as health and welfare traffic is being passed to and from Chile.

As well, the RECNA requests that they're call frequencies be avoided.
They are 28300,28500,21200,21350,14200,14350,7050,7095,3738,3750 khz.

Many thanks for your understanding,

73

Doug Mercer VO1DTM
Vice President Field Services
Radio Amateurs of Canada

SB DX @ WW < KB8NW $OPDX.949
Ohio/Penn DX Bulletin No. 949

The Ohio/Penn DX PacketCluster
DX Bulletin No. 949
BID: $OPDX.949
March 1, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, W2VU, N3CR, NG3K & ADXO, N4AA & QRZ DX, N5UCF, KH6BZF, N7OU, K8GI, K8YSE, W8GEX (60m News), WE9V, AB0RX, AT International, DK8JB, DL7MAE & The DX News Letter, DX World.Net, F5NQL & UFT, F6FQK, HP1AC, I1JQJ/IK1ADH & 425 DX News, JE2EHP, LY4Q, OE1WHC, OK7MT, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, SQ8X, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

** PLEASE NOTE (CQ Newsroom): Following the 8.8 earthquake that struck southern Chile early Saturday, February 27th, IARU, Region 2 and the Red Chilena Nor Austral de Servicio (RECNA) suggests radio amateurs monitor EmComm frequencies for earthquake and tsunami information:
SSB frequencies are:
10 meters - 28.300, 28.500 MHz 40 meters - 7.050, 7.095 MHz
15 meters - 21.200, 21.350 MHz 80 meters - 3.738, 3.750 MHz
20 meters - 14.200, 14.350 MHz
(via CQ Public Service Editor Richard Fisher, KI6SN)
In addition, the worldwide emergency communication "centre of activity" frequencies should be monitored. They are: 14.300, 18.160 and 21.360 MHz

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 21st-February, through Sunday, 28th-February there were 232 countries active. Countries available: 3A, 3B8, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9U, 9V, 9X, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H2, H4, H40, HA, HB, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T30, T7, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU,

TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9X, VP2M, VP2V, VP6, VP8, VP8/h, VP8/s, VP9, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B9, RODRIGUES ISLAND. Just a reminder that John, G3LZQ, will be active as 3B9WR from Cotton Bay, Rodrigues Island (AF-017) between March 3rd and April 2nd. Activity will be on all bands 160-10 meters, probably and mainly CW, but with a focus on the lower band (QRN permitting). Look for him to be in the RSGB's 73rd Commonwealth Contest (March 13-14th). QSL via his home callsign.

5W, SAMOA (Update ZK3). Operators Bill/N7OU and Bob/W7YAQ continue to be active as 5W0OU and 5W0YA, respectively, from Apia, while they wait for a boat to take them to Tokelau (ZK3). Bill informs OPDX that the boat trip to Tokelau may happen sometime this week. So stay tuned and be listening. He states, "Over the last week and a half we've done a lot of repositioning and tinkering with our antennas and think we have them optimized." QSL QSOs with 5W0OU to N7OU (including the ARRL DX Contest) and QSOs with 5W0YA to W7YAQ.

6V, JAMAICA. Chad, WE9V, will be active as 6Y9V between March 4-14th. Activity will be on 160-10 meters, with emphasis on 160/30/17/12 meters, using CW, SSB and RTTY. This will include an entry in the ARRL DX SSB Contest (March 6-7th). QSL via WD9DZV. You can contact Chad during his stay by E-mail at 6y9v@we9v.com or see updates via Twitter at: http://twitter.com/6y9v

8P, BARBADOS. Tom, W2SC, will be active as 8P5A during the ARRL DX SSB Contest (March 6-7th) as Single-Op/All-Band/High-Power entry. QSL via LoTW or direct to NN1N.

CN, MOROCCO. Hartwig, DL7BC, will be active as CN2BC during the CQ WW WPX SSB Contest (March 27-28th) as a Single-Op/All-Band/Low-Power entry. QSL via DL7BC. Visit his Web page at: http://www.qslnet.de/dl7bc

CQ3/CT9, MADEIRA ISLANDS. Helmut, DF7ZS, will be active as CT9/DF7ZS between March 24-31st. Activity will be holiday style and will focus on the WARC bands. QSL via DF7ZS. Also, he will be active as CQ3L during the CQWW WPX SSB Contest (March 27-28th) as a Single-Op/All-Band entry. QSL via DJ6QT.

D4, CAPE VERDE. Massimo, IZ4DPV, is now active as D44AC from Vicente Island (AF-086) until March 9th. He was active this past weekend as D4C in the CQ 160m SSB Contest. QSL both callsigns only direct via IZ4DPV.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
3V3S ï¿½ Tunisia; 2009 Operation
D2CQ ï¿½ Angola; Current Operation

EA8, CANARY ISLANDS. Andrew, G7COD, will be active as EA8/G7COD from Playa Del Cura on the Island of Gran Canaria (AF-004) between March 20-28th. Activity will be on 20-10 meters, including 17/12m, using CW and SSB. He plans to be active daily approximately between 1300-1400z, 1800-20:00z and 2300-2330z. Suggested frequencies are:
CW - 14003, 18073, 21003, 24893 and 28003 kHz (+/- to allow for QRM)
SSB - 14177, 18133, 21253, 24953 and 28500 kHz (+/- 10 kHz)
For comprehensive details of QSL information, propagation forecast etc, please check his Web site at: http://www.8q7ak.freewebspace.com

GB0, ENGLAND. Members of Newbury And District Amateur Radio Society (NADARS) will be activating GB0VUL during the month of March. Activity will be on 80-10 meters using CW and SSB. This special event is to increase the awareness of the "Vulcan to the Sky Trust" and their efforts to save the only flying Vulcan XH558 bomber. <http://www.nadars.org.uk/vulcan.asp> While activity may take place all month, the main event of the month will be on the weekend of 20th and 21st. For more details, see the information (as well as possible updates) on QRZ.com. QSL via the RSGB Bureau, eQSL preferred or via G8JIP.

HQ2, HONDURAS. Andrei, NP3D, will once again be active from here between March 19-29th. He will sign HR2/NP3D on all HF bands, all modes, but will focus on 160m. Andrei will also be in the CQWW WPX SSB Contest (March 27-28th) as HQ2T and as a Single-Op/All-Band entry. QSL via W3HNK, RW6HS, or via LoTW. Also, he plans to be in the Russian DX Contest and the BARTG Spring RTTY.

IOTA NEWS.....
EU-008. Members of Kilmarnock and Loudoun Amateur Radio Club (GM0ADX, GM7A and MM0KLR)and South Cheshire Amateur Radio Society (G6TW) will activate jointly the Isle of Eigg (WAB NM48, IOSA NH03), Inner Hebrides, as GM6TW/P between April 24-27th. Operators mentioned are: Graham/MM0GHM (KLARC), Gordon/MM0GOR (KLARC) and Mark/M0UTD (SCARS). QSL via G0UZP.

EU-010. Members of Camb-Hams will once again be active as GS3PYE/P from the Isle of Harris between May 1-14th. Operators mentioned are: Voi/G0BOE, Geoff/G0DDX, Adam/G1UAF, Bob/G1SAA, Terry/ G3VFC, Martin/G3ZAY, Colin/G4ERO, Mike/G7VJR, Lawrence/M0LCM, Mark/M0MJH, Frederick/M0RFD, Robert/M0VFC and Gavin/M1BXF.
QSL via M0VFC. Check out their 2009 activation via the Camb-Hams Web page at:
http://www.camb-hams.com/coming-events/2009-dxpedition
Also see their diary page for some video!

EU-156. Operators Francois/ON4LO, Kurt/ON4CB and Johnny/ON7KJW will be active as F/OR9W/P from Tombelaine Rock between July 23ï¿½25t h.
Activity will be on 160-10 meters SSB using home-made antennas.
QSL via ON4CB.

NA-034. David, K2DBK, will be active as K2DBK/4 from Lido Key Island between March 22-24th. Activity will be on 20/15 meters SSB.

QSL via his home callsign, direct or by the Bureau.

NA-046. Members of the Fall River Amateur Radio Club will be active as W1ACT from Martha's Vineyard (USI MA-005S, WLOTA LH-2804) between April 30th and May 2nd. Activity will include the New England QSO Party (May 1-2nd). Suggested frequencies are: 3540, 7040, 14040 and 14280 kHz. QSL via N1JOY: Roland Daignault, 19 Davis Rd, Westport, MA 02790-3433.

NA-079. (Update) Members of the Amateur Radio Outdoor Adventures, Inc., will be activating Grid Square EL84, March 11-15th. Activity will be from Fort Jefferson, Garden Key in the Dry Tortugas (USI FL-013S, USA-316, Monroe County, Florida) 72 miles west of Key West. Callsign will be K4T. Team members are: Mike/AC2V, Dave/N2NL, Chris/KN3ZIG, Pete/AI4QY, Gary/K4MF, Max/KJ4EUT, Dan/W4UH, Pete/WD4IXD, Fred/K9VV, Vick/WA0USA, Mark/N8MH and Jennifer LeSueur. Activity will be on HF, Satellite and Digital. The group plans to have 3 HF stations, 2 satellite stations and 1 portable satellite station. They have posted the proposed satellites passes and frequencies on their Web. The K4T Web page is available at: http://aroadventures.org

IOTA STATESIDE TOUR. Pete, VE3IKV, will once again be active from the following stateside islands:
March 6-7th - St. Simons; NA-058, USI GA-003S, Glynn county, Georgia
March 8-13th - Key West; NA-062, USI FL-040S, Monroe county, Florida
March 11-12th - Garden Key, Dry Tortugas; NA-079, USI FL-013S, Monroe county, Florida.
His callsign will be W4/VG3RA. Activity will probably be on 40 meters CW using 100 watts into a sloper antenna. Also, look for him on 6 meters using CW and SSB. QSL via VE3IKV, direct or by the Bureau.

J7, DOMINICA (NA-101). After his activity in the ARRL contest as KP2M, John, K3TEJ, will once again be active as J7N until March 11th. Activity will be on all bands mainly using CW and RTTY. John has been heard with good signals on both 80m and 40m CW. He plans to be in the ARRL International DX SSB Contest (March 6-7th) as a Single-Op/All-Band entry. QSL via his home callsign. ADDED NOTE: K3TEJ and K3CT run up over 6900 contacts during the ARRL DX CW Contest from KP2M even after rig problems.

JX, JAN MAYEN (2011 Op/Operators Needed). Stan, SQ8X, announced that a team of 8-9 individuals (5-6 hams) are planning to visit the Island of Jan Mayen between July 4-14th, 2011. This will not only be a DXpedition, but the team will have an unique opportunity to climb "Beerenberg" - an active stratovolcano (2275m) <http://en.wikipedia.org/wiki/Beerenberg> as well as a chance to visit many interesting sites on the island. The team will depart from the Island of Iceland by a 60 ft. comfortable yacht. Sailing to the Island of Jan Mayen takes approx. 2-3 days depending on sea conditions. The team will spend 6-7 days on the island depending of WX. They will have 2-3 stations on the air utilizing rather smaller transceivers like IC-706, (maybe 756 PRO III) and verticals (or one multi-band beam + verticals). Stan states, "Since we will be there

during summer time, and due to the location over 70i¿½N, we will probably not be able to operate on 160-40 meters as bands will probably be useless at that time. 30m may be open, but it can be tough due to auroral influences/pressure up there. The best openings may occur on 20-15 meters. If we have higher SSN, 12-10 may be workable, too. Keep in mind that if any stronger geomagnetic disturbances occur, all bands will be totally D.E.A.D." A generator will be used and possibly small amps, but it all depends on their budget. The island is still very rare on CW and RTTY, and especially outside of Europe. So one station will be on CW and RTTY, while the other is on SSB. The team can be split into 2 teams: one operates while the other one visits the island and then swap. Stan mentions, "Climbing the volcano is quite challenging. Getting to the top of the volcano takes 10-12 hours. The rest of the places to see are easy to access and not that challenging. But the volcano is the best attraction to see!" If interested in joing the team, E-mail Stan for more details at: stan.sq8x@gmail.com

KH0, MARIANA ISLANDS. Yoshi, JE2EHP, informs OPDX that he will be active as K1HP/KH0 from Saipan (OC-086) between March 21-25th. Activity will be on all the HF bands and 6m, using CW, SSB and RTTY. QSL via the Bureau to home callsign JE2EHP.

KH6BZF PROPAGATION FORECAST/REPORT (For March 1-7th)....
Mar 1 AN SOLAR REFERENCE KEYS
Mar 2 AN --------------------
Mar 3 AN BN - Below Normal
Mar 4 AN AN - Above Normal/Geomagnetic Level is QUIET
Mar 5 AN LN - Low Normal
Mar 6 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Mar 7 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

* PLEASE NOTE (From KH6BZF): THE NEXT 27.5-DAY SOLAR CYCLE IS FORECASTED FOR 1-6th MARCH, 2010, WITH SFI (SOLAR FLUX INDEX'S) BETWEEN THE HIGH 80'S TO LOW 90'S....

LX, LUXEMBOURG. Philippe/LX2A will be active as LX7I during the ARRL DX SSB Contest (March 6-7th) as a Single-Op entry. QSL via LX2A. Visit the following Web page at: http://www.lx2a.com

LY11/LY20, LITHUANIA (Special Event and Award). To celebrate 20th anniversary of the "Act on the Restoration of Independence of Lithuania" (March 11, 1990), the Lithuanian Amateur Radio Society (LRMD) is issuing an award for amateurs who make contact with special event stations with the prefixes LY20 or LY11 (11 stations on the air), as well as all other

LY stations and collecting 20 points between the period of March 1st and May 1st, 2010.
Points are:
EU stations - any LY20 or LY11 station is 3 points; other LY is 1 points
DX stations - any LY20 or LY11 station is 5 points; other LY is 2 points.
It is necessary to have 3 QSOs with any LY20 or LY11 station. QSOs with the same station is possible on multiple different bands and different modes. Application deadline is December 31, 2011. Please send certified list of contacts (no QSL please) and payment to the LRMD Award Manager. Please provided your E-mail address with your application, in case they need to contact you by E-mail. Postal address is: P.O. Box 1000, LT-01014, post 1, Vilnius, LITHUANIA. Payment: 5 EURO or equivalent in USDs, or 7 IRC. Look for the following special event stations (w/ their operating dates): Special Owner, Operating

Callsign	QSL Route	Dates
LY20W	LY5W	March 1st-April 29th
LY20PSK	LY3X	March 1st-April 29th
LY11A	LY5A	March 1st-April 29th
LY11GV	LY2GV	March 1st-April 29th
LY11QT	LY2QT	March 1st-April 29th
LY11BY	LY3BY	March 1-31st
LY20NX	LY3NX	March 1-31st
LY20INDP	LY1CT	March 1st-April 29th
LY11MM	LY2MM	March 1st-April 29th
LY20AM	LY2AM	March 1st-April 29th
LY20J	LY3J	March 1st-April 29th

MAJOR PACIFIC TOUR (Update). After his recent trip from the Pacific, team leader, Hrane/YT1AD announced that an international team of operators will activate Tokelau (ZK3), Canton Island (T31 - Central Kiribati) and Wallis Island (FW) during the following updated tentative schedule:
September 29th - Loading in Apia and departure Apia to Fakaofo Atoll in the Republic of Tokelau Island
September 30th - Arriving at Fakaofo Atoll
September 30th - Departure from the Island of Tokelau
October 1st - Traveling to Canton Island
October 2nd - Arriving at Canton Island in the early morning
October 2-11th - Activity from Canton Island
October 11th - Activity and afternoon departure from Canton Island
October 13th - Arriving Wallis Island
October 13th - Departure from Wallis Island
October 16th - Arriving at the Fiji Islands
Operators mentioned are: Hrane/YT1AD, Drgan/YT3W, Vel/YT3WW, Mladen/YT6W, Miki/YU1AU, Chuck/JT1CO, Atilano/PY5EG, Vangelis/SV2BFN, Aleksej/UA4HOX, Krassimir/K1LZ, Dave/K3LP and Doug/N6TQS. Pilot stations are: Toma/YU1AB and Aca/YU1AA. Consultant is: Larry/AH8LG. Activity will be on 160-2 meters using CW, SSB, RTTY, SSTV and PSK31. Suggested frequencies available are: http://www.yt1ad.info/t31/frq.html
More information will be forthcoming. Watch for updates at:

http://www.yt1ad.info/t31/index.html

OD5, LEBANON. Fred, DL6SN, is now active as OD5/DL6SN from here until the end of year. He plans to be active on 40-10 meters mainly on CW. Activity over the past week has been on 20/17/12 meters CW. QSL via DO8LA.

OE10, AUSTRIA (Special Event). The Amateur Radio Section of the ORF (Austrian Broadcasting Corporation) and the Documentary Archives Radio Communications/QSL Collection will operate, for only 72 hours, a special event station with the callsign OE10M during the weekend of April 23-25th (0000-2400z). OE10M is an official "International Marconi Day" station. Contacts made on Saturday, April 24th, are valid for the IMD Award. QSL via OE QSL Bureau or direct to OE1WHC. Cards without SAE and (new!) IRC or USDs to cover postage will be processed via Bureau. To see the QSL, go to: http://www.qsl.at/down/oe10m.jpg

PJ4, NETHERLANDS ANTILLES. Operators Michal/OK7MT and Vit/OK5MM will be active as PJ4/OK7MT and PJ4/OK5MM, respectively, from Bonaire (SA-006, WLOTA LH-1279) between March 18th and April 1st. They are planning to be entries in the Russian DX (March 20-21st) and CQWW WPX SSB Contests (March 27-28th) as PJ4L. QSL PJ4L via OK7MT direct or bureau.

PZ, SURINAME. Peter, PA1LP, is now active as PZ5LP from Nieuw Nickeriebe and Paramaribo until March 25th. Activity will be on 80-10 meters using SSB and the Digital modes. He will be using a FT-857 w/100 watts into a G5RV. QSL via eQSL or LoTW.

QSL INFO AND NEWS.....
QSL CN3A via LoTW or I2WIJ. Activity was during the CQ 160-Meter SSB Contest. Operators were: IK2QEI, IK2SGC, IK2SFZ and IV3ZXQ.

QSL EY8ZF via the address on QRZ.com. Activity was during the CQ 160 Meter SSB Contest. Operators were: EY8BI, EY8MM, K4ZW and RV0AR.

QSL KH7MM via W1NA. Activity was during the CQ 160-Meter SSB Contest. Operator was W1NA from KH6YY.

QSL RW2F via DK4VW. Activity was during the CQ 160-Meter SSB Contest. Operator was UA2FB.

Jerry, N5UCF, reports: "Effective immediately, I will be serving as QSL Manager for Selva, 9V1UV. I will have logs for all of Selva's QSOs, past and future and will be answering direct and bureau requests. Please send direct requests to my QRZ.COM address with SASE or SAE + new IRC or minimum of 1 USD for a direct return. New cards have to be ordered and printed, so please be patient for a return QSL over the next month or so."

NEW QSL MANAGER. Joe, W3HNK, is now the QSL Manager for V26M.

QSLS VIA LoTW: 6W/GM4FDM, A92IO, DO5OT, EA3DUM, EW4AA, F08RZ, HA1AD, HR2J, SP2FUD, TX3D, TX4T, UX0FF, XE2YWH, XR0X and ZS2EZ

QSLS RECEIVED VIA MAIL: 3D20CR, 3V3S, 4U30VIC, 7X4AN, 8R1K, AM5FUV, BX4AQ, CO7PH/P, DU1/HL1IWD, EL2DX, ET3JA, H6VA, HC8A, HC8GR, HL1/JH4RHF, I3THJ, J5UAP, J7N, J88DR, KH7X, OX3MC, OX3XR, P49X, RA2FF, ST2AR, T32BJ, TY1MS, V51AS, VK6IOA, VP2MXO, YS4/K9GY, Z29KM, ZK2DL and ZY0T

QSLS RECEIVED VIA THE BUREAU: 2M0GSC/P, 6V7G, 6W1RY, AD1L, DL3G, EA4RCT, EH5J, K4YKZ, LX0HQ, MW5W, NI4I/AM, ON4LO, PJ4NX, SI3A, VE3MIS, VE6MAA and YO2MHD

SV5, DODECANESE. Willi, DJ7RJ, will once again be active from Kos Island EU-001, GIOTA DKS 043) as SV5/DJ7RJ between now and March 18th. He is there on holiday, but plans to be active on all HF bands, 160-6 meters (he does prefer the lower bands), using CW and SSB. QSL to his home callsign, direct or by the Bureau.

T32, EASTERN KIRIBATI (Update). This past week the callsigns for the upcoming DXpedition to activate four uninhabited IOTA islands (in the Southern Line Islands Group) that have never been put on the air before were announced. Look for the following callsigns and IOTAs to be activated between mid-March and early April:
T32MI - Malden Island (OC-279)
T32SI - Starbuck Island (OC-280)
T32CI - Caroline Island (OC-281)
T32VI - Vostok Island (OC-282)
No specific dates were announced yet, but a team of 5 operators and 5 Government Kiribati officers will set sail on the "SV Kwai" from Kiritimati (Christmas Island) on approximately March 17th, returning to Kiritimati approximately April 18th. Per their Web site, the team will operate from two sites (two stations each) and will operate on 40-10 meters using a variety of verticals and dipoles. QSL direct via SM6CAS. The T32 Southern Line Islands DXpedition's Web page is at: http://t32line.webnode.com

TM4, FRANCE (Special Event). Operators Jacques/F5LON, Jean-Francois/F6CNM, Nicolas/F8FKD and Claude/F9OE will activate TM4FFU from the French radio maritime coast station "Brest-Le Conquet Radio (FFU)" on "2010 Radio Maritime Day" between 1200z Saturday, April 10th, and 1200z Sunday, April 11th. Activity will be on 160/80/40/20/15/10 meters using CW only with 100w into a dipole and vertical. Suggested frequencies are (+/- 5 kHz): 1824, 3520, 7020, 14052, 21052 and 28052 kHz. QSL via F8FKD.

TP60, FRANCE (Special Event). Francis, F6FQK, reports that members of the "Council of Europe Radio Amateur Club" (CERAC) will be active as TP60CE between March 12-14th. Activity will be on CW, SSB, PSK and the Satellites to celebrate the 60th anniversary of the "Convention of Human Rights". QSL via F5LGF. An online log search will be available at: http://ewwa.free.fr

V6, MICRONESIA (Rare IOTA to be Activated!). Operators Mike/KM9D and Jan/KF4TUG onboard the "Don Henry", are expected to activate the rare IOTA group of Oroluk Atoll (OC-260) very soon. In previous activities from Micronesia, Mike and Jan used the callsigns V63MY and V63TO. Last activation from here was in 2003 by Joe/I2YDX and Robert/IK2WXZ as V60A/p. No other details are available at this time.

ZB, GIBRALTAR. The "60m News" is reporting that Erine, ZB2FK, has reported that Gibraltar now has 60 meter permission. His radio doesn't work on the band, but they are looking for another ham on the island or a contester going there to put 60m on the air.

ZP0, PARAGUAY. Tom, ZP5AZL, plans to be active as ZP0R during the CQWW WPX SSB Contest (March 27-28th) as a Single-Op/All-Band entry. QSL via ZP5AZL. Visit Tom's Web page at: http://www.qsl.net/cx6vm/ZP5AZL

Special Event Ferry Operations Enter Final Weeks

Ei2GBW and GB2EI, special event stations celebrating the return of the Cork to Swansea ferry, enter their final weeks of operation. Both stations will be QRV as many hours as possible from 1 to 4 March for MV Julia's first scheduled ferry operations to Swansea (1-2 March) and her return to Cork (3-4 March).

Operations are planned on 80m (CoA 3.660 to 3.680MHz) and 40m (CoA 7.120 to 7.140MHz) phone. Unfortunately, the intended maritime mobile operations aboard MV Julia had to be cancelled at the last minute. This was due to refusal by the Department of Transportation to issue the ship's passenger certificate if the amateur station was allowed to operate on board.

Regular operations of Ei2GBW will continue until 2 April and GB2EI until 30 April. QSL cards will be sent to all stations worked, and the 'Spirit of Innisfallen Award' certificate is available for working both special event stations. Full details are on the Ei2GBW page at qrz.com.

EI2AJ QRP

Ei 2 AJ will be operating portable and QRP from Duquesa (West of Estapona) on the south coast of Spain from 2nd March to the 28th March.

Operation will be CW on the QRP frequencies in 40,20 & 15m bands.

Equipment used will be a Yaesu FT 817ND running 2.5 Watts. The antenna will be a multi band mobile vertical clamped to an iron balcony rail and will be looking out for Ei or Gi stations.

AREN Google Group

Just a reminder to members and a notice to anyone else interested in discussion around Emergency Communications topics, that AREN is now hosting a google group at http://groups.google.com/group/AREN-EI for this purpose.

Limerick Radio Club The Annual General Meeting of Limerick Radio Club took place on 25 February last in the Limerick Institute of Technology. There was a good attendance of members and the following officers were elected for 2010/11.

Chairman Dermot Gleeson EI2GT Hon Treasurer Tony Condon EI2AW Hon Secretary Ger McNamara EI4GXB Committee: Simon Kenny EI7ALB, Mike Griffin EI4FMB, John Edgeworth EI6IW, Michael Kingston EI2IX

CARA

Crossakiel Amateur Radio Association (EI4Cara) who are based in Crossakiel, Kells, Co. Meath had their annual AGM on the 17th of February 2010.

Committee appointments are as follows:-President: Gary EI3GIB, Vice President/Secretary: Alan EI5GFB & Treasurer: Steven EI4GKB

The Crossakiel Amateur Radio Association (EI4Cara) meet every Wednesday at 8.30pm in the Welcome Wagon in Crossakiel. All are welcome to attend.

Richard Hendy from the Dundalk Amateur Radio Society will be coming to CARA to talk about all aspects of the Echolink system from the basics right up to the technical side of setting up of a local Echolink repeater.

CARA would like to extend an invitation to amateurs who have knowledge of specific areas of radio to come down to the club and give a talk on their radio related chosen subject.

Internet access and other facilities are available, so don't be shy, they are a friendly bunch of guys looking to expand knowledge and to promote radio.

Contact details are as follows.

The club frequency is 145.550MHz. For more information please visit the CARA website

http://ei4cara.crosakiel.com or on email: ei4cara /at/ crossakiel.com.

QRP Talk at SHARE Rally

Yet more good news follows earlier news that George Dobbs, G3RJV will be at the Lough Erne Amateur RadioClub Rally.

George, who is the world's best known QRP author has agreed to give a talk, entitled QRP Why and How in a room near the Rally arena. Meantime, there will be three major QRP displays in the Rally arena.

Brendan Minish EI6IZ, from the Mayo Radio Experimenters Network will display Elecraft kits. Graham Firth, G3MFI will set up the G-QRP Club stall& Dom Baines M1KTA will display home-built kits, receivers, transmitters and accessories.

George's talk will be for 40 minutes then questions, with a second one hour session if needed. George will also sign copies of his books, whether brought along or bought at the rally (availability TBA).

The Rally is on Sunday 11 April in the SHARE centre near Lisnaskea, with a talk-in on the Fermanagh Repeater, GB3CP. Rally enquiries to the Organiser, Iain Gibb, Phone 048-6632-6693, Email iain.gibb101 <AT> btinternet.com

All 18 from Lough Erne Amateur Radio Club's Foundation course at the SHARE centre passed the Examination last Sunday after a two-weekend course.

By Thursday they were downloading their new licenses from OFCOM. Three women, all from Rosslea, were the first on air, using the Fermanagh Repeater GB3CP.

They were Fidelma Mi6UIM, Shauna Mi6SHF and NoreenMi6NCC.

Welcome ladies to amateur radio!

These 18 new licensees range in age from 13 to 78 years, and include four women and three SHARE staff.

The Club is most grateful to SHARE, whose staff and facilities were invaluable, particularly the ten computers linked by wireless to a website used for exam question practice.

At the Club's Rally in SHARE on 11 April, Billy Pollock GI3NVW, himself over 50 years licensed, will present Welcome to Amateur Radio Certificates to these 18 and other new Foundation licensees.

For more information contact Michael Mi5MTC, Chairman Lough Erne ARC

South Dublin Radio Club

The South Dublin Radio Club annual general meeting (AGM) will take place on Tuesday 2nd of March.

Classes are still being run every Tuesday evening and

Visitors are always welcome.

Shannon Basin Radio Club The Shannon Basin Radio Club id having a meeting on Wednesday night next the 3rd March at 20:30 in Hannons Hotel Roscommon Town.

All members are requested to attend.

Tipperary Amateur Radio Group

The monthly meeting of the Tipperary Amatuer Radio Group will take place on Thursday next the 4th of March in Raheen House Hotel,Raheen Road,Clonmel. at 8.00 pm all are Welcome.

Rallies

Limerick Radio Club Radio, Electronics & Hobbies Fair

The Radio, Electronics & Hobbies Fair takes place on Sunday 7th March 2010 at the Radisson SAS Hotel, Ennis Road, Limerick.

Doors Open at 11:00 AM. Admission is 5 Euro. No charge for children when accompanied by an adult. There will be the usual traders attending the Fair. A Bring & Buy Sale will also take place.

For further Rally info and contact details please check out the IRTS Website at

http://www.irts.ie/cgi/rallies.cgi

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to "charlie dot carolan at gmail dot com" Or by phone to 087-6265418 News can also be submitted via e-mail to "newsteam at irts dot ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

138. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.misc

From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1267426800@panix.com>
Source record: 5857
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

News from Chile - 2010-03-01

Friends, a few minutes ago I talked by phone with Doctor Galdino
Besomi CE3PG Radio Club de Chile (RCCH) president.

He informs that soon after the earthquake, the Emergency Net was
activated in the whole country, first on VHF and them in HF. All the
board and club members are actively working in close coordination with
civil and military authorities.

After three days of the earthquake the request for news about people
in the affected countryside areas is one the main activity occupying
the radio amateurs.

March 1, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX
Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet
Clusters Network, and KM9D for the following DX information.

V6, MICRONESIA (Update - Rare IOTA to be Activated!). Operators Mike/KM9D
and Jan/KF4TUG onboard the "Don Henry", are now on Oroluk Atoll (OC-260).
The following info was sent to OPDX by Mike:
"All being well, V63MY and V63TO are intending amateur radio activity
from a land-based station located at Oroluk Island beginning 02 March,
2010, and continuing for about 10-days.

Oroluk Island is located on the northwest of a lagoon bearing the
same name and is located near 07"37'N, 155"10'E. Oroluk is situated
approximately 190 nautical miles WNW of Pohnpei Island, capitol for
Federated States of Micronesia, and within the bounds of Pohnpei State.

For island-collecting enthusiasts Oroluk atoll is IOTA reference OC-260.

Requests for QSL cards should be directed to the QSL manager, OM2SA.
The radio-log will also be included in the ARRL's LoTW database."

C5 - GAMBIA
Niels,OZ8KR, will be active as C56KR in SSB on 80m-10m from Bakuto running 100 watts. He will use a wire antenna, 2x 36m in 12m height which will be put up near the Atlantic coast. Though it is a holiday style operation, Niels hopes to make as many QSOs as in the year 2009. QSL via bureau or direct to OZ8KR.

FS - ST MARTIN, NA-105
Dennis,FS/KT8X, is spending his holidays on St Martin (NA-105) from Mar 5-12. He prefers working in CW, SSB and RTTY on the WARC bands. The only QSL route announced is via LoTW.

J3 - GRENADA, NA-024
Harry,AC8G, will be on the air as J37K from Mar 4-7. He works on 160m-10m but most likely you can find him in SSB on 15m or 17m listening especially for Europe. He will join the ARRL DX SSB Contest on Mar 6/7. QSLs via his homecall (also via bureau).

J6 - ST LUCIA, NA-108
Bob,J6/G3PJT, is expected to show up from Mar 9-16. His QTH is situated in the northeast of St. Lucia (NA-108). Bob prefers working on 80m and 30m and plans to take part in the RSGB's 73rd Commonwealth Contest. QSLs via homecall.

OD - LEBANON
Manfred,DL6SN, is working in Lebanon for about half a year now and will stay there at least until the end of 2010. He has received his guest licens last week and is now working as OD5/DL6SN. Manfred is active from 10m-80m (mostly in CW) but due to QRL most of the time during the evenings and weekends. His QSL manager is Ronny,DO8LA, who is also confirming via bureau reliably. QSL cards to DL6SN (direct or via buro) cannot be answered.

V2 - ANTIGUA, NA-100
Bob,W4OWY, and Mark,W9OP, will be QRV from Antigua (NA-100) signing
V25WY and V25OP in CW, SSB and RTTY on 160m-6m from Mar 9-18.
QSLs via bureau, direct, eQSL or LoTW to their homecalls.

Alan,N3AD, is staying on Antigua as well and will show up as V26M from
Mar 4-7. He also wants to take part in the ARRL DX SSB Contest. Alan
will be QRV on 10m/15m/20m during the daylight and on 160m/80m/40m
during the night hours. QSL via homecall.

V6 - FEDERATED STATES OF MICRONESIA, OC-260
Mike,KM9D, and YL Jan,KF4TUG, are sailing with their yacht "Don Henry"
and hope to arrive on the Oroluk atoll (OC-260) soon. They expect to
use their former calls V63MY and V63TO again. QSLs via OM2SA (direct).

V7 - MARSHALL ISLANDS, OC-028
Tom,V7/N4XP, will be QRV from Kwajalein (OC-028) from Mar 9-22.
He will work in CW and SSB on 160m-10m. He will also try to make some
QSOs on 60m. QSL via homecall.

VK9C - COCOS KEELING ISLANDS / E5 - SOUTH COOK ISLANDS
Tim,NL8F will be QRV as VK9COF or VK9C/NL8A from Cocos Keeling (OC-003)
from Mar 3-10. Activities will take place on 80m-6m including the
ARRL International DX SSB Contest.
His next stop will be Rarotonga (OC-013) where he is going to become
active on 80m-10m signing E51COF from Mar 20-30. Both QSLs via K8NA.

VP2M - MONTSERRAT ISLAND, NA-103
Bob,AA1M, will show up mostly in CW as VP2MPL from Mar 6-11.
QSL via his homecall AA1M.

YN - NICARAGUA
Cal,WF5W (YN2EA), Mike,K5UO (YN2UO), Keith,NM5G (YN2MG), and
Doug,WB5TKI (YN2TKI), who are all members of the "Texas DX Society"
are working in SSB, CW and RTTY on 10m-160m from Mar 4-9. They will
sign YN2EA in the upcoming ARRL DX Contest SSB (Mar 6/7).
All QSLs are handled by their QSL manager Paul,W5PF (also via LoTW).
Online logs will be available on: http://www.tdxs.net/yn2ea.html

ZK3 - TOKELAU ISLANDS, OC-048
Due to lacking transportation possibilities to Tokelau Bill,N7OU, and
Bob,W7YAQ, are still active as 5W0OU and 5W0YA. However they still hope
to get a boat to Tokelau during this week. The calls and the length of
their stay are not known yet.

6Y - JAMAICA, NA-097
Chad,WE9V, plans to become active as 6Y9V from Jamaica (NA-097) working
in CW, SSB and RTTY on all bands from 160m-10m from Mar 4-14 (including
the ARRL DX SSB Contest). Emphasis will be put on 160m and the WARC
bands. QSLs via his manager WD9DZV.
Skeds with Chad can be arranged via e-mail (6y9v@we9v.com).

3B9 - RODRIGUES ISLAND, AF-017
John,G3LZQ, is expected to show up as 3B9WR from Cotton Bay (AF-017)

between Mar 3 and Apr 2. He will work mainly in CW (maybe some RTTY)
on 160m-10m but he prefers to work on the lowbands. He will also join
the RSGB Commonwealth Contest (BERU) on Mar 13/14.
QSL cards should be sent via bureau or direct to his homecall.

7P - LESOTHO
Pista,HA5AO, is going to hit the airwaves as 7P8AO from Mar 8-22.
OM Pista will run 300 watts into a vertical wire antenna in CW, SSB
and RTTY on 80m-10m. QSLs via bureau or LoTW to his homecall.
An online log will be available at: http://ha5ao.novolab.hu

9G - GHANA
Alan,G3XAQ, will try to reactivate his old callsign 9G5XA in March
(including the RSGB Commonwealth Contest). Alan will use a K2 radio
with 100 watts, an Inverted L for 80m, an Inverted Vee for 40m and
a Moxon yagi for 20m and 15m. QSL via G3SWH (also via bureau).

BULGARIA, SPECIAL EVENT STATION
The "Balkan Contest Club" is activating the callsign LZ132GO during
March to remember the 132nd anniversary of the Russian-Turkish war.
Bulgaria emerged as an autonomous principality after this war.
QSL via LZ1ZF and more information about "St. Teodosii Tyrnovski Award"
can be found on their website: http://www.balkanclub.org/awards.htm

ENGLAND, SPECIAL EVENT STATION
Members of the "Newbury and District Amateur Radio Society" (NADARS)
are activating GB0VUL in CW/SSB on 80-10m during the month of March.
More information can be found at: http://www.nadars.org.uk/vulcan.asp
QSLs via bureau, direct or via eQSL to G8JIP.

LITHUANIA, SPECIAL EVENT STATIONS
Lithuania became independent 20 years ago on Mar 11, 1990. Eleven
special event stations will be activated during March and April.
LY11BY and LY20NX are working until Mar 31 and LY11A, LY11GV, LY11MM,
LY11QT, LY20AM, LY20INDP, LY20J, LY20PSK and LY20W until Apr 29.
Rolandas,LY4Q (diplomai@lrmd.lt), gladly provides information about the
award and you can also find information online at: http://www.lrmd.lt

K6HFA SOUTH PACIFIC TRIP 2010
Hugh,K6HFA, plans to activate following islands from Mar 3 till Apr 26:
5W OC-097 Samoa Islands Mar 3-10
A3 OC-049 Tonga Group Mar 12-Apr 4
OC-123 Niuafo'ou Islands Mar 12-Apr 4
OC-064 Vava'u Group Mar 12-Apr 4
FW OC-054 Wallis Islands Apr 6-12
T2 OC-015 Tuvalu Islands Apr 13-21
3D2 OC-016 Fiji Apr 23-26 or
OC-156 Fiji Apr 23-26
Hugh is working with 100 watts and a vertical antenna in CW, SSB and
maybe also in RTTY on 80m-15m. His preferred frequencies are 7040 and
14040 kHz. QSLs direct or via the bureau to his homecall.

DXCC: Following operations were approved for DXCC credit:
3V3S, Tunisia, operation from 2009
D2CQ, Angola, momentarily active.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Mar 2: YL-CW-Party
Mar 6/7: ARRL International DX Contest SSB
Mar 7: UBA Spring Contest 80m
Mar 7: DARC 10m Digital Contest "Corona"

IOTA collected by Fredy,DE0MST (e-mail: iota@dxhf.darc.de)

Island activities:
EU-146, PA, Zuid Holland/Zeeland Province Group: Tommy,PD/ON3TD/p, is active
from Schouwen Duiveland Island from Mar 5-8. QSL via homecall.

VE3IKV island trip: Peter,VE3IKV, plans to show up from following islands
signing W4/VG3RA from Mar 6-12:
St. Sinons Island NA-058 Mar 6/7
Key West NA-062 Mar 8-13
Dry Tortugas NA-079 Mar 11/12
QSL via VE3IKV (direct/bureau).

Lighthouse activities (WLOTA/ARLHS/ILLW)

DL3AD LH 1712 Ruegen resident
FS/KT8X LH 0383 St. Martin Mar 5-12

EARTHQUAKE IN CHILE / EMERGENCY COMMUNICATION FREQUENCIES

Because of the strong earthquake that shook southern Chile last weekend
all radio amateurs are asked to keep following frequencies clear for
emergency communication: 28300, 28500, 21200, 21350, 14200, 14350, 7050,
7095, 3738 and 3750 kHz.

DARC Contest Logbook (DCL) connected with eQSL service

All QSOs of the electronic QSL bureau www.eQSL.cc can be transferred to the DARC Contest Logbook (DCL). The transferred confirmations count as proven DCL QSLs but the final decision is still made by the awards manager. The linking between eQSL and DCL was possible thanks to the straightforward support of the eQSL operator Dave Morris,N5UP, who tested and finalized the system in unexpectedly short time. Every bronze member of eQSL may use his electronic eQSL cards for the DARC awards supported by the DCL.
The DCL was originally designed to support active contesters. With a new feature added in January this year supporting the manual upload of QSL card information through an ADIF interface the DCL is now open to all award collectors. ADIF stands for Amateur Data Interchange Format and can be generated by almost all logging programs.

Iceland gains access to 500kHz and 70MHz amateur bands

On Feb 19 the Post and Telecom Administration in Iceland granted a temporary experimental access to the 4m meter band between 70 and 70.2 MHz. The permit is valid until Dec 31, 2010. Access is granted on a secondary basis with a maximum bandwidth of 16 kHz and a power limit of 100 watts. Icelandic N and G licensees will need to apply for a special licence. At the same time, they were also granted temporary experimental access to the 600m band between 493 and 510 kHz CW only. Again access is on a secondary basis and the power limit is 100 watts.

60m operation allowed in Gibraltar

Erine,ZB2FK, stated that the 60m band has been released in Gibraltar now. Unfortunately there is no radio amateur who has the right equipment yet. So let's wait for somebody who makes the first QSOs on this band from ZB2.

Many thanks for contributing to this issue of the DXNL are going to:
Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, DF6EX (WINQSL), DJ5AV, DK8JB, DL1SBF, DL3IE, DL7VOA, DL8LAS, DL8WX, DM3VL, DO3ME, DO8LA, F5NQL, G3LZQ, NG3K, W9DX, SWL Norbert Maibaum and others.

The German PDF version can be found on the DARC homepage at:
http://www.darc.de/referate/dx/bulls/dxmb/2010

Subscribe or unsubscribe to the DXNL mailing list yourself at:

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

March 3, 2010

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Yak For the Plaque - ARRL DX Phone
- Digital World - NA RTTY Sprint, Ukraine RTTY, DARC Corona, EA PSK31
- WRTC-2010 Fundraising by K1LZ
- Top Band Beacons by OK1RP
- Musical Morse Method
- ARRL DX - Logs Pouring In
- CQ WPX Searchable Records Page
- Get Wound Up About Transformers
- Sidewalk Radio

NEW HF OPERATORS - THINGS TO DO

If you "Turn On, Tune In, and Tune Up" this weekend, you'll encounter
bands full of DX in the annual ARRL DX Phone contest. The exchange from
US and VE stations is signal report and state or province. In return
you'll get a report and the station's power. It's okay to enter "K" or
"KW" for kilowatt, by the way - the log checking software understands
that just fine.

BULLETINS

IARU Region 2 and the Red Chilena Nor Austral de Servicio (RECNA)
request that hams monitor the following emergency communications
frequencies for traffic pertaining to the Chilean earthquake and
tsunami: 3.738, 3.750, 7.050, 7.100, 14.200, 14.350, 21.200, 21.350,
28.300 and 28.500 MHz. As ARRL DX Phone is coming up, please take extra
care for calling or answering CQ's on those frequencies.

BUSTED QSOS

A golden issue last time!

CONTEST SUMMARY

Complete information for all contests follows the Conversation section
```

March 6-7

- ARRL International DX--Phone
- High Speed CW Contest
- Open Ukraine RTTY Championship
- DARC 10-Meter Digital "Corona"
- CLARA and Family HF Contest-- (Mar 9)

March 13-14

- Heavy Metal Rally,
- RSGB Commonwealth Contest--CW
- AGCW QRP Contest
- QRP ARCI HF Grid Square Sprint--CW
- EA PSK31 Contest
- Idaho QSO Party
- North American RTTY Sprint
- Wisconsin QSO Party

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Krassy K1LZ, President and co-founder of amplifier manufacturer Acom, is managing fundraising efforts for the upcoming WRTC-2010 <http://www.wrtc2010.ru/> in Moscow in July. As previous WRTC's have shown, it's important to have the financial support of the international radiosport community for the event's success. In North America, donations are being handled as for previous WRTC's by the Northern California DX Foundation <http://www.ncdxf.org/> through the mail and via both credit card and PayPal. For more information, a letter from Krassy is posted on his QRZ.com <qrz.com> Web page, including information about tax-deductibility for US donors.

With work on the new ARRL.org Web site underway, ARRL Contest Branch Manager, Sean KX9X has temporarily moved his Contest Branch blog <http://kx9x.wordpress.com/> to a new site. Once blog capabilities are running on the new ARRL site, the blog will return. Note that Web versions of the results for the 2009 ARRL 10 GHz and Up, September VHF Sweepstakes, IARU HF Championship and EME Contests are also temporarily being hosted off-site <http://aptos.arrl.org/contests>. The searchable database and Log Checking Reports are waiting for work to be completed on the new Web site.

The recent Contest Club of Finland <http://www.contestclubfinland.com/> (CCF) Contest & DX Conference in Riga, Latvia featured the world premier of RTTY Contesting School. You can download the session handouts by Kari OH2BP <http://contestclubfinland.com/CCF/1st%20CCF%20RTTY%20School.pdf> on RTTY Contesting, Vilnis YL2KF <http://contestclubfinland.com/RTTY%20Decoder%20comparison.pdf> on comparing RTTY decoders, and a photo tour of Daniel OK1DIG's <http://contestclubfinland.com/CCF/OK1DIG_Riga2010.pdf> terrific station you've heard as OL6X and OK3R in RTTY contests.

A February 20th's Slashdot <http://www.slashdot.com/> item cites an
IEEE Spectrum article
<http://spectrum.ieee.org/consumer-electronics/gaming/steamed-valve-software-battles-video
game-cheaters>
that looks at the technology used to battle cheating in video games.
The article is thought-provoking and invokes echoes of detecting
radiosport rascals.

If you fancy some ham radio-themed shirts or bumper stickers or just
about anything else, the Cafï¿½ Press <http://www.cafepress.com/> Web
site should appeal to you. Search for "ham radio" from the home page
and you'll find page after page of stuff from the silly to the sublime.
For example, check out the "QRO Beer Stein" or a ham tee-shirt for your
dog! (Thanks, Nancy W7FIR)

Steve N2IC notes with some interest that in the recent ARRL DX CW
contest the top Single Operator, Assisted claimed scores are higher
than the top Single Operator scores. That's fairly uncommon! It might
be due to the unexpectedly good conditions or perhaps a harbinger of
things to come. Time will tell.

The Hands-On column of IEEE Spectrum for Feb 2010 features
"Do-It-Yourself Eye In the Sky
<http://spectrum.ieee.org/geek-life/hands-on/diy-eye-in-the-sky/1>" by
David Schnieder. An RV pilot, David describes "First Person View" RC
aircraft piloting with the video relayed to ground via 910 MHz ATV
transmissions. Amateur radio license requirements get mentioned, so
David must be a ham. Take a look at the videos on the Web site to get
your own front-seat view!

There is quite a variety in computer-controlled radios. How are you
supposed to tell what each can do? The N1MM team has compiled a long
list of radios with computer interfaces
<http://n1mm.hamdocs.com/tiki-index.php?page=Supported+Radios&structure=N1MM+Logger+Refere
nces+and+Appendices>
and discusses the limitations of each. Once you've decided on a radio,
this index of ARRL Product Reviews
<http://www.arrl.org/tis/info/prodrev.html> on the ARRL TIS Web page is
a listing by manufacturer and model of the date when the review was
released. Even an Allied Knight-Kit transceiver was reviewed (Oct 1966)
but, no, it did not have a computer interface! (Thanks, Tom K1KI and
Bob AD5VJ)

After a big contest, digging through the flood of 3830 messages for the
juicy commentary can be quite a chore. Luckily, Dink N7WA has extracted
the Soapbox comments <http://www.eskimo.com/%7Emwdink/3830/> and
distilled them down to a heady brew you may quaff at leisure.

Web Site of the Week - Petr OK1RP has updated his list of Top Band
beacons <http://topband.blog.cz/0611/160m-beacon-list/>. He asks for
continued contributions, updates, and notification of any errors.

WORD TO THE WISE

Urban legends <http://en.wikipedia.org/wiki/Urban_legend> - Ever wonder how to check out those interesting emails that wind up in your Inbox? Snopes.com <http://snopes.com/> is my favorite "truthiness assessment" site, but the Urban Legends site <http://urbanlegends.about.com/> is good, too. For the ham radio and technical rumor mill grist, copy-and-paste a section of the email's text into an Internet search engine window. You'll often find the necessary de-bunkum in the first few links.

==> SIGHTS AND SOUNDS

Ragav VU3VWR found a rather addictive online video that aims to teach teach Morse by music <http://www.youtube.com/watch?v=Oidt3CYn9cA>. He says that it "sticks to your head almost instantly. Besides Morse, it teaches you sign language as well!

Gabriel LU3DAT made a short video with pictures of LU3DY's <http://www.youtube.com/watch?v=rm1FsPuhhmY> ARRL Contest activity, Workshop and Anniversary celebration. (Thanks, Alberto LU1DZ)

==> RESULTS AND RECORDS

ARRL Contest Branch Manager, Sean KX9X reports, "2600 logs have been received for the 2010 ARRL DX CW contest only five days after the end of the event! That's stunning; just five years ago, we received 2570 logs for the entire DX CW contest! Let's hope propagation will be as good for DX Phone!" [February did have a sunspot every for the first time since Jan 2007 - Ed.] Sean also reports that with the Contest Branch assistant being on extended medical leave, he is running a little behind. Plaques for 2009 ARRL DX have been ordered and all awards are expected to be shipped out in a couple of weeks.

Preliminary North American CW Sprint results <http://www.ncjweb.com/sprintcwprelim.php> are now available on the NCJ Web site. (Thanks, Tree N6TR)

The new CQ WPX records Web page <http://www.cqwpx.com/records.htm> allows you to look up records at the World, Continent, Country, and Call Area levels. For each region, the records are shown for all possible categories for both CW and SSB. If you want to learn more about a particular record, click on the hyperlink for the category to see a list of the all time high scores for that category and geographic region. (Thanks, CQ WPX Director, Randy K5ZD)

Some contesters submitting REF contest <http://concours.ref-union.org/contest/?page_id=164> logs have reported trouble receiving acknowledgement messages from the email robot. If so, a Web form <http://concours.ref-union.org/contest/?page_id=164> has been prepared. (Thanks, Pascal F5LEN)

More than 2300 logs for the CQ WPX RTTY have been received to date! CQ RTTY Contest Director Ed W0YK <w0yk@cqwpx.com> reminds all participants that now is a great time to email him your stories and photos for the contest report while it is fresh on your mind.

RAC Canada Winter Contest Manager, Sam VE5SF, announces that a summary of logs received <http://www.rac.ca/en/rac/programmes/contests/files/2009%20Canada%20Winter%20Logs%20Recd-Feb-1-2010.pdf> for the Canada Winter Contest 2009 is now online. You can advise him of any errors at Canadawinter@rac.ca. In some cases where the category claimed was not clear or conflicted with the actual content of the log, logs were re-categorized to give the entrant the best possible competitive position in terms of total potential multipliers.

The final results of the 2009 Worked All Europe DX Contest <http://www.darc.de/referate/dx/contest/waedc/en/results/ssb/> SSB are available. Thanks to all participants and congratulation to the winners. WAE begins again in August. (Thanks, WAE DX Contest Manager, Joerg HB9/DL8WPX)

Rick K6VVA, having suffered a plaque of errors in log processing for the Locust QSO Party, recovers by announcing, "We now have TWO LQP/NCCC NS NOOB Category Winners for the 2010 LQP: AD6E (NCCC) and K9JWV (Non-NCCC). Both will receive an NCJ Subscription (or Renewal). Accordingly, I have revised the 2010 Results <http://www.k6vva.com/lqp>."

OPERATING TIP

Trust But Verify - As more and more spots pour into and out of the spotting networks, it is up to the operator to be even more vigilant that calls are correct. Not only can call signs be busted, but with automatic CW decoders located in different locations, more than one station can be present on a frequency! It only takes a little bit of frequency offset somewhere along the line and it's easy to work a station adjacent to the one you intended to call. So confirm the call sign before entering it in your log. And pileup running stations -give your give call frequently to reduce slowing your rate from duplicate QSOs!

==> TECHNICAL TOPICS AND INFORMATION

If you want to know how to wind your own power transformer for repairing old equipment or building new stuff, you should visit Manfred XQ2FOD's Web site <http://ludens.cl/Electron/trafos/trafos.html>. It is quite extensive with lots of illustrations and photos. Manfred has also provided a design spreadsheet to help with the calculations. Be sure to browse the other pages around the site, including the supporting Transformers and Coils page. If toroids are your cup of tea, Diz W8DIZ has published a toroidal inductor calculator <http://toroids.info/XXX-XX.php> using the common T, FT, and BN part numbers.

More technical photos are found on the Web site of Tony G3NPF <http://homepages.tesco.net/%7Ea.wadsworth/index.htm>. He goes into great detail with descriptions and illustrative graphics for different types of components - look in the "Technical" area. This may help you

identify a component or help a new ham about the different types of components and why their characteristics are useful.

Rudy N6LF's article on radials in the May 2010 issue of QST is certainly drawing well-deserved attention. The entire set of Rudy's seven QEX articles <http://www.antennasbyn6lf.com/2009/12/series-of-qex-articles-on-ground-system-experiments.html> on ground systems is available online on his Web site. (Thanks, Steve N2IC)

The previous issue's discussion of drilling holes in tubing at right angles was missing a technique for marking the drill points spaced by ninety degrees. Bob WA6GFR discovered just such a procedure in the recent August 2009 issue of QST - "Diamonds In the Sky" by KH6TY. The article shows how to mark straight lines along the tubing and do the job with a hand drill, as well.

The March 2010 issue of Nuts and Volts <http://nutsvolts.texterity.com/> features a nice article, "Build Your Own Electronics Test Fixtures" by W. Hartley Roberts. The techniques for making simple jigs can save you tons of time when making repetitive tests of components or connectors. Good for club projects, too!

With all the gadgets a contest operation requires, there are lots of ways to accidentally apply reverse-polarity power. This is even easier to do when operating away from home. To protect your low-power, 12-volt gear from reverse polarity without damage and with a minimum of voltage drop, install a 1N5817 Schottky diode in series with the incoming power line. It will handle up to 20 V of reverse voltage and 1 amp of continuous forward current with only 0.45 V of voltage drop. (Thanks, Chuck W5USJ)

The Winter 2010 issue of CQ VHF <http://www.cq-vhf.com/> shows how to convert a Bird Model 43 wattmeter to a digital readout in an article by Mark Spencer WA8SME. Mark uses a small microprocessor to convert the display to digital and digitize the sensing element output. The magazine also features spectacular photos of a "Fata Morgana <http://en.wikipedia.org/wiki/Fata_Morgana_%28mirage%29>" mirage and tropospheric duct by Chip K7JA.

Technical Web Site of the Week - We'd all like to have one of those low-band four-squares, but certain practical considerations often put the kibosh on those plans. Nevertheless, one can enjoy a look at four-square arrays around the world at G4ATA's "The 4-Square Site <http://www.4-square.co.uk/>". Pictures and construction details abound! If you do have a four-square of your own, why not contribute photos and construction details? (Thanks, Kris N5KM)

==> CONVERSATION

Sidewalk Radio

This is the time of year when at club meetings the president gravely scans the assembled throng and with dulcet tones delivers a hortatory call to rise as one in support of the annual Field Day adventures. A sough rustles across the membership as they rouse from their post-supper hebetude to contemplate the implications. A leader is chosen, sometimes in clever ambush, launching the annual roborant exertion of weaving March's gallimaufry into June's fructuous spectacle of wireless effulgence!

Ah, Field Day. Many an operator will remember a long-past Field Day as having provided the first of many radio enlightenments. Indeed, quite a few will have experienced that personal tipping point by which they are delivered to ham radio during those early summer imbroglios of comestibles, cables, connectors, conversation, and camaraderie. Field Day is a time when ham radio blooms, attracting the cognoscenti and curious alike.

In this sense of presentation to other, I suggest that we consider the location in which we plant our gardens. If yours is a group for whom a big score and competitive mastery is the goal, then perhaps that secret hilltop is the optimum spot. But for the rest, why not offer up ham radio to the beginners and passers-by? So much of our hobby-sport-service takes place out of view in basements, spare bedrooms, local EOCs, and club houses, access to which the public is rarely granted. We are invisible!

It is commonly agreed that ham radio has lost much of its place in the public conversation. We are too often seen as preservationists or oddballs tinkerering with obsolete technology. Services rendered by hams in time of need may be duly noted, but after the fact and still the public has little interaction with what it is we do. It seems to me that instead of hiding our activities, we should be performing them out in plain view where anyone can experience the ham radio of today.

Amateur astronomers, facing parallel concerns, have adopted what they call "Sidewalk Astronomy". Never mind that the local street corner does not have optimum "seeing". What's important is that passers-by, many of whom have never looked through a telescope, get an opportunity to effortlessly experience astronomy and talk with an enthusiastic stargazer. Never mind that 10th-magnitude stars are obscured by light pollution. Point the 'scope Moon-ward and let someone get their first glimpse of shadows cast by lunar mountains across crater floors!

We need to practice "Sidewalk Radio" so that the public can have a similar encounter with ham radio "in the wild" and not as a curiosity. Field Day is a perfect opportunity to set up in a public area. For example, if you operate near the local baseball and soccer playfields, you will have a continuous stream of curious kids dragging the parents over to have a look! Where do people go on weekends? How about shopping centers and malls?

I can hear the groaning now, "What a terrible location! It will be noisy! People will bother us!" Fiddlesticks! We can lock ourselves in

the basement the other 51 weekends of the year - get out there and welcome the public. Don't set up a defensive perimeter -- arrange the tables and tents so that a "civilian" doesn't feel like an intruder. Have a greeter and tour guides to break down those social barriers! Be prepared to answer questions, have handouts and brochures available, and act like you're enjoying yourself! Sit up straight and brush your teeth! (Sorry, got carried away there...)

Seriously, put out signs that say "Amateur Radio Demonstration - Public Welcome!" Better yet, add a sign that says, "Free Coffee and Cookies!" Don't expect people to know what "Field Day" is - you need to get them to come over so that you can tell them! And when they ask about local radio clubs or other events (like a flea market) be prepared with a custom handout that shows all of the local radio club Web sites and meeting information.

Once you start Sidewalk Radio, you might enjoy it enough to ask yourself, "Why not some time other than Field Day?" Exactly! It's easy to get out there and put up a no-ground vertical and work a little HF - it doesn't have to be worldwide DX with a big beam. Figure out how to use your handheld radio and a VHF/UHF "Cheap Yagi <http://www.wa5vjb.com/references.html>" to work a ham radio satellite from the parking lot of the local big-box store. Show off meteor scatter on 6 meters with WSJT. Once you get started, the ideas will flow and you'll hear a lot of, "I never knew hams did that!" Our signals are invisible, but we don't have to be.

73, Ward N0AX

==> CONTESTS

March 3 through March 16, 2010

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL International DX--Phone, from Mar 6, 0000Z to Mar 7, 2400Z. Bands (MHz): 1.8-28. Exchange: RS and state, province, or power. Logs due: Apr 5. Rules <http://www.arrl.org/contests>

High Speed CW Contest--CW, from Mar 6, 0900Z to Mar 6, 1100Z and Mar 6, 1500Z to Mar 6, 1700Z. Bands (MHz): 3.5-28. Exchange: RST and HSC nr or "NM". Logs due: 30 days. Rules <http://hsc-contest@gmail.com/>

Open Ukraine RTTY Championship--Digital, from Mar 6, 2200Z to Mar 7, 1200Z. Bands (MHz): 1.8-28. Exchange: Regional abbreviation and serial. Logs due: Apr 7. Rules <http://www.ucc.zp.ua/>

DARC 10-Meter Digital "Corona"--Digital, from Mar 7, 1100Z to Mar 7, 1700Z. Bands (MHz): 28. Exchange: RST and serial. Logs due: Apr 7.

Rules <http://www.darc.de/referate/ukw-funksport/>

CLARA and Family HF Contest --Phone,CW, from Mar 9, 1700Z to Mar 10, 1700Z and Mar 13, 1700Z to Mar 14, 1700Z. Bands (MHz): 3.5-21. Exchange: RS(T), name, QTH, and CLARA . Logs due: Apr 15. Rules <http://www.clara.comm.sfu.ca/>

Heavy Metal Rally--Phone,CW, from Mar 13, 0000Z to Mar 14, 2359Z. Bands (MHz): 3.5-28. Exchange: RS(T) and serial, plus "V" if vintage equip. Logs due: Apr 3. Rules <http://www.xe1rcq.info/heavymetal.htm>

RSGB Commonwealth Contest--CW, from Mar 13, 1000Z to Mar 14, 1000Z. Bands (MHz): 3.5-28. Exchange: RST and serial (Commonwealth only). Logs due: 30 days. Rules <http://www.rsgbcc.org/hf/calendar10.shtml>

AGCW QRP Contest--CW, from Mar 13, 1400Z to Mar 13, 2000Z. Bands (MHz): 3.5-28. Exchange: RST, serial, class, AGCW number or NM. Logs due: Mar 31. Rules <http://www.agcw.org/>

QRP ARCI HF Grid Square Sprint--CW, from Mar 13, 1500Z to Mar 13, 1800Z. Bands (MHz): 3.5-28. Frequencies: QRP calling frequencies. Exchange: RST, 4-digit grid square, QRP ARCI number. Logs due: Apr 13. Rules <http://www.qrparci.org/>

EA PSK31 Contest--Digital, from Mar 13, 1600Z to Mar 14, 1600Z. Bands (MHz): 3.5-28. Exchange: RST + serial or EA province. Logs due: 30 days. Rules <http://www.ure.es/>

Idaho QSO Party--Phone,CW,Digital, from Mar 13, 1900Z to Mar 14, 1900Z. Bands (MHz): 1.8-28, 50-440, Frequencies: CW 35 kHz above band edge; Phone 7.260, 14.260, 21.335, 28.470 MHz, plus 50, 144, 440 . Exchange: RS(T) and S/P/C. Logs due: 30 days. Rules <http://www.nx7tt.com/>

North American RTTY Sprint--Digital, from Mar 14, 0000Z to Mar 14, 0400Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, name, and S/P/C. Logs due: 7 days. Rules <http://www.ncjweb.com/sprintcwprelim.php>

Wisconsin QSO Party--Phone,CW,Digital, from Mar 14, 1800Z to Mar 15, 0100Z. Bands (MHz): 3.5-28, 50+, Frequencies: CW 3.550, 7.050, 14.050; Phone 3.890, 7.230, 14.290, 21.350, 28.400. Exchange: WI county or S/P/C. Logs due: Apr 14. Rules <http://www.warac.org/>

VHF+ CONTESTS

Idaho QSO Party--Phone,CW,Digital, from Mar 13, 1900Z to Mar 14, 1900Z. Bands (MHz): 1.8-28, 50-440, Frequencies: CW 35 kHz above band edge; Phone 7.260, 14.260, 21.335, 28.470 MHz, plus 50, 144, 440 . Exchange: RS(T) and S/P/C. Logs due: 30 days. Rules <http://www.nx7tt.com/>

Wisconsin QSO Party--Phone,CW,Digital, from Mar 14, 1800Z to Mar 15, 0100Z. Bands (MHz): 3.5-28, 50+, Frequencies: CW 3.550, 7.050, 14.050; Phone 3.890, 7.230, 14.290, 21.350, 28.400. Exchange: WI county or S/P/C. Logs due: Apr 14. Rules <http://www.warac.org/>

==> LOG DUE DATES

March 3 through March 16, 2010

March 4, ARS Spartan Sprint, paper logs and diskettes to: spartansprint@yahoo.com, paper logs and diskettes to: (none). Rules <http://adventure-radio.org/wiki/index.php?title=Spartan_Sprint_Rules>

March 5, PODXS 070 Club Valentine Sprint, paper logs and diskettes to: w4krn@his.com, paper logs and diskettes to: Karen Russo, W4KRN, 7720 Willow Pond Lane, Nokesville, VA 20181, USA. Rules <http://www.podxs070.com/valentine-sprint>

March 7, Russian PSK WW Contest, paper logs and diskettes to: ra3bb@mail.ru, paper logs and diskettes to: (none). Rules <http://www.qrz.ru/contest/detail/384>

March 7, ARCI Fireside SSB Sprint, paper logs and diskettes to: contest@qrparci.org, paper logs and diskettes to: Jeff Hetherington, VA3JFF, 139 Elizabeth St. W., Welland, Ontario L3C 4M3, Canada. Rules <http://www.qrparci.org/content/view/8344/118/>

March 7, FYBO Winter QRP Sprint, paper logs and diskettes to: FYBO2010@azscorpions.org, paper logs and diskettes to: John Stevens,, Attn: FYBO, 21547 N. 91st Drive, Peoria AZ 85382, USA. Rules <http://www.azscqrpions.org/FYBO2010.htm>

March 8, Black Sea Cup International, paper logs and diskettes to: bscup@ur5eaw.com, paper logs and diskettes to: BSCI, Box 4, KERCH 98319, UKRAINE. Rules <http://bscc.ucoz.ru/index/0-21>

March 8, Mexico RTTY International Contest, paper logs and diskettes to: xe3rr@prodigy.net.mx, paper logs and diskettes to: Daniel Baraggia, XE3RR, Concursos FMRE, Calle Meteoro 5 Mza. 4 Lote 5 S.M. 47, Residencial La Herradura, Cancun, Q.Roo 77505, Mexico. Rules <http://www.fmre.org.mx/concursos/2010/rtty/rules-rtty-2010-eng.doc>

March 9, Delaware QSO Party, paper logs and diskettes to: qsoparty@gmail.com, paper logs and diskettes to: Contest Chairman, FSARC, PO Box 1050, Newark, DE 19715, USA. Rules <http://www.fsarc.org/DEQSO.html>

March 9, Vermont QSO Party, paper logs and diskettes to: vtqsologs@westriverradio.org, paper logs and diskettes to: Vermont QSO Party, c/o Darrel Daley, K1KU, PO Box 445, Putney, VT 05346-0445, USA. Rules <http://vtqsoparty.westriverradio.org/VTQSORules.htm>

March 12, ARRL School Club Roundup, paper logs and diskettes to: (none), paper logs and diskettes to: School Club Roundup, c/o Lew Malchick, N2RQ, Brooklyn Technical HS ARC, 29 Fort Greene Place, Brooklyn, NY 11217, USA. Rules <http://www.arrl.org/SCR/rules/>

March 13, North American QSO Party, RTTY, paper logs and diskettes to: (see rules, web upload preferred), upload site <http://www.ncjweb.com/naqplogsubmit.php>, paper logs and diskettes to:

Shelby Summerville, K4WW, 6506 Lantana Ct., Louisville, KY 40229-1544, USA. Rules <http://www.ncjweb.com/naqprules.php>

March 14, KCJ Topband Contest, paper logs and diskettes to: kcj-log@kcj-cw.com, paper logs and diskettes to: M. Namba, 1420-55 Kibara, Sammu-city, Chiba 289-1212, Japan. Rules <http://www.kcj-cw.com/contest/10_toptest_rules_e.pdf>

March 15, YLRL YL-OM Contest, paper logs and diskettes to: n0wbv@earthlink.net, paper logs and diskettes to: Cheryl Muhr, PO Box 342, Littleton, CO 80160, USA. Rules <http://www.ylrl.org/ylcontests.html>

March 15, AGCW Semi-Automatic Key Evening, paper logs and diskettes to: semiautomatic@agcw.de, paper logs and diskettes to: Manager:, Ulf-Dietmar Ernst, DK9KR, Elbstrasse 60, D-28199 Bremen, Germany. Rules <http://www.agcw.org/en/?Contests:Semi_Automatic_Key_evening>

March 15, Dutch PACC Contest, paper logs and diskettes to: pacc@dutchpacc.com, upload site <http://pacc.veron.nl/logsubmission.html>, paper logs and diskettes to: PACC Contest Manager, c/o VERON Central Bureau, PO Box 1166, 6801 BD Arnhem, The Netherlands. Rules <http://pacc.veron.nl/>

March 15, FISTS Winter Sprint, paper logs and diskettes to: wa1lad@cox.net, paper logs and diskettes to: Gil Woodside, WA1LAD, 30 Hilltop Ave., West Warwick, RI 02893-2825, USA. Rules <http://www.fists.org/sprints.html>

March 15, Louisiana QSO Party, paper logs and diskettes to: laqso@bellsouth.net, paper logs and diskettes to: LAQSO Party, 508 Hache St., Houma, LA 70364, USA. Rules <http://www.qsl.net/kd5wdy/LAQSO_/LAQSO_Rules/laqso_rules.html>

March 15, Minnesota QSO Party, paper logs and diskettes to: MNQP@ISD.NET, paper logs and diskettes to: MNQP, 4745-170th Lane NE, Ham Lake, MN 55304-5233, USA. Rules <http://www.w0aa.org/mnqp_rules.htm>

March 15, OMISS QSO Party, paper logs and diskettes to: (none), upload site <http://www.omiss.net/Facelift/qsoElectronic.php>, paper logs and diskettes to: OMISS QSO Party, c/o James Main, N8FV, 4427 S. Dangl, Muskegon, MI 49444, USA. Rules <http://www.omiss.net/Facelift/qsoparty.php>

==> ACKNOWLEDGEMENTS

ARRL Contest Update wishes to acknowledge information from WA7BNM's Contest Calendar <http://www.hornucopia.com/contestcal> and SM3CER's Contest Calendar <http://www.sk3bg.se/contest>.

The ARRL Contest Update is published every other Wednesday (26 times each year). ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at

http://www.arrl.org/contests/update/.

==> ARRL SEEKS INPUT FOR NEW IARU REGION 2 BAND PLAN

The International Amateur Radio Region 2 conference -- held later
this year in El Salvador -- brings together delegations from the
national Amateur Radio Societies in the Western Hemisphere. One of the
topics on the agenda will be the Region 2 HF band plan. This band plan
is "harmonized with" -- spectrum management-speak for "very similar to"
-- the IARU Region 1 and Region 3 band plans. At this year's
conference, the IARU Member-Societies will consider possible changes to
the Region 2 band plan. The ARRL is cooperating with this procedure by
inviting input to be sent to the ARRL Board of Directors' Band Planning
Committee. The committee will review the existing Region 2 band plan,
```

consider input from the amateur community and make recommendations to the ARRL Board for submission to IARU Region 2. Read more here <http://www.arrl.org/news/stories/2010/03/04/11374/?nc=1>.

==> PUBLIC SERVICE: RADIO CLUB DE CHILE ACTIVE AFTER EARTHQUAKE

On Monday, March 1, IARU Region 2 <http://www.iaru-r2.org/> President Reinaldo Leandro, YV5AMH, spoke via telephone with Radio Club de Chile (RCCH <http://www.ce3aa.cl/>) President Dr Galdino Besomi, CE3PG, regarding the 8.8 magnitude earthquake that struck the South American nation on Saturday, February 27. "He informed me that soon after the earthquake, an Emergency Net was activated in the whole country -- first on VHF and then on HF. All the RCCH Board and club members are actively working in close coordination with civil and military authorities," Leandro posted to the IARU Region 2 e-mail reflector. "Three days after the earthquake, the requests for news about people in the affected areas is one of the main activities occupying the Chilean radio amateurs."

==> PUBLIC SERVICE: HAWAII HAMS SPURRED TO ACTION BY CHILEAN EARTHQUAKE

On Saturday, February 27 -- in reaction to a tsunami warning triggered by the Chilean earthquake -- 60 Amateur Radio operators participated in a tsunami radio net that operated throughout the island State of Hawaii. More than 25 real-time reports from observers around the state were relayed simultaneously to the State Emergency Operating Center (EOC) and the four county EOCs, providing timely information via Amateur Radio on sea level changes to emergency management officials. Read more here <http://www.arrl.org/news/stories/2010/03/01/11368/?nc=1>.

==> FCC NEWS: FCC SEEKS COMMENTS FOR BLANKET WAIVER TO ALLOW AMATEUR RADIO IN HOSPITAL EMERGENCY DRILLS

In February 2010, the American Hospital Association (AHA) filed a request with the FCC for a blanket waiver of Section 97.113(a)(3) of the Commission's Rules "to permit hospitals seeking accreditation to use Amateur Radio operators who are hospital employees to transmit communications on behalf of the hospital as part of emergency preparedness drills." On March 3, the FCC issued a Public Notice -- WP Docket 10-54 -- seeking comments if the Commission "should grant AHA's request for a blanket waiver of Section 97.113(a)(3) to permit amateur operators who are hospital employees to participate in emergency drills that are conducted by hospitals for accreditation purposes and that are not government-sponsored."Section 97.113(a)(3) specifically prohibits amateur stations from transmitting communications "in which the station licensee or control operator has a pecuniary interest, including communications on behalf of an employer." Read more here.

==> FCC NEWS : FCC DENIES ARRL'S REQUEST FOR DECLARATORY RULING

In 2005, after the State of Florida adopted statutes aimed at pirate broadcasters and making it a felony to make a radio transmission

without Commission authorization or to interfere with a licensed public or commercial radio station, the ARRL -- through General Counsel Chris Imlay, W3KD -- filed a Request for Declaratory Ruling (Request) with the FCC, seeking a declaratory ruling on portions of that statute. The ARRL argued that the statute was written so broadly that one could infer that Commission-licensed Amateur Radio stations in Florida would be subject to felony prosecution if their transmissions interfered with broadcast or other radio receivers. In 2006, New Jersey adopted a similar statute and the ARRL's Request was modified to include that state. Five years and one day after the original Request was filed with the Commission, the FCC denied the Request. Read more here <http://www.arrl.org/news/stories/2010/02/28/11365/?nc=1>.

==> FCC NEWS: FCC REAFFIRMS STATEMENT ON ROS

In mid-February, European amateurs first used a new, experimental digital mode known as ROS. On February 23, 2010 -- after FCC review of the original documents provided from the developer's Web site -- the FCC made a statement on ROS. The ARRL supports -- as one of the basic purposes of Amateur Radio -- the experimentation and advancing the technical skills of operators. The development and use of any new mode is exciting to many amateurs, and the League encourage amateurs to experiment within the parameters of the rules; however, the ARRL also reminds US licensees that according to Section 97.307, spread spectrum communications are only permissible in the US on frequencies above 222 MHz. Read more, including what the FCC had to say about ROS, here <http://www.arrl.org/news/stories/2010/03/04/11377/?nc=1>.

==> PUBLIC SERVICE : AMATEUR RADIO OPERATORS WRAP UP COMMUNICATIONS SUPPORT IN HAITI

After the 7.0 magnitude earthquake struck the island nation of Haiti on January 12, many Amateur Radio operators asked how they could volunteer their time and service to assist with communications support. When Project Medishare <http://projectmedishare.org/> -- a partnership between the University of Miami Medical School (UM) and physicians and health officials in Haiti -- needed help with their communications, Amateur Radio operators were quick to respond. According to Jack Satterfield, W4GRJ/AFA4DG, Medishare has constructed several health clinics in Haiti over the years -- all of which were destroyed in the earthquake. "Medishare was able to rapidly deploy medical teams and assets to begin the overwhelming task facing the post earthquake medical needs," he told the ARRL.

"UM Vice President for Facilities and Operations Ron Bogue was the Director in Charge of the Haiti operations. His concern about the unreliable communications caused him to contact Julio Ripoll, WD4R, with whom he has worked for years as the architect for UM Medical facilities. Ron knew that Julio is a ham radio operator and very involved with the National Hurricane Center in Miami and its Amateur Radio station, WX4NHC. Ripoll then contacted ARRL to request help in soliciting volunteers. ARRL immediately sent down an HF Go Kit --

through the ARRL's Ham Aid Program -- and put Ripoll in touch with ARRL West Central Florida Section Emergency Coordinator and Navy MARS Florida State Deputy Director Neil Lauritsen, W4NHL/NNN0TFH. Read more here <http://www.arrl.org/news/stories/2010/03/03/11371/?nc=1>.

==> ARRL IN ACTION : WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members, including holding elections for and appointing people to League leadership positions, preparing for WRC-12, legislative actions, providing equipment for communications support in Haiti through the ARRL's Ham Aid program, developing on-the-air events, investigating power line noise and more. This installment covers the month of February. Read more here <http://www.arrl.org/news/features/2010/03/01/11366/?nc=1>.

==> ARRL EXECUTIVE COMMITTEE MEETING AGENDA NOW AVAILABLE

At its January 2010 meeting, the ARRL Board of Directors decided to make the agendas of Board and Executive Committee meetings available on the ARRL Web site. The first opportunity to do so is for the Executive Committee meeting to be held March 13. The agenda is available here <http://www.arrl.org/news/files/20100313_EC_agenda.pdf>.

==> AMATEUR RADIO IN SPACE: A CLOSE ENCOUNTER FOR AMSAT-OSCAR 51

While many in North America were fast asleep Monday morning, March 1, the AMSAT-OSCAR 51 (AO-51) satellite had a potentially dangerous encounter with another spacecraft known as Formosat 3D. OSCAR 51 is a popular Amateur Radio satellite that often functions as a crossband FM repeater, relaying brief conversations over hundreds of miles. Formosat 3D is part of a constellation of six remote sensing microsatellites that collect atmospheric data for weather prediction and for ionosphere, climate and gravity research. Both orbit at an altitude of approximately 500 miles. Read more here <http://www.arrl.org/news/stories/2010/03/03/11373/?nc=1>.

==> W1AW ANNOUNCES NEW SCHEDULE FOR DIGITAL BULLETIN TRANSMISSIONS

Beginning Monday, March 15, W1AW <http://www.arrl.org/w1aw.html>, the Hiram Percy Maxim Memorial Station, will alternate the digital modes used for its digital bulletin transmissions. While Baudot, PSK31 and MFSK16 still make up the digital mode complement, W1AW Station Manager Joe Carcia, NJ1Q, says that the schedule will be altered to give more exposure to PSK31 and MFSK16. "Because of time constraints and the varying lengths of digital bulletins, there were many instances where only Baudot was used," he said. "With the new schedule, amateurs preferring either PSK31 or MFSK16 will no longer find these modes secondary." Read more here <http://www.arrl.org/news/stories/2010/02/16/11343/?nc=1>.

==> SOLAR UPDATE

Tad "The Sun shines hot and the wind blows cold <http://en.wikipedia.org/wiki/Great_Expectations>" Cook, K7RA, reports: The sunspots just keep coming: Two new sunspot groups appeared on March 1, numbered 1052 and 1053. This brings the total number of sunspot groups appearing over the last month at 11. Looking at our 3-month moving average of daily sunspot numbers, the latest for December-January-February is 22.4, for the period centered on January. The 3-month moving averages for the periods centered on July through January were 4, 4, 4.64, 7.1, 10.16, 15.15 and 22.4. The average sunspot number for the month of February was 31, up from 21.3 for January and 15.7 for December. The February average being 8.6 points higher than the trailing three month average (22.4) is a good trend. Look for more information on the ARRL Web site on Friday, March 5, including more news from happy radio amateurs commenting on improved conditions on the higher part of the HF spectrum. The vernal equinox occurs in a little over two weeks, ushering in good spring conditions. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by Charles Dickens' Great Expectations <http://en.wikipedia.org/wiki/Great_Expectations>.

==> SILENT KEY : TAPR PRESIDENT EMERITUS DR DAVID TOTH, VE3GYQ (SK)

Dr David Toth, VE3GYQ -- President Emeritus of Tucson Amateur Packet Radio (TAPR) -- passed away Friday, February 26 after a long battle with cancer. He was 55. A resident of Spencerville, Ohio, Toth served as a Director and Executive Vice President of TAPR in the 1980s and was elected President of the organization in September 2005. With his advancing illness, he decided not to stand for re-election last October and was instead named President Emeritus with Steve Bible, N7HPR, taking the reins as TAPR President. Read more here <http://www.arrl.org/news/stories/2010/03/01/11367/?nc=1>.

==> W1AW NEWS: MARCH W1AW/WEST COAST QUALIFYING RUN SCHEDULE

The March schedules for the W1AW and West Coast Qualifying Runs were inadvertently left out of the March issue of QST. The March schedules for W1AW are as follows: Friday, March 5 at 10 PM EST (Saturday, March 6 at 0300 UTC) for 10-25 WPM and Tuesday, March 16 at 7 PM EDT (2300 UTC) for 10-40 WPM. The West Coast Qualifying run will be transmitted by station K6KPH on Saturday, March 13 at 2 PM PDT (2200 UTC) for 10-35 WPM. The run will be transmitted simultaneously on 3581.5, 7047.5, 14047.5, 18097.5 and 21067.5 kHz.

==> THIS WEEK ON THE RADIO

This week, look for the ARRL International DX Contest (SSB) <http://www.arrl.org/contests/rules/2010/intldx.html> on March 6-7. The Wake-Up! QRP Sprint is March 6 and the DARC 10 Meter Digital Contest is March 7. The CLARA HF Contest is March 9-10 (continuing on March 13-14) and the CWops Mini-CWT Test is March 10-11. Next week, the Feld Hell Sprint is March 13. The RSGB Commonwealth Contest, the Elecraft QSO

Party and the Idaho QSO Party are March 13-14. The North American Sprint (RTTY) and the SKCC Weekend Sprint are March 14. The Wisconsin QSO Party is March 14-15 and the NAQCC Straight Key/Bug Sprint is March 18. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info.
Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> ARRL RECOGNIZES: PAUL CHRISTENSEN, W9AC, WINS FEBRUARY QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for February is Paul Christensen, W9AC, for his article "An SWR Null Meter." Congratulations Paul! The winner of the QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/members-only/QSTvote.html>. Cast a ballot for your favorite article in the March issue by Wednesday, March 31.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, March 21, 2010, for these online course sessions <http://www.arrl.org/cep/student/> beginning on Friday, April 2, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

There are only a few days left to nominate individuals and clubs for the Hamvention 2010 awards. While the Special Achievement Award, Technical Excellence Award, and Amateur of the Year Award have been given for many years, Awards Chairman Frank Beafore, WS8B, said this a year a special award with be given for Club of the Year. That award is tied to this year's Hamvention theme, Amateur Radio Clubs Worldwide: The Lifeline.

March 15 is the deadline for nominations for all four awards and winners will be notified in April and publicly honored at Hamvention 2010 in May. Information on how to nominate for these awards is available at www.hamvention.org <http://www.hamvention.org>. This is an opportunity recognize that individual or club for efforts in behalf of amateur radio.

148. Amateur Radio Newsline(tm) Report 1699 - March 5, 2010

Amateur Radio Newsline(tm) Report 1699 - March 5, 2010

Now, Amateur Radio Newsline report number 1699 with a release date of Friday, March 5th, 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio responds to an earthquake in Chile and a tsunami it causes across the Pacific Ocean. Find out the details on Amateur Radio Newsline(tm) report number 1699 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: CHILEAN HAMS ACTIVATE FOLLOWING FEBRUARY 27 QUAKE

Radio Club de Chile President Dr Galdino Besomi, CE3PG says that hams in Chile took to the air shortly after a magnitude 8.8 earthquake that rattled his nation in the early morning hours of February 27th. Norm Seeley, KI7UP, has the latest:

--

In a March 1st telephone conversation with IARU Region 2 President Reinaldo Leandro, YV5AMH, Dr. Bensomi said that soon after the earthquake hit, an Emergency Net was activated across the entire country. Initial activation was on VHF followed by nets on the HF bands.

CE3PG says that all Radio Club de Chile members are actively working in close coordination with civil and military authorities. Also that requests health and welfare news about people in the affected areas is one of the main activities occupying the Chilean radio amateurs these days.

As we reported in last weeks breaking news bulletin, the massive 8.8 magnitude shaker caused widespread devastation across Chile. It also triggered a tsunami alert from the West coast of North and South America to as far away as New Zealand, Australia and the nations of the Pacific Rim..

Ham radio will likely be involved in post quake disaster communications for some time. The IARU Region 2 and the Chilean national ham radio society have requested that monitor a number of emergency communications frequencies for traffic pertaining to the earthquake and its aftermath. These are 3.738, 3.750, 7.050, 7.100, 14.200, 14.350, 21.200, 21.350, 28.300 and 28.500 MHz.

In addition to these frequencies, hams may also want to listen to the worldwide emergency communication Center of Activity frequencies. These are 14.300, 18.160 and 21.360 MHz. Other suggested monitoring frequencies are 3.720, 7.045 and 7.060 MHz.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

As we go to air, the Chilean government confirmed 799 people had been killed by the quake, and at least 2 million made homeless. But that number could rise because others including tourists camping on the coast may have been dragged out to sea by the 40ft-high tsunami that followed. (Various Sources)

**

RESCUE RADIO: HAWAII HAMS WERE PREPARED TO FACE TSUNAMI

The shaker that caused massive devastation across Chile also triggered a tsunami alert from the West coast of North and South America to as far away as New Zealand, Australia and the nations of the Pacific Rim. One of the first places to go on tsunami watch was Hawaii. Bill Pasternak, WA6ITF, has been following that part of the story from our newsroom in Los Angeles:

--

"Did I hear any more stations trying to check in, KH6IB with the emergency response communications net for the impending tsunami headed into Honolulu as well as the Hawaiian Islands and actually California."

--

That's the voice of Ralph Young, KH6IB, who was part of a Hawaii state wide tsunami alert on Saturday, February 27th. This as some 60 Hawaiian hams participated in a tsunami radio net that operated throughout the island state. Over two dozen real-time reports from observers around the state were relayed simultaneously to the State Emergency Operating Center and the four county EOC's. Reports like this one provided up to the minute information on sea level changes to emergency management officials.

--

"Just an update from the Big Island of Hawaii. Its been reported the water is receding in Hilo too on the breakwaters as well as on a couple of the beaches. I'm on the Southern end and that's the report from Hilo, Hawaii. Back to net, KH6RFB."

--

Ron Hashiro, AH6RH, is the Hawaii State Civil Defense ARES and RACES Coordinator. He says that emergency managers in his state have long been preparing for a tsunami from Chile. Planning began in 1960 shortly

after an earthquake in Chile created a tsunami that all but destroyed the city of Hilo on the Big Island.

According to AH6RH, the 14 hour travel time for the tsunami to reach Hawaii provided ample time for radio amateurs to put in place their response plan.

Hashiro said that activity started on Friday, February 26 when key Amateur Radio operators were alerted to the 8.8 magnitude earthquake in Chile. Then he and Kevin Bogan, AH6QO began receiving messages from the Pacific Tsunami Warning Center that lead to the activation of RACES and ARES. Coordination was handled on radio via the AH6CP UHF repeater. Also utilized were text messages, phone calls as well as postings to Facebook and tweets on the Twitter social networking websites. But it was mobile operations over the state wide repeater network that Hashiro said would prove to be of the greatest value as the tsunami approached:

--

"We were very fortunate with the tsunami net during this event because both islands have exempted amateur radio from their mobile cellular telephone bills. As a result hams can still operate with their radios in their vehicles and it was that element that provided real time reporting to the state EOC"

--

Radio operations began with the sounding of the warning sirens across the state at 6 AM. The 6:01 AM net was a bulletin-only with instructions for starting operations at 7 AM. Meantime, amateur radio operators reported to the State and County EOCs. Hashiro, Robin Liu, AH6CP, and Mitch Pinkerton, KH6MP, were stationed at the State Civil Defense EOC in Diamond Head crater From there they operated nets on the State RACES VHF Repeater network and 7.088 MHz on 40 meters.

The state-wide tsunami net commenced operation at 10:45 AM with check-ins and position reports. Everything was ready for the tidal surge. When it began, so did the reports from the hams in the field:

--

"The water is still receding on the Big Island of Hawaii in Hilo. Its going back out again and going out more this time than it did the first time and we've heard that the Marquises Islands have been hit with a 6 foot wave."

--

As the event continued, hams traced the ocean changes around the Big Island, then to the harbors and rivers on Maui, Oahu and Kauai. Receding water levels on the order of 2 to 6 feet were reported as the various waves moved through the island chain. And as the hours passed the hams also passed along other information including one dealing with the water supply on one of the islands:

--

"They have turned off all the water to Hilo as well as Kona, I think as a precautionary measure so that they don't get contamination. So they have shut down all the water to both of those cities. Back to net, Ill be monitoring. KH6RC."

--

According to AH6RH check-in nets were run at the top of each hour to monitor the availability of operators and their locations. Thankfully the tidal surge was minimal. As a result, real-time reporting ended at 1:08 PM and the tsunami warning for Hawaii was canceled at 1:38 PM.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles

--

Ron Hashiro AH6RH, says that Hawaii State Civil Defense Vice Director Ed Teixeira was extremely pleased and grateful for these reports and extended his thanks to the Hawaiian amateur radio community for another outstanding job well done. (ARNewsline(tm), AH6RH)

BREAK 1

Coming to you this week from Los Angeles, California and Auckland, New Zealand we are the Amateur Radio Newsline, heard on bulletin stations around the world including the WB0QXW repeater serving Saint Louis, Missouri.

(5 sec pause here)

**

RESCUE RADIO: SOCAL HAMS READY BUT NOT CALLED OUT FOR TSUNAMI

While public officials in Hawaii were in full alert for the Chilean earthquake generated tsunami, the same cannot be said for the political leadership in Southern California. This according to Gordon West, WB6NOA, who says that after all the hours of training volunteers in the various cities that comprise the Southern California region, not one politician nor their staff members had the courtesy to let them know what was going on:

--

West: "We had ham radio operators in Dana Point, Newport Beach, Huntington Harbor, Catalina Island, Long Beach Harbor, L.A. Harbor. Hams were all over the place but no one to make a report to. The hams were not mobilized in Southern California, and that seems strange because here in Southern California we've offered a lot of free classes to municipalities wanting to get their CERT groups going in disaster preparedness."

--

West speculates that the uncertainty over the use of volunteers caused by the FCC's strict interpretation of rule 97.113 might be one of the reasons that the political leaders shied away from calling out or using the services of ham radio volunteers:

--

West: "Well, maybe it was 97.113 and the worry by cities that this would be an exercise that the FCC might not approve. This was not an exercise. This was an actual tsunami with the waves coming into the Los Angeles area."

--

Even though there was no official callout some Southern California's rescue radio hams took the initiative to use the event as a training exercise. Some nets did put themselves into operation and properly equipped operators like Jason Gant,W6AUX, on Catalina Island were able to provide accurate tidal surge reports. Reports that sadly went nowhere:

--

"This is W6AUX reporting from Avalon. We had an approximate one foot surge come in at 12:18 P.M. Pacific Standard Time. The tidal situation is that we are two hours from an extreme low tide of minus 1.2 feet so this helped us in managing this very low surge. This is W6AUX, out."

--

According to West, its beginning to appear as if the political leadership of the region really has no idea of the free expert communications talent at their fingertips:

--

West: "They don't realize the resources that the ham operators could bring, such as we had one ham, Richard, K6RBS, that was monitoring the DART Buoys and was giving an up to date count as to how high or not high the tsunami would reach here in Southern California."

--

As we go to air its unclear if any other California, Oregon, Washington, Alaskan or Canadian coastal communities put their ham radio response groups on alert. What we do know is that in Southern California that was not the case.

And less we forget, to hear more of what Gordon West has to say regarding this issue just tune into this weeks RAIN Report, Its on line all this week at www.therainreport.com. (ARNewsline(tm))

**

RADIO LAW: FCC REFUSES TO ISSUE DECLARATORY RULING TO PROTECT HAMS FROM NEW JERSEY AND FLORIDA ANTI PIRATE RADIO LAWS

The FCC has turned down a request filed in 2005 by the American Radio Relay League for a declaratory ruling. One that would have indemnified ham radio operators from prosecution under anti pirate radio laws in two states.

In a letter dated February 25th, the FCC responded to a Request for Declaratory Ruling Request filed by attorney Christopher D. Imlay, W3KD, on February 25, 2005 on behalf of ARRL. In it the ARRL asked the FCC for a declaratory ruling that Section 877.27 of the Florida Criminal Statutes and Section C.2C:33-23.1 of the New Jersey Statutes be preempted by federal law. Both of these statutes make it a felony to make a radio transmission without Commission authorization or to interfere with a licensed public or commercial radio station.

In its filing, the ARRL acknowledged that the statutes were enacted to address unlicensed pirate broadcasting facilities. But the League was concerned that these laws could be applied to Commission-licensed amateur radio stations.

In declining the ARRL request the FCC noted that the Florida legislation has now been in effect for over five years and the New Jersey law has been in effect for over four years. It says that in that time the agency has not received any reports of any amateur operators being prosecuted or threatened with prosecution under either statute.

The FCC decision did leave the door open in case a ham somewhere winds up under the gun of one of these two state laws. It said that the ARRL may file a new petition for declaratory ruling in the event of changed circumstances. Read that to mean its going to take a test case in New Jersey or Florida before the FCC gives any consideration to preempting either state law. (FCC)

**

RADIO SAFETY: FLORIDA MAN ELECTROCUTED INSTALLING ANTENNA TO TALK TO HAITI

A Lauderdale Lakes, Florida, man who was electrocuted on February 28th. This, while trying to install an antenna that authorities said would have been used to communicate with Haiti.

Police spokesman Sgt. Frank Sousa said Mackenson Mareus died when he touched a live power line at a home in the 1100 block of Northwest 18th Court. Police said the antenna Mareus was helping install was intended to set up communication with Haiti.

According to experts in South Florida that is something ham radio operators would be able to do with relative ease. But Mareus was not a radio amateur and according to his cousin Louikenson Arne he did not know what the antenna was for.

Arne said that the 27 year old Mareus, was from Haiti and had lived in South Florida for less than three years. He ran an Internet-based radio station called Radio Tendresse, and the Web site boasted the frequency of 97.7 FM but was not on the air anywhere in the United States.

According to the police report on the accident ham radio operators are supposed to be licensed with the Federal Communications Commission. However it was unclear who, if anyone, held a license to use the antenna and any radio gear connected to it at the time of the accident that took Mackenson Mareus life. (Published news reports)

RADIO BUSINESS: GRE TO ASSUME ALINCO SALES AND SERVICE

GRE, Inc, best known as an original electronics manufacturer and Alinco, Inc. have announced an new marketing agreement. One under which G-R-E America, Inc. will distribute, offer customer support, and provide warranty and non-warranty repair for radios and amplification equipment under the Alinco brand for all of North America.

Under the agreement, GRE, Inc. will be the exclusive distributor of Alinco products in Canada, USA, and Mexico and will handle all warranty service and parts orders. GRE will also provide out-of warranty service as will other currently authorized Alinco service centers. (GRE)

**

NEW PRODUCTS: MORSE CODE TIE FOR PILOTS

A new way to learn the Morse code if you fly. Wear it. And no we are not kidding as we hear from Frank Lusa, VK2FJL of the WIA National News has the story from down-under:

--

Aviators have Morse code all tied up. How, Well you might ask? Well it's a neck tie that has the code printed on it.

Presumably pilots can check their tie if they're a bit rusty on the code and want to verify what beacon they're receiving. These beacons transmit a two to five letter callsigns at 5-words per minute. Lets hope that coffee stains do not obliterate too many dits and dahs.

Im VK2FJL reporting for the WIA National News.

--

Now all someone has to make these new aviators Morse code ties, self cleaning. (WIA News)

**

THE SOCIAL SCENE: THE DUTCH NATIONAL RADIO FLEAMARKET MARCH 13

Turning to the international social scene, the Dutch National Radio Fleamarket takes place on March 13th at the Autotron at

's-Hertogenbosch, just off A59 motorway in Holland. The event opens at 9.00 A.M. local time and runs until 15.30. Details can be found on the website at www.radiovlooienmarkt.nl. (GB2RS)

CHANGING OF THE GUARD: DR. DAVID TOTH, VE3GYQ - SK

Some sad news to report. This with word of the February 26th passing of former Tucson Amateur Packet Radio President David Toth, VE3GYQ at his home in London, Ontario, Canada. Toth who was only age 55 served as Tucson Amateur Packet Radio President from 2005 to 2009 and was twice as a member of its Board of Directors. At the time of his passing he held the title of President Emeritus of the organization.

In addition to amateur radio, Dr. Toth's other passions were flying his Piper Twin Comanche and astronomy. He established the London, Ontario, Astronomy Club and served as its president. He was also a member of the Royal Astronomical Society of Canada and belonged to the Lima, Dayton and Columbus Astronomy Clubs.

During his career VE3GYQ traveled to Chile and Australia for NASA to fix telescope problems. He also worked closely with Software Bisque to develop computer programs to operate telescopes.

Dr. Toth graduated from the University of Western Ontario Medical School in 1978. He practiced family medicine in London, Ontario but moved to the U.S. in 1993 to began a career in emergency medicine. He was a partner of Premier Health Care Services, in Dayton, Ohio, and worked at Lima Memorial Health System and St. Rita's Medical Center until the time of his illness. (WB9QZB)

**

CHANGING TECHNOLOGY: SONY TO CLOSE ALABAMA MAGNETIC TAPE PLANT

Call it a true sign of the times. This with word that Sony Corporation plans to close its tape-manufacturing plant in Dothan, Alabama. This as the need for magnetic tape products dwindles to a trickle world-wide.

As recently as five years ago most recording of video and audio was done to tape. But as magnetic disc drives, flash memory and electro-optical recording technology made rapid advances, the need for magnetic tape products quickly declined.

Now it has finally reached a low where the demand for magnetic tape products like those produced at the Sony Dolthan, Alabama, plant has reached the point where keeping it open is no longer economical. According to Sony, operations at the plant will be phased out starting in April with the closure planned to be completed by September.

The facility was opened in 1977. Termination of its operation will lead to the loss of 300 jobs. (Birmingham News, RW, others)

**

HAMS IN THE NEWS: MATTHEW ARTHUR KA0PQW NAMED TO RECEIVE PRESIDENTIAL AWARD

Some names in the news. Handiham World reports that Matthew Arthur, KA0PQW, of Ellendale, Minnesota, has been selected to receive a President's Volunteer Service Award. Arthur is being recognized for his work with the Community Emergency Response Team in Steele County, Minnesota. That's where he volunteered and handled communications during a flood in 2007.

According to Handiham World, this was a nine hour non-stop stint that lasted until the National Guard could relieve him. During that time he handled traffic into and out of the flood zone, passing messages to authorities in the city of Winona.

Handiham World says that a story on Matthew Arthur's selection to receive the award appeared in the February 18, 2010 edition of the Star-Eagle newspaper that also featured a photo of his well equipped amateur station. KA0PQW is also a Handiham leader and volunteer. (WA0TDA, Handiham World)

**

NAMES IN THE NEWS: DIANA ENG KC2UHB JOINS ARRL PUBLIC RELATIONS COMMITTEE

Diana Eng KC2UHB, well known for her amateur radio articles and videos for MAKE magazine, will be joining the ARRL Public Relations Committee. Eng who is a fashion designer who is known to integrate electronics into the attire she designs says that she is very excited to join the committee because she wants to help connect the maker and hacker community to the ham radio community.

Phil Torrone is the senior Editor of MAKE magazine. He describes Diana Eng as a fashion nerd, hacker, maker and ham radio ambassador. He says that KC2UHB is one of those people who inspire us all to hack, mod, and learn new skills.

Eng herself notes that it is an exciting time because there is a huge growth in the maker and hacker community. She says that it is hip to tinker and that ham radio operators were the original makers and hackers.

Diana Eng maintains her own website. It's a fun place in cyberspace to visit at http://fashionnerd.com/ (Southgate)

**

EMERGING TECHNOLOGY: CHILE QUAKE MAY HAVE SHORTENED THE DAYS

Scientists at NASA say that the 8.8 magnitude earthquake that struck Chile on Saturday, February 27th may have shifted Earth's axis and created shorter days. If their preliminary calculations are correct each day should be 1.26 microseconds shorter/

According to Science OnLine, large earthquakes cause massive amounts of rock to shift and alters the distribution of mass on the planet. That distribution change causes the rate at which the planet rotates to alter and it is the rate of rotation rate determines the length of a day.

Richard Gross is a geophysicist at NASA's Jet Propulsion Laboratory in Pasadena, California. He used computer modeling to determine how the magnitude 8.8 quake that struck Chile may have affected Earth. He found that the quake should have moved Earth's figure axis about 8 centimeters. That shift in axis is what may have lead to the minutely shortened days. (Science Daily)

**

RADIO COOPERATION: ROS FREQUENCIES MOVED ON 20 METERS

ROS is changing channel. Josï¿½ Alberto Nieto Ros, the originator of the new amateur radio data mode ROS, has agreed to move the suggested 20 meter frequencies for this mode to 14.0972MHz and 14.102MHz. This following a mounting number of complaints that the mode was accidentally causing massive world-wide interference to the international beacon frequency of 14.100 MHz.

The original frequencies recommended for the mode had been 14.098MHz and 14.1011MHz. This sandwiched the decades old propagation advisory system between the original frequencies for ROS and making it impossible to hear the beacon propagation broadcasts.

You can find out more about ROS at http://rosmodem.wordpress.com. More about the International Beacon Project at www.ncdxf.org/beacons.html. (Southgate)

**

DX

In DX, we start with word from ARRL Awards Branch Manager Bill Moore, NC1L, that the 3V3S operation from Tunisia and the D2CQ operation in Angola have been approved for DXCC credit. The 3V3S operation took place in 2009 while D2CQ is ongoing.

On the air now is G3LZQ active as 3B9WR from Rodrigues Island through April 2nd. His operation is on all bands 160 to 10 meters, mainly CW, but with a focus on the 160 through 40. Also look for him to be in the RSGB's 73rd Commonwealth Contest (March 13-14th). QSL via his home callsign.

And lastly, DF7ZS, will be on the air from Madeira Island signing portable CT9. This. between March 24th and the 31st. Activity will be holiday style and will focus on the WARC bands. QSL via DF7ZS. To which we can only add the line: "Have some Madiera my dear." OK. Bad joke unless you know the music of the Limeliters.

(Above from various DX news sources)

**

THAT FINAL ITEM: NEIGHBOR SUES NEIGHBOR OVER ELECTROMAGNETIC ALLERGY

And finally this week the story of a Santa Fe, New Mexico, man who is suing his neighbor because he claims that her cellular telephone, her WiFi and even her lamp dimmers are making him ill. Once again, here is Amateur Radio Newsline's Bruce Tennant, K6PZW, who takes a look at this rather strange case:

--

The Santa Fe Reporter and Huffington Post newspapers says that a New Mexico resident who alleges he suffers from electromagnetic allergies is has filed a tort action against neighbor because she refuses to turn off her home electronic equipment. According to the news stories, Arthur Firstenberg of Santa Fe, has been sleeping at friends' homes or in his car to avoid what he claims are the electromagnetic waves created by his neighbor's cell phone, wireless network, computer, compact fluorescent light bulbs and lamp dimmer switches.

Firstenberg claims that the low-level electromagnetic radiation emitted by cell phones and other modern gadgets makes him, and others sensitive to radio waves suffer terribly. He believes that the side-effects of exposure, include nausea, vertigo, ringing in the ears, severe headaches and body aches. He also credits crippling joint pains, insomnia, impaired vision, impaired muscular control and other ailments to electromagnetic sources.

The suit claims that when Raphaela Monribot moved in next door, she refused to keep her phone, computer and wireless network turned off when not in use. When asked if she could use a landline instead of her iPhone, Firstenberg claims the neighbor flatly refused.

Firstenberg suit demands that a judge to stop his neighbor from using her iPhone, her wireless internet and her laptop charger, saying the radiation has forced him from his home. He also wants $530,000 in damages, including $100,000 for pain and suffering.

The lawsuit was filed January 4th in First Judicial District Court in Santa Fe. Firstenberg's attorney is Lindsay Lovejoy, Jr, who is a graduate of Harvard and Yale, as well as a former Assistant New Mexico Assistant Attorney General who has argued cases alongside now US Senator Tom Udall. With such a high power attorney, its doubtful that this case will disappear anytime soon.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, In Los Angeles.

--

The battle against WiFi in Santa Fe isn't one Firstenberg is fighting alone. He's part of a group of city residents who are pursuing legal means to remove all WiFi hotspots from public locations because they claim the wireless internet waves aggravate their electromagnetic allergies. NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that the nominating period for the 2010 Amateur Radio Newsline Young Ham of the Year Award is now open. Each year, we here at the Amateur Radio Newsline in association with Vertex Standard Corporation -- the makers of Yaesu brand ham radio gear -- and CQ Magazine combine to honor a ham radio operator age 18 or younger for his or her contributions to ham radio or to society itself through ham radio.

All nominations and materials required by the official rules must be received by Amateur Radio Newsline no later than midnight on May 30th. Both "mail-in" and electronic submissions are being accepted this year. Full rules and a downloadable nominating form are now on our website at www dot arnewsline dot org. Just scroll down until you see "2010 Young Ham of the Year Awards Now Being Accepted" and click on the word "here" to download the directions and the form. You can also leave questions and comments on the official Young Ham of the Year Award page on Facebook dot com.

For now, with Bill Pasternak, WA6ITF, at the editors desk in Los Angeles, I'm Jim Meachen, ZL2BHF, reporting from Auckland, New Zealand, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 7th March 2010

The news headlines

* Prestigious Italian award to ARISS

* IARU request amateurs stay clear of the emergency frequencies after Chilean earthquake

* Open house at Flight Refuelling for National Science Week

Italian radio listeners' society AIR has awarded the prestigious 2010 Boselli prize to ARISS, the Amateur Radio in the International Space Station project. The award recognises how ARISS has shown the importance of radio communications to hundreds of young students in Europe and beyond. ARISS has spread the use of radio from the forefront of science in outer space to classrooms around the world. The prize will be delivered at the AIR AGM on 8 May in Faenza, Italy.

Following the earthquake that struck southern Chile on Saturday 27 February, IARU Region 2 requests that radio amateurs keep clear of the EmComm frequencies for earthquake and tsunami information so that those in affected areas may monitor the frequencies for information. These are 28.300 and 28.500MHz, 21.200 and 21.350MHz, 14.200 and 14.350MHz, 7.050 and 7.095MHz, 3.738 and 3.750MHz. In addition, the worldwide emergency communication centre of activity frequencies should be monitored, which are 14.300, 18.160 and 21.360MHz. This is a changeable situation and amateurs should check the IARU website for the latest information.

The Flight Refuelling ARS will once again be holding an open day at their Society HQ at Merley, near Wimborne Minster in Dorset, on Saturday 20 March as part of their National Science Week participation. Doors open at 11am and active demonstrations of most aspects of current amateur radio communications will be available for viewing by the general public and fellow enthusiasts. HF, VHF and microwave exhibits, including satellite and EME should feature, together with other items such as a working high voltage Tesla coil. The theme for Science Week 2010 is based on The Earth, so grounding will be in there somewhere. The event will be live webstreamed by members of BATC - last year's event attracted a peak web audience of over 1000. For more details look at the www.frars.org.uk website or send an e-mail to jfell<at>tesco.net.

As part of National Science Week, Sheffield Amateur Radio Club is providing hands-on experience of amateur radio to a local school as well as to the community at large. On Monday 15 March, the club will hold an open house from 7.30 to 9.30pm at the Sheffield Transport Sports Club, Greenhill Main Road, Meadowhead Roundabout, Sheffield S8. The evening will include demonstrations of short wave and VHF/UHF amateur radio including HF, VHF satellite communications, data modes and the D-Star repeater system. In addition there will be a display of equipment, amateur radio videos and printed information. Visitors will be able to meet the club members and, in particular, obtain information on how to obtain an amateur radio licence. Children under 18 must be accompanied by a parent or other responsible adult family member On Wednesday 17 March Sheffield Amateur Radio Club will be at Tapton School, Crosspool, from 9am to approximately 4.30pm and, by installing two temporary radio stations and aerials, will put the school on the air for the day. Both club callsigns will be in use, G2AS and G3RCM. For further information please send an e-mail to Peter Day, G3PHO, to scienceweek<at>g3pho.org.uk.

2E1EUB will once again be active as 2M1EUB from 20 to 27 March, operating every amateur radio satellite that he can reach from the Cairngorms National Park. Also, look for him on 160 and 80m. Check out QRZ.com under 2M1EUB for more information.

Following its most successful year ever and with record number of visitors expected in 2010, Bletchley Park is looking for more volunteer tour guides and stewards. A new volunteer recruitment campaign is being launched at a recruitment fayre on Friday 12 and Saturday 13 March, starting at 11am, where the Park's team of tour guides will be on hand to meet potential new recruits and show them the ropes. Anyone who has a general interest in the past, or a particular interest in World War Two, is very welcome to come along to the recruitment fayre for a no-commitment and informal chat and a guided tour of the Park. Full training will be given to new volunteers who may choose how much or little time they are able to give up weekends, weekdays, once a month, or more often. Everyone is welcome. For further information, contact Niki Holmes Bridges on 01908 272675 or e-mail volunteer@bletchleypark.org.uk.

An amateur radio club for members of the Royal British Legion held its first meeting in Telford. Membership is open to all Royal British Legion members and those intending to become legion members. If you are interested in joining, contact Malcolm Seeby, 2E1DJM by e-mail at malcolm2e1djm<at>hotmail.com.

Angel of the North Amateur Radio Club will be taking part in National Science week when they put GB2ANG on the air on 15 and 22 March. They will also be constructing radios on those club nights and visitors are welcome. Contact Nancy Bone, by e-mail to nancybone2001<at>yahoo.co.uk.

The latest High Speed Telegraphy Honour Roll has been published with three amateurs, LZ4UU, DJ1YFK and EW8VK, achieving an amazing 1231

characters per minute. For full details check out www.rufzxp.net.

There are 3 places left on an Intermediate Course starting on 24 March. The training centre is located at Clay Cross just a few miles south of Chesterfield and around 3 miles from M1 Junction 29. Tutors are Martin, M1ANW and Geoff, G7SRI with assistance from Steve, G6IBQ and Tracey, 2E0VWI. Disabled facilities are available together with easy parking. The website www.m0oct.com has all the details.

Reading and District Amateur Radio Club is scheduling another Intermediate Licence Course commencing Monday 19 April through to 28 May. Details from Eric Curling by e-mail at m0luv<at>radarc.org.

Region 13 is planning another Train the Trainers session. They are looking for ten candidates and the date and venue will be chosen to suit. Check out the Region 13 website at www.rsgb-region-13-org.uk for details or contact Jim, G0EJQ on 01522 532604.

And now for the details of rallies and events for the coming week

Bournemouth Radio Society will be holding its 22nd annual sale today, Sunday 7 March, at the Kinson Community Centre, Pelhams Park, Millhams Road, Bournemouth BH10 7LH. Doors open at 9.30am and admission is £1.50 per visitor. All are welcome. Further details from John, G0HAT on 07719 700 771. Also today, 7 March, the Exeter Radio & Electronics Rally takes places in America Hall, De la Rue Way, Pinhoe, Exeter EX4 8PW, Doors open at 10.30am and admission is £2. There will be trade stands, a Bring & Buy and catering on site. Details from Pete, G3ZVI on 0771 419 8374.

Today, 7 March, sees the Cambridge & District ARC Rally opening at 10am from the Wood Green Animal Shelter, King's Bush Farm, A1198 London Road, Godmanchester PE29 2NH. Entry is £3 and there will be trade stands, a Bring & Buy, special interest groups and activities for the whole family. Contact David, M0GUM, on 01954 203080.

Saturday 13 March is the date for the Dutch National Radio Flea Market. See the report in May 2009 RadCom or check out www.radiovlooienmarkt.nl.

Now for the news of special events

Today, 7 March, listen out for GB4BAR for Brickfields Amateur Radio. It will be on the air from Binstead.

The Newbury & District Amateur Radio Society will be activating GB0VUL throughout March to promote awareness and publicity of the Vulcan Bomber. The first week is expected to be mainly CW. The main operation will be 20 and 21 March when a station will be run by Norman, M0JEC from the ATC Hut in St Michael's Road Newbury. Visitors most welcome. Full details at QRZ.com. Following a staggering donation of £458,000, the Vulcan will be making appearances at air shows around the UK. More details can be found at www.vulcantothesky.org.

The ISWL Club Callsigns in use during March 2010 will be GX4BJC /A & GX4BJC /P operated /A from Walton on the Naze, in Essex by Herbie, G6XOU. MX1SWL /A operated /A from Stratton, near Bude in Cornwall by Mike, M0SMJ. All QSL info is on www.iswl.org.uk or www.qrz.com. ISWL awards are available to all amateurs and SWLs.

And now the HF DX news compiled from 425 DX News and other sources.

5R8UI will be active from Madagascar until the end of the year. QSL to IK4ZUI.

Until 10 March, K6HFA will be on the air using both CW and SSB from Samoa, which is call area 5W. QSL to his home callsign. From 11 to 21 March N7OU and W7YAQ will be on the air as 5W0OU. QSL via N7OU.

Until 21 March, G3RWF will be on the air from Uganda with the callsign 5X1NH. QSL via his home callsign. Also from Uganda, 5X7JD will be on the air until 25 May. QSL as directed on air.

Between 8 and 22 March, HA5AO will be on the air from Lesotho using all modes and bands as 7P8AO. QSL via his home callsign.

DL7AFS and DL7ZG will sign V21ZG from Antigua for 18 days starting 16 March. They will concentrate on RTTY, PSK31/63 and SSB. Now the contest news

9 March sees the 432MHz UK Activity Contest from 2000 to 2230UTC using all modes. The exchange is signal report, serial number and locator.

On 10 March, the CW leg of the 80m Club Championship runs between 2000 and 2130UTC. The exchange is signal report and serial number.

The second session of the 70MHz Cumulative Contest takes place on the 14th from 1000 to 1200UTC. Using all modes the exchange is signal report, serial number and locator.

The RSGB 73rd Commonwealth Contest runs on 13/14 March and several contest expeditions have already been announced, including 3B9/G3LZQ, 5X1NH by G3RWF, 9G5XA by G3XAQ, J38CW/J38SW by G3VCQ/M3VCQ, J6/G3PJT, J88DR by G3TBK and VP2MCC by G4FAL. Remember, during the contest they only work Commonwealth stations, which helps to avoid those big pile-ups of European or US stations. Many regard this contest as the most gentlemanly of RSGB events. It's a worldwide 24-hour CW event and a list of Commonwealth Call Areas can be found at www.rsgbcc.org/hf/information/codes.shtml. The times are 1000 to 1000UTC and the exchange is signal report, serial number and HQ stations also send HQ.

Now the solar factual data for the period from the 22nd to the 28th of February, compiled by Neil Clarke, G0CAS on the 1st of March.

February saw sunspots visible every day of the month, a contrast from February last year when only 6 days saw sunspots visible. Despite sunspots visible every day during the period, solar activity remained at very low levels with no solar flares taking place. A large coronal

mass ejection took place on the far side of the Sun on the 28th. Solar flux levels declined from 84 units on the 22nd to 78 by the 28th. The average was 82. The 90 day solar flux average on the 28th was 81 units, that's one unit up on last week. X-ray flux levels declined from A7.6 units on the 23rd to A2.3 by the 28th and average was A5. Geomagnetic activity was quiet everyday and the average was Ap 2 units. Solar wind data from the ACE spacecraft saw solar wind speeds 290 and 410 kilometres per second. Particle densities were low throughout. Bz varied no more than minus and plus 6 nanoTeslas for the period.

And finally the solar forecast. This week solar activity is expected to be very low to low. Going on past rotational data there is a slight chance that activity could be moderate. Solar flux levels should be in the 80s for most of the week, but if any reasonably sized sunspot groups appear then levels could increase into the 90s. Geomagnetic activity is expected to be quiet everyday but next weekend could see activity increase due to a recurring coronal hole. MUFs during daylight hours at equal latitudes should be around 25MHz for the south and 22MHz for the north. Darkness hour lows should be about 8MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of around 29MHz. The optimum working frequency with a 90 per cent success rate will be about 22MHz. the best time to try this path will be between 1200 and 1800UTC. Just a reminder that these paths are based on London, slight variations will take place from different locations around the UK.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

On Wednesday 10 March Norfolk Amateur Radio Club is having an informal, construction and workshop evening. Details from Chris Danby, G0DWV, on 01603 419204. On Wednesday 10 March South Essex Amateur Radio Society is having a talk on marine and offshore radio by Dave, G4UVJ. Contact Norman, M0FZW, on 01268 692776. On Wednesday 10 March Southgate Amateur Radio Club is holding its spring junk sale. Contact David Sharp, M0XDS, by email to david.sharp1<at>tesco.net. On Wednesday 10 March Worthing & District Amateur Radio Club is meeting at Lancing Parish Hall for a discussion evening. For more information contact Roy, G4GPX, on 01903 753 893. On Thursday 11 March Bittern DX Group is having an informal meeting. Details from Linda, G0AJJ, on 01692 404154. On Thursday 11 March Echelford Amateur Radio Society is having a talk on D-Star by David Lake, G4ULF. Contact John, G4GSC, on 01784 451898. On Thursday 11 March Edgware & District Radio Society is having a talk on plastic welding by John, G4GYS. More information from Mike, G4RNW, on 0208 950 0658. On Thursday 11 March King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV, by email to ral-g3rsv<at>supanet.com. On Thursday 11 March Lowestoft & District PYE Amateur Radio Club is having an open planning meeting. Details from Phil, G0JSG, on 01502 585448. On Thursday 11 March Reading & District Amateur Radio Club is having a talk by Andy Cunningham, M0HAK, on five ways to steal your data. Details from Pete, G8FRC, on 01189 695 697. On Thursday 11 March Shefford & District Amateur Radio Society is holding its AGM. Details from David, G8UOD, on 01234 742 757. On Friday 12 March Cambridge & District Amateur Radio Club is having a quiz night with Chris G1PXH. Details from Lawrence Micallef, M0LCM, on 07941 972724. On Friday 12 March Itchen Valley Amateur Radio Club is holding its AGM. Contact Charlie, M0WYM, on 02380 439560. On Friday 12 March Mid-Sussex Amateur Radio Society is having a radio night. Contact Peter, G4AKG, on 01444 239371. On Friday 12 March Radio Society of Harrow is having a talk on fuel economy by M3OJH. More information from Linda, G7RJL, on 0208 386 8586. On Friday 12 March Whitton Amateur Radio Group is having user training on the Icom PRO 3 by Garo, G0PZA. Details on the web at www.warg.info. On Friday 12 March Wimbledon & District Amateur Radio Society is on the air, operating digimodes. Contact Jim, M0CON, on 020 8874 7456. On Sunday 14 March Waterlooville Amateur Radio Club is holding its exam course. Details from Rich, G4IBW, on 02392 680852.

NEWS FOR THE SOUTH WEST

On Monday 8 March Cornish Amateur Radio Club is having a talk by Clive, G3OCB, on Microsoft Excel. Details from Steve, G7VOH, on 01209 844939. On Tuesday 9 March Blackmoor Vale Amateur Radio Society is having a talk on D-Star by Alan, M0MYI. Contact Tony, G0GFL, on 01258 860741. On Wednesday 10 March Taunton & District Amateur Radio Club is operating the club station. Contact William, G3WNI, on 01823 666 234 for more

information. On Wednesday 10 March Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048. On Thursday 11 March South Bristol Amateur Radio Club is having a home brew evening. Contact Len, G4RZY, on 01275 834 282. On Thursday 11 March Swindon & District Amateur Radio Club is having a natter night. Contact Den, M0ACM, on 07810 317750. On Thursday 11 March Yeovil Amateur Radio Club is having a talk by M3ZFF on "my first year as an amateur". Contact Steve Crask, G7AHP, by email to steve<at>g7ahp.co.uk. On Friday 12 March North Bristol Amateur Radio Club is having an operating evening. Contact Dick on 01454 218362. On Friday 12 March Torbay Amateur Radio Society is having an operating night. For more information contact Dave, G6FSP, by email to g6fsp<at>tars.org.uk.

NEWS FOR WALES

On Tuesday 9 March Marches Amateur Radio Society is having a quiz. For more information contact Dave, MW0AYM, on 01691 777242. On Friday 12 March Newport Amateur Radio Society is having a talk by Ross, GW3NWS, on R L Drake and the TR4 series. Contact Ross Clare, GW3NWS, on 01633 880146.

WIANEWS FOR WEEK COMMENCING MAR 7 2010.

I'm Tim VK2ZTM, and the broadcast this week has been prepared and presented by
members from the VK2WI broadcast team, Mathew VK2YAP, Richard VK2SKY,
John VK2JPM and Tim VK2ZTM, So stay tuned!

IT'S ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING MAR 07 2010

WIA CENTENARY

The WIA is very pleased to announce that Dick Smith VK2DIK has agreed to be
Patron of the WIA's Centenary Celebrations.

Dick is one of Australia's best known entrepreneurs, businessman, aviator
and modern day explorer. He obtained his amateur licence when he was 17.

He founded Dick Smith Electronics, the Australian Geographic and Dick Smith
Foods.

He was made an Officer of the Order of Australia in 1999 for service to the
aviation industry, and was the 1986 Australian of the Year.

In accepting the position of Patron for the WIA Centenary Celebrations, Dick Smith said "I am delighted to support an organisation that traces its history back 100 years but at the same time is looking to the future by encouraging a new generation of radio amateurs."

As you would already have heard, This year the WIA celebrates 100 years of organised amateur radio in Australia - there are articles in Amateur Radio Magazine for February and March as well as on wia.org.au

Next Thursday the 11th of March, marks one hundred years since a group of Wireless experimenters met to discuss the difficulties they were having in pursuing their interests.

This 1910 meeting was reported by both the Sydney Morning Herald and the Daily Telegraph. The Sydney Morning Herald of the 14th March 1910 reported on an Institute of Wireless Telegraphy, that had been inaugurated on Friday at a meeting at the Australia Hotel. It continued ...

[clip] Mr George A Taylor, who was chairman, pointed out that investigations of wireless were to-day on the verge of an arena of wonder. They were like explorers of a strange country, where every step was a discovery.
But as success could only be achieved after many failures, there was need of mutual co-operation between investigators to avoid making the same mistakes and to climb together when any successful discovery would be achieved ..

There was further necessity for the formation of the Institute to protect legitimate experimenting. He proposed the formation of the Institiute.

Mr. Wal Hannam seconded the motion. He explains how the meeting came about in this interview recorded by Radio New Zealand in the mid 1950's ..

[Extract of Wal Hannam - Transcript]

In conjunction with the late George Taylor...he was keenly interested with all sorts of flying, and... he heard about me having this radio gear, and he asked me would i come and show it at this exhibition. Well, when I was at the exhibition i suggested to him that as a lot of people had been round the stand and showed an interest in the matter of radio we called it wireless of course in those days ? still do i think, most of us an Americanism... he um.. said when i spoke to him about this, yes he said, i'll arrange a meeting.

Well the meeting was held in the smoke room of the Hotel Australia, I think there were about fifty people there, including professors, physicists and all that sort of thing, and they came and they said, yes we will form a society. And thats how the wireless institute of new south wales was born, and I became the first secretary.

How long the original name lasted is not known, but by 1912 the group was using the name Wireless Institute of New South Wales.

What is interesting is that Groups formed in other states independently. The Wireless Institute of Australia was formed in the 1920s as an umbrella organisation, to represent the common interests of these state organisations on a National and International level. Each state organisation maintained its independent existence as Divisions, until the recent amalgamation into the

National WIA in 2004. Before World War 1 most States had formed Amateur groups, but it is New South Wales that is the longest spoke in the wheel.

By the time Mr. Marconi carried out his successful wireless experiments, cables and telegraph lines - carrying Morse code traffic - were well established. The telephone was also starting to make its presence felt.

These systems produced revenue and the operators sought to keep it that way. But the radio experimenters just wanted to experiment and the authorities were not being helpful.

So, some of those experimenters in Sydney decided to call a meeting. The venue was chosen the smoking room(!) of the Hotel Australia - on the corner of Castlereagh Street and Martin Place in Sydney. It was a Friday afternoon the 11th March 1910.

Other states established similar organisations soon thereafter. The outbreak of World War I in 1914 curtailed the experimenters, as the Navy acquired control of the spectrum. At war's end, the Navy was ill inclined to return the spectrum for civilian use. The experimenters lobbied through their respective Institutes, but by then there were other interests after the spectrum as well.

NSW, it appears was the leading 'Institute' and about 1920 they were talking about a national body and inquired whether other States would ? if such a body was formed ? join as branches. NSW proposed that the body be known as the Wireless Institute of Australia. That took until 1924.

During this period the NSW body was registered as a company the Wireless Instutute of Australia New South Wales Division on the 26 th May 1922.

The 1920's were rough times for the experimenters. They had been pushed down below 200 metres or above 1.5 Mhz - near the top of the present AM broadcast band. That got them out of the hair of the 'important players' who saw their fortunes in this new medium. Below 200 metres was ? as the conventional wisdom then held useless. But that proved otherwise, as we now know!

Membership of the Wireless Institute had expended to encompass both the amateur - experimenter and professional ? commercial interests. This caused some conflict and for a period in NSW the amateurs split out into another body the A R A. In time, professional radio engineers went off to become members of the IRE and the amateurs regained the WIA.

The WIA had a policy to be located where the PMG was. In the early years of Federation the Commonwealth Government was Melbourne based and so was the WIA and has been ever since - except for a period in World War 2 when they operated in a very reduced way in Sydney. When the Radio Department involved with the Amateur movement made their transfer to Canberra in the 1970's a lack of resources prevented the WIA from following.

While the Institutes were the main State organisation, local radio clubs sprang up around the country. One which has lasted the distance is the Waverley Amateur Radio Society, established in 1919. It is the photo of some of their early members which is on this years Callbook cover and one of the centenary posters.

And that brings us back to today, one hundred years later proud to be the National Society, acknowledged as the oldest in the world. We are two years ahead of the RSGB of the UK, and four years ahead of the ARRL in America.

There is much more to tell, but it will have to wait till another time.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Ewan McLeod VK4ERM vk4erm@wia.org.au
Secretary Geoff Atkinson VK3AFA secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

WIA National Inwards QSL Bureau Changes

A new National Inwards QSL Bureau Service is being introduced for WIA members, to expedite the availability of inwards cards from overseas bureaux.

The Inwards Bureau has established a central Post Office box for the new service, at PO Box 2040 Bayswater VIC 3153.

By centralising the Australian delivery point, overseas bureaux can make more cost-effective despatches to the central box.

In summary, bulk quantities of cards to a central point will lead to more frequency consignments and a better service to you.

HAMS ACROSS AUSTRALIA.

VKR Roundup
http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNEWS from VK4WIA. I'm Geoff Emery, VK4ZPP wondering if I still
have the internet.

When we changed QTH, almost 18mths ago, we found that we were eligible for
satellite "broadband" via the Australian Broadband Guarantee. Duly the
processes were completed and the ground station equipment installed, at
government expense.

As the summer season started, an email arrived from the ISP advising that
the outside (roof mounted) equipment could overheat and the frequency of
the back channel transmitter drift outside the pass band of the satellite's
receiver. Before summer had started this year, we got the same reminder.

Being in the sub-tropical zone, this is really re-assuring that the gear
you're using has a basic major design flaw. We averaged about 6 hours loss
of service daily when the inside thermometer reached 32degC.

Well, this year, connectivity had been getting progressively poorer and the dropouts were occurring before the outside temperature reached the critical level. After 2 days without service but after the passing monsoonal rains, I got onto the ISP tech support line. Seems the outside equipment also suffers moisture ingress.

We are waiting for the replacement equipment to arrive and the local installer to do the repairs.

Am I glad I took the extended insurance cover?

There are consultations going on between the government and the satellite service supplier. If your satellite internet was supplied through the ABG program, call them on their toll free number (1800 883 488) if you are having equipment problems.

now do I have service to file this report?

I'm Geoff Emery VK4ZPP and That's What I think... how about you.....?

GYMPIE
www.gceginc.org.au
Trevor Taege, VK4BAT

I'm Trevor Taege, VK4BAT with news from the Gympie Communications & Electronics Group:

The Club is happy to advise that the 2 metre repeater is operational again, now at the temporary location at Chatsworth.

The repeater was off-air for only one day and after identifying and removing a faulty lightening arrester in the feed line, acceptable coverage was restored to the Gympie region.

Base station reports from the Sunshine Coast through Maleny to Maryborough along with a few reports from mobile stations were gratefully received to assist with troubleshooting.

The IRLP node 6464 is also back on line and operating fine.

The Club's Monday evening net was held at the usual time of 7:30pm with good signals into the repeater.

The next step toward the move to Mt. Boulder is to obtain solar panels and batteries and then set up these and associated equipment for testing at Chatsworth.

And now a reminder to any amateurs that may be interested in assisting the WICEN operators at the International Rally of Queensland.

The car rally is to be held predominantly in the beautiful Imbil Forest areas over the weekend of Friday 30th July through to Sunday 1st August.

Please contact the GCEG Treasurer or Secretary who will put you in touch with Gary VK4ZGB for more information.

Your assistance would be appreciated and this event would be a good way to learn more about the practical side of field communications as first time operators will be teamed up with experienced members.

It's now less than two weeks until the John Moyle field day contest and Gympie Club members participating are reminded to prepare equipment to take to Mt. Wolvi.

Please let Barry VK4KKN know what you are planning to bring along.

For Gympie Area News, I'm Trevor Taege, VK4BAT.

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au
Secretary Clive 4928 1173
http://www.radarc.cjb.net/

This is Doug VK4DUG from the Rockhampton and District Amateur Radio Club.

Work is being carried out by Brian 4QB on a rather impressive piece of brass tube which masquerades as a 23 centimetre slot antenna, the electrics for which was previously assembled and tested by Marcel VK4TMH A suitable location with a generous coverage for the beacon is at present being negotiated before a working bee will be arranged.

With the renewed interest in Fox Hunting and requests for comm.'s support for motor rallies, Open Days at the Heritage Village, and the anticipated trip to Clairview for the May day weekend, (and its famous auction) the RADAR Club is assured for a busy year.

The next important happening will be the RADAR Club's Annual Meeting to be held on the 17th March (that's the 3rd Wednesday of the month) at the usual meeting place, the SES Building on Charles St. North Rockhampton at 1930 hrs.

Both the President Jack JRC and the Secretary Clive ACC will not be able to attend (both gallivanting in other countries or oceans). But don't be afraid to attend for fear of election or appointment to one of these positions as they have both indicated their willingness to accept re-election should you so decide.

As an added attraction for you to attend it should be noted that Brian, (an ex radio inspector from the local area) will be attending the meeting to give a talk and share his vast knowledge with members. It should be an interesting night.

73 from Doug.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day this is Dale VK4DMC from the Tablelands Radio and Electronics Club located on the Atherton Tablelands.

This week our president John VK4TL penned some timely words for our monthly club newsletter TREC-NEWS which is distributed throughout Queensland and elsewhere.

John has a background as a broadcast engineer and has been a licensed ham for over 50 years.

So, without further ado over to John.

"How easy it is. We used to build all of our gear before WW2 and after it when AR88, BC348s etc were abundant we built the transmitter. In the 50s along comes Donald Duck and a few of us made SSB transmitters.

It has all progressed to the point where we no longer build anything.

It horrifies me to see new hams buying a dipole. What could be more simple than two measured lengths of wire connected to a piece of coax. The essence is that the self satisfaction of achievement has gone. When we chase DX we gang up in a mob waiting our turn at a special DX contact. Where is character in the ham of today who will get his DX on his own merit.
Well there are still plenty around who do still build in particular antennas and amplifiers. $10,000 for an Alpha, no fear, get some Russian tubes and look on VK ham classifieds for some parts, that's the way. Many hams are frightened individuals who will not even look at the 240 volt connections in their gear. Some will call an electrician.

Having worked in the Broadcast industry most of my working life I assure all that if one observes all the normal safety precautions all will be well.

I am still here and I might add no ill effects of radiation from high power radiation from the antennas. I did work on the pirate radio ships in the English channel where you could wander the ship's deck with a lit fluorescent tube in each hand.

Let us put fear aside as a reason for not constructing certain projects and continue ham radio as a do it yourself hobby".

TOWNSVILLE
vk4wit@wia.org.au
4773 1196 or 0408 001142
po box 333 Garbutt East, QLD 4814
www.tarc.org.au

GREETINGS!
THIS IS DON VK4FNQA, WITH ALL THE GOOD NEWS FROM NORTH QUEENSLAND,

THIS MORNING, I PASS ON CONGRATULATIONS TO THE MASTER OF TIME AND SPACE, IAIN VK4IGM, FOR BEING THE 500TH CALLER ON THE NEWS CALLBACK SESSIONS IN TOWNSVILLE FOR THE CURRENT WIA YEAR.

(Congratulations Iain, and congratulations to all that call in following retransmissions across VK, making things all that more worthwhile..
and before continuing with Don and then moving actross Bass Straight, on Melbournes VK3REC 9:30AM news recently they clocked up their 1000th checkin this WIA year it was VK3UKR!...vk4bb ed.)

WANT TO REALLY KNOW HOW ACCURATE YOUR RECEIVER, TRANSMITTER OR TEST EQUIPMENT IS IN RELATION TO FREQUENCY ? AT THIS TUESDAY EVENINGS TARC PROJECT NIGHT, THE THEME IS CALIBRATION, WITH CLUB TECHNICIAN AND ELECTRONICS ENGINEER DON VK4MC GIVING THOSE WHO ATTEND A CHANCE TO CHECK THEIR EQUIPMENT AGAINST SOME SERIOUSLY ACCURATE FREQUENCY AND TIME CALIBRATION SOURCES. THE PROJECT NIGHT STARTS THIS TUESDAY AT 7-30PM AND EVERYONE IS WELCOME TO ATTEND.

HERE IS AN ITEM THAT WILL INTEREST THOSE WHO ATTENDED THE 2009 NORTH QUEENSLAND AMATEUR RADIO CONVENTION. DURING THE BOOT SALE IAN VK4ZT SOLD A LABTECH DUAL TRACE OSCILLOSCOPE TO AN AMATEUR BUT CAN NOT REMEMBER WHO IT WAS. COULD THAT AMATEUR CONTACT IAN AS THE USERS MANUAL HAS BEEN FOUND! IAN CAN BE CONTACTED ON 47799668.

SHOCK ! HORROR ! THE TIME IS GOING QUICK AND IT IS NOW ONLY TWO WEEKS UNTIL THE JOHN MOYLE FIELD DAY ! TARCADIANS AND SUPPORT CREWS WILL BE OPERATING VK4WIT CLUB STATION LOCATED AT BLUEWATER SCOUT DEN, JUST A SHORT 20 MINUTES DRIVE NORTH ALONG THE BRUCE HIGHWAY FROM THE THURINGOWA CBD. NOT MANY OPERATORS HAVE INFORMED RICHARD THAT THEY ARE GOING AND BECAUSE OF THIS THE ENTIRE OPERATION IS IN JEOPARDY !
SO, STOP THINKING ABOUT IT AND CONTACT TARC CONTEST MANAGER RICHARD VK4FRJG ON MOBILE 0400339543 FOR FURTHER DETAILS OR LET HIM KNOW YOU ARE GOING ALONG.

FINALLY, NEWS THAT A REGULAR TARC SOCIAL GATHERING IS STARTING UP THIS MONTH AND WILL HAPPEN ON THE FOURTH SATURDAY OF EVERY MONTH FROM NOW ON.

TARC PRESIDENT KEN VK4QZ HAS OBSERVED THAT TARCADIANS DO HEAPS FOR EVERYONE IN THE COMMUNITY BUT DO NOT HAVE MANY EVENTS WHERE THEY CAN SOCIALISE TOGETHER. SO, BRING YOUR BREKKIE ITEMS DOWN TO THE BARBEQUES LOCATED EITHER SIDE OF THE ENTRY TO STRAND JETTY, MAKE BAKE AND COOK ALL THE WHILE WHILST SOCIALISING IN ONE OF NORTH QUEENSLANDS AWARD WINNING SETTINGS.

BREAKFAST WITH THE PRESIDENT WILL BE HAPPENING THIS MONTH FROM 7AM, SATURDAY 27TH MARCH.

ARE YOU PROMOTING THE CENTENARY OF ORGANISED AMATEUR RADIO IN AUSTRALIA AND IF NOT, WHY NOT...

WELL, THATS ALL THE QNEWS FOR THIS SUNDAY 7TH MARCH... THIS HAS BEEN DON VK4FNQA IN TROPICAL PARADISE FOR THE TOWNSVILLE AMATEUR RADIO CLUB INC, AND YOU HAVE BEEN LISTENING TO; AND ENJOYING QNEWS FROM VK4WIA..

Club Archive Proposals

It has been proposed to build an archive of NWT-ATV Group history, activity and involvement over the last 35 or so years since the North West ATV Group first became active early in the 1970's.

Some of the activities were installation of the Solar Powered ATV Repeater on Mt. Duncan, The 1990 World Rowing championships and 2 subsequent National Rowing Championships, ATV at HamFests, through to some recent events such as The Marconi Centenary and the International Space Station

communications with the Devonport High Schools in 2007.

(Tony VK7AX, News Officer NWT-ATV Group)

Don't forget, today is the day for Penguinale.

The Penguin Lions Club in north-west Tasmania is holding a community fun day today at Hiscutt Park in Penguin.

Celebrating the Penguin-ness of Penguin, there will be games for the kids, a 'Penguin Performs' talent quest, Penguinalia displays, Penguin Polish car and bike display, a model boat regatta, Devonshire teas, hot food and refreshments and 'Penguins On The Air' because Amateur Radio will be there.

Winston VK7EM will be operating throughout the day portable from near the windmill beside the lake and frequently calling on 7090, 14190 and 28490 KHz.

Operating times are from 2300 to 0500 UTC (10.00 am until 4.00pm local time.

Listen out and join in the fun. That's today, on 7090, 14190 and 28490 KHz.

VK9

Tim, NL8F (ex VK4COF) will be on Cocos Keeling Islands, which is IOTA reference OC-003 from 2nd to 10th March. He hopes to get the callsign VK9COF.

After operating from Cocos, his plans are to go to the South Cook Islands where he will be active as E51COF from 20th to 30th March.

Activity is expected mostly on 40m.

SILENT KEY

Dr David Toth, VE3GYQ -- President Emeritus of Tucson Amateur Packet Radio (TAPR) -- passed away Friday, February 26. He was 55.
VE3GYQ had served as a Director and Executive Vice President of TAPR in the 1980s and was elected President of the organization in September 2005.

(advised by vk4jkl)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Chile

Doctor Galdino Besomi CE3PG Radio Club de Chile (RCCH) president informs us via the RAC that soon after the earthquake, their Emergency Net was activated throughout the whole country, first on VHF and them in HF.

All the board and club members are actively working in close coordination with civil and military authorities.

The request for news about people in the affected countryside areas is one the main activities occupying the radio amateurs.

IARU Region 2 Area Emergency Coordinator Jorge Sierra, LU1AS reports that traffic on the 40m band has included health and welfare inquiries with people seeking information about the well-being of their relatives and friends in the affected areas of southern Chile.

The death toll following the 8.8 Richter scale magnitude earthquake is about 800 with authorities expecting to rise further as rescue crews dig into more collapsed buildings and find bodies.

More than 500,000 structures were destroyed and millions of people displaced or left homeless
At the request of the International Amateur Radio Union (IARU) and the Red Chilena Nor Austral Servicio (RECNA), all Radio Amateurs are requested to keep all IARU Centre of Activity Frequencies clear until further notice as health and welfare traffic is being passed to and from Chile.

As well, the RECNA requests that their call frequencies be avoided.

28300, 28500,
21200, 21350,
14200, 14350,
7050, 7095,
3738, 3750 kHz.

(Doug Mercer VO1DTM and Reinaldo Leandro, YV5AMH President - Executive Committee - IARU Region 2 and Jim Linton IARU Region 3)

RESCUE RADIO ROBOT IN THE 430 TO 450 MHz BAND

The FCC has issued a waiver of the Part 90 rules to permit a company called Reconrobotics Incorporated to sell a remote controlled security robot that will operate in the 430 to 448 MHz band. This is spectrum that is primary to the Federal Radiolocation Service but also encompasses the Amateur Service weak signal, satellite and repeater sub bands.

The Recon Scout transmits the analogue video signal to the operator on one of three six megahertz channels. These are 430 to 436 MHz, 436 to 442 MHz, and 442 to 448 MHz.

In approving the waiver, the FCC told Reconrobotics . the Recon Scout will have to operate on a secondary basis where it cannot cause interference and is not protected from interference to all Federal users and licensed non-Federal users including radio amateurs.

NOV 20-21 WIA Spring VHF-UHF Field Day
John Martin VK3KM tac@wia.org.au

NERG's VK3CNE field station will be portable on Mt. Macedon
for the John Moyle Memorial National Field Day Contest.

Setup begins on Friday afternoon, with Contest runs Mid-day Saturday
to Mid-day Sunday. This National Field Day covers all bands (except
10, 18 and 24 MHz) with emphasis on portable operation. Categories
for single or multi-operator, home/portable, HF/VHF+/All bands. All
Australian, Papua New Guinea and New Zealand amateurs may compete.

Rules and last minute changes at:
www.wia.org.au

(Mark NERG NEWS editor, February 2010)

Ross Hull Contest Results

The 2010 Ross Hull Contest was won by Ted Thrift VK2ARA.

Ted was also highest scorer on the 6 metre band.

The top scorer on 144 and 1296 MHz was Stephen Hayman ZL1TPH, and the highest
score on 432 was made by Gavin Brain VK3HY.

The winner of the Digital Modes section was Rex Moncur VK7MO, closely
followed by Wayne Pearson VK5APN.

Congratulations to all.

RSGB secures the use of short form contest calls

Following long and detailed discussions with the Radio Society of
Great Britain, Ofcom have announced the availability of special short
form contest callsigns for certain amateur full and reciprocal licensees.

The callsign will consist of G or M, a regional locator if applicable, a
chosen digit and a chosen suffix letter. For example G8Z or GW8Z.

SPECIAL EVENT CALLS, REPEATER BEACON DX AND NET ADVICE
hf nets ON the net, www.timroberts-vk4yeh.id.au/

EI2GBW, Ireland to Great Britain Ferry Celebrations ends March 31 2010

GB2EI, Great Britain to Ireland Ferry Celebrations ends March 31 2010

Ei2GBW and GB2Ei, special event stations celebrating the return of the Cork
to Swansea ferry, enter their final weeks of operation, unfortunately however
the intended maritime mobile operations aboard MV Julia had to be cancelled
due to refusal by the Department of Transportation to issue the ship's
passenger certificate if the amateur station was allowed to operate on board.

VP2MCC will be on the air during March, including the British Commonwealth
Contest, from Montserrat.

During the contest, contacts will only be with other British Commonwealth
Call areas but outside the contest he will try to work other countries as
a priority.

All VP2MCC contacts will be uploaded to Logbook of the world so do not
send a paper QSL if you only want a card for DXCC.

QSL to the home call of G4FAL.

Micronesia DXpedition - rare IOTA to be activated

Operators Mike KM9D and Jan KF4TUG onboard the 'Don Henry', are now on
Oroluk Atoll (OC-260).

Amateur radio activity from a land-based station located at Oroluk Island
began 02 March, 2010, and should be continuing for about 10-days.

Oroluk Island is located on the northwest of a lagoon bearing the same name
and is located near 07"37'N, 155"10'E.

For island-collecting enthusiasts Oroluk atoll is IOTA reference OC-260.

Requests for QSL cards should be directed to the QSL manager, OM2SA.

The radio-log will also be included in the ARRL's LoTW database."

AWARDS

The Tassie Trout Award is awarded for "kilograms of trout" or points from contacts made with Central Highlands Amateur Radio Club of Tasmania members.

The Club callsign gains you 3kg of trout, the President, 2kg, etc. Once you have 14kg of trout you can claim the basic award, 25kg - gold award and 50kg - platinum award.

W1AW ANNOUNCES NEW SCHEDULE FOR DIGITAL BULLETIN TRANSMISSIONS

The ARRL says that beginning Monday, March 15th its W1AW digital bulletin transmissions will alternate the modes used.

While Baudot, PSK31 and MFSK16 still make up the digital mode complement, the schedule will be altered to give more exposure to PSK31 and MFSK16.

The digital bulletin times remain at 6 and 9 p.m. daily Eastern Time. More on this change is on-line at
www.arrl.org/news/stories/2010/02/16/11343/?nc=1

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO

EMERGENCY FREQUENCIES IARU REGION 3
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

SUMMERLAND VK2

Emergency Management Queensland (EMQ) on Tuesday 8th at Rockhampton saw 3 hams attend, 4LM, 4NJB & VK4JRC.

The meeting was basically a fact finding mission for Amateur Radio Emergency Comms and to present ham ideas to EMQ for their consideration.

Both parties acknowledged that this is the beginning of a plan that will hopefully see mutual benefits for EMQ and the RADAR Club in respect of Emergency Comms and the promotion of Amateur Radio in the future.

Sunday Feb 7 saw the inaugural Hobart `Run the Bridge' run, with 1400 runners and walkers completing the 10 km course.

The event's communications framework was provided by WICEN Tasmania (South).

WICEN has commercial VHF and UHF licensed frequencies, which were used for the event. The event crew carried hired handhelds with headsets on the UHF network, extended by a repeater on Rosny Hill near the eastern approaches to the Tasman Bridge. WICEN also provided a back up VHF network with WICEN operators stationed at the Start, Finish and two Aid Points along the way.

A presentation can be found at
http://tas.wicen.org.au/Photo_pages/2010_run_bridge.html

(73, Roger, VK7ARN)

The Kentish Endurance Riders have asked the C.C.A.R.C. to provide comms support for their Tassie endurance ride next Saturday March 13.

This is an 80km event and starts at 7.30am and will be held in the Sheffield area.

If amateurs would like to assist with this event then please contact David, VK7DC directly or through any of the other committee members and register you interest and get more information.

WRAP UP WYONG FIELD DAY.

Australia's biggest gathering of hams and electronic enthusiasts took place last Sunday, 28th of February.

The 2010 Central Coast Amateur Radio Club's? Field Day at Wyong Racecourse attracted the crowds, boosted by perfect weather.

WIA News was there, and we open the report with Dot VK2DB who told us just how far some people had travelled

[clip]

We heard the vendor point of view from Gary VK2ZKT who thought that sales were good
[clip]

Amateur Radio New South Wales ran an onsite assessment, providing the opportunity to qualify people on to the bands, and higher levels. Terry, VK2UX, was very pleased with the outcome.
[clip]

Michael Owen, VK3KI, WIA National President, made a special trip up from Melbourne to catch up with old friends and snare a few new recruits. What did he think of the event?
[clip]

One attendee who can claim a special affinity is Pierce, VK2APQ, very close to celebrating a centenary of his own. Pierce has attended nearly every field day....
[clip]

And having seen so many field days, what's happened over the years?
[clip]

As president of CCARC, Col VK2ZCO had much riding on the day, the culmination of almost 12 months' work by a seriously dedicated bunch of volunteers.
[clip]

But you can just bet he's also looking forward to next year's Wyong Field day.

2010 SOCIAL SCENE

In VK2 some celebrations are taking place, this month Amateur Radio New South Wales will be operating using its special call - VK2 FIRST.

Next Thursday afternoon of the 11 th of March there is to be a small gathering in the Sydney CBD on the site of the former Hotel Australia to mark the anniversary.

Then on next Sunday the 14 th - members of Amateur Radio New South Wales have been invited to the VK2WI site in Dural where the Centenary will be observed by the opening of the recent completed building. More details in this week?s VK2WI News and on the ARNSW web site - www.arnsw.org.au

Well, that wraps it up for this historic news bulletin. We are indeed honoured by having been invited to present this bulletin - both close to the date and close

to the place, where it all began.

While celebrations have already started from the first day of the year - there is much more to come throughout the country. Next weekend is the annual John Moyle Field Day, and Ian VK2ZIO's Radio Museum at Kurrajong is mounting a centenary display to name but a few activities.

So from Mathew VK2YAP, Richard VK2SKY, John VK2JPM, and me Tim VK2ZTM - Its goodbye from members of the VK2WI news team.

==========
WIANews - we've reported...YOU decide.

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit material and do not necessarily reflect those of the rebroadcasters, nor the National WIA, but are broadcast in the spirit in which they were submitted.

Material may be reproduced in whole or in part, in any form, a credit to WIANews wouldn't go astray...

QNEWS BROADCAST march 07 2010

Welcome to Qnews from VK4WIA. I'm Geoff Emery, VK4ZPP wondering if I still have the internet.

When we changed QTH, almost 18mths ago, we found that we were eligible for satellite "broadband" via the Australian Broadband Guarantee. Duly the processes were completed and the ground station equipment installed, at government expense.

As the summer season started, an email arrived from the ISP advising that the outside (roof mounted) equipment could overheat and the frequency of the back channel transmitter drift outside the pass band of the satellite's receiver. Before summer had started this year, we got the same reminder.

Being in the sub-tropical zone, this is really re-assuring that the gear you're using has a basic major design flaw. We averaged about 6 hours loss of service daily when the inside thermometer reached 32degC.

Well, this year, connectivity had been getting progressively poorer and the dropouts were occurring before the outside temperature reached the critical level. After 2 days without service but after the passing monsoonal rains, I got onto the ISP tech support line. Seems the outside equipment also suffers moisture ingress.

We are waiting for the replacement equipment to arrive and the local installer to do the repairs.

Am I glad I took the extended insurance cover?

There are consultations going on between the government and the satellite service supplier. If your satellite internet was supplied through the ABG program, call them on their toll free number (1800 883 488) if you are having equipment problems.

now do I have service to file this report?

I'm Geoff Emery VK4ZPP and That's What I think... how about you.....?

GYMPIE
www.gceginc.org.au
Trevor Taege, VK4BAT

I'm Trevor Taege, VK4BAT with news from the Gympie Communications & Electronics Group:

The Club is happy to advise that the 2 metre repeater is operational again, now at the temporary location at Chatsworth.

The repeater was off-air for only one day and after identifying and removing a faulty lightening arrester in the feed line, acceptable coverage was restored to the Gympie region.

Base station reports from the Sunshine Coast through Maleny to Maryborough along with a few reports from mobile stations were gratefully received to assist with troubleshooting.

The IRLP node 6464 is also back on line and operating fine.

The Club's Monday evening net was held at the usual time of 7:30pm with good signals into the repeater.

The next step toward the move to Mt. Boulder is to obtain solar panels and batteries and then set up these and associated equipment for testing at Chatsworth.

And now a reminder to any amateurs that may be interested in assisting the WICEN operators at the International Rally of Queensland.

The car rally is to be held predominantly in the beautiful Imbil Forest areas over the weekend of Friday 30th July through to Sunday 1st August.

Please contact the GCEG Treasurer or Secretary who will put you in touch with Gary VK4ZGB for more information.

Your assistance would be appreciated and this event would be a good way to learn more about the practical side of field communications as first time operators will be teamed up with experienced members.

It's now less than two weeks until the John Moyle field day contest and Gympie Club members participating are reminded to prepare equipment to take to Mt. Wolvi.

Please let Barry VK4KKN know what you are planning to bring along.

For Gympie Area News, I'm Trevor Taege, VK4BAT.

ROCKHAMPTON
IRLP NODE 6973 ;
e-mail vk4acc@wia.org.au
Secretary Clive 4928 1173
http://www.radarc.cjb.net/

This is Doug VK4DUG from the Rockhampton and District Amateur Radio Club.

Work is being carried out by Brian 4QB on a rather impressive piece of brass tube which masquerades as a 23 centimetre slot antenna, the electrics for which was previously assembled and tested by Marcel VK4TMH A suitable location with a generous coverage for the beacon is at present being negotiated before a working bee will be arranged.

With the renewed interest in Fox Hunting and requests for comm.'s support for motor rallies, Open Days at the Heritage Village, and the anticipated trip to Clairview for the May day weekend, (and its famous auction) the RADAR Club is assured for a busy year.

The next important happening will be the RADAR Club's Annual Meeting to be held on the 17th March (that's the 3rd Wednesday of the month) at the usual meeting place, the SES Building on Charles St. North Rockhampton at 1930 hrs.

Both the President Jack JRC and the Secretary Clive ACC will not be able to attend (both gallivanting in other countries or oceans). But don't be afraid to attend for fear of election or appointment to one of these positions as they have both indicated their willingness to accept re-election should you so decide.

As an added attraction for you to attend it should be noted that Brian, (an ex radio inspector from the local area) will be attending the meeting to give a talk and share his vast knowledge with members. It should be an interesting night.

73 from Doug.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'day this is Dale VK4DMC from the Tablelands Radio and Electronics Club located on the Atherton Tablelands.

This week our president John VK4TL penned some timely words for our monthly club newsletter TREC-NEWS which is distributed throughout Queensland and elsewhere.

John has a background as a broadcast engineer and has been a licensed ham for over 50 years.

So, without further ado over to John.

"How easy it is. We used to build all of our gear before WW2 and after it when AR88, BC348s etc were abundant we built the transmitter. In the 50s along comes Donald Duck and a few of us made SSB transmitters.

It has all progressed to the point where we no longer build anything.

It horrifies me to see new hams buying a dipole. What could be more simple than two measured lengths of wire connected to a piece of coax. The essence is that the self satisfaction of achievement has gone. When we chase DX we gang up in a mob waiting our turn at a special DX contact. Where is character in the ham of today who will get his DX on his own merit.
Well there are still plenty around who do still build in particular antennas and amplifiers. $10,000 for an Alpha, no fear, get some Russian tubes and look on VK ham classifieds for some parts, that's the way. Many hams are frightened individuals who will not even look at the 240 volt connections in their gear. Some will call an electrician.

Having worked in the Broadcast industry most of my working life I assure all that if one observes all the normal safety precautions all will be well.

I am still here and I might add no ill effects of radiation from high power radiation from the antennas. I did work on the pirate radio ships in the English channel where you could wander the ship's deck with a lit fluorescent tube in each hand.

Let us put fear aside as a reason for not constructing certain projects and continue ham radio as a do it yourself hobby".

TOWNSVILLE
vk4wit@wia.org.au

po box 333 Garbutt East, QLD 4814
www.tarc.org.au

GREETINGS!
THIS IS DON VK4FNQA, WITH ALL THE GOOD NEWS FROM NORTH QUEENSLAND,

THIS MORNING, I PASS ON CONGRATULATIONS TO THE MASTER OF TIME AND SPACE, IAIN VK4IGM, FOR BEING THE 500TH CALLER ON THE NEWS CALLBACK SESSIONS IN TOWNSVILLE FOR THE CURRENT WIA YEAR.

WANT TO REALLY KNOW HOW ACCURATE YOUR RECEIVER, TRANSMITTER OR TEST EQUIPMENT IS IN RELATION TO FREQUENCY ? AT THIS TUESDAY EVENINGS TARC PROJECT NIGHT,

THE THEME IS CALIBRATION, WITH CLUB TECHNICIAN AND ELECTRONICS ENGINEER DON VK4MC GIVING THOSE WHO ATTEND A CHANCE TO CHECK THEIR EQUIPMENT AGAINST SOME SERIOUSLY ACCURATE FREQUENCY AND TIME CALIBRATION SOURCES. THE PROJECT NIGHT STARTS THIS TUESDAY AT 7-30PM AND EVERYONE IS WELCOME TO ATTEND.

HERE IS AN ITEM THAT WILL INTEREST THOSE WHO ATTENDED THE 2009 NORTH QUEENSLAND AMATEUR RADIO CONVENTION. DURING THE BOOT SALE IAN VK4ZT SOLD A LABTECH DUAL TRACE OSCILLOSCOPE TO AN AMATEUR BUT CAN NOT REMEMBER WHO IT WAS. COULD THAT AMATEUR CONTACT IAN AS THE USERS MANUAL HAS BEEN FOUND! IAN CAN BE CONTACTED ON 47799668.

SHOCK ! HORROR ! THE TIME IS GOING QUICK AND IT IS NOW ONLY TWO WEEKS UNTIL THE JOHN MOYLE FIELD DAY ! TARCADIANS AND SUPPORT CREWS WILL BE OPERATING VK4WIT CLUB STATION LOCATED AT BLUEWATER SCOUT DEN, JUST A SHORT 20 MINUTES DRIVE NORTH ALONG THE BRUCE HIGHWAY FROM THE THURINGOWA CBD. NOT MANY OPERATORS HAVE INFORMED RICHARD THAT THEY ARE GOING AND BECAUSE OF THIS THE ENTIRE OPERATION IS IN JEOPARDY !
SO, STOP THINKING ABOUT IT AND CONTACT TARC CONTEST MANAGER RICHARD VK4FRJG ON MOBILE 0400339543 FOR FURTHER DETAILS OR LET HIM KNOW YOU ARE GOING ALONG.

FINALLY, NEWS THAT A REGULAR TARC SOCIAL GATHERING IS STARTING UP THIS MONTH AND WILL HAPPEN ON THE FOURTH SATURDAY OF EVERY MONTH FROM NOW ON.

TARC PRESIDENT KEN VK4QZ HAS OBSERVED THAT TARCADIANS DO HEAPS FOR EVERYONE IN THE COMMUNITY BUT DO NOT HAVE MANY EVENTS WHERE THEY CAN SOCIALISE TOGETHER. SO, BRING YOUR BREKKIE ITEMS DOWN TO THE BARBEQUES LOCATED EITHER SIDE OF THE ENTRY TO STRAND JETTY, MAKE BAKE AND COOK ALL THE WHILE WHILST SOCIALISING IN ONE OF NORTH QUEENSLANDS AWARD WINNING SETTINGS.

BREAKFAST WITH THE PRESIDENT WILL BE HAPPENING THIS MONTH FROM 7AM, SATURDAY 27TH MARCH.

ARE YOU PROMOTING THE CENTENARY OF ORGANISED AMATEUR RADIO IN AUSTRALIA AND IF NOT, WHY NOT...

WELL, THATS ALL THE QNEWS FOR THIS SUNDAY 7TH MARCH... THIS HAS BEEN DON VK4FNQA IN TROPICAL PARADISE FOR THE TOWNSVILLE AMATEUR RADIO CLUB INC, AND YOU HAVE BEEN LISTENING TO; AND ENJOYING QNEWS FROM VK4WIA..

March 8, 2010
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, N2ZN, NG3K & ADXO, N4AA & QRZ DX, WC5N, KH6BZF, WB6RSE, N7OU, K8GI, K8YSE, KE8G, NE8Z, W8GEX (60m News), AB0RX, AT International, CO8TW, DK2WV, DL7MAE & The DX News Letter, DX World.Net, F5NQL & UFT, F6AJA & Les Nouvelles DX, G3SWH, I1JQJ/IK1ADH & 425 DX News, MM0DFV, OH2BN, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, SP5UAF, VA3RJ & ICPO, VE3EXY, VE3ZIK, VHF-DX-Portal (MMMonVHF) and ZS6XK for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late ARRL DX SSB Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the ARRL DX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 26th-February, through Friday, 5th-March there were 235 countries active. Countries available: 3A, 3B8, 3B9, 3V, 3W, 4J, 4L, 4O, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9X, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T30, T7, T8, TA, TF, TG, TI, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9W, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/h, VP8/s, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work

First Worry Later" (WFWL).

3W, VIETNAM (Update/Satellite Activity [VERY RARE IOTA - #2]). An international group of operators will be active as 3W6C from Con Co Island (AS-185), Vietnam, in April 10-18th, 2010. This multi-national project, being coordinated by Swiss ham-radio operators, consists of roughly 20 individuals including one woman and members not only from Switzerland but also from Vietnam, Germany, USA and Japan. Operators mentioned as of today: Team Leader Hans-Peter/HB9BXE, Jan/DJ8NK, Hans/HB9BHW, Rene/HB9BQI, Christine/HB9BQW, Thomas/HB9BSH, Hans-Jurg/HB9DKZ, Paul/HB9DST/AA1MI, Friedhelm/HB9JBI, Matthias/HB9JCI, Peter/HB9PJT, Rolf/HB9TVR, Bob/K4UEE, Eddy/XV1X, Bac/XV2A, Quang/XV2B, Michal/XV9DX and Torsten/XV9TH. During their stay they plan to have 4 stations on the air. Their goal is to make contacts on as many different frequencies as possible, even on the 80 meter and 160 meter bands which makes this DXpedition very special. Announced this past week, the team will also be on the satellites. The crew will use a FT-897 TRX with homebrewed "Easysat" - antenna for 2m and 70cm and a home-brewed 10m cross-dipole. The following satellite will be used: AO-07*, AO-51*, HO-68*, SO-50 and SO-67 (*first priority - not all overflights and sats will be used). Please note, that only AO-07 will be activated in the SBB/CW-mode. All other satellites are in the FM-mode. The main areas in the footprint are: East-Asia, Japan, China, India, Australia and eastern part of Russia. If possible, the 3W6C Team will also use some DX-Windows to near east and west part of Russia. Operation note: The main operator for the satellites is Hans-Peter/HB9BXE. Hans-Peter doesn't use a CAT-Interface for doppler correction. The equipment is in full manual use. It is important to know that Hans-Peter doesn't hear his own downlink. For AO-07, he will not make any doppler correction in his uplink. Hans-Peter will search some signals +/- 5 kHz around the downlink frequency (quasi splitmode like shortwave). If there is a pileup on the satellite, please use only callsign, signal strength and grid square. All crew members are primary shortwave operators. So please be patient if they have some troubles with the sat-operation. Complete details about the 3W6C operation are available at: http://www.3w6c.qrv.ch

8Q, MALDIVES. Noel, F6BGC, will be active as 8Q7NC from Madoogali, North Male Atoll (AS-013) between March 13ï¿½21st. Activity will be holiday style on 80-6 meters. QSL via his home callsign, direct or by the Bureau.

CO8, CUBA. Eduardo, CO8LY, will be in the ARRL DX SSB Contest (March 6-7th) as a Single-Op/Single-Band (15m)/QRP entry. QSL via EA7ADH. Also, look for Juan Carlos, CO8TW, to be active in the contest as a Single-OP/ Single-Band/All-Band/Low-Power entry. QSL via HB9SVT. His log will be on-line at: http://www.qsl.net/co8tw

CR2/CU2, AZORES (Radio Arcala Press Release). AZORES POISED TO HIT HARD AT ARRL SSB DX CONTEST: "The group out of Radio Arcala and their associates will put the Azores on the air on a variety of bands for the ARRL SSB weekend. CU2CE, CU2DX, OH2BH and OH8NC will be at the controls to provide you with an elusive Azores multiplier under a callsign not determined yet. Please update your CTY files to take note of the fact that the CR2 prefix

along with the traditional CU2 will represent this Azorean outpost, the westernmost point of Europe, one hour behind UTC time.
Soon Radio Arcala is scheduled to hold their Annual Meeting in the Azores and may activate several stations for the WPX SSB contest. The meeting is expected to have on its agenda the important issue of broadening the scope of the original Arcalians and their mission by inviting several international partners to join the radio operator team and to enter into Radio Arcala technology partnerships."

CT8, AZORES. Operators Tom/SP5UAF and Marcin/SP5ES will be active as CT8/homecall from Sao Miguel (EU-003), Azores, between March 17-29th. Activity will be on all HF bands, using CW, SSB and the Digital modes. They will participate Russian DX Contest (March 20-21st) and CQWW WPX SSB Contest (March 27-28th). This will be a low power (100W) activity. Antennas will be verticals and a spiderbeam. QSL via their home callsigns, by the Bureau or direct.

E2, THAILAND. Operators Dej/E21YDP and Champ/E21EIC will be active as E21YDP during the ARRL DX SSB Contest (March 6-7th) as a Multi-Single entry. QSL via E21YDP.

FR, REUNION ISLAND. Stephane, F5UOW, will once again be on holiday and active from Reunion Island (AF-016) between April 9th ando May 2nd. He will also be using the same callsign as last time, FR/F5UOW, but only between April 9-17th, and activity will be only on 20 meters. He will then move to another QTH were he will use the callsign TO2R and will be active on 80-10 meters, mostly on CW. QSL via his home callsign, direct or by the Bureau.

HI, DOMINICAN REPUBLIC. Operators Edwin/HI3K, Tino/HI3CC and Rafael/HI8KW will be active in the ARRL DX SSB Contest as HI3K (March 6-7th) from Lomas del Toro in Santiago (Lomadeltoro Contest Team's HI3CCP station) (NA-096, WLOTA LH-2974) as a Multi-Single entry. QSL via KB2MS. Visit their contest Web page at: http://www.lomadeltoro.com

IOTA NEWS.....
NA-058/
NA-062. (Update) Peter, VE3IKV, who was to be active as W4/VG3RA from St. Simons Island (NA-058) and Key West (NA-062), Florida, between March 6-13th, has cancelled his trip.

J6, ST. LUCIA. Just a reminder that Bob, G3PJT, will be active as J6/G3PJT from the northeast corner of St. Lucia (NA-108) between March 9-16th. Activity will be holiday style using a K2 w/100 watts and vertical antennas. He plans to also be in the RSGB's 73rd Commonwealth Contest (March 13-14th). Look for him outside of the contest, especially on 80 and 30 meters. QSL via his home callsign.

KH6BZF PROPAGATION FORECAST/REPORT (For March 8-14th)....
Mar 8 AN SOLAR REFERENCE KEYS
Mar 9 AN --------------------
Mar 10 AN BN - Below Normal

Mar 11 AN AN - Above Normal/Geomagnetic Level is QUIET
Mar 12 AN LN - Low Normal
Mar 13 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Mar 14 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

MM0, SCOTLAND (GMFF Op). Members of the Scottish-Russian ARS will activate MM0DGR/p from from the Whitlaw Mosses National Nature Reserve (GMFF-067) on Saturday, March 6th. The station will be located at Lindean Reservoir (nr. Selkirk, Scottish Borders). Reference numbers: WAB NT52, QRA Locator IO85ON. Activity will be on 80-10 meters using CW, SSB and BPSK63. QSL cards should be sent via MM0DFV. For more info, go to:
http://www.srars.org/wff-reports/gmff-067.htm
ADDED NOTE: A new Web site is now active and dedicated to the Natural Heritage of Scotland under the WFF award program. All their informative photo and video reports will be published there. Very soon they will run their own award program. Please keep an eye on their new Web site at: http:// www.gmff.org

PACIFIC TOUR (Update). Hugh, K6HFA, has started his South Pacific tour this past week from Upolu Island (OC-097), Samoa. He received the callsign 5W5A and will be active until March 10th. Activity will be on CW, SSB and possibly RTTY using 100 watts into a multi-band vertical antenna (for 80-15m). Look for him on the IOTA frequencies or possibly other frequencies. Hugh plans to call by areas (EU, NA, SA, ASIA... etc..) per propagation. QSL via K6HFA. His next stops will be:
Tonga (A3) - March 12thï¿½April 2nd; IOTAs include OC-049, OC-064 and OC-123.
Wallis (FW)- April 6ï¿½12th; IOTA OC-054
Tuvalu (T2)- April 13ï¿½21st; IOTA OC-015
Fiji (3D2) - April 23ï¿½26th; IOTA OC-016 or OC-156
Look for more details to be forthcoming.

PACIFIC TOUR (Update). Tim, NL8F, is now active as VK9CF from Cocos (Keeling) Island (OC-003) until March 10th. Activity will be on 80-10 meters, plus 6 meters, and an entry in the ARRL International DX Phone Contest (March 6-7th). From Cocos, Tim will then head to the South Cook Islands and once again operate as E51COF from Rarotonga Island (OC-013) between March 20ï¿½30th. Activity will also be on 80-10 meters. QSL both operations via K8NA.

PB88, THE NETHERLANDS (WOTA Op). Anneke, PB7XYL, of the WOTA CLUB (Member #12) will be active with a special callsign PB88XYL between April 3-30th. QSL via Bureau or direct. See QRZ.com for more info! This is the first activity by the "Women On The Air (WOTA)". Check out the details on:

http://wotaclub2010.blogspot.com

QSL INFO AND NEWS.....
NEED A QSL MANAGER? Jim, KE8G, is interested in becoming a QSL Manger
for a few stations. Contact him via his E-mail address at: ke8g@cox.net

LOG CLOSING. Karl, DK2WV, reports that he will be closing the logs for
the following operations at end of April:
Conway Reef --> 3D2WV
Banaba --> T33WV
Tunisia --> 3V8W
QSL via DK2WV (QRZ.com address).

Rick, NE8Z/HC1MD, reports that Pablo, HC5NAI, has passed his final test
and now holds the callsign HC5AI. The original HC5AI was his father,
Alfo.
Pablo states that he can now confirm all new QSOs with his new HC5AI
callsign and also any old QSO that you may have had with his father.
Please send your QSL via DIRECT ONLY (w/SAE + 2.00 USDs or 1 new IRC/
properly stamped. Any IRC that is not properly validated will result
in no QSL. Old IRC's will not be accepted either). The HC bureau only
functions to receive cards from DX countries. There is no outgoing bureau
from Ecuador any longer.

OLD QSL COLLECTION (Update). Jean Michel, F6AJA, wants to remind everyone
to visit the Les Nouvelles DX (LNDX) Web page to see more than 7300 old
QSL cards in several different albums/galleries. This site contains:
- The ten most wanted DXCC entities (2004 to 2008) with more than
300 QSLs
- At least one card for each 58 deleted DXCC countries (more than
1000 QSLs)
- Nearest the totality of current prefixes, disappeared now (more
than 2700+ QSLs)
- Album for stations from Magrebh - 1945 to 1962 (more than 300+ QSLs)
- More than 800 QSLs from the Antarctic bases.
- Nearly 240 QSLs from the TAAF (Terres Australes and Antarctiques
Francaises).
- More than 300 QSLs for the rare French Pacific Islands such as
FK/C, FO/C, FO/A, FO/M, FO/C and FW
- Nearly 100 cards from Eparses Islands such as FR/B/E/G/J/T
- More than 850 cards for the old timer with more than 120 countries
before 1945.
- A card from the French Department before 1945.
- One card from each of the states in the U.S. before 1945.
The URL address for the Web site is : http://LesNouvellesDX.free.fr
Some cards are still needed for the collection, and your particip-
ation is welcome. Please visit their site and give them your comments
by sending an E-mail to: LesNouvellesDX@free.fr
ADDED NOTE: A new album opened with the old cards for the D5 and DL5
stations between 1945 and 1962. Visit the URL address:
http://lesnouvellesdx.fr/galerie/galerie2.php?page=dl5qsl&pfx=DL5

SENDING QSLS TO UK8. OPDX received a report that Mike, UK8OM, states "DO NOT" send greens stamps to Uzbekistan because envelopes will be opened and they will be taken. Also, don't send envelopes. Just send an address label if you have one. Since January, only envelopes produced in Uzbekistan can be used there.

VK9X/G6AY LOG. Phil, G3SWH reports: "Just to let you know that my Web site <http://www.g3swh.org.uk> is now working again and Iï¿½ve just uploaded the log of 10,256 QSOs to the search facility. The site apparently crashed under the weight of the number of hits on the first couple of days on top of my normal monthly traffic but automatically reset itself at the end of February. The log will be uploaded to LoTW in the next few days, subject to getting a certificate from ARRL."

QSLS VIA LoTW: C5YK, C56SMT, CX7TT, DL775TMG, DL9MEN, E51WWA, E51WWB, EI4GNB, F6HRP, GI4SIZ, HA2EOA, HZ1PS, IT9KCD, JM1XCW, K4M, LZ2BE, OX3XR, OY2J, T70A, TX4T, UR5EDU, UT2FF/A, VK9X/G6AY, VP8LP, W5KNE/NH8, XR0Y (not XR0X), YN2LJ, Z21BB and ZL1BYZ.

QSLS RECEIVED VIA MAIL: 3D20CR, 6W/EI6DX, 9L7NS, EU3AR, KH0AC, KC4AAA, OH0X, PY2XB/PY0F, R1FJM, RW0CWA, TF4M, UA2FF, VP9/N1SNB and XU7ACY.

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

T03, PRINCIPALITY OF SEBORGA (Italy). Zoli, HA3HK, will be active as T03HK (Tango Zero Three Hotel Kilo) from the Principality of Seborga between March 12ï¿½14th. Bands and modes of activity were not provide. According to Wikipedia: "The Principality of Seborga is a micronation located in the northwestern Italian region of Liguria, near the French border, and in sight of Monaco. The principality is coexistent with, and claims the territory of, the town of Seborga, which is an Italian municipality."

TF, ICELAND. Siggi, TF3CW, will be active in the ARRL DX SSB Contest (March 6-7th) as Single-Op/Single-Band (20m) entry. QSL via LX1NO.

V6, MICRONESIA. Operators Sho/JA7HMZ (V63DX), Koh/JA1ADT (V63DQ) and Keiichiro/JA7GYP (V63T) will be active from Pohnpei (OC-010) between April 11-17th. Activity will be on all bands and modes. QSL via their home callsigns.

YU140, SERBIA (Special Event). Members of Radio Club "Marica-Zemun" (YU1AVQ) will celebrate 140th anniversary of Voluntary Fire Brigade in the city of Zemun and will be active as YU140Z until May 31st. QSL via YU1AVQ.

YU40, SERBIA (Special Event). Look for the prefixes YU40 and YT40 to be used by members of "YU CW Club" to commemorate its 40th anniversary.

ZK3, TOKELAU. By the time you read this, operators Bill/N7OU and Bob/W7YAQ will be on their way to Nukunono, Tokelau Islands (OC-048), and should be on the air by Sunday or Monday as ZK3OU and ZK3YA. Bill, N7OU, informs OPDX that there is a chance of a very late entry from ZK3 in the ARRL DX SSB Contest, but no one should count on it. He also states that

during their 3 weeks in Samoa (5W) they made a total of 22,400 QSOs.

ZS10, SOUTH AFRICA (Special Event). Special event station ZS10WCS will
be on the air between now and July 12th (started Sept. 2009). Activity
is to celebrate the 2010 Soccer World Cup being held in South Africa
between June 11th and July 11th. The callsign will be operated by members
of various SARL affiliated clubs. Operations through May 31st will be
only on the air over weekends. However, operations between June 1st and
July 12th, will be on the air 7 days a week. Frequency band selections
and times will be dependent on propagation conditions. Preferred fre-
quencies are: CW - 3510, 7010, 14010, 21010 and 28010
SSB - 3780, 7080, 14180, 21280 and 28480 kHz
Electronic QSL cards must be sent to: wcs@sarl.org.za
All stations logged will get a special QSL card via the Buereau. Direct
QSL can be sent to: PO Box 1721, Strubensvallei, 1735, South Africa.
Please included a self-addressed envelope (DL size) and 1 IRC or 1 USD.

The following stations are expected to be active in the
ARRL DX SSB Contest (March 6-7th, 2010)

Thanks to Bill, NG3K, for providing OPDX readers with the following
consolidated listing of the participants in the 2010 ARRL DX SSB Contest.
For a more detailed listing (and up-to-date changes/corrections) in HTML
format, please visit Bill's Web page at:
http://www.ng3k.com/Misc/adxs2010.html (By callsign)
http://www.ng3k.com/Misc/adxsd2010.html (By entity)

SARL News - SUNDAY 07 MARCH 2010

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by email.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 10,130, 7,066 and 3,695 MHz SSB.

In the news today:

NOMINATIONS FOR RADIO AMATEUR OF THE YEAR AWARDS INVITED

SARL's WORKED ALL ZS AWARDS PROGRAMME

NARC PIC COURSE DATE CHANGE

HOW SEVERE CAN THE EFFECT OF RFI BE?

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

NOMINATIONS FOR RADIO AMATEUR OF THE YEAR AWARDS INVITED

The South African Amateur Radio Development Trust is inviting nominations for the Nokia Siemens Networks (NSN)Radio Amateur of the Year and Community Service Awards. The three award categories are:

GARTH MILNE TECHNICAL INNOVATION AWARD

The award is made for the support, development and application of Technological Innovation in Amateur Radio in South Africa. The recipient will be a person who has promoted the use of technology in amateur radio at club level, nationally, at schools or tertiary education institutions.

NSN RADIO AMATEUR OF THE YEAR AWARD

The award is made for the support and development of the Amateur Radio Service in South Africa, not for individual achievements such as DXCC and other operational awards or contests. The recipient will be a

person who has given of his or her expertise and time to the promotion of Amateur Radio in South Africa.

NSN AMATEUR RADIO COMMUNITY SERVICE AWARD

Annually the South African Amateur Radio Development Trust is recognising a radio amateur or a group of radio amateurs for service to the community. Community service can be assistance to a handicapped radio amateur, communications support during a sporting event or a disaster situation like a road accident or a natural disaster like a flood, veld fires, or an earthquake. Nominations are invited for an individual or a group of people like a radio club, or an association.

Full details and nomination forms are available from www.amateurradio.org.za.

SARL's WORKED ALL ZS AWARDS PROGRAMME

Four trophies have recently been awarded to the top achievers in the SARL's Worked All ZS awards programme.

WAZS requires contacts with 100 South African stations. Since 1959, over 300 certificates have been issued to all continents except Asia. Endorsements are provided for single bands or modes and for multiples of 100 call signs.

In 2001, Pretoria Contest Club, ZS6Z, undertook to donate trophies to the first three applicants to reach 500 confirmed call signs. It took almost nine years for the third applicant to make the grade.

The biggest factor in the sudden rise of the popularity of WAZS has been the introduction of SA-QSL, the Web-based electronic QSL system that Richard Seddon, ZS2CLI, built on the SARL Web site. This system has greatly increased both participation and the number of call signs that can be achieved.

In past four years, over 150 WAZS certificates have been issued. This number is more than the number of certificates issued between 1970 and 2006!

The first WAZS-500 was won by Chris R. Burger, ZS6EZ, in 2002.

At the time, the closest contender was Harald Pfeffer, OE6HPD, with more than 400. Unfortunately, Harald has to date not achieved the 500 level.

Jan Botha, ZS4JAN, applied in 2007, with the third applicant being Gerhard Coetzee, ZS3TG, in May 2009.

Jan Botha has continued increasing his score, and passed the 1 000 level in November 2009. Jan has a score of at least double those of any of his peers.

The WAZS-500 trophies are handsome plaques, with an enamel design mounted onto a dark wooden base. The WAZS-1 000 is similar, but much

larger. Its size and design are intended to reflect the magnitude of the achievement.

The plaques have been sponsored by Superb Flight Training, a Pretoria-based flight training school. Their Web site is at pilots.co.za.

NARC PIC COURSE DATE CHANGE
